This ANCAP safety rating applies to:

Make / Model	Mini Cooper Hatch
Year Range	April 2014 – December 2022
Variant(s)*	3 door hatch
Vehicle Type	Small Car

The Mini Cooper was introduced in Australia and New Zealand in 2014. This ANCAP safety rating applies to the 3 door hatch.

Dual frontal, side chest and side head airbags (curtains) are standard. Electronic Brake Distribution (EBD) and Emergency Brake Assist (EBA) are also standard. Autonomous Emergency Braking (AEB), reversing collision avoidance and tyre pressure monitoring are optional. Advanced seat belt reminders are fitted to all seats.

Driver chest and abdomen protection in the side impact test was marginal.

Occupant Protection.

Frontal Offset Test

Each body region is scored out of 4 points

Head / neck:	4.00 points
Chest:	3.31 points
Upper legs:	4.00 points
Lower legs:	3.29 points

The passenger compartment held its shape well in the frontal offset test. Pedal and steering wheel displacements were well controlled. Driver and passenger contact with the airbags was stable. All doors remained closed during the crash.

Side Impact Test

Each body region is scored out of 4 points

Head:	4.00 points
Chest:	2.00 points
Abdomen:	2.35 points
Pelvis:	3.84 points

In the side impact test, forces were transmitted to parts of the dummy which are not representative of a human body, reducing the load on the ribs. Accordingly the maximum penalty of 2 points was applied. This resulted in a chest rating of 'Marginal'. Loads on the abdomen also indicated marginal protection.

Pole Test

Scored out of 2 points

Score:	2.00 points
--------	-------------

The vehicle was eligible for a side pole test because it has side curtain airbags. The vehicle scored the maximum 2 points for head protection in this test.

Whiplash Protection Test

Whiplash protection is assessed to the RCAR Protocol

Geometric test:	Good
Dynamic test:	Good
Overall whiplash rating:	Good

Pedestrian Protection.

Pedestrian Test

Scored out of 36 points

Adult & child head impacts: 18.05 points
 Upper leg impacts: 0.00 points
 Lower leg impacts: 6.00 points

This vehicle scored 24.05 out of 36 points (Acceptable). The bumper provided good protection to pedestrians' legs and scored maximum points. However, the front edge of the bonnet was poor at all test locations and scored no points. The active bonnet was tested in the deployed (raised) position and results were predominantly good or adequate. (Tested by Euro NCAP v7.0)

Score Deductions.

Deductions from frontal offset test scores

Head / neck: No deductions
 Chest: No deductions
 Upper legs: No deductions
 Lower legs: No deductions

Deductions from side impact test score

Chest: -2.00 points (excessive T12 load)

Deductions from pole test score

Head: No deductions

* ANCAP safety ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases, ANCAP considers technical evidence submitted by manufacturers before deciding on extending a rating to additional variants of a model. For further information about the application of ANCAP safety ratings to model variants, see the ANCAP Variant Policy.

^ The Rating Year denotes the year requirements against which a vehicle has been assessed. The Rating Year is determined by ANCAP and may be based on the year in which a new vehicle model is first launched into the Australian and/or New Zealand markets; the year in which the vehicle was tested (if tested by Euro NCAP); or, for vehicles which hold an existing ANCAP safety rating, the year in which the rating was updated (or earlier applicable year).
