Safety Assist.

Speed Assistance System (SAS)

Scored 0 out of 3 points

Speed limit information: Not available in Australasia

Speed assistance (manual): 0 Intelligent speed assistance: 0

Euro NCAP awarded points for a camera-based speed sign recognition system. The Australasian RX does not have this function.

Electronic Stability Control (ESC)

Scored 3.0 out of 3 points

AEB (Interurban)

Scored 2.71 out of 3 points

Autonomous emergency braking: 1.50 out of 1.5 Forward collision warning: 0.96 out of 1.0 Human machine interface: 0.25 out of 0.5

Seat Belt Reminder (SBR)

Scored 3.0 out of 3 points

Lane Support Systems (LSS)

Scored 1.0 out of 1 point

Lane keep assist: Pass

Safety Assist Comments

Australasian models have different AEB performance to the European model tested by Euro NCAP. ANCAP was provided with evidence that the performance of AEB-interurban was still adequate to give a total Safety Assist score needed for 5 stars.

The Australasian AEB-city system does not meet low-speed test requirements and so scored zero for Adult Occupant Protection.

Speed sign recognition is available in Europe but not Australasia.

Approaching a stationary vehicle: 15.94 out of 18 for Forward Collision Warning (FCW)

Approaching a slow moving vehicle: 11 out of 11 for AEB, 11 out of 11 for FCW

Approaching a braking vehicle with short headway: 2 out of 2 for AEB, 2 out of 2 for FCW

Approaching a braking vehicle with long headway: 2 out of 2 for AEB, 2 out of 2 for FCW

[^] The Rating Year denotes the year requirements against which a vehicle has been assessed. The Rating Year is determined by ANCAP and may be based on the year in which a new vehicle model is first launched into the Australian and/or New Zealand markets; the year in which the vehicle was tested (if tested by Euro NCAP); or, for vehicles which hold an existing ANCAP safety rating, the year in which the rating was updated (or earlier applicable year).

^{*} ANCAP safety ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases, ANCAP considers technical evidence submitted by manufacturers before deciding on extending a rating to additional variants of a model. For further information about the application of ANCAP safety ratings to model variants, see the ANCAP Variant Policy.
