#### Model History and Safety Features

The Volvo S60 was introduced in Australia during 2011. This ANCAP rating currently applies to S60 variants with a 5 cylinder diesel engine and front-wheel-drive. Further technical information is being sought about other variants.

Dual front airbags, side airbags and head-protecting side curtains are standard equipment. Antilock brakes (ABS), electronic brakeforce distribution (EBD) and electronic stability control (ESC) are also standard. Intelligent seat belt reminders are fitted to all seats. City Safety - an advanced collision avoidance system - is standard. Several other advanced safety features are available.

Pretensioners are fitted to the front seat belts to reduce slack in the event of a crash. A three point seat belt is fitted to the centre rear seat. This provides better protection than a two point (lap) seat belt.

#### OCCUPANT PROTECTION: 5 Stars

The vehicle scored 15.34 out of 16 in the offset crash test. The passenger compartment held its shape well. There was a slight risk of serious leg injury for the driver and front passenger. There was a slight risk of serious chest injury for the front passenger.

The vehicle scored 16 out of 16 in the side impact crash test and a further two points in the optional pole test.

#### FRONTAL OFFSET CRASH TEST

Body region scores out of 4 points each: Head/neck 4.0 pts, chest 3.96 pts, upper legs 4.0 pts, lower legs 3.38 pts.

The passenger compartment held its shape well in the offset crash test. The brake pedal moved rearwards by 24 mm and upwards 19 mm. The steering wheel hub moved 84mm forward, 28mm downward and 8 mm sideways. The front ("A") pillar moved 1 mm rearwards. All doors remained closed during the crash. After the crash the driver's door could be opened with normal effort.

The airbag cushioned the head of the driver and contact was stable. The passenger's head was cushioned by the airbag. There were no knee hazards.

#### SIDE IMPACT CRASH TEST

Body region scores out of 4 points each: Head 4 pts, chest 4 pts, abdomen 4 pts, pelvis 4 pts.

The vehicle scored the maximum 2 points in the pole test.

#### PEDESTRIAN PROTECTION: Acceptable

The bumper provided good protection in some of the areas tested and marginal in others. In most areas likely to be struck by a child, the bonnet provided good protection against head injuries. In those areas likely to be struck by an adult's head, protection was predominantly poor but good in several of the areas tested.

PEDESTRIAN PROTECTION
