RATING YEAR	2022
VEHICLE TYPE	Medium Car
ENGINE TYPE	Petrol
BUILT FROM	September 2024 - June 2025
ON SALE FROM	AUS: November 2024 - February 2026 NZ: December 2024 - February 2026
SERIES	n/a
AIRBAGS	Dual frontal, side chest, side head, centre, driver knee

The Skoda Octavia was originally rated by ANCAP in 2019. Skoda has since made a number of safety upgrades to the Skoda Octavia and the updated model has been assessed against 2022 rating criteria, with some results from 2019 testing able to be used. This ANCAP safety rating applies to updated Skoda Octavia variants built from September 2024 and on sale from November 2024 in Australia, and December 2024 in New Zealand.

Dual frontal, side chest-protecting, and side head-protecting (curtain) airbags, as well as a driver knee airbag, are standard. A centre airbag which provides added protection to front seat occupants in side impact crashes is also standard.

Autonomous emergency braking (Car-to-Car, Vulnerable Road User, and Junction Assist) as well as a lane support system with lane keep assist (LKA), lane departure warning (LDW) and emergency lane keeping (ELK), are standard on all variants.

ADULT OCCUPANT PROTECTION

89%

33.84 POINTS
OUT OF 38

The passenger compartment of the Skoda Octavia remained stable in the frontal offset (MPDB) test. Dummy readings indicated MARGINAL protection for the driver's chest and ADEQUATE protection for the lower legs, while dummy readings indicated ADEQUATE protection of the lower leg of the front passenger. Protection was GOOD for all other critical body regions for both the driver and front passenger.

The front structure of the Skoda Octavia presented a moderate risk to occupants of an oncoming vehicle in the MPDB test (which evaluates vehicle-to-vehicle compatibility), and a 2.78 point (out of 4.00) penalty was applied.

In the full width frontal test, protection was ADEQUATE for the chest of both the driver and the rear passenger, with GOOD protection of all other critical body areas.

In the side impact test, protection offered to all critical body regions of the driver was GOOD and maximum points were scored in this test.

In the oblique pole test, protection was MARGINAL for the chest of the driver and GOOD for all other critical body regions.

The Skoda Octavia is equipped with a centre airbag to protect against occupant-to-occupant interaction in side impact crashes and it provided GOOD protection for the head of both front seat occupants. Prevention of excursion (movement towards the other side of the vehicle) in the far side impact tests was assessed as GOOD for both the vehicle-to-vehicle impact scenario and the vehicle-to-pole scenario.

A Rescue Sheet, providing information for first responders in the event of a crash is available, and a multi-collision braking system is fitted.

In the frontal offset test, protection of the neck of the 10 year dummy was MARGINAL and chest ADEQUATE, while protection offered to all other critical body areas of both the 6 and 10 year child dummies was GOOD.

In the side impact test, protection of the 6 year dummy was GOOD for all critical body regions. Protection of the chest of the 10 year dummy was POOR, with protection of all other body areas assessed as GOOD.

The Skoda Octavia is fitted with lower ISOFix anchorages on the rear outboard seats and top tether anchorages for all rear seating positions.

Installation of typical child restraints available in Australia and New Zealand showed most child restraints could be accommodated in most rear seating positions, though one of the convertible seats in both forward and in rearward-facing modes, and one of the booster seats, could not be correctly installed in the centre rear position.

* Installation of each child restraint is assessed separately in each position on an Australian vehicle. Installation of multiple restraints has not been assessed and may not be possible.

^ The above list of child restraints has been selected to provide a general indication of the rated vehicle's ability to accommodate various CRS types. ANCAP does not endorse or recommend any one CRS brand or model, nor does it rate the safety of child restraints.

37.11 POINTS
OUT OF 54

The bonnet of the Skoda Octavia provided GOOD or ADEQUATE protection to the head of a struck pedestrian over most of its surface, with MARGINAL and POOR results recorded on the stiff windscreen pillars.

Protection of the pelvis was mixed, with areas of GOOD and POOR performance, while the bumper provided GOOD protection to pedestrians' legs.

The Skoda Octavia is fitted with an autonomous emergency braking (AEB) system is capable of detecting and reacting to pedestrians and cyclists.

Testing of this system showed ADEQUATE performance in forward pedestrian test scenarios. The AEB system does not react to vulnerable road users in turning scenarios. An AEB system in reverse (AEB Backover) is available on vehicles built from December 2024 in Australia and New Zealand, but was not standard on the tested vehicle and hence these tests were not conducted.

In cyclist test scenarios, the AEB system offered ADEQUATE performance.

PEDESTRIAN IMPACT TEST (40 KM/H)

The Skoda Octavia is fitted as standard with a range of safety assist features including an autonomous emergency braking system capable of functioning at highway speeds and a lane support system (LSS) with lane keep assist (LKA) and emergency lane keeping (ELK) functionality.

Tests of the AEB (Car-to-Car) system showed GOOD performance with collisions avoided or mitigated in most test scenarios, including AEB Junction Assist where the test vehicle can autonomously brake to avoid crashes when turning across the path of an oncoming vehicle.

Tests of LSS functionality showed GOOD performance, including in several of the more critical emergency lane keeping test scenarios.

A manually-set speed assistance system is standard equipment. A speed limit information function is not available.

A seatbelt reminder system with occupancy detection is fitted to all seating positions. A driver drowsiness monitoring system (indirect) is fitted as standard.

RATING PUBLISHED	February 2025
RATING UPDATED	n/a

MODEL VARIANTS:

ANCAP safety ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases, ANCAP considers technical evidence submitted by manufacturers before deciding on the extension of a rating to additional variants of a model.

RATING YEAR (DATESTAMP):

The Rating Year denotes the year requirements against which a vehicle has been assessed. The Rating Year is determined by ANCAP and, for vehicles rated from 2018, the Rating Year is the year in which the vehicle was tested.

~ Specifications & availability subject to change. Please check with the vehicle manufacturer for confirmation of vehicle specification.

Not available on vehicles built prior to December 2024.
