OVERVIEW

The Volkswagen Polo was introduced in Australia and New Zealand in February 2018. This ANCAP safety rating applies to all variants.

Dual frontal, side chest-protecting and side head-protecting (curtain) airbags are standard. Autonomous emergency braking (AEB) and a manual-set speed limiter are standard. A lane support system (LSS) is not available.

The passenger compartment remained stable in the frontal offset test. Dummy readings indicated GOOD protection of the head, knees and femurs of the driver and passenger, while driver chest protection was rated ADEQUATE.

In the full-width test, protection was GOOD for all critical body regions of both the driver and rear passenger with the exception of the rear passenger chest which rated ADEQUATE.

In both the side impact and oblique side pole tests, protection of all critical body regions was GOOD and maximum points were scored.

The autonomous emergency braking (AEB City) system showed GOOD performance at the low speeds typical of city driving, with impacts avoided at all test speeds.

Protection provided by the bonnet to the head of a struck pedestrian was mostly GOOD or ADEQUATE with some WEAK and POOR results around the base of the windscreen and along the stiff windscreen pillars. The bumper provided GOOD protection to pedestrians' legs, while protection of the pelvis was mixed.

Performance of the pedestrian-detecting autonomous emergency braking system was GOOD with impacts either avoided or mitigated under all test scenarios.

The Volkswagen Polo has, as standard, a seatbelt reminder system for all front and rear seats, driver-set speed limitation system and an autonomous emergency braking (AEB) system.

Tests of the autonomous emergency braking system at highway speeds showed GOOD performance, with collisions avoided or mitigated under all test scenarios.

A lane support system (LSS) is not available.

MODEL VARIANTS:

ANCAP safety ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases, ANCAP considers technical evidence submitted by manufacturers before deciding on the extension of a rating to additional variants of a model.

RATING YEAR (DATESTAMP):

The Rating Year denotes the year requirements against which a vehicle has been assessed. The Rating Year is determined by ANCAP and, for vehicles rated from 2018, the Rating Year is the year in which the vehicle was tested.
