The Cupra Leon was introduced in New Zealand in July 2021 and Australia from July 2022. The ANCAP safety rating for the Cupra Leon is based on testing of the SEAT Leon conducted in 2020. ANCAP was provided with technical information and additional test data to show that the test results of the SEAT Leon are also applicable to the Cupra Leon. This ANCAP safety rating applies to all Cupra Leon variants, excluding the VZX Extreme Package.

Dual frontal, side chest, side head, and a driver knee airbag are standard. A centre airbag which provides added protection to front seat occupants in side impact crashes is also standard on all rated variants.

Autonomous emergency braking (Car to Car, Vulnerable Road User and Junction Assist) as well as a lane support system with lane keep assist (LKA), lane departure warning (LDW) and emergency lane keeping (ELK), are standard.

| Cupra Leon VZe Sportstourer    | 5 door wagon | 1.5 litre plug-in hybrid | 2WD        | ✓   | -              |
| Cupra Leon VZx Extreme Package | 5 door hatch | 2.0 litre turbo petrol   | 2WD        | ✗   | ✗              |

<sup>^</sup> In order to qualify for the scoring shown, vehicles manufactured for the New Zealand market before 18 July 2022 require software and hardware updates - to be performed by Cupra dealers during routine servicing.

# ADULT OCCUPANT PROTECTION

91%

34.92 POINTS  
OUT OF 38

The passenger compartment of the Cupra Leon remained stable in the frontal offset (MPDB) test. Protection of the driver chest was MARGINAL and lower legs was ADEQUATE, with GOOD protection offered to all other body regions. Protection of the front passenger lower legs was also ADEQUATE while protection was GOOD for all other critical body regions.

The front structure of the Cupra Leon presented a lower risk to occupants of an oncoming vehicle in the MPDB test (which evaluates vehicle-to-vehicle compatibility), and a low 0.86 point penalty was applied.

In the full width frontal test, protection was ADEQUATE for the chest of both the driver and the rear passenger, with GOOD protection of all other critical body areas.

In the side impact test, protection was ADEQUATE for the chest and the pelvis of the driver and GOOD for all other critical body regions.

In the oblique pole test, chest protection for the driver was ADEQUATE. All other critical body regions saw GOOD results.

Prevention of excursion (movement towards the other side of the vehicle) in the far side tests was assessed as ADEQUATE for both the vehicle-to-vehicle impact scenario and the vehicle-to-pole scenario. The centre airbag prevented contact between the heads of front seat occupants in side impacts.

A Rescue Sheet, providing information for first responders in the event of a crash, is available.

88%

43.20 POINTS  
OUT OF 49

In the frontal offset test, protection of the neck of the 10 year dummy was ADEQUATE, while the protection offered to all other critical body regions of both child dummies was GOOD. In the side impact test, protection of all critical body areas was GOOD for both child dummies.

Vehicles in Australia and New Zealand are fitted with lower ISOFix and top tether anchorages on all second row rear outboard seating positions. Only Australian variants are fitted with a top tether anchorage on the centre seating position in the second row.

New Zealand variants of the Cupra Leon are fitted with a lower ISOFix anchorage and top tether anchorage suitable for the installation of forward-facing child restraints to the front passenger seat. Rearward-facing child restraints however must not be installed in the front passenger seating position.

Installation of typical child restraints available in Australia and New Zealand showed most child restraints could be accommodated in most rear seating positions, however, for variants with a top tether in the second row centre seat, one of the selected booster seats could not be correctly installed in the centre rear seating position.

|                          |                   |
|--------------------------|-------------------|
| DYNAMIC TEST (FRONT)     | 15.39 (out of 16) |
| DYNAMIC TEST (SIDE)      | 8.00 (out of 8)   |
| RESTRAINT INSTALLATION   | 11.81 (out of 12) |
| ON-BOARD SAFETY FEATURES | 8.00 (out of 13)  |

**NOTE:** Installation of AS/NZS-approved child restraints in the second row centre seating position is not recommended in New Zealand variants as there is no top tether anchorage.

\* Installation of each child restraint is assessed separately in each position. Installation of multiple restraints has not been assessed and may not be possible.

^ The above list of child restraints has been selected to provide a general indication of the rated vehicle's ability to accommodate various CRS types. ANCAP does not endorse or recommend any one CRS brand or model, nor does it rate the safety of child restraints.

71%

38.49 POINTS  
OUT OF 54

The bonnet of the Cupra Leon provided GOOD or ADEQUATE protection to the head of a struck pedestrian over most of its surface, with some MARGINAL and POOR results recorded along the side of the bonnet and on the stiff windscreen pillars. The bumper provided GOOD protection to pedestrians' legs and protection of the pelvis was also GOOD.

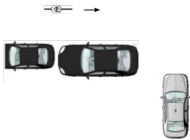

The autonomous emergency braking (AEB) system is capable of detecting and reacting to pedestrians and cyclists. The AEB system offered ADEQUATE performance in tests of its effectiveness in pedestrian test scenarios, with MARGINAL performance recorded in daylight scenarios and GOOD performance in night-time scenarios. In cyclist test scenarios, the AEB system offered ADEQUATE performance. The AEB system does not react to vulnerable road users in reverse, and hence AEB Backover tests were not conducted. The system's overall performance was classified as ADEQUATE.

## PEDESTRIAN IMPACT TEST (40 KM/H)

The Cupra Leon is fitted as standard with a range of safety assist features including autonomous emergency braking (AEB), a lane support system (LSS) with lane keep assist (LKA) and emergency lane keeping (ELK) functionality, and blind spot monitoring (BSM).

Tests of the AEB (Car-to-Car) system showed GOOD performance with collisions avoided or mitigated in most scenarios. Overall, effectiveness of the AEB (Car-to-Car) system performance was rated as GOOD.

Tests of LSS functionality showed GOOD performance in the LKA scenarios, with the system intervening in some of the more critical emergency lane keeping (ELK) test scenarios. Overall performance of the LSS system was classified as GOOD.

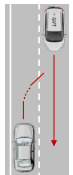

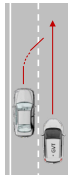

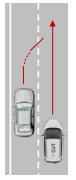

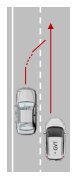

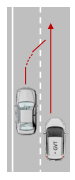

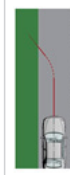

A manually-set speed assistance system is standard equipment. A speed limit information function is not available.

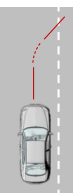

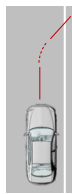

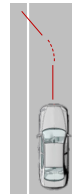

A seatbelt reminder system with occupancy detection is fitted to all seating positions.

#### MODEL VARIANTS:

ANCAP safety ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases, ANCAP considers technical evidence submitted by manufacturers before deciding on the extension of a rating to additional variants of a model.

#### RATING YEAR (DATESTAMP):

The Rating Year denotes the year requirements against which a vehicle has been assessed. The Rating Year is determined by ANCAP and, for vehicles rated from 2018, the Rating Year is the year in which the vehicle was tested.

~ Specifications & availability subject to change. Please check with the vehicle manufacturer for confirmation of vehicle specification.
