RATING YEAR	2022
VEHICLE TYPE	Large SUV
ENGINE TYPE	Battery Electric Vehicle (BEV)
BUILT FROM	December 2021
ON SALE FROM	AUS: February 2022 NZ: April 2022
SERIES	N/A
AIRBAGS	Dual frontal, side chest, side head, centre

The Kia EV6 was introduced in Australia in February 2022 and New Zealand in April 2022. This ANCAP safety rating applies to all variants except the GT which is unrated.

Dual frontal, side chest-protecting and side head-protecting (curtain) airbags are standard. A centre airbag which provides added protection to front seat occupants in side impact crashes is also standard on all variants.

Autonomous emergency braking (Car-to-Car, Vulnerable Road User and Junction Assist) as well as a lane support system with lane keep assist (LKA), lane departure warning (LDW) and emergency lane keeping (ELK), and an advanced speed assistance system (SAS) are standard on all variants.

OUT OF 38

The passenger compartment of the Kia EV6 remained stable in the frontal offset (MPDB) test. Dummy readings for the driver indicated MARGINAL protection for the driver's chest and lower legs. Dummy readings for the front passenger indicated ADEQUATE protection of the lower legs. Protection was GOOD for all other critical body regions for both the driver and front passenger.

The front structure of the Kia EV6 presented a lower risk to occupants of an oncoming vehicle in the MPDB test (which evaluates vehicle-to-vehicle compatibility), and a 0.93 point penalty was applied.

In the full width frontal test, protection of the driver dummy was GOOD for all critical body areas. Protection was ADEQUATE for the chest of the rear passenger. GOOD protection was offered to all other critical body regions for both the driver and rear passenger.

In the side impact test and the oblique pole test, protection offered to all critical body regions was GOOD and the Kia EV6 scored maximum points in these tests.

The Kia EV6 is equipped with a centre airbag to protect against occupant-to-occupant interaction in side impact crashes and it provided GOOD protection for the head of both front seat occupants. Prevention of excursion (movement towards the other side of the vehicle) in the far side impact tests was assessed as ADEQUATE for the vehicle-to-vehicle impact scenario, and MARGINAL in the vehicle-to-pole scenario.

A Rescue Sheet, providing information for first responders in the event of a crash is available, and a multi-collision braking system is fitted.

In the frontal offset test, protection of the 6 year and 10 year dummies was GOOD for all critical body areas.

In the side impact test, protection of the head of the 10 year dummy was MARGINAL, while that of other body areas of both the 6 year and 10 year dummies was GOOD.

The Kia EV6 is fitted with lower ISOFix anchorages on the rear outboard seats and top tether anchorages for all rear seating positions.

Installation of typical child restraints available in Australia and New Zealand showed most child restraints could be accommodated in most rear seating positions, though one of the selected booster seats could not be correctly installed in the centre rear seating position.

* Installation of each child restraint is assessed separately in each position. Installation of multiple restraints has not been assessed and may not be possible.

^ The above list of child restraints has been selected to provide a general indication of the rated vehicle's ability to accommodate various CRS types. ANCAP does not endorse or recommend any one CRS brand or model, nor does it rate the safety of child restraints.

The bonnet of the Kia EV6 provided ADEQUATE to MARGINAL protection to the head of a struck pedestrian over most of its surface, with WEAK and POOR results recorded at the base of the windscreen and on the stiff windscreen pillars. Protection of the pelvis area was ADEQUATE to POOR, while the bumper showed GOOD results for leg impacts.

Testing of the autonomous emergency braking (AEB) system showed ADEQUATE performance in pedestrian test scenarios, with GOOD performance in forward pedestrian tests, however the standard AEB system does not react to vulnerable road users in reverse (AEB Backover) or turning scenarios, and hence these tests were not conducted. In cyclist test scenarios, the AEB system offered GOOD performance. Overall, the system's effectiveness for vulnerable road user protection was rated as GOOD.

The Kia EV6 is fitted with an autonomous emergency braking (AEB) system capable of functioning at highway speeds, a lane support system (LSS) with lane keep assist (LKA) and emergency lane keeping (ELK) functionality, and blind spot monitoring (BSM).

Tests of its AEB (Car-to-Car) system showed GOOD performance, including AEB Junction Assist where the test vehicle can autonomously brake to avoid crashes when turning across the path of an oncoming vehicle or pedestrian.

Tests of LSS functionality showed GOOD performance in lane keep assist scenarios, and ADEQUATE performance in the more critical ELK scenarios, with overall performance classified as GOOD.

A speed assistance system (SAS) is standard on the Kia EV6. This system identifies the local speed limit and allows the driver to set the speed accordingly.

A seatbelt reminder system is fitted to all seating positions with occupancy detection available for the front passenger and rear outboard seating positions.

A driver drowsiness monitor system is fitted as standard.

MODEL VARIANTS:

ANCAP safety ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases, ANCAP considers technical evidence submitted by manufacturers before deciding on the extension of a rating to additional variants of a model.

RATING YEAR (DATESTAMP):

The Rating Year denotes the year requirements against which a vehicle has been assessed. The Rating Year is determined by ANCAP and, for vehicles rated from 2018, the Rating Year is the year in which the vehicle was tested.

~ Specifications & availability subject to change. Please check with the vehicle manufacturer for confirmation of vehicle specification.
