For use in suppressing grasshoppers and Mormon Crickets

Active Ingredient: Nosema locustae Canning* 0.05%
Inert Ingredients: 99.95%
Total: 100.00%

*Contains at least one billion viable spores per 454 grams (1.0 pound)

Net contents: __________ Date Formulated: __________
Lot# __________
PRECAUTIONARY STATEMENTS

FIRST AID
Have the product container or label with you when calling a poison control center or doctor or going for treatment.
You may also contact 1-800-222-1222 for emergency medical treatment information.

Personal Protective Equipment (PPE)
As a general precaution, when exposed to high concentrations of a living microbe product such as this, wear a dust particle mask when applying this product.

Environmental Hazards
Do not apply directly to water. Do not contaminate water when cleaning equipment or disposing of equipment wash waters or rinsate

DIRECTIONS FOR USE
Read all directions before using

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For use on plants grown for other than commercial or research purposes, which may include home fruit and vegetable gardens.

General Information
NOLO BAIT™ is for use in suppressing grasshoppers and Mormon Crickets. It contains a microsporidial pathogen of grasshoppers. NOLO BAIT™ infects the fat bodies of most species of grasshoppers and some crickets. Infection and sickness to the grasshoppers from the insect pathogen begins upon ingestion of the bait by the grasshopper. Grasshopper death will begin in 3-6 weeks. The insect pathogen multiplies in infected grasshoppers and will pass from grasshopper to grasshopper and can remain active for several years.

Use Restriction
Application Procedures: Do not apply product in a manner that would allow it to come into contact with any fruit or vegetables. Strictly follow the Application Instructions outlined below.

Application Instructions
Use NOLO BAIT™ when densities reach eight (8) or more grasshoppers per square yard. Grasshoppers are most effectively suppressed when they are young. For best results, apply NOLO BAIT™ when grasshoppers are ½ to ¾ inch long.

Home and Garden
Apply NOLO BAIT™ to lawn at a minimum rate of five (5) teaspoons per 100 square feet by hand, shaker can or spreader.
Apply NOLO BAIT™ to garden at a minimum rate of five (5) teaspoons per 100 square feet only by any of the following methods:
• Soil-directed applications by hand, shaker can or spreader around and adjacent to all plants.
• Hand, shaker can or spreader applications to garden when no above-ground fruit or vegetables are present (usually preploom).
• Hand, shaker can or spreader applications to garden after fruit or vegetables have been removed.

Apply bait around perimeter of garden areas as a buffer against migrating grasshoppers.

Storage and Disposal
Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE
Store in original container, in a cool, dry location. Optimum storage temperature is 42°F. For best results, use before (13 weeks after formulation).

PESTICIDE DISPOSAL AND CONTAINER HANDLING
Nonrefillable container. Do not reuse or refill this container.

If empty:
Place in trash or offer for recycling, if available.

If partly filled:
Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

WARRANTY
The seller warrants only that the goods shall arrive viable. This warranty is expressly made in lieu of all warranties, express or implied, including the warranties of merchantability and fitness for use. In the event of a breach of the warranty stated herein, buyer shall have as a sole remedy a replacement of the goods sold upon giving proper notice to Seller. To the extent permitted by applicable law, no claim shall be made for damages, nor may any recovery be had for incidental or consequential damages.
