Clothes MOTH TRAPS

Attracts & captures adult webbing clothes moths

Easy Instructions

Safe for use in food-handling and food storage areas.

- Cut open lure packet. Drop one lure from packet directly onto each trap as shown below. To prevent compromising effectiveness, do not touch lures.
- For best results, use 2 traps at a time and place where moths have been seen.
- Replace traps every 3 months or when full of moths. Use until no moths are caught for 6-9 months before discontinuing use.
- In case of skin contact, use vegetable oil to remove

Clothes Moth Facts

Clothes Moths occasionally occur in homes, where the larval stage damages clothing and other personal objects that are made of wool, hair, fur, feathers or other natural fibers. Female moths are especially attracted to oily or soiled fabrics, where they are likely to lay their eggs. The small moths avoid light and are difficult to find and identify. If moths are found in the trap, take immediate measures to control the larvae causing the damage. Use Enoz[®] Moth Balls to kill clothes moths, eggs & larvae in airtight containers & storage closets.

Place 1 Pheromone Lure
(included) in a Trap
