FLEA TRAP FACTS

The flea trap attracts and captures adult fleas. Use it as a part of your complete flea control program for your home and pets. Catching one female flea may prevent 200 or more eggs from being laid. Trapping one female now is like catching 200 fleas later. The flea trap will reduce the number of fleas wherever it is used. Under certain conditions, it will also eliminate fleas. Fleas on your pet are unlikely to leave and go to the trap. Remove fleas from your pet with a flea comb or flea soap. Make sure the flea trap is maintained for best results. Fleas and dust will reduce the stickiness of the pad. Replace the sticky pad every 3 months or sooner, if needed. Replace the light bulb with a 5 watt or less nightlight bulb.

SAFETY FACTORS

1. CAUTION - This product is intended for use indoors only in households. To avoid risk of fire or electrical shock, do not use where it may be exposed to water, including roofed, but open porches.
2. Don't abuse cord - never carry product by cord or yank it to disconnect from receptacle. Keep cord from heat, oil, and sharp edges.
3. Disconnect the product from the power supply when not in use, before servicing, when changing bulbs, cleaning and the like.
4. Do not insert foreign objects into this product. Use extension cords if needed marked SPT-2 18 gauge type or equivalent.
5. Use only extension cords which have plugs and receptacles which accept the product's plug. Replace or repair damaged cords.
6. WARNING: "This is an electrical lamp - not a toy" and "To avoid risk of fire, personal injury and electric shock it should not be placed where small children can reach it."

THE FLEA TRAP

IT REALLY WORKS!

The FLEA TRAP works by catching adult fleas that are looking for a pet to infest. The light, heat and infra-red rays from the light bulb are strong attractants for fleas. The fleas jump on the sticky pad. Each flea caught may prevent 200 more fleas from infesting your home. Use more Traps for severe infestations or fastest relief.

Catches 4 times more fleas than other older-style traps

Independently tested

One Year Warranty

READY TO USE - NO ASSEMBLY REQUIRED

RECOMMENDED LOCATIONS FOR THE FLEA TRAP

1. Place the flea trap at or near places where fleas are present, such as where your pet sleeps, rests, eats and walks.
2. Position your trap so that fleas can see it. Fleas only go to the trap when they can see the light. Locations under furniture are very effective, but skirting around the furniture reduces results.
3. Use several traps for best coverage and superior results. Leave the traps on ALL the time for best effects. The trap is a permanent system which will remove fleas for many years when properly maintained.

INSTRUCTIONS FOR USE

<PEEL THE STICKY -- PLUG IT IN!>

1. Activate the capture pad by pulling the release paper from its front.
2. Remove the protective screen from the trap and place the sticky pad in the base, Sticky Side Up!
3. Replace the protective screen over the sticky pad.
4. Place your flea trap at a "Recommended Location" and plug it into a regular electrical outlet.

In case of contact, the Sticky Glue can be removed from hands with vegetable oil.

CONTENTS: 1 Trap and 1 Sticky Pad
(Sticky Pads last 3-6 months or 10,000 fleas)

SEE YOUR DEALER FOR REPLACEMENT STICKY PADS.
Return damaged traps IMMEDIATELY for warranty repair or replacement!
