Hydroponic Rates

Treatment Intervals and Rates for Initial and Subsequent Applications of RootShield® Granules & RootShield® WP

1. Young Plants (from seeding to recently placed in blocks and up to about 1½ months old)
   • 1\textsuperscript{st} application: 5-6 oz. RootShield WP per 100 gallons.
   • 2\textsuperscript{nd} application: 3-4 oz. RootShield WP per 100 gals every 10-12 weeks.
   OR
   • 1\textsuperscript{ST} application: ½ gram (¼ teaspoon) of RootShield Granules placed under each rockwool block.
   • 2\textsuperscript{nd} application: Use RootShield WP at 3-4 oz. per 100 gals every 10-12 weeks.

2. Established Plants (older than 1½ months old)
   • 1\textsuperscript{st} application: 5-6 oz. RootShield WP per 100 gals.
   • 2\textsuperscript{nd} application: 3-4 oz. RootShield WP 7-10 days later.
   • 3\textsuperscript{rd} application: 3-4 oz. RootShield WP every 10-12 weeks.
