FLEA'n TICK B GONE™

**FAST
ACTING
EASY TO USE**

LOVE ONE ANOTHER

**Gets Rid of Fleas
and Ticks Without
Harmful Pesticides**

16 fl. oz. (474 ml)

DIRECTIONS

For Fleas: Use Flea 'n Tick B Gone™ full strength for heavy infestations. For mild infestations, a 50/50 mixture of Flea 'n Tick B Gone™ and water may be used.

1) Spray a ring of Flea 'n Tick B Gone™ around the neck of your pet to discourage the fleas located on the body from running to areas of the face (ears, eyes, nose and mouth).

2) **BELOW THE NECK:** From the neck down, spray Flea 'n Tick B Gone™ onto the pet until the hair is completely saturated.

3) **ABOVE THE NECK:** Protecting the eyes, carefully apply Flea 'n Tick B Gone™ with sprayer or apply by hand (with fingertips or saturated cloth) and work it into the head and face area. For young animals that tend to lick themselves (Kittens), wrap them in a towel and hold them.

4) After 10 minutes, add a small amount of warm water to the animal's body and work into the fur.

5) Rinse thoroughly with water.

6) Use a strong, fine-tooth comb to remove any remaining fleas.

For Ticks: Always use full strength for ticks. **SPOT TREATMENT:** Spray Flea 'n Tick B Gone™ directly on the tick and wait until it starts backing out of your pet's skin. Remove the tick using a method that will protect you from disease: gloved fingertips, tweezers or any other tick removal equipment. **COMPLETE BODY TREATMENT:** Apply Flea 'n Tick B Gone™ as directed for fleas, but allow it to remain on the pet for at least 30 minutes before lathering, rinsing and combing.

OTHER HELPFUL HINTS: When possible, use washable bedding for your pet. Wash in hot water and dry on high heat at least once a week. Spray bedding lightly with Flea 'n Tick B Gone™. Regularly vacuum pet areas to keep them clean and bug free. Flea 'n Tick B Gone™ is an excellent cleaner for waterproof hard surfaces. Spray and wipe dry pet related areas.

IMPORTANT

Avoid getting into eyes. If eye contact is made, flush thoroughly with cool water. Keep out of reach of children. Use only under adult supervision. For external use only.

Flea 'n Tick B Gone™ is a safe, non-toxic, multi-enzyme product made from natural plant sources. This extra-strength formula has been proven to effectively remove fleas and ticks from a variety of pets... without the use of harmful pesticides. Flea 'n Tick B Gone™ can be used as often as needed to solve flea, tick, lice and other pest problems. Since it contains no harmful pesticides, it is safe to routinely use as a preventative, particularly during the warmer months. It is especially helpful for animals that live in warm climates and/or spend time outdoors in tall grass or wooded environments. Regular use of this non-polluting product can help break the flea's life cycle and may help reduce the risk of infections, itching and dermatitis caused by insect bites. Flea 'n Tick B Gone™ is produced by the makers of Lice B Gone™, the leading lice, nit and scabies treatment used around the world.

FLEA'N TICK B GONE™ INGREDIENTS

Filtered water, a proprietary blend of enzymes derived from natural plant sources.
Made in USA

NOTE: Flea 'n Tick B Gone™ does not contain harmful pesticides or chemicals, such as DEET, pyrethrins, synthetic pyrethroids or permethrin, all of which can be asthma triggers and harmful and irritating to your pet, the person applying them and our environment.
