

OLIVIA'S CLONING GEL®

- A professional strength, easy and ready to use propagation gel. *Just Cut, Dip and Grow!*
- Stimulates root development for all types of plants; can be used for all stem, leaf, softwood, semi-hard and some hardwood cuttings.
- Seals cutting and reduces transplant shock.
- Easier and safer to use than powders or liquids.
- For the professional grower or home hobbyist.

DIRECTIONS: No mixing required. Ready to use. Stir before use to create a smooth consistency. Dip your cuttings in the Gel to the desired rooting depth. Coat entire stem area that is going to be below the soil or medium line. Place in your soil or any growing medium to root. For more details on how to clone/propagate your plants visit our web site. Store bottle in a cool place or your refrigerator. If Gel freezes just thaw, stir and use. Shelf life is approximately 1 year from date of purchase.
