This year the ARBICO Organics family celebrates 40 years of service to our customers. Since 1979, we have been committed to our mission of providing the highest customer service and finest quality of products to encourage sustainable and organic practices to our community. We look forward with gratitude to the opportunity to continue to grow with you in the future.
In 1979, Rick and Sheri Frey hosted friends who shared their latest discovery – insects that parasitize flies! Rick was captivated and ARBICO Organics was born. Rick began to grow Fly Eliminators in a carport closet then upgraded to an airstream trailer. Sheri had a passion for the environment and teamed up with him promoting their philosophy of “bio-balance”.

In 1984, ARBICO expanded to a 10 acre facility, nestled in the Catalina Mountains north of Tucson, AZ. Here the company grew to include an insectary, a shipping department to mail bugs around the country and a sales and marketing team! Each year brought on more products and more team members to help promote environmentally friendly options for homes, gardens, barns and farms.
After 40 years, we continue to challenge ourselves to grow the best insects we can and to deliver those insects and additional organic farm & garden supplies to our customers. What started with one insect has grown to include so much more and we continue to thank the support of our customers and our community of family, friends and coworkers who have made this all possible!

Throughout the 1990’s and 2000’s our customers and their needs diversified and we have added over 20 different kinds of insects and thousands of other products to our offerings to support pesticide-free solutions.

In 2011, the company grew once again and ARBICO attained another location in Oro Valley, AZ that includes a retail location where locals can shop for their favorite products!
Introduction to Beneficials Kit

This “One-Of-A-Kind” Kit Provides An Array Of Products To Prevent, Monitor, Trap & Control Pests While Educating, Enhancing & Promoting Beneficial Insects.

TARGET: Growers who want a start to finish comprehensive solution to pests.

DESCRIPTION: This kit is designed to help you learn more about the good and bad insects that are found in your garden. In addition, it contains the building blocks that will help you attract and keep beneficial insects in your garden:

- Aphid/Whitefly Yellow Sticky Traps - 4” x 7” - 5 pack
- Thrips/Leafminer Blue Sticky Traps - 4” x 7” - 5 pack
- PredaLure - 2 pack
- Good Bug Power Meal - 1/2 lb.
- Good Bug Blend, Seeds for Beneficial Insect Habitats - 1/2 lb.
- Green Lacewing (Chrysoperla rufilabris) - 1,000 Eggs
- Garden Insects of North America book by Whitney Cranshaw

SUGGESTED USE: Use the elements of this kit to begin learning about integrated pest management.

1000000 Introduction To Beneficials Kit $52.00

Cannot be shipped to the following states: HI, PR

SAVE OVER $15.00

Predalure™

Attract Ladybugs, Green Lacewings & Many Other Beneficial Insects Into Your Garden With Predalure.

TARGET: Attract predatory beneficial insects such as green lacewings, ladybugs, etc.

DESCRIPTION: This lure uses a special combination of pheromones and botanicals to attract and keep desirable beneficial predators in your garden.

SUGGESTED USE: Hang one at crop height in your garden or in a tree. Lures last approximately one month.

1231319 Predalure - 2 Pack Lures $9.25
1231322 Predalure - 10 Lures $43.00
1231321 Predalure - 25 Lures $90.00

ARBICO Organics™ Good Bug Blend

Flowering Beneficial Insect Habitat – Good for People, Too!

TARGET: Help keep your beneficial insects from flying away.

DESCRIPTION: Provide beneficial insects with a source of pollen and nectar year-round in order to feed and reproduce. ARBICO’s Good Bug Blend is a combination of yellow, red, crimson, rose, white clovers, grizzly alfalfa, white alyssum, nasturtium, white yarrow, carrot, dill, daikon and celery seeds.

SUGGESTED USE: 1 lb./2,000 sq. ft. or 20 lbs./acre. The first blooms will appear within 45-90 days.

1134000 Good Bug Blend - 1/2 lb. Bag $5.95
1134001 Good Bug Blend - 1 lb. Bag $9.75
1134002 Good Bug Blend - 10 lb. Bag $67.95
1134003 Good Bug Blend - 50 lb. Bag $289.00

ARBICO Organics™ Good Bug Power Meal

Beneficial Insect Attractant & Food.

TARGET: Attract and sustain beneficial insects and butterflies.

DESCRIPTION: Attract and keep beneficial insects in your garden with this balanced food supplement that is composed of proteins, fats, fibers, ash, calcium, phosphorus, sodium, amino acids, vitamins, lactose and sucrose.

SUGGESTED USE: Dry or wet application can be made. For dry applications you can directly dust your plants. For wet applications, mix 4 oz. /1 gal. of water to treat 3,000 sq. ft. using a garden sprayer. For 1/2 acre, mix 1/2 lb. in 5-10 gal. of water. This product can also be applied as a paste or slurry. Simply add water until desired consistency is reached and use a clean foam or bristle paintbrush to apply to plants. As a nectar source, mix 1 oz. with 1 qt. of water and place in butterfly feeders.

1133001 Good Bug Power Meal - 1/2 lb. Bag $6.50
1133002 Good Bug Power Meal - 1 lb. Bag $11.50

Monterey Lady Bug Attractant

Attract Beautiful & Beneficial Ladybugs!

TARGET: Gardens lacking beneficials, with mild to moderate pest infestations.

DESCRIPTION: This specialized product contains pheromones that will send out signals to and attract garden friendly ladybugs! Contains 3 ready-to-use lures!

SUGGESTED USE: Place in orchards, gardens, greenhouses and nurseries during growing seasons. Wear gloves to avoid touching the lure. Hang where pest infestations are present and replace lure every 2-3 weeks.

1281605 Lady Bug Attractant - 3 Lures Per Pack $11.50
**Natupol Bumblebee Hives**

Put These Portable Hives Where You Need Them Most To Greatly Improve Pollination.

**TARGET:** For use indoors in greenhouses and hoophouses and outdoors in fields, gardens & orchards.

**DESCRIPTION:** By introducing gentle bumblebees to your crops, you can improve fruit quality, increase productivity, save labor costs by reducing hand pollination and provide pollination that is independent of weather conditions. These hives house the *Bombus impatiens* species of bumblebees and contain a colony with a queen, workers and brood (pupae, eggs and larvae). The Natupol Excel and Natupol Excel Startup hives replace the now-discontinued Natupol Class-A, Class-B & Class-C hives. These new hives have carefully considered innovations in design that keep the bees comfortable inside their hives and make it easier for them to enter and exit. Both have been also developed for use under artificial light and in warmer conditions to serve crops with large numbers of flowers per sq. ft.

**SUGGESTED USE:**

**Natupol Excel:** Replaces the Natupol Class-A & Class-C hives. An ideal choice for greenhouses that operate consistently; especially so if they are at the beginning of the planting cycle before full bloom. Also excellent for consistently growing hydroponic operations. This hive may take longer to reach its maximum efficiency level than the Natupol Excel Startup, but will retain optimum performance over the course of time. Covers 1,000-15,000 sq. ft. and last for about 9 weeks.

**Natupol Excel Startup:** Replaces Natupol Class-B hives. This larger size colony will provide intense pollination from day 1 and reach maximum efficiency rapidly, great for those crops that need heavy pollination in a short period of time. A wonderful choice for greenhouses that are near to or in full bloom and need thorough pollination immediately. Covers 1,000-15,000 sq. ft. and last for about 9 weeks.

Shipment to California require that a permit application be filled out & sent to the California Department of Food & Agriculture. Please call if more information is needed.

---

**Honey Bee Magnet**

When Placed Where Blooms Are Starting, The Honey Bee Magnet Will Increase The Number Of Pollinators That Come To Your Area.

**TARGET:** Honey Bees.

**DESCRIPTION:** The Honey Bee Magnet attracts both honey bees and mason bees with non-toxic natural attractants — fruit volatiles that researchers identified as pheromone lures for bees. When placed where blooms are starting, the Honey Bee Magnet will increase the number of pollinators that come to your area. If you want increased pollination — which means increased fruit, berry and vegetable production — just hang one lure per large fruit tree or one lure per 200 sq. ft. in your garden or field at the start of bloom. The Honey Bee Magnet will last for 2 weeks.

**SUGGESTED USE:** This simple lure has several advantages over a liquid spray:

- No mess or cleanup
- No need to reapply if bloom lasts 2 weeks or less
- No need to reapply if it rains after 1-3 days

**Heterorhabditis indica**

Protect Your Hives From Small Hive Beetle.

**TARGET:** Small Hive Beetles (*Aethina tumida*).

**DESCRIPTION:** Now, more than ever, it is important to protect our bees and other pollinators. Using Beneficial Nematodes to control hive beetles is cost effective and eco-friendly.

*H. indica* is a heat tolerant, entomopathogenic nematode that attacks pre-pupal stages of small hive beetle in the soil. By suspending the nematodes in water and applying to the soil below and around the hive, the nematodes quickly seek out the pupal stage and attack, typically entering the pest and killing it within 24-48 hours. *H. indica* are a virulent and aggressive species of nematodes and work best when the strength of the hive is maintained.

**SUGGESTED USE:** Remove bag from outer package and fill with water. Once filled, agitate the gel and strain over pint sized container. Once over the container, pour another half pint of water over gel to ensure all nematodes strain out. Take pint of liquid and mix into 5 gallons of water, agitate and apply to infected area. Irrigate after treatment. Use 5 million for every 10 hives.

**GENERALISTS**

### Green Lacewings - *Chrysoperla rufilabris, Chrysoperla sp.*

**Referred To As “Aphid-Lions,” These Generalists Have Amazing Dispersal Abilities!**

**TARGET:** Aphids, mealybugs, spider mites, leafhopper nymphs, moth eggs, scale thrips, whiteflies and more.

**DESCRIPTION:** Green lacewings are available in all three life stages: egg, larva and adult. Green lacewing larvae paralyze their prey with venom and then draw out the body fluids of the pest into their large hollow jaws. Each lacewing larva will devour 200 or more pests or pest eggs a week during their two to three week developmental period.

**Temperature:** Minimum: 60°F  Best: 75-90°F  **Relative Humidity:** 30-50%  **Release Rate:** Every 7-10 days

  - **1110007** ≈500 Adults  **$170.00**
  - **1110010** ≈1,000 Larvae in Bottle  **$24.00**

**SUGGESTED USE (Depending upon level of infestation):**

- **Gardens & Greenhouses**
  - Eggs: ≈1k-2k Eggs/1,000 sq. ft.
  - Larvae: ≈2-4/sq. ft.
  - Farms: ≈2,000-40,000/Acre

- **Farms**
  - Adults: ≈1,000-2,000/Acre

**Minute Pirate Bug - *Orius insidiosus***

**Excellent General Predator In Field Crops & Greenhouses.**

**TARGET:** Thrips, whiteflies, spider mites, aphids, psyllids, small caterpillars, insect eggs and others.

**DESCRIPTION:** Minute Pirate Bugs (*Orius* spp.) also known as flower bugs, are one of the most common general predators in field crops. Their diet consists of a variety of small pests. They are also known to attack adult thrips.

**SUGGESTED USE (Depending upon level of infestation):**

- For maintenance, release 1 to 2 *Orius* per plant in greenhouses or 1 to 4 *Orius* per plant in hot spot areas outdoors.
- When treating a serious whitefly, aphid, thrips or other pest infestation, we recommend releasing up to 500 *Orius* per 250 sq. ft. area. For field crops, we recommend releasing between 100 and 2,000 *Orius* per acre, depending on the level of infestation.

**Temperature:** 64-82°F  **Relative Humidity:** Moderate ≈60%

**LADYBUGS - *Hippodamia convergens***

**Ladybugs Consume A Vast Quantity Of Soft-Bodied Insects.**

**TARGET:** Aphids, chinch bugs, asparagus beetle larvae, thrips, alfalfa weevil larvae, bean thrips, grape root worm, Colorado potato beetle larvae, whiteflies, mites and many other soft-bodied insects and eggs.

**DESCRIPTION:** One of the most common of all beneficial insects, ladybugs are shipped to you in the adult stage. Each adult consumes about 5,000 aphids. The number of ladybugs per shipment is approximate.

**SUGGESTED USE (Depending upon level of infestation):** Ship as adults. Release prior to or at the onset of infestation. Use more or less depending on your level of infestation and crop.

**Temperature:** Moderate: 62-88ºF  **Relative Humidity:** Minimum 40%

Cannot be shipped to the following states: HI, PR, VI, GU, AS, PW

---

*LADYBUGS Require OVERNIGHT Shipping*

*FREE SHIPPING in the contiguous 48 United States. Quantities of 1,000-25,000 eggs ship via USPS Priority only. Quantities of 50,000-250,000 ship via FedEx 2nd Day Air only. Expedited shipping available for an additional fee.

**FREE SHIPPING** does not apply to Green Lacewing Adults, Green Lacewing Larval Frames and Green Lacewing Larvae in Bottle.

Cannot be shipped to the following states: HI, PR, VI, GU, AS, PW
**Praying Mantids - *Tenodera aridifolia***

Don’t Be Fooled, Their “Praying” Front Legs Are Actually Designed To Grasp Prey!

**Target:** Aphids, leafhoppers, mosquitoes, caterpillars and other soft-bodied insects when young. Adults will eat beetles, grasshoppers, crickets and other pest insects.

**Description:** Shipped in their egg cases, each egg contains ≈200 baby mantids. Mantids can be used in conjunction with other beneficials. Beware, they will eat other beneficials if pests are not available.

**Suggested Use (Depending upon level of infestation):** Begin releases during early Spring. Attach egg cases to branches of shrubs, trees or other plants at a notch between the trunk or stem and offshoot branch. Egg cases can also be attached with wire or twist ties. Do not place on the ground as they are easy prey for ants. Mantids can also be hatched inside a paper bag when kept in a warm place. Upon hatching, release immediately to avoid cannibalism.

**Temperature:** Moderate: 70-90°F  
**Relative Humidity:** Low-High ≈40-95%

**Ships US Mail**

Cannot be shipped to the following states: HI, PR, VI, GU, AS, PW

**Assassin Bug - *Zelus renardii***

These Voracious Ambush Predators Will Stay In Your Garden & Devour A Wide Variety Of Pest Insects!

**TARGET:** Leafhoppers, aphids, early instar caterpillars, flies, mites in conjunction with mite predators, and most other pests.

**Description:** These hardworking ambush predators are an excellent addition to any growing area, large or small. Feasting on a variety of pests, assassin bugs stay put in order to knock out an infestation. With an approximate two-month lifespan, these generalist predators will live, eat and reproduce in the area of release. *Zelus* start eating immediately after hatching, and by the second instar they produce a resin on their legs, which turns them into a walking sticky trap. Once captured, their prey is pierced with their rostrum and a digestive enzyme is injected into the prey and the insect is quickly killed. This method of predation allows for *Zelus* to take out prey much larger than themselves. These generalist predators are voracious and can be used efficiently in gardens, fields, orchards and greenhouses.

**Suggested Use (Depending upon level of infestation):** Use ≈250/5,000 sq. ft. or ≈1,000-4,000/acre.  
**Temperature:** 70-77°F  
**Relative Humidity:** Low-High ≈60-80%

**Overnight Shipping Required**

Cannot be shipped to the following states: HI, PR, VI, GU, AS, PW

**Aphid Parasite - *Aphelinus abdominalis***

These Ravenous Predators Will Eat & Parasitize Aphid Nymphs!

**TARGET:** Aphids, including potato (*Macrosiphum euphorbiae*), foxglove (*Aulacorthum solani*), green peach (*Myzus persicae*), California laurel (*Euraphis郇eburnulatiae*), cotton (*Aphis gossypii*), melon (*Aphis gossypii*), bird cherry-oat (*Rhopalosiphum padi*), cereal (*Sitobian avenae*), and alfalfa aphids (*Acrthysophion pisum*).

**Description:** Not great fliers, these parasitic wasps nevertheless can hunt down and destroy large numbers of aphids. These predators will not only lay their eggs in aphid nymphs, they will eat those that they don’t parasitize. This secondary method of killing has a powerful effect on the aphid population and provides females with additional protein to develop more eggs. As the larvae matures inside the nymph, they feed on it, turning it into a mummy. The parasites are shipped in this stage; simply place them where the infestation is. The mature adult will chew a hole in the back of the mummy and emerge. This species is better able to handle high temperatures than the *Aphidius* species.

**Suggested Use (Depending upon level of infestation):** Apply before the onset of infestation. Use ≈250/5,000 sq. ft. or ≈1,000-4,000/acre.  
**Temperature:** 70-77°F  
**Relative Humidity:** Low-High ≈60-80%

**Overnight Shipping Required**

Cannot be shipped to the following states: HI, PR, VI, GU, AS, PW

**Aphid Parasite - *Aphidius colemani***

Exceptional In Greenhouses Producing Vegetables & Ornamentals.

**TARGET:** Aphids, especially melon and cotton aphids (*Aphis gossypii*).

**Description:** These tiny (1/8”) parasitic wasps specifically target aphids to provide food and a place to oviposit. The adults respond to alarm signals from plants to locate the aphids and, once there, they feed on the honeydew produced by the aphids. The females will then lay their eggs inside aphid nymphs. The larvae will hatch and devour the aphid from inside, turning it into a mummy. The parasites are shipped to you in this stage; simply place them where the infestation is. Once mature, the adult wasp will chew its way out of the mummy and begin hunting aphids.

**Suggested Use (Depending upon level of infestation):** Apply to existing infestations weekly, until pests subside. Use ≈1-8/1 sq. yd. or ≈500-3,000/acre.  
**Temperature:** 70-77°F  
**Relative Humidity:** High ≈80%

**Overnight Shipping Required**

Cannot be shipped to the following states: HI, PR, VI, GU, AS, PW

**Call 1-800-827-2847 or Order Online www.arbico-organics.com**
Aphid Parasite - *Aphidius ervi*

This Non-Stinging Parasitic Wasp Attacks Larger Aphid Species.

**TARGET:** Aphids, especially potato (*Macrosiphum euphorbiae*), glasshouse potato (*Aulacorthum solani*), green peach (*Myzus persicae*), foxglove (*Aulacorthum solani*) and pea aphids (*Acyrthosiphon pisum*). Also attacks greenbug/wheat (*Shizaphis gramiminum*), yellow rose (*Rhodobium solani*) and pea aphids (*Acyrthosiphon pisum*).

**DESCRIPTION:** These mini-wasps (1/8”) are vigorous fliers and will aggressively seek out aphid populations, no matter how small. Once they find the aphids, they feed on the honeydew produced by the aphids and lay their eggs inside the aphid nymphs. As the larvae feed on the nymphs from the inside, the nymph turns into a mummy. The parasites are shipped to you this stage; simply place them where the infestation is. Once mature, the adult wasp will chew its way out of the mummy and begin its own search for aphids.

**SUGGESTED USE** (Depending upon level of infestation): Apply to existing infestations weekly, until pests subside. Use ≈1-3/10 sq. ft. or 1-8/sq. yd.

- **Temperature:** 64-75ºF
- **Relative Humidity:** Moderate ≈70%
- **1001001** =250 Mummies $80.00

**Cannot be shipped to the following states:** HI, PR, VI, GU, AS, PW

Aphid Predator - *Aphidoletes aphidimyza*

This Aphid Predator Attacks & Feeds On Over 60 Different Species Of Aphids.

**TARGET:** Over 60 different aphids, including green peach aphids (*Myzus persicae*) and hemlock woolly adelgid (*Adelges tsugae*).

**DESCRIPTION:** Predacious to aphids, these insects will inject a paralyzing toxin into pest's legs and feed on aphid body contents, causing eventual death.

**SUGGESTED USE** (Depending upon level of infestation): Apply to existing infestations weekly, until pests subside. Use =1-3/10 sq. ft., =2-3/10 sq. ft. or =4,500/acre.

- **Temperature:** Warm 64-77ºF
- **Relative Humidity:** Moderate ≈70%
- **1101001** =1,000 Pupae $80.00
- **1101003** =3,000 Pupae $207.00
- **1101002** 4 x 250 Pupae in Blister Packs $60.00

**Cannot be shipped to the following states:** HI, PR, VI, GU, AS, PW

Whitefly Parasite - *Eretmocerus eremicus*

**SPECIALISTS - WHITEFLY CONTROL**

*Better Adapted To Higher Temperatures, Including Temperatures That Fluctuate Day & Night! Good For Desert Climates.*

**TARGET:** Greenhouse whiteflies (*Trialeurodes vaporarium*), sweet potato whiteflies (*Bemisia tabaci*), silverleaf whiteflies (*Bemisia argentifolii*), and banded-winged whiteflies (*T. abutiloneus*) and others.

**DESCRIPTION:** The whitefly parasite (parasitoid) is a tiny wasp that host feeds and parasitizes the scale (nymphs) of whiteflies. The time from egg laying to adult emergence is approximately 22 days. Can be used with Green Lacewings.

**SUGGESTED USE** (Depending upon level of infestation): For prevention: use 1,000/10,000 sq. ft. Light infestations: 1,000/1,000 sq. ft. Heavy infestations: use 5,000/1,000 sq. ft. Hang squares with parasitized pupae on plant foliage at first sign of infestation. Order weekly for approximately 2-6 weeks until control is achieved. Call to set up your customized weekly program.

- **Temperature:** Moderate 62-82ºF
- **Relative Humidity:** Minimum 40%
- **1000703** 20 Blister Packs (=250 Pupa Per Pack) $94.95

**Cannot be shipped to the following states:** HI, PR, VI, GU, AS, PW

Whitefly Parasite - *Encarsia formosa*

**SPECIALISTS - WHITEFLY CONTROL**

*The Whitefly Parasite - Encarsia formosa*

**SUGGESTED USE** (Depending upon level of infestation): For prevention: Use 500-1,000/15,000 sq. ft. Light infestations: (less than 1 adult whitefly per 50-100 plants) Use 1,000-2,000/5,000-10,000 sq. ft. for minimum of 3 weeks or until control is achieved. Heavy infestations: Use 3,000/3,500 sq. ft. for a minimum of 3 weeks or until control is achieved. Hang squares with parasitized pupae on plant foliage at first sign of infestation. Order weekly for approximately 2-6 weeks until control is achieved. Please call to set up your customized weekly program.

- **Temperature:** Moderate 76-85ºF
- **Relative Humidity:** Moderate =50-70%
- **1132001** =1,000 Count $32.50

**Cannot be shipped to the following states:** HI, PR, VI, GU, AS, PW
### Whitefly Parasite - Delphastus catalinae

**These Tiny Brown Beetles Consume Several Hundred Pests Daily!**

**TARGET:** Aphids, scale, thrips, and especially greenhouse and outdoor sweet potato whiteflies and other soft-bodied insect pests.

**DESCRIPTION:** Females lay 3-4 eggs daily and adults live for approximately one month. Adult beetles capture prey with their mandibles, inject paralyzing venom & feed on pest body fluids. Shipped as adults, they should be used at the first signs of infestation.

**SUGGESTED USE** (Depending upon level of infestation): Upon arrival, release at sundown. May be stored at temperatures between 50-60°F for 1-2 days. Can be combined with other whitefly parasites.

**Temperature:** Moderate 65-90°F  **Relative Humidity:** High ~70% & Higher

### BENEFICIAL MITES

#### Mite Predator - Neoseiulus (=Amblyseius) californicus

**Good For Areas Where Temperatures Fluctuate Greatly Such As Deserts.**

**TARGET:** Various spider mites, cyclamen mites, broad mites and russet mites.

**DESCRIPTION:** This tiny, ivory, pear-shaped predatory mite feeds on a variety of pests on crops including: cucumbers, tomatoes, strawberries, tropical foliage plants, and greenhouse roses. Although adults consume prey at a relatively slow rate of about one egg per day, they can survive longer under starvation conditions. During their lifetime of about 20 days, females will lay approx. 1-3 eggs per day. Eggs hatch within a few days and adulthood is reached in about 4-12 days.

**SUGGESTED USE** (Depending upon level of infestation): Use ≈1,000 per 4,500 sq. ft. in greenhouses to treat for broad mite. Use ≈10,000 per acre to treat for cyclamen mites on strawberries. Use weekly until infestation subsides.

**Temperature:** Warm 50-105°F  **Relative Humidity:** 40-80%

### Spider Mite Destroyer - Feltiella acarisuga

**We Recommend This Predator When Spider Mite Infestations Are Widespread & Severe.**

**TARGET:** Two spotted spider mites, carmine spider mites, European red mites; various mites.

**DESCRIPTION:** The entire life cycle is about 15 days. Adults are about 2 mm long, pinkish-brown, and have long legs. Adults do not prey on spider mites, but drink water and nectar. The female adult gall-midges actively search for spider mite colonies and deposit eggs next to them for about 5 days. Eggs laid are .1 x .25 mm in size and are shiny and translucent. They hatch in 2 days. The larvae that hatch from the eggs are .2-2 mm in length and are orange-brown. They feed on all stages of the spider mite for 4-6 days, depending on the temperature, humidity and abundance of spider mites. Larvae pupate inside a white cocoon, usually on the underside of leaves along the veins. It takes 4-6 days to produce an adult.

**SUGGESTED USE** (Depending upon level of infestation): For light infestations, introduce 10/1,000 sq. ft or 400/acre every 7 days, for at least 3 weeks. For heavy infestations, introduce 25/1,000 sq. ft or 1,000/acre every 7 days, for at least 3 weeks.

**Temperature:** Moderate 60-77°F  **Relative Humidity:** High 50-90%

### Mite Predator - Mesoseiulus longipes

**Originating In South Africa, This Predatory Mite Is Known For Its Quick Hunting Skills In Warmer & Very Dry Conditions.**

**TARGET:** Spider mites, two spotted spider mites; various mites.

**DESCRIPTION:** An excellent choice for dry, western states. The female mite predator will lay approx. 50 eggs during a lifespan of approx. 13-40 days. Consumption of pests is dependent upon temperatures and infestation conditions. Use in greenhouses and with taller plants growing under warm lights.

**SUGGESTED USE** (Depending upon level of infestation): Use in warm/dry greenhouses and in low pest population; lasts longer than most mite predators. Use weekly and apply 3-5 times. For indoor use: ≈1,000 per 300 sq. ft. For outdoor use: ≈5,000 per acre.

**Temperature:** 65-90°F  **Relative Humidity:** 40-60%

Mite Predator - Neoseiulus (=Amblyseius) fallacis
An Excellent Mite Predator For Control Of Many Different Types Of Mites.

Image Citation: Photo by Dr. Art Agnello, Cornell University

TARGET: Two spotted spider mites, broad mites, cyclamen mites, hemp russet mites; various mites.

DESCRIPTION: This predatory mite effectively suppresses cyclamen mites in strawberry fields, broad mites in greenhouse crops, European red mites and two-spotted spider mites in orchards, spider mites on roses and vegetable crops in greenhouses and general mite problems on mint and hops in northern climates. Eggs and nymphs are difficult to see as they are small and almost transparent. Adults are pear-shaped and ivory until feeding, when they take on the red or brown coloration of their prey. Adult females consume around 2-16 pest mites per day and lay ≈20-60 eggs during a 14-60 day life-cycle. The transition from egg to adult stage takes about 7-9 days.

SUGGESTED USE (Depending upon level of infestation): Good for cold climates! Use preventatively; over-winters and sustains on pollen. Release at the start and end of the season. Use ≈1,000 per 4,500 sq. ft or 10,000 per acre.

Temperature: Moderate 50-80ºF  Relative Humidity: Minimum 50%

Mite Predator - Galendromus occidentalis
Excellent For Hot & Dry Inland Areas!

Image Citation: Photo by E. Beers, WSU- TFREC

TARGET: Two spotted spider mites, russet mites, eriophyid mites, prunus rust mites, blister mites, European red mites; various mites.

DESCRIPTION: Early stages are white, turning red or brown depending on pest host consumed. Adults feed on about 6 pest eggs or 1-3 pest adults per day. Females lay approx. 20 eggs in a 30 day lifecycle. Eggs hatch in a few days, and development to adulthood takes about 7-14 days. Ideal for use on fruit trees, vegetables, grapes and field crops.

SUGGESTED USE (Depending upon level of infestation): Used indoors and outdoors. For indoor, use ≈1,000 per 500 sq. ft. For outdoor, use ≈2,000-5,000 per acre. Use weekly until infestations subsides.

Temperature: Hot 80-110ºF  Relative Humidity: Low 40%

Mite Predator - Amblyseius andersoni
Great For Pre-Emergent Control Of Pest Mite Infestations!

TARGET: Various pest mites including broad mites (Polyphagotarsonemus latus), cyclamen mites (Phytoseius pallidus), two-spotted spider mites (Tetranychus urticae), red spider mites (Tetranychus cinnabarinus), tomato russet mites (Aculops lycopersici) and rust mites (Eriophyidae).

DESCRIPTION: This predatory mite is less than 1mm long and light brown. Adult females lay about 35 eggs in a lifetime, arranging eggs onto leaf hairs. This predatory mite feeds on all stages of pest mites, thrips, pollen and honeydew.

SUGGESTED USE (Depending upon level of infestation): For best results, apply as a preventative treatment of mite infestations in vegetable crops, strawberries, raspberries, and fruit trees. Sachets allow for controlled release of mites over 4-6 weeks. Apply at a rate of 1-2 mites per sq. ft, or 1 sachet per plant. Place sachets within plant canopy. Use sachets on sticks at 1 per propagation tray, or where canopy cannot hold sachet on hook. Replace sachets every four weeks for continued control. Can be used with Phytoseiulus persimilis and Stethorus punctillum.

Temperature: Moderate 42-100ºF  Relative Humidity: High if in higher temps.

BULK SIZES:
1101323  ≈25,000 in 200 Mini Sachets w/Hooks  $150.00
1101350  ≈25,000 in 200 Mini Sachets on Sticks  $162.00
1101325  ≈62,500 in 250 Sachets  $225.00
1101355  ≈125,000 in 1,000 Mini Sachets on Sticks  $650.00
1101322  ≈125,250 in 6 x 328 ft. Strips of Sachets  $600.00

CONTROLLED RELEASE:
1101327  ≈50,000 in 1 Liter Bottle  $150.00

Mite Predator - *Phytoseiulus persimilis*

**The Mite Predator With The Highest Consumption & Dispersal Rate.**

Image Citation: Photo by David Janzen. All rights reserved to BioBee Sde Eliyahu Ltd.

**TARGET:** Two spotted spider mites and various other mites.

**DESCRIPTION:** These orange and bright red predatory mites have high consumption rates, feeding on approx. 5-20 pests and pest eggs per day! Females will lay about 60 eggs throughout their 50-day lifespan. They will not enter a diapause stage in enclosed or greenhouse settings; making them active year round.

**SUGGESTED USE** (Depending upon level of infestation): For prevention on tomatoes and indoor crops, apply 1-3 mites per sq. ft. Increase to 5 or more mites per sq. ft. for severe infestations. For severe infestations consider using a knockdown prior to release of predatory mites. See online or call for severe infestations or outdoor control.

**Temperature:** Moderate: 68-90°F  
**Relative Humidity:** High: 60-90%

Thrips Predator - *Amblyseius cucumeris*

**These Beneficial Mites Consume Vast Quantities Of Thrips.**

**TARGET:** Prefers greenhouse and western flower thrips. They will also eat spider mites, russet mites and pollen.

**DESCRIPTION:** Tan colored adult females lay about 35 small white eggs throughout their lifespan of about 30 days. During the 7-10 day nymph stage, predation begins. Adults will consume about 1 pest a day. Predators are shipped as adults.

**SUGGESTED USE** (Depending upon level of infestation): For best results, apply before onset of thrips infestation. For prevention, use at a rate of 10-20 mites per sq. ft at weekly intervals. Use continuous release sachets at 1 per 3 sq. ft. for 3-6 weeks. Spot treat with 10-40 mites per sq. ft. weekly until infestation subsides. Monitor with blue sticky traps or ribbon (see pg. 16).

**Temperature:** Moderate: 66-80°F  
**Relative Humidity:** Moderate: 65-72%

Spider Mite Destroyer - *Stethorus punctillum*

**Use These Predators In Addition To Other Predatory Mites When Spider Mite Populations Are Especially High.**

**TARGET:** Two spotted spider mites, European red mites, spruce spider mites, southern red mites; various other mites.

**DESCRIPTION:** Using smell, this tiny ladybug is an effective locator and as an adult will consume more than 40 mites per day. Females lay up to 15 eggs per day. Development to the adult stage takes around 18 days at a temperature of 70°F and the total lifespan of the predator is about 9 weeks. They are known to survive temperatures over 100°F in field crops.

**SUGGESTED USE** (Depending upon level of infestation): Use 100 adults per 300 sq. ft. of infested area. Release adult beetles into mite infested areas and look for signs of reproduction (larvae, pupae, and adults) after four weeks. This predator is more mobile than spider-mite predators (predatory mites) but takes longer to establish, so releases of spider-mite predators should also be made into mite infested areas.

**Temperature:** Moderate 73-77°F  
**Relative Humidity:** High 60%

**SPECIALISTS**

### Thrips & Whitefly Predator - *Amblyseius swirskii*

*For Use On A Variety Of Pest Mites, Thrips & Whiteflies.*

**TARGET:** Western flower thrips, onion thrips, broad mites, hemp russet mites, glasshouse whiteflies, tobacco whiteflies or silverleaf whiteflies.

**DESCRIPTION:** These predacious mites feed on various pest insects in their developing adult stages, pollen and mold. They may consume about 10 thrips or whitfly larvae a day and up to about 20 whitfly eggs per day. They will not undergo diapause, and can be used in protected crops in cooler growing areas.

**SUGGESTED USE** (Depending upon level of infestation): Introduce before the onset of infestation, when temperatures are no lower than 60°F. Apply at a rate of 10 mites per sq. ft every other week as needed, or apply continuous release sachets every 2-4 weeks. Use 1 sachet per plant, or 1 per 3 plants if canopy is touching. Use sachets on sticks during propagation or where canopy cannot support hooks. Not recommended for use on infestations in tomato crops.

**Temperature:** Moderate 77-85°F  
**Relative Humidity:** 70%

**BULK SIZES:**
- 1101312 ≈25,000 in 1 Liter Tube

**Red Scale Parasite - *Aphytis melinus***

*Use These Parasitic Wasps On A Variety Of Armored Scale Pests!*

**TARGET:** California red scales, citrus red scales, oleander scales, San Jose scales, ivy scales, yellow scales and other armored scale varieties.

**DESCRIPTION:** Shipped as adults. Females lay their eggs in host scale. Larvae hatch inside host bodies and consume and kill scale. One adult will parasitize nearly 50 mealybugs. One female will parasitize nearly 50 mealybugs. Each female produces an average of 100 mummies per generation. Remove bottle top, place near infested areas and let wasps emerge on their own. DO NOT use near ants as they will inhibit wasp parasitism & reproduction.

**SUGGESTED USE** (Depending upon level of infestation): Release 1 wasp per 5 sq. ft every two weeks and or field application use about a minimum of 2,000 mummies/acre monthly. Keep at room temperature to ensure emergence. Remove bottle top, place near infested areas and let wasps emerge on their own. DO NOT use near ants as they will inhibit wasp parasitism & reproduction.

**Temperature:** Moderate 65-93°F  
**Relative Humidity:** Moderate ≈40-60%

### Mealybug Parasitoid - *Anagyrus pseudococcii*

*Stop Destructive Mealybugs With This Beneficial Parasitoid.*

*Image Citation: Cenrob Hermosillo, Mexico*

**TARGET:** Citrus mealybugs, grape mealybugs, vine mealybugs, cypress mealybugs, obscure mealybugs, longtail mealybugs and most Planococcus and Pseudococcus spp.

**DESCRIPTION:** These solitary parasitoid wasps of mealybugs are shipped as mummies, hatch within five days of arrival and immediately begin to oviposit. Once the egg is laid inside the mealybug, the larva develops and consumes the mealybug. One female will parasitize nearly 50 mealybugs.

**SUGGESTED USE** (Depending upon level of infestation): Release 1 wasp per 5 sq. ft per 5 sq. ft every other week and or field application use about a minimum of 2,000 mummies/acre monthly. Keep at room temperature to ensure emergence. Remove bottle top, place near infested areas and let wasps emerge on their own. DO NOT use near ants as they will inhibit wasp parasitism & reproduction.

**Mealybug Destroyer - Cryptolaemus montrouzieri**

These Tiny Ladybird Beetles Devour Pest Mealybugs In Both The Larval & Adult Stages.

*Image Citation: Nijel Cruz*

**TARGET:** Mealybugs, aphids, mites, thrips, whiteflies, and other soft-bodied insect pests.

**DESCRIPTION:** Cryptolaemus is a small dark brown ladybug with an orange head and tail (elytra). The larvae are up to 13 mm long and are white with a wax-like covering. The pupae are found around stems, the underside of leaves, greenhouse structures and other sheltered areas. Shipped as adults and most effective in severe infestations.

**SUGGESTED USE** (Depending upon level of infestation): 250-1,000/acre every 2 weeks, 2-3 releases. Use indoors and outdoors. Weekly release programs available. Please call.

**Rove Beetle - Dalotia coriaria (=Atheta coriaria)**

For Indoor Control Of Soil Dwelling Pests!

**TARGET:** Fungus gnats (sciarid flies), thrips and shore flies.

**DESCRIPTION:** “Rove beetles” will feed on small soil-dwelling pest larvae and eggs. Adults are a brown-black color, 3-4 mm long and winged. They are predacious in all stages and develop from egg to adult in about 21 days; passing through three larval instars prior to pupation and adulthood. Adults consume about 150 pest fungus gnat eggs per day. Compatible with *Stratiolaelaps scimitus (=Hypoaspis miles)*. Winged adults have high dispersal and colonization rates and are not recommended for outdoor use.

**SUGGESTED USE** (Depending upon level of infestation): Use season-long, in covered crops such as ornamentals, cucumbers, strawberries and mushrooms. Apply directly to growing medium surface. Apply approx. 1-5 predators per sq. ft. For high infestation, increase application rate and consider pairing with another suitable predator or parasite like *S. scimitus*, beneficial nematodes, or specific mite predators.

**Purple Scale Predator - Rhyzobius (=Lindorus) lophanthae**

Voracious Adults & Larvae Feed On Scale & Other Pests!

**TARGET:** Specializes in purple scale, relatively thin scale covered insects and immature stages of soft scale until honeydew forms. Also predates on mealybug and other small insects.

**DESCRIPTION:** Also known as the Australian Ladybird Beetle. Adults are small, shiny black lady beetles. Their larvae is grey and alligator shaped. Both adults and larvae feed on target pests.

**SUGGESTED USE** (Depending upon level of infestation): Apply about 100/250 sq. ft. for light infestations, 100/100 sq. ft. for heavy infestations, 5 to 10 per heavily infested large plant and 20-40 per tree.

**Fungus Gnat Predator - Stratiolaelaps scimitus (=Hypoaspis miles)**

Stop Destructive Fungus Gnats & Thrips In Their Developing Soil Stages.

**TARGET:** Fungus gnats, western flower thrips, springtails, mold mites, spider mites, cactus root mealybugs, strawberry root weevils and black vine root weevils.

**DESCRIPTION:** This tiny brown mite naturally inhabits the top layer of soil where larvae and pupae dwell. Female predatory mites lay their eggs in soil and the nymphs and adults feed on pests.

**SUGGESTED USE** (Depending upon level of infestation): ≈5,000-10,000 mites treat approximately 1,000 sq. ft. Release ≈25,000-50,000/acre depending on level of infestation. Apply weekly until infestation subsides. Weekly release programs available. Please Call. Trap adult infestations using Blue Sticky Traps. Reinforce with applications of beneficial nematodes.

**PEST INSECT TRAPS**

**ARBICO Organics™ Yellow Insect Traps**

**Monitoring + Trapping = Effective Pest Control**

**TARGET:** Use against aphids, bean beetles, California laurel aphids, flea beetles, fungus gnats, greenhouse whiteflies, leafminers, psyllids, shore flies, silverleaf whiteflies, sweet potato whiteflies and more.

**DESCRIPTION:** ARBICO Organics Yellow Insect Traps are 5” x 7” gridded, 2-sided adhesive traps for a wide range of crawling and flying insect pests. Insects are drawn in by the bright color and are caught on the glue. Once they are trapped, the gridded surface makes it easy to count just how many have landed. Having the insects immobilized on the trap also makes it easy to identify them. There is a very low risk to beneficials, but some may become caught by accident.

**SUGGESTED USE:** For use indoors and outdoors to trap and monitor insect pests. Traps may be hung virtually anywhere, placed on the ground or inserted into included stake. If hung, traps should be slightly above the plant canopy.

- For trapping in the greenhouse or garden, use roughly one trap per 25-50 sq. ft.
- For monitoring, use roughly one trap per acre.

**Sticky Traps**

**Monitor & Trap For Best Pest Identification!**

**DESCRIPTION:** These 4” x 7” traps reverse fold to capture insect pests on both sides and include a twist tie and punched hole for easy hanging. All natural and weatherproof.

**Aphid/Whitefly Yellow Sticky Traps:**

**TARGET:** Whiteflies, aphids, leafhoppers, fungus gnats, spittlebugs, flies and more.

**SUGGESTED USE:** Greenhouses, orchards, row crops, barns and more. Hang or attach to stake approx. every 7 ft. at the end of each row or per tree. Use more for trapping.

**Thrips/Leafminer Blue Sticky Traps:**

**TARGET:** Thrips, leafminers.

**SUGGESTED USE:** Greenhouses, orchards, row crops, barns and more. Hang or attach to stake approximately every 7 ft. at the end of each row or per tree. Use more for trapping.

**BioCare® Gnat Stix**

**An Effective Treatment For A Variety Of Small Pests Infesting Indoor Plants!**

**TARGET:** Fungus gnats, aphids, plant lice & more!

**DESCRIPTION:** Effective for even the worst infestations of fungus gnats. Use one Gnat Stix for each infested plant in adjacent rooms or hallways.

**SUGGESTED USE:** Peel release paper on yellow sticky sheet. Slide stick through the holes in the sticky sheet. Use one sticky strip on each stick. Place in the soil of plants. Avoid leaves coming in contact with sticky paper.

**Stiky™ Strips Yellow Insect Traps**

**These Basic Traps Come With A Handy Wire Hanger.**

**TARGET:** Whiteflies, aphids, fungus gnats, leafminers, thrips, and more.

**DESCRIPTION:** This non-gridded yellow sticky trap is versatile enough to use virtually anywhere you are growing. Many insects find this particular yellow hue irresistible and, with glue on both sides, these traps will grab them coming and going. The adhesive is UV resistant, which keeps it from drying out.

**SUGGESTED USE:** For use in homes, gardens, greenhouses, nurseries and fields. Included wire hangers can also be used as plant stakes.

Olson Garden Guard
Yellow Stiky™ Ribbon

This Ribbon Is Just Right For
Encompassing Small Gardens.

TARGET: Whiteflies, aphids, leafhoppers, thrips and most flying insects.

DESCRIPTION: Made for trapping and monitoring, Olson Garden Guard provides another weapon in the sticky trap war on insect pests. Pre-coated with Stiky Stuff adhesive, this narrow (2” wide) and long (100 ft.) roll is ideal as a perimeter barrier; use two levels of ribbon to form a formidable fence of stickiness. Comes packaged in a heavy duty plastic flange for easy dispensing.

SUGGESTED USE: Drive some stakes (not included) into the ground and wrap the ribbon around them and loop from one stake to another. To create a “fence” around your garden, place one row of ribbon at 1 ft. off the ground and another 2 ft. higher. Adhesive can be removed with vegetable oil, soap and water, and we recommend using vinyl gloves while handling ribbon for additional ease in cleanup.

1259605 Garden Guard Yellow Stiky Ribbon - 2” x 100 ft. $14.25

Yellow Sticky Trap Ribbon
Positively Identify Your Pests!

TARGET: Whiteflies, aphids, leafhoppers, fungus gnats, froghoppers (spittlebugs), flies and more.

DESCRIPTION: This pre-coated yellow strip, 100 feet long and 6 1/4 inches wide, is sticky on both sides in a 6-inch pattern. This trap can reduce or eliminate the use of chemicals.

SUGGESTED USE: The yellow ribbon trap can be used in a greenhouse, placing it close to the upper vents where it will trap incoming insects. It can also be set around the perimeter of a field to trap migrating insects or in the rows between plants. Recommended for foliage crops, grapes, leaf crops or nurseries as well as greenhouses.

1253201 Yellow Sticky Trap Ribbon - 6” wide x 100’ long $29.50
1253202 Yellow Sticky Trap Ribbon - (2 ea.) 6” wide x 100’ long $57.50
1253203 Yellow Sticky Trap Ribbon - (3 ea.) 6” wide x 100’ long $80.25

Yellow Stiky™ Tape
Longer Length Tape To Cover
Even More Area.

TARGET: Whiteflies, aphids, leafhoppers, fungus gnats, froghoppers (spittlebugs), flies and more.

DESCRIPTION: When you have an insect population in a large area that you need to monitor and trap, this sticky tape is the choice for you. It will work well against aphids, thrips, flies, gnats and many others. Pre-coated with adhesive on both sides, this yellow tape is 530’ long and comes in 4 convenient widths (2”, 6”, 10” & 12”), making it perfect for a variety of locations. You’ll also find that the extra thick cardboard flanges and heavy duty plastic plugs make these rolls easy to work with and the product easy to dispense. You can loop these along the perimeter of fields, inside greenhouses, barns, corrals, stalls or any other area where you need insect control. Any unwanted pests or other residue can be removed with vegetable oil or CitraSolv® (available online).

SUGGESTED USE: Loop along the perimeter of fields, inside greenhouses, barns, corrals, stalls or any other area where you need insect control.

1259610 Yellow Stiky Tape - 2” wide x 530’ long $44.00
1259611 Yellow Stiky Tape - 6” wide x 530’ long $90.00
1259612 Yellow Stiky Tape - 10” wide x 530’ long $125.00
1259613 Yellow Stiky Tape - 12” wide x 530’ long $175.00

* Larger quantities available.

Pest Wizard Yellow Sticky Traps
Large Or Small – We’ve Got You Covered
With These Popular Sticky Traps!

TARGET: Thrips, whiteflies, aphids, fruit-nut-maggot flies, stinkbugs, flea beetles, hoppers, yellow-jackets, psyllids, cucumber beetles, olive fruit flies, midges, sharpshooters, true bugs, common nuisance flies and other beetles.

DESCRIPTION: Designed to visually attract insects with this specific and irresistible color, bugs are drawn in and then become hopelessly ensnared by the powerful, yet not messy, glue. These traps are clearly gridded on both sides for easy monitoring. Use the large (5 1/2” x 8”) size when you have a greater area to cover and the mini (3 3/4” x 5”) for those hard-to-control nooks and crannies. Traps can be used alone or with an added attractant. They are especially effective when used with a pheromone lure to target specific pests. Adhesive can be cleaned off with soap and water.

SUGGESTED USE: Traps can be hung from tree branches, in greenhouses, on garden stakes, on lines above vegetable rows, on ornamental shrubs, on fences and on trellises.

1254205 Mini Yellow Sticky Traps - 5 Pack $5.99
1254206 Mini Yellow Sticky Traps - 5 Pack - Bundle of 3 $14.99
1254207 Mini Yellow Sticky Traps - 5 Pack - Bundle of 5 $21.99
1254255 Large Yellow Sticky Traps - 4 Pack $8.99

Call 1-800-827-2847 or Order Online www.arbico-organics.com
Pest Wizard Assorted Sticky Traps

Try This Assortment To Find The Best Sticky Trap For You!

TARGET: Many insect species, including aphids, whiteflies, fruit flies, thrips, hoppers, beetles, psyllids and sharpshooters.

DESCRIPTION: This assortment of UV and weather-resistant rectangular sticky traps offers a variety of sizes and colors to address almost any common garden pest problem or area. This selection contains one each of the Large Yellow (5½” x 8”), medium-sized (3.5” x 8”) Blue/Yellow, smallish Mini Yellow (3.25” x 5”) and small (3” x 5”) Green Traps. These traps can be used alone or with an added attractant (such as an essential oil) or lure. They are especially effective when used with a pheromone lure to target specific pests. Each unique color has been shown to attract specific insects, with some insects being very particular color-wise and others liking all the colors. Each gridded trap is coated with Messyless Adhesive™, which reacts with light in a very specific way to increase your capture rate and to keep insects firmly caught.

SUGGESTED USE: Can be used indoors or outdoors. Hang trap about 1 ft. (31 cm.) above or to the side of host plants. When trap is full of insects and/or debris, dispose in household waste. Trap is biodegradable.

1254230 Assorted Sticky Traps - 4 Pack $7.99

Blue Sticky Strips

Use Blue For Monitoring & Trapping A Wide Range Of Thrips Species!

TARGET: Male and female western flower thrips as well as other species of Frankiniella.

DESCRIPTION: Thrips find this particular tone of blue extremely attractive. For best results, place just above crop canopy and use early in the season before pest populations grow. Monitor regularly and replace after 6 weeks of use or when surface is mostly covered or dirty. Complete instructions included. Traps feature no mess “dry touch” adhesive. Each pack includes 10 - 4” x 9 ½” 2 sided traps and 10 twist ties.

SUGGESTED USE: If used for pest suppression in glasshouses: At least 1 trap per 10 sq. meters, adjusting amount as needed for severity of problem. If used just for monitoring pest populations: Use 1 trap per 100-1000 sq. meters depending on the crop and/or the size of the glasshouse.

1254401 Blue Sticky Traps - 10 Pack $9.00
1254402 Blue Sticky Traps - 10 Pack (Bundle of 5) $43.00

Pest Wizard Blue-Yellow Card Trap

A Trap With Two Special Colors – To Attract Even More Pests!

TARGET: The blue side will attract aphids and thrips. The yellow side attracts whiteflies, hoppers, beetles, fruit flies, psyllids and more!

DESCRIPTION: Blue on one side, yellow on the other. These dual-duty traps will capture an array of pests using specific color wavelengths and MessyLess™ non-toxic adhesive that won’t stick to your fingers. Each pack contains 4 rectangular traps, 8 hangers and instructions. Traps are weather resistant and measure 8” x 3.5”.

SUGGESTED USE: Hang traps on branches in trees and roses. Hang on stakes near vegetable row crops, shrubs and container plants.

• For Monitoring: ≈1 trap/1,000 sq. ft.
• For Trapping: ≈1 trap/20-50 sq. ft.

1254201 Blue & Yellow Card Trap - 4 Pack $8.99
1254202 Blue & Yellow Card Trap - 10 Pack $16.00

Blue Ribbon Sticky Trap

Thrips & Leafminers Love This Pretty Shade Of Blue!

TARGET: Thrips (Thysanoptera), including Western Flower Thrips (Frankiniella occidentalis) and leafminers (Multi spp).

DESCRIPTION: This weather-resistant blue ribbon is 100’L x 6.25”W and made of durable 3-mil plastic. It is coated with a strong adhesive on both sides to catch the pests coming or going. Thrips and leafminers are instinctively drawn to the color of this ribbon, other insects (specifically beneficials) are less interested. Nevertheless, there will be a minimal number of unintended captures.

SUGGESTED USE: For use indoors or outdoors. For best results, use before infestation occurs. Place ribbon just above plant canopy, along and in between crop rows and/or around perimeter of growing area. In greenhouses, place close to upper vents to trap incoming insects. Replace every 6 weeks or when surface is covered with insects and debris.

1254450 Blue Ribbon Sticky Trap - 100’ L x 6” W $30.00
1254455 Blue Ribbon Sticky Trap - 100’ L x 6” W - Case of 20 $370.00
When Will I See Results?

Beneficial Nematodes are considered to be one of the most lethal parasites known to kill plant pests. Depending upon the pest(s) you are treating and the method of application, it can take from 2-30 days for you to see results. It is important to remember that Beneficial Nematodes disintegrate pests from the inside out. You will not see dead insect bodies as you would with a chemical knockdown. Instead you will notice less of the pest(s) over time. Like all insects and organisms, some nematodes will survive the winter in a dormant state; however, we recommend re-applying at least 2-4 times on an annual basis to ensure that your pests do not get out of hand again.

When & How Often Should Beneficial Nematodes Be Applied?

Use nematodes whenever larvae or grubs are present. As pest larvae feed on plant roots beneath the soil surface, severe damage can be done before you realize you have a pest dilemma. If adult insects are present, their eggs, nymphs, larvae and pupa will soon be developing.

**FOR TREATMENT:** Apply nematodes every 2 weeks until pest infestation subsides.

**FOR PREVENTION:** Apply at least 2-4 times per year in the spring, summer, fall and winter as needed.

How Do I Apply Beneficial Nematodes?

Since nematodes are alive and sensitive to light, apply them early in the morning or at dusk. It’s easy to apply nematodes. Before applying, make sure the soil is moist.

1. Simply mix ready-to-use Beneficial Nematodes with water.
2. Apply pre-dawn or at dusk with a hose end sprayer (See Chameleon Sprayer below), backpack sprayer, pump sprayer or watering can. Lightly water again after application.
3. Keep area moist for at least 2 weeks.

Easily Apply Beneficial Nematodes With The Chameleon Adaptable Hose End Sprayer.

**Chameleon Adaptable Hose End Sprayer**

Get Perfect Application With This Highly Adjustable Sprayer.

**DESCRIPTION:** Multipurpose sprayer that works great with Beneficial Nematodes (see pages 18-19). This affordable, easy-to-use, lightweight multipurpose sprayer is perfect for applying your natural biologicals, fertilizers, amendments, insecticides, herbicides & fungicides.

**SUGGESTED USE:** Any garden products requiring dilution and application with a sprayer, including applying Beneficial Nematodes.

1800006 Chameleon Adaptable Hose End Sprayer - 1 Sprayer $14.75
# Beneficial Nematodes

## NemaSeek™ *Heterohabditis bacteriophora (Hb)* Beneficial Nematodes

NemaSeek actively seeks out larval pests and is most effective against sedentary pests, such as queen ants, asparagus beetles, bagworms, banana moths, banana weevils, berry root weevils, bill bugs, borers, carrot weevils, chafers, fleas, grubs and more!

## NemAttack™ *Steinernema feltiae (Sf)* Beneficial Nematodes

These nematodes are known to wait for passing pests, such as cabbage maggot, humpbacked flies, onion maggots, pill worm, raspberry crown borer, root maggots, sclarids, shore flies, thrips and more!

## NemAttack™ *Steinernema carpocapse (Sc)* Beneficial Nematodes

These nematodes are known to wait for passing pests. NemAttack is most effective against mobile pests such as fleas, cutworm, fly larvae, termites and more!

## NemAttack™ *Steinernema riobrave (Sr)* Beneficial Nematodes

These nematodes are known to wait for passing pests. NemAttack *S. riobrave* is most effective against grubs of various beetles, citrus weevil and other weevil grubs, small hive beetle and more.

## NemAttack™ *Steinernema kraussei (Sk)* Beneficial Nematodes

NemaSeek actively seek out larval pests in the soil. *S. kraussei* has been shown to be effective at cooler soil temperatures (37-86°F) against the developing stage of weevils (especially black vine weevils) and sawflies.

### Sluggo®

**Wipes Out Slugs & Snails!**

**TARGET:** Snails and slugs.

**DESCRIPTION:** Made from a mix of biodegradable wheat gluten attractant and naturally occurring iron phosphate, this product will help control pest snails or slugs. Once consumed, it interferes with calcium metabolism which inhibits feeding and causes death in about 3-6 days.

**SUGGESTED USE:** Apply about 0.5-1 lb./1,000 sq. ft. or 20-40 lbs./acre.

### Slug Saloon

**This Will Be A Slug’s Last Drink!**

**TARGET:** Slugs.

**DESCRIPTION:** Use this rugged, low-maintenance trap for years of effective slug control. The food-grade malted barley bait is child & pet safe but irresistible to slugs, who are lured in by the smell and drown in the broth. Each bait lasts for 30 days. Trap comes with one bait, measuring spoon and instructions.

**SUGGESTED USE:** Either place on or sink into the ground one trap for every 10 sq. ft. Bait should be emptied and refilled every 3-4 days.

### Sluggo® Plus

**Save Your Plants From Slugs!**

**TARGET:** Kills earwigs, cutworms, sowbugs (roly poly), pillbugs, crickets, slugs and snails.

**DESCRIPTION:** This easy-to-use pellet formula kills insects, slugs and snails outdoors. Contains Spinosad, created from the soil bacterium, Saccharopolyspora spinosa, that is toxic to a variety of insect pests and other pests, including slugs. Use on vegetable gardens, fruit trees, lawns, flowers, shrubs and non-commercial greenhouses.

**SUGGESTED USE:** Apply bait on the soil around/close to the targeted plants at a ratio of ≈1/2-1 lb./1,000 sq. ft.; Wet ground before applying bait; do not use more than 3 times in a 30-day period; do not apply within 3 days of harvest; best when applied in the evening.

### BONIDE® Slug Magic

**Control Slugs With This Easy-To-Use & Convenient Size Of Iron Phosphate.**

**TARGET:** Slugs.

**DESCRIPTION:** This is a biodegradable product that consists of a naturally occurring mineral — iron phosphate. Once slugs or snails ingest Slug Magic, they stop eating and die within days. It can be used in fruit and vegetable gardens up to the day of harvest.

**SUGGESTED USE:** 1 lb. treats 1,000 sq. ft., the pellets remain active for 2 weeks – rain or shine.

### Snailer Snail & Slug Trap

**One Way In & No Way Out For Snails!**

**TARGET:** Snails, earwigs & sowbugs.

**DESCRIPTION:** The special design of this trap will last for years and keeps water and debris out but entices destructive snails and slugs in. You can be comfortable using this trap around children and pets — its bait is chemical-free and natural. Each bait lasts for approximately 30 days. Trap comes with one bait, measuring spoon and instructions.

**SUGGESTED USE:** For maintenance purposes, use one per 400 sq. ft.; for heavy infestation, use one per 10 sq. ft.

**Monterey B.t.**

An Easy-To-Use Solution For Controlling Caterpillars, Loopers & More!

**TARGET:** Cabbage looper, imported cabbage worm, tomato hornworm and bagworm, spring cankerworm, fall cankerworm, gypsy moth, tent caterpillar, elm spanworm and fall webworm on trees and ornamentals.

**DESCRIPTION:** This biological insecticide contains *Bacillus thuringiensis* subspecies *kurstaki* strain SA-12 solids, spores and Lepidopteran active toxins that when eaten by worms or caterpillars will halt feeding, resulting in death. When used as directed, it will not affect birds, earthworms or beneficial insects such as honeybees and ladybugs.

**SUGGESTED USE:** Apply when infestations are in first stages, making applications every 5-7 days until control is reached. Apply directly to all sides of foliage that is being affected by target pest. Can be applied with a hand sprayer or a hose-end sprayer and can be used up to the day of harvest. Of the foliage that is being affected by target pest. Can be applied with a hand sprayer or a hose-end sprayer and can be used up to the day of harvest.

**DiPel® Pro DF & DiPel® DF**

OMRI listed & WSDA approved *Bacillus thuringiensis* var. *kurstaki* (Btk) to control most Lepidoptera insects.

**TARGET:** Caterpillars, armyworms, bagworms, budworms, loopers, Gypsy Moth larvae, earworms and webworms.

**DESCRIPTION:** This dust-free, flowable powder bioinsecticide works quickly; pests will stop feeding within the hour and die in a few hours to 3 days. Use the smaller-sized DiPel PRO DF for ornamentals and small edibles. Use DiPel DF is meant for agriculture production. People, beneficials, birds, fish and wildlife are not affected by DiPel.

**SUGGESTED USE:** Can be used indoors and outdoors. Best if used while larvae are actively feeding but before plants are damaged. Small scale applications: Mix 1/2-4 tsps/gal. of water. Or use 1/4-2 lbs/acre. Repeat applications every 3-14 days. Add a spreader-sticker on hard-to-wet crops and to improve spray efficacy in poor weather conditions.

**Monterey Garden Insect Spray**

Insect Pests & Powdery Mildew Don’t Stand A Chance With This Spinosad Product!

**TARGET:** Control of foliage feeding worms (caterpillars), leafminers, thrips, fire ants and other pests as listed on the label.

**DESCRIPTION:** This OMRI listed spray is made with Spinosad and is specially formulated for use in home environments such as gardens, lawns, ornamentals, shrubs, trees and non-commercial greenhouses. Not for use on plants being grown for sale or other commercial use, for commercial seed production or for research purposes. The Spinosad in this spray works on insects' nervous systems, causing paralysis and death within 1-2 days. Because the insects are paralyzed, they may remain stuck on the plants and be mistaken for live insects; we recommend you check your plants 2-3 days after spraying to re-evaluate your control.

**SUGGESTED USE:**

- For insect pests: Apply when listed pests are present. Thoroughly spray and drench all plant foliage until wet, taking care to include undersides of leaves. Repeat applications may be made as indicated in the “Use Restrictions” section of the label.
- Toxicity: This product is toxic to bees for 3 hours following treatment. This product is also toxic to aquatic invertebrates such as insects, crustaceans, mollusks and worms.

**BONIDE® Thuricide Liquid Concentrate**

*Bacillus thuringiensis* var. *kurstaki*

**TARGET:** Control of caterpillars.

**DESCRIPTION:** Use Thuricide to control caterpillars that are causing excessive damage. This easy to mix and easy-to-use liquid can be sprayed on any plant that you would like to protect. Can be used on fruits, vegetables and ornamentals and can be used up to the day of harvest. Use weekly until the infestation is under control.

**SUGGESTED USE:** Easy-to-use for all spray applications, just mix 1-4 tsp. per gallon of water and apply to plants. It is important to target the underside and top of leaves to ensure good coverage. The mix rate you use is dependent on the level of infestation – there is no harm to the plant if you use a stronger mix rate.

FLEA & TICK CONTROL

Perma-Guard™ Crawling Insect Control

An OMRI Listed Diatomaceous Earth Insecticide That Really Does The Job!

TARGET: Any crawling or hopping pest insect.

DESCRIPTION: Perma-Guard Crawling Insect Control is Diatomaceous Earth mixed with amorphous silica. D.E. is the crushed fossilized shells of microorganisms; this fine dust clings easily to whatever passes through it. When an insect comes into contact with this dust, it proves fatal. The D.E. absorbs the waxy cuticle around the insect body, which causes it to dehydrate and die in as little as 48 hours. This physical method of killing eliminates the possibility of insects becoming immune to the insecticide, as can be the case with chemical controls. With regular applications of this OMRI listed product, you will receive continued protection.

SUGGESTED USE: Apply with a hand duster, power duster or as slurry to areas where insects are found. Avoid introducing into the air. Dust insects directly, if possible.

1218250 Perma-Guard Crawling Insect Control - 2 lb. Bag $10.15
1218260 Perma-Guard Crawling Insect Control - 5 lb. Bag $18.35

Case sizes available.

Essentria™ G Granular Insecticide

A Granular That Handles A Handful Of Outdoor Pests!

TARGET: Ants, bermudagrass mites, centipedes, chiggers, chinch bugs, cockroaches, crickets, earwigs, fall armyworms, fleas, leafhoppers, millipedes, sowbugs/pillbugs, and other insect pests.

DESCRIPTION: This quick and long-lasting natural granular insecticide uses essential botanical oils clove, thyme and wintergreen to treat various pests. Easy-to-use outdoors on landscapes, turf, building facilities and around organic operations, sensitive areas such as schools, and in aquatic environments.

SUGGESTED USE: Use with a hand spreader. For treatments around buildings, apply uniformly a band about 5-10 ft. wide. For landscapes and turf, use around 3-5 lbs./1000 sq. ft. Water in, applying about 1/8 in. - 1/4 in. of water without puddling. For ant mounds, use about 1-2 tsp./nest. For red imported fire ants, use around 1/2 cup/nest and make a 2 ft. band around nest.

1273050 Essentria G Granular Insecticide - 22 lbs. $67.50

Beneficial Nematodes

Combo packs of NemAttack™ & NemaSeek™ Beneficial Nematodes are your #1 defense against eggs and developing stages of fleas outdoors. Use these two varieties of beneficial nematodes for your most comprehensive control. See pages 17-19 for more information.

Electronic Flea Trap

Great Indoor Flea Control!

TARGET: Monitors and captures fleas.

DESCRIPTION: Each capture pad lasts for approx. three months or until filled with up to 10,000 fleas. Excellent flea control without toxic chemicals! Light and heat attracts fleas 24 hours a day and draws fleas from up to 25 feet away. 6" x 5" capture pad holds up to 10,000 fleas. Attractive, durable, patented design.

SUGGESTED USE: 1 trap per 2-3 dogs depending on dog’s size.

1280101 Flea Trap - 1 Unit $17.50
1280103 Flea Trap - 1 Unit (Bundle of 3) $45.00
1280102 Capture Pads (3 Pack) $6.50
1280106 Capture Pads 3 Pack (Bundle of 3) $18.75

Flea ‘n Tick B Gone™

Fast Acting & Easy-To-Use!

TARGET: Owners wanting natural flea control for their pets.

DESCRIPTION: This professional strength, enzyme based formula has been proven to effectively remove fleas, ticks, lice and other pests from a variety of pets without the use of harmful pesticides. Enzymes kill the fleas and ticks by dissolving their exoskeletons.

SUGGESTED USE: Simply apply directly to your pet’s fur, wait 10-30 minutes (depending on level of infestation), lather and rinse with warm water.

1452501 Flea ‘n Tick B Gone - 16 oz. RTU $17.98
1452502 Flea ‘n Tick B Gone - 1 Gallon $63.00

**NemaSeek™ Hb Beneficial Nematodes**

Beneficial Nematodes are one of nature’s most powerful weapons available for managing Japanese Beetle infestations. Along with parasitizing the beetles in their larval, underground damaging stages, they also parasitize the larval stages of other pest grubs, weevils, fleas, leafminers and more. Apply with a watering can, hose end sprayer or backpack sprayer. See pages 17-19 for more information.

---

### Milky Spore Powder

**Specific, Long Lasting Larval Control.**

**TARGET:** Japanese beetle grubs.

**DESCRIPTION:** Contains *Bacillus popillae* bacterium, lethal to soil-borne grub stages of Japanese beetles. Grubs that normally feed on roots of grass and vegetables will ingest the bacterium, which will cause death in about 1-3 weeks. As grubs decompose they re-release bacteria spores. The spores can remain in the soil for about ten years, and in some cases up to 20 years. In warmer climates, control can occur in 1-3 years (after one application) and in cooler climates, 3-5 years. Can apply with other fertilizers, will not harm animals and can be applied to food crops. For best results, apply with NemaSeek Hb Beneficial Nematodes (see pages 18-19), which will aid in spreading the bacterium to grubs. Store in a cool dry place to maintain shelf life.

**SUGGESTED USE:** Use All-Purpose Dispenser Tube for easy application (see page 49). White chalk carries the bacterium, and the resultant treated area should resemble a checkerboard. Water within about 48 hours for about 15-20 minutes to permeate into soil and do not mow or rake until thoroughly soaked.

Apply about 1 tsp., every 4 ft., in rows 4 ft. apart. 10 oz. covers ≈2,500 sq. ft., 40 oz. covers =1/4 acre, 50 lbs. covers =4.5 acres.

---

### Milky Spore Granular

**A New Formulation For Use In A Drop Spreader**

**TARGET:** Japanese beetle grubs.

**DESCRIPTION:** Contains spores of the bacteria *Bacillus popilliae*, which work specifically against the grub stage of the Japanese beetle. Once Milky Spore is in the soil, grubs will ingest the bacterium as they feed on roots. The spores will then multiply inside the grub, leading to its death in 1-3 weeks. As the grub decomposes it will release the spores in their increased numbers back into the soil. Will not harm people, animals, plants or beneficial insects.

**SUGGESTED USE:** For best results, apply with a drop spreader (available online) in the spring, summer and fall for 2 consecutive years. This allows the Milky Spore to build up in the soil. After that, the spores will work on their own for several years. After the 6th application, control can last up to 10 years. 1 lb. of material will cover 350 sq. ft. and 20 lbs. bag will cover 7,000 sq. ft.

Apply 1 lb. per 1,000 sq. ft.

Apply in cooler months, typically April through June and August through October.

**Where Are Japanese Beetles Found?**

Japanese Beetles are native to Japan. They were first found in the United States in 1916 in New Jersey and it is believed they arrived before inspections of commodities entering the country were required. Since then, they have spread to many states in the United States including: AL, AR, CT, DE, GA, IA, IL, IN, KS, KY, MA, MD, ME, MI, MN, MO, MS, NC, NE, NH, NJ, NY, OH, OK, PA, RI, SC, SD, TN, TX, VA, VT, WI, WV. If you are unsure if Japanese Beetles have invaded your county, please contact your County Extension Agent to find out.
ORCHARD CARE

**IV Organic® White Wash**

Give Your Trees Year-Round Sun Protection.

**TARGET:** Use for sun protection on trees and shrubs, including fruit, nut and ornamental trees and roses.

**DESCRIPTION:** Protect your trees and shrubs from sunburn and sunscald with this easy to use, long-lasting coating. Sun can be debilitating to trees and shrubs; avocado, citrus and new growth are especially susceptible to sun. In winter, warm days followed by freezing nights can lead to sunscald. Also provides an extra layer of protection from phototoxicity when using horticultural oils. Can be brushed on, sprayed on or applied as a tree paste.

**SUGGESTED USE:** Brush on: 1-2 coats a year. Contents should cover approximately 12 young tree trunks (3 gal. size) with 1 coat. Add water to powder in can & stir. Foliage spray: Use up to 3x yearly. Use 1-2 tsps./gal. water. Tree paste: Add 1/4 cup of water to contents & stir well.

**IV Organic® 3-In-1 Tree Guard Paint**

An Organic Pest Control Solution For Your Trees – Easy As 1-2-3!

**TARGET:** Insect and small animal pests and sun damage to trees.

**DESCRIPTION:** Trees can easily fall victim to insects, the sun and rodents; this easy-to-use tree paint offers an eco-friendly solution. This paint is made with Neem oil, which deters insects by repelling them, coating and smothering them. Additionally, it’s fatal if ingested. This product contains Castor oil, which has a taste that most rodents and other small animals find repugnant. Sunburn and sunscald can cause great stress to a tree and can lead to death. This highly reflective paint will keep a good portion of the sun’s damaging rays out. Goes on very easily and requires only one application per year.

**SUGGESTED USE:** One can contents should cover approximately 12 young tree trunks (3 gal. size) with a single coat. Fill can with powder and oil vial from can, fill with water and stir.

Monterey Horticultural Oil

Functions As A Fungicide, Insecticide & Miticide!

TARGET: Spider mites, eriophyid mites, armored scale, soft scale, mealybugs, psyllids, whiteflies, aphids, leaf rollers, leafhoppers, webworms, cankerworms, plant bugs, leaf hoppers and adelgids.

DESCRIPTION: Composed of mineral oil, this product covers egg, larval and nymph stages causing suffocation. In addition, it functions as a fungicide as it will interfere with a fungal pathogen’s ability to attach to a host plant.

SUGGESTED USE: Can be used year-round on ornamentals, roses, vegetables, citrus, small fruits, tree fruits, and nuts. Best when applied during dormancy. During growing seasons, apply until day of harvest. Use about 2.5-5 Tbsp. oil/1 gal. water. For trees, apply about 8-15 gal. solution/tree. For various fruits, apply about 2.5-5 Tbsp. oil/1 gal. water. For trees, use approximately 3-4 gal. during dormancy. During growing seasons, apply until day of harvest. Use

SuffOil-X®

OMRI Listed Pre-Emulsified Mineral Oil
Suffocates Many Soft-Bodied Insects & Controls Certain Fungal Diseases.

DESCRIPTION: Made with highly refined pre-emulsified mineral oil, this suffocant creates the optimum in coverage with limited risk of plant damage. The pre-emulsified process creates a lighter oil that dries faster, will not cause photo toxicity, burn or undue stress, leaves no toxic residue on plants and dilutes easily with water.

SUGGESTED USE: Can be used with a wide variety of crops indoors or outdoors. Do not apply through any type of irrigation system (chemigation), during periods of drought, or when plants exhibit moisture stress. Apply when oil will dry and evaporate in 1-2 hours and when relative humidity is less than 90%. Don’t spray in high wind or temps over 95°F. Application rates are generally 1-2 gallons of SuffOil-X per 100 gallons of water or 20-500 gallons of spray solution per acre.

| 1332805 | SuffOil-X - 2.5 Gallons | $62.00 |
| 1332806 | SuffOil-X - Case of 2 ct./2.5 Gals. | $112.00 |

Larger sizes available.

Shipping Restrictions: Cannot ship via US Mail or air shipping methods. Cannot be shipped to the following states: AK, DC.

Organic JMS Stylet-Oil®

Smother Overwintering Insect Pests & Mites With This Food Grade Dormant Oil!

TARGET: Powdery mildew, mites, whiteflies, leafminers and insect transmitted diseases.

DESCRIPTION: Use this multi-purpose, year-round fungicide, insecticide and antiviral spray oil in greenhouses, on field crops and on fruit trees. Kills powdery mildew on contact and prevents occurrence for up to 14 days and controls mites, whiteflies and leafminers. Made from paraffinic oil that exceeds standards set by the FDA for “Food Grade Quality.” Has a high purity level of ≈99.1% (UR) for formations with an industry-high emulsifier content of ≈2.9% (νν) and is colorless, tasteless and odorless. 4-hour re-entry interval; no pre-harvest interval.

SUGGESTED USE: For gardens, apply approx. 3 Tbsp./gal. water with a sprayer. For larger areas, apply about 1-2 gal./100 gal. water and use 25-150 gal. of dilute/acre depending on crop, timing and desired treatment. Apply weekly or bi-weekly depending on severity of condition. Begin at the onset of plant growth, fungus emergence, disease and insect infestation. See label online for detailed rates and instructions.

BONIDE® All Seasons Horticultural & Dormant Spray Oil

Control Overwintering Eggs Of Insect Pests With This Light-Weight Concentrated Oil.

TARGET: Aphids, bean thrips, leaf hoppers, scale, codling moths, fungus gnats, whiteflies, mealy bugs, mites, psyllids and spider mites.

DESCRIPTION: This oil-based concentrate can be used as a growing season spray, dormant spray (no leaves) or delayed dormant (green tip) spray to control overwintering eggs and other insects. Highly recommended for use on fruit trees, shade trees, shrubs, ornamentals, roses and vegetables. Light enough to use anytime of the year.

SUGGESTED USE: Dilute 2-8 oz per gal. of water depending upon infestation. For gardens, apply approx. 3 Tbsp./gal. water with a sprayer. For larger areas, apply about 1-2 gal./100 gal. water and use 25-150 gal. of dilute/acre depending on crop, timing and desired treatment. Apply weekly or bi-weekly depending on severity of condition. Begin at the onset of plant growth, fungus emergence, disease and insect infestation. See label online for detailed rates and instructions.

Ships via Ground ONLY.

Shipping Restrictions: Cannot ship via US Mail or air shipping methods. Cannot be shipped to the following states: AK, DC.
**Summerset® AllGuard™**

This Spray Repels Lots Of Insects – & The Rain!

**TARGET:** For use in repelling listed insects from vegetable gardens, flowers, ornamentals and lawns.

**DESCRIPTION:** This highly concentrated repellent uses Garlic Juice to fend off insects and keep them away. The natural sulphurs in Garlic Juice are repugnant to the insects that plague plants and trees. There will be a garlic odor when sprayed, but the smell will dissipate in about 30 minutes. Use it on most anything you grow; it won’t leave a garlic taste on your crops. SummerSet AllGuard is blended with a rain-resistant additive that will keep the product on the plants and trees. There is no need to use additional adjuvants, stickers or surfactants.

**SUGGESTED USE:** For preventive treatment: Add 2 oz./gal. water. Make first application at foliar emergence. Repeat every 3-4 weeks. For infestation control: Add 4 oz./gal. Spray every 2-3 days until insects are under control and then maintain on a 3-4 week cycle. For ticks and mosquitoes: Mix 6 oz./gal.

**Garlic Barrier®**

Protect Your Plants With Garlic!

**TARGET:** Ants, aphids, armadillos, armyworms, beetles, birds, caterpillars, deer, grasshoppers, leafhoppers, leafminers, loopers, mealybugs, mites, rabbits, sawflies, whiteflies and wireworms.

**DESCRIPTION:** Made from 10% garlic extract, when absorbed by plants it helps to protect them from pest insects, repelled by the smell and taste. The garlic odor diminishes about 30 minutes and will not alter taste.

**SUGGESTED USE:** Apply weekly. For nematode and grub control, spray seeds before planting. For foliar applications, apply before noon for best results. Mix at a rate of 1 cup/10 cups water to cover about 15,000 sq. ft.

**SNS-217™ and SNS-217C™**

These Botanical Extracts Will Not Harm Plants But Are Fatal To Spider Mites.

**TARGET:** Use to kill and repel adult spider mites and to prevent hatching of their eggs.

**DESCRIPTION:** Using food grade rosemary extracts and oils, these products will kill adult spider mites and prevent their eggs from hatching. The natural salts and fatty acids derived from the rosemary disrupt the insect cell structure and the permeability of its membranes; this will quickly cause the insect to dehydrate and die. Additionally, once eggs are coated with the oily liquid, their respiration will be blocked and they will perish without hatching. The plant will absorb some of the components of these products, which will form a barrier to any additional mites that may try to feed on it.

**SUGGESTED USE:** RTU - 4 quarts or 1 gallon solution will cover approximately 550 sq. feet. Concentrate - Mix 21 oz. (approx. 2 3/4 cups) to 26 oz. (3 1/4 cups) of concentrate per gallon of water. For best results use warm (70°F) distilled or chlorine-free water. Mixed solution may be used immediately or stored for up to 2 weeks.

## Monterey Fruit Tree Spray Plus

**OMRI Listed Spray Combining Pyrethrins & Neem Oil Used As Insecticide, Fungicide & Miticide.**

**Target:** Powdery mildew, downy mildew, rusts and leaf spot; aphids, spider mites, whiteflies, loopers, leafminers and more.

**Description:** Monterey Fruit Tree Spray Plus is a natural control spray for many common pest insects and plant diseases, such as powdery mildew, downy mildew, rusts and leaf spots. A mixture of pyrethrins and 70% Neem Oil ensures that Monterey Fruit Tree Spray Plus is fast-acting when sprayed on your plants up until the day of harvest.

**Suggested Use: Concentrate:** Mix 2 tablespoons of Monterey Fruit Tree Spray Plus per gallon of water and thoroughly apply to all leaf surfaces including the undersides of the leaves. **RTS:** Attach to a hose with water access and follow spraying directions on the label.

**Fungicide Use:**

- Effective against powdery mildew, black spot, downy mildew, anthracnose, rust, leaf spot, Botrytis, needle rust, scab, twig and tip blight and Alternaria.

**DESCRIPTION:** Derived from the Neem seed, this concentrated oil is an excellent pest and disease control choice for use on many plants including roses, flowers, vegetables, herbs, spices, houseplants, trees, turf and shrubs. Can be used on contact for existing pests/diseases and as a dormant spray to control overwintering pest eggs. Can be used until day of harvest.

**SUGGESTED USE:**

- Insecticide: Mix 2-4 tablespoons (1-2 fl. oz.) per 1 gallon of water thoroughly and spray all plant surfaces, including underside of leaves, until completely wet.
- Fungicide: For present disease, use at 7-14 day intervals, and for prevention and continued control use at 14 day intervals.
- Caution: This product is toxic to bees exposed to direct treatment.

## Monterey 70% Neem Oil

**Effective Against Indoor & Outdoor Insect Pests & Fungal Diseases!**

**TARGET:** Use as an insecticide/miticide and/or fungicide on a wide range of ornamental plants, vegetables, trees and shrubs, as well as fruit and nut crops.

**DESCRIPTION:** *Insecticide/Miticide Use:*

- Controls spider mites, aphids, whiteflies, scale, beetles, leafrollers and other insect pests.

**Fungicide Use:**

- Effective against powdery mildew, black spot, downy mildew, anthracnose, rust, leaf spot, Botrytis, needle rust, blights and Alternaria.

**SUGGESTED USE:**

- Insecticide/Miticide Use: Mix rate: 1-2 oz./gallon of water. Thoroughly spray all plant surfaces (including the undersides of leaves) until wet. **Fungicide Use:** Apply every 7-14 days; for heavy infestation, apply every 7 days. Use 1 oz./gallon of water & thoroughly spray all plant surfaces until wet. Apply on a 7-14 day schedule until control is achieved.

## BONIDE® Neem Oil RTU & Concentrate

**Three Great Products In One – A Fungicide, Insecticide, & Miticide.**

**TARGET:** As an insecticide/miticide on eggs, larvae and adults of aphids, spider mites, scale, whiteflies, beetles, leafroller, etc. As a fungicide on various diseases including powdery mildew, black spot, downy mildew, anthracnose, rust, leaf spot, Botrytis, needle rust, scab, twig and tip blight and Alternaria.

**DESCRIPTION:** Made from organic neem seed kernel extract, this is the world’s first water-soluble, neem-based bio-insecticide powder. This OMRI listed formula uses a patented process to allow a highly concentrated version of Azadirachtin to readily mix with water. This provides all the benefits of neem products without the odor, stickiness, residue, or need for added solvents. Not harmful to birds, mammals or beneficials.

**SUGGESTED USE:** Can be applied via soil drench, spray, sub-surface treatments, tree injection and in hydroponics and chemigation systems. Can be applied to soil-less media. Use in a fogger to repel adult flies. Drip applications: Established plants-5 grams/5 gallon container. Spray applications: 1 tsp/1 gal water/1000 sq. ft. to 4 tsp/1 gal water/1000 sq. ft. Apply 2-3 times at 7-20 day intervals, unless otherwise indicated.

Azadirachtin
Azadirachtin is similar to Neem Oil in that it is derived from the seeds of the neem tree (Azadirachta indica). The primary mode of is as an anti-feedant, but it also disrupts normal insect growth/molting, repels larvae and adults, sterilizes adults and deters egg laying. Consider Neem Oil is you need fungicidal properties.

Debug® Turbo
Controls Over 200 Pest Insects, Plant Parasitic Nematodes & Other Plant Pathogens.

TARGET: Red ants, cutworms, grubs, chinch bugs, crickets, aphids, whiteflies, thrips, beetles, leafhoppers, fruit worms, spider mites, caterpillars, cabbage loopers, armyworms, Colorado potato beetles, diamondback moths, grasshoppers, maggots, weevils, chafers, spider mites, spittlebugs, webworms, Rhizoctonia solani, Sclerotium rolfsii, Sclerotinia sclerotiorum, Fusarium oxysporum, rust, and powdery mildew.

DESCRIPTION: OMRI listed Debug Turbo is an insecticide, fungicide, miticide, and nematicide. Use to control insects in various stages of development, repel insects from entering treated areas and to deter insects from feeding on treated surfaces. It also acts as a growth regulator when ingested by young insects. Debug Turbo has a high concentration of active ingredients, including azadirachtin, tri-terpenoids and neem oil. It has a low REI and PHI (pre-harvest intervals) and can be used without harm to beneficial insects.

SUGGESTED USE:
Home & Garden
Shake container of Debug Turbo well before use. Mix 2 Tbsps. (1 oz.) of Debug Turbo with 32 oz. of water in spray container. Spray mixture on leaves, stems, and underside of leaves making sure to completely saturate the plant. Apply in early morning or late evening with temperatures less than 95°F. For best results apply weekly; do not water leaves for 24 hours after application.

Lawn Care
Shake container of Debug Turbo well before use. Add 1-3 oz. of Debug Turbo in a 2 gal. of water. Apply with the Chameleon Adaptable Hose End Sprayer. (See page 55). Mix and spray on 100 sq. ft. of lawn before irrigating. Apply in early morning or late evening with temperatures less than 95°F. Use diluted material, do not save unused mix for later use.

AzaGuard®
This OMRI Listed Product Works On A Wide Range Of Ornamental, Forestry, Food & Non-Food Crops.

TARGET: For controlling and repelling over 300 listed insect species, including aphids, beetles, armyworms, fungus gnats, leafhoppers, caterpillars, mealybugs, webworms, plant parasitic nematodes and root knot nematodes.

DESCRIPTION: Azadirachtin, extracted from the neem tree, is the active ingredient here. Insects are repelled by the taste and smell of neem, but azadirachtin also works as a molting/growth disruptor. This Insect Growth Regulator (IGR) disrupts the life cycle between larval, pupal and nymphal stages by impeding the metabolism of ecdysone. Ecdysone is necessary for molting, without which the insect cannot mature into its next growth stage and will, ultimately, die. NOP Compliant.

SUGGESTED USE: Apply using a power or pump sprayer or a hand-held trigger type sprayer. Spray when pests first appear and repeat at 5-7 day interval as required. A sticker agent may be added to product for more complete coverage on waxy or pubescent plant surfaces. Do not exceed the rate of 22.5 fl. oz. (20 g.) per acre per application.

AzaSol™
This Non-Oil Based & Water Soluble Powder Controls A Myriad Of Insect Pests.

TARGET: Whiteflies, aphids, caterpillars, mushroom flies, phorid flies, leefminers, mealybugs, psyllids, weevils and many more.

DESCRIPTION: AzaSol contains Azadiractin, a product of the Neem tree. In production, the Neem oil from the seeds of the trees is transformed into a yellowish-white, water-soluble amorphous powder suitable for spraying. When used as directed it is effective on adult insects, larvae and pupae. It will vigorously repel insects, kill them when they come in contact with the spray or feed on sprayed plants and interrupt their life cycles. This powder quickly dissolves in water and won’t clog equipment or leave an oily residue or discoloration on plants. Won’t burn leaves or block photosynthesis. Can be injected in trees for quick results.

SUGGESTED USE: Apply as a foliar spray or soil drench to soil or soil-less media A wetting agent may be used. To repel adult flies, use fogging equipment. Use from 1-4 tsp./1000 sq. ft depending on pest infestation levels, application method and growing environment. For optimum results, 2-3 applications made at 7-10 day intervals is recommended.
BEAUVARIA BASSIANA

BioCeres® WP
This Versatile Biopesticide Can Be Used In A Tank Mix Or As A Stand-Alone.

TARGET: Aphids (Aphidoidea), whiteflies (Aleyrodoidae), thrips (Thysanoptera), plant bugs (Lygus lineolaris), spotted wing drosophila (Drosophila suzukii), borers, beetles and weevils.

DESCRIPTION: This OMRI Listed biopesticide uses the power of Beauveria bassiana to control insects in developing and adult stages. Upon application, the spores will adhere to and begin penetrating the insect’s outer shell. Once inside the insect, the spores will continue to multiple until they reach its hemolymph (blood). When the spores encounter the blood they will begin feeding on it. Death will occur in 7 to 14 days. 0 pre-harvest interval and 4-hour REI.

SUGGESTED USE: Repeat at 5-7 day intervals as needed. Apply 1-3 lbs. per acre, according to the density of the insect population. For conventional air and ground applications, use at least 50 gallons of spray volume per acre. Thoroughly cover plant foliage with spray solution, but not to runoff.

1332890 BioCeres WP - 1 lb. Bag $80.00
1332892 BioCeres WP - Case of 1 lb. Bags/12 ct. $880.00

Cannot be shipped to the following states: CA

Mycotrol® WPO
A New Formulation For A Reliable Favorite!

TARGET: Adult and immature stages of whiteflies, thrips, aphids, psyllids, mealybugs, leafhoppers/plant hoppers, scarab beetles and plant bugs (Heteroptera) and more.

DESCRIPTION: Mycotrol WPO is a wettable powder mycoinsecticide that contains live spores of the naturally occurring fungus, Beauveria bassiana. In fact, this formulation contains the highest concentration of any insecticide containing Beauveria. These spores adhere to the host insect and use enzymes to attack and ultimately dissolve the cuticle that surrounds and contains the body cavity. This fungal penetration will ultimately kill the unwanted insects but will not harm beneficials.

SUGGESTED USE: For use in greenhouses, nurseries, landscape and interiorscape settings. Mycotrol WPO can be used for a wide range of vegetables, fruits and berries, herbs and spices, ornamentals, ground covers, trees and turf. Apply Mycotrol WPO using hand-held, ground spray equipment and/or low volume application equipment.

1332875 Mycotrol WPO - 1 lb. $100.00
1332795 Mycotrol WPO - 1 lb. (Case of 12) $1,070.00

Ships via UPS Ground & FedEx Ground ONLY.

BotaniGard® ES & 22WP
Beauveria bassiana Strain GHA
Controls A Wide Variety Of Soft-Bodied Insects In Greenhouse, Field & Nursery.

TARGET: A wide variety of soft-bodied insects such as whiteflies, thrips, aphids, psyllids, mealybugs, scarab beetles, plant bugs and weevils.

DESCRIPTION: BotaniGard ES is a natural contact insecticide that contains a liquid emulsified suspension of the mycoinsecticide – Beauveria bassiana Strain GHA, which controls many varieties of soft-bodied insects in greenhouse, field and nursery crops. Application Rates of BotaniGard ES

• For whiteflies and aphids, use about .5-1 quarts per 100 gallons of water.
• For thrips, use about 1-2 quarts per 100 gallons of water.
• For other insects, use about .5-2 quarts per 100 gallons of water.
• If applying as a high or low volume spray, use up to 3 quarts per 100 gallons of water to cover an area of 5,000-20,000 sq. ft.

Application Rates of BotaniGard 22WP

• For whiteflies and aphids, use .5-1 lb. of BotaniGard 22WP per 100 gallons of water.
• For thrips, use 1-2 lbs. of BotaniGard 22WP per 100 gallons of water.
• For other labeled insects, use .5 to 2 lbs. of BotaniGard 22WP per 100 gallons of water.
• Rate depends upon infestation level, consult package instructions before application.

BotaniGard ES

1332801 BotaniGard ES - 1 Quart $84.00
1332799 BotaniGard ES - 1 Gallon $260.00

BotaniGard 22WP

1332800 BotaniGard 22WP - 1 lb. Powder $88.00

Case sizes available.

Shipping Restrictions: Cannot ship via US Mail.
**OTHER BIORATIONAL**

### Grandevo® & Grandevo® WDG

**Get Widespread Control With This Multi-Action Microbial-Based Insecticide/Miticide.**

**TARGET:** Aphids, whiteflies, thrips, mealybugs, mites, armyworm, Asian Citrus Psyllids, leafhoppers, Lygus, cutworms, beetles, *Drosophila*, loopers, moths, sharpshooters, earworns, caterpillars and more.

**DESCRIPTION:** Grandevo uses the bacterium *Chromobacterium subtsugae* strain PRAA4-1T to provide long-lasting, reliable broad spectrum control of a long list of labeled pests. Its mode of action is multi-faceted; it is toxic when ingested, it repels and it reduces insect reproduction. This OMRI listed and NOP compliant organic pesticide/miticide can be a valuable part of any IPM program. Can be used on a wide range of edible crops in field and greenhouse applications.

**SUGGESTED USE:** In greenhouses: Use 1-3 lbs./100 gallons of water sprayed until just before point of runoff. Ground & aerial application: Use sufficient water to provide thorough coverage plant parts. For tank mix programs: Apply 1-2 lbs./acre. For rotational programs: Apply 2-3 lbs./acre when alternating.

**Green Cleaner**

**An Industry Favorite Because It Works So Well!**

**TARGET:** Soft-bodied insects including spider mites, aphids, whiteflies, broad mites & russet mites. Also effective against powdery mildew.

**DESCRIPTION:** The mixture of Soybean oil, Sodium Lauryl Sulfate, alcohol and Citric acid in Green Cleaner creates a killer combination for insect pests. The oils coat the insects to suffocate or limit sporereproduction and the alcohol and citric acid dehydrates and kills insects. This process affects the mature bugs and their eggs, so the potential for insecticide resistance in future generations is effectively eliminated. You can use Green Cleaner in every stage of plants’ lives: as a dip for new cuttings, as a foliar spray during all stages of growth and to prevent cross-contamination when outsourcing plant starts.

**SUGGESTED USE:** As an insecticide, fungicide or miticide. For use on horticultural plants; not for use on feed or feed crops. Apply with any sprayer (high pressure preferred). Initial drench-2 oz. per gal.; secondary application-1 oz. per gal. (apply every 1-2 days) and weekly maintenance-1/2 oz. per gal. Apply at a rate of -1/2 oz. per gal.

### Venerate® XC

**This Unique Bioinsecticide Fits In Any IPM & Resistance Management Program (RMP).**

**TARGET:** Caterpillars, foliage feeding Coleopteran, aphids, whiteflies, Asian Citrus Psyllids (ACP), leafhoppers, stink bugs, mites, *Lygus* and more.

**DESCRIPTION:** Venerate uses killed cells of the *Burkholderia* spp. strain A396 and spent fermentation media to kill insects in fields and greenhouses. It’s toxic when ingested and works on contact to cause enzymatic degradation of exoskeletal structures and fatal interference with the molting process. Not harmful to fish, birds, most beneficials and honey bees.

**SUGGESTED USE:** Mix with water and apply as a foliar spray. Apply 1-4 qts./acre on a 7-day interval. Smaller scale applications: 2-4 Tbsp./gal. Can alternate with another product on a 7-day interval. No limit on number of applications per season. No spray buffer needed.

### SNS 209 All Natural Systemic Pest Control Concentrate

**This NOP Compliant Insecticide Works From The Inside Out To Provide Long-Lasting Control.**

**TARGET:** For use against spider mites, whiteflies, fungus gnats, thrips, root aphids, scales and more.

**DESCRIPTION:** This unique product formula contains rosemeric acid, a derivative of the rosemary plant, that the plant will uptake and spread throughout its structure. The presence of this acid in the plant cells forms a barrier that insects find distasteful. Once a feeding insect comes in contact with the rosemeric acid, they retreat and look for a more suitable food source. Contact with rosemeric acid can be fatal depending on the size of the pest affected and that pest’s maturity. SNS 209 stays in the plant’s leaves, stems and roots and can’t be diluted by the elements. This provides complete protection for all parts of the plant.

**SUGGESTED USE:** This product may be used as a foliar spray or as a root drench. Use daily or every few days until it begins working in 1-2 weeks. It will be effective for up to 3 weeks. Discontinue use once it starts working and then reaply every 14-28 days as needed. Do not overuse.

**Azera® Gardening**

This Unique Mix Of Azadirachtin & Pyrethrins Offers Exceptional Insect Control.

**TARGET:** This product will kill the larval, pupal and adult stages of a broad spectrum of over 200 listed insects.

**DESCRIPTION:** This organic pesticide couples two powerhouses (Azadirachtin and Pyrethrins) to fight both hard-bodied and soft-bodied insects. Hard-to-kill insects will not get past Azera; they will succumb to the quick knock-down kill or perish more slowly once they ingest it. One of these two processes will kill all stages of an insect’s life (larval, pupal and adult), effectively eliminating all future generations. This OMRI listed product is hard on insects and soft on the environment.

**SUGGESTED USE:** Apply Azera as soon as insects appear; do not wait until plants are heavily infested. Apply with any powered or manual pesticide application equipment. The most commonly used rate of application is 2 pints per acre (32 fl. oz. = 946 ml.) Higher populations of adults and/or hard to kill insects may require 3 pints per acre (48 fl. oz. = 1.42 L) or 3.5 pints per acre (56 fl. oz. = 1.66 L.).

**Monterey Take Down Garden Spray**

A Mix Of Pyrethrins & Canola Oil For Affordable, Effective Insect Control!

**TARGET:** Aphids, beetles, caterpillars, ants (except fire ants, harvester ants, carpenter ants & pharaoh ants), mealybugs, mites, leafhoppers, scale, whiteflies, adelgids, plant bugs, fungus gnats, thrips, sawfly larvae, psyllids, spittlebugs & phyloxera.

**DESCRIPTION:** This spray works on a broad spectrum of insect pests and will attack ALL stages of insect life — eggs, larvae & adults. With canola oil and pyrethrins as active ingredients, you have a spray that will knock them down and hold them down. Can be used as a dormant or growing season spray and does not persist in the environment. Safe to use up to the day of harvest.

**SUGGESTED USE:** With concentrate formula, mix in either 1% or 2% solution as follows. 1% Solution: Mix 2 tsp. of concentrate with 1 qt. water or 1 fl. oz. of concentrate with 3 qts. of water. 2% Solution: Mix 4 tsp. of concentrate with 1 qt. of water or 2 fl. oz. with 3 qts. of water. Shake or stir frequently during use.

**PyGanic® Gardening**

Rapid Knockdown & Kill For Outdoor Pests In Your Garden.

**TARGET:** Over 100 listed pests, including aphids, beetles, caterpillars, crickets, fruit flies, fungus gnats, mites and thrips.

**DESCRIPTION:** This updated version of PyGanic offers the same ingredients and results as the former PyGanic 1.4. Pyrethrins, the active ingredient here, have been used safely and effectively for millennia. This formulation can be applied in a variety of ways, making it easy to use no matter what size your garden is. Spraying should begin when the insects first appear, not when they are already heavily infested. Thoroughly cover all plant surfaces. This OMRI listed, NOP compliant insecticide can be used throughout your growing season and up to the day of harvest.

**SUGGESTED USE:** For use on outdoor gardens and growing areas. Not for use indoors. Not for use on plants grown for sale. Do not exceed the maximum application rates of 1.4 fl. oz. per 1,000 sq. ft. or 59 fl. oz. per acre.

**BotaniGard® MAXX**

**Beauveria bassiana & Pyrethrins Make A Powerful Team!**

**TARGET:** Whiteflies, aphids, thrips, psyllids, spider mites, mealybugs, leafhoppers, weevils, borers and other leaf-feeding insects.

**DESCRIPTION:** This potent biорational formulation provides a quick knock-down of insect and mite pests. The two active ingredients, Beauveria bassiana and Pyrethrins, work independently, yet in harmony, to provide multiple mechanisms to kill harmful insects. The pyrethrins will attack the nerve cells of the insect and the Beauveria bassiana strain GHA fungal spores penetrate an insect’s protective cuticle and destroy it from within.

**SUGGESTED USE:** Can be applied at a rate of up to 2 quarts per 100 gallons of water; however most target insects can be controlled at a rate of 1 quart per 100 gallons of water, 1/2 quart per 50 gallons of water or 1 pint per 25 gallons of water. For best results, use as soon as insect pests are spotted, before their population becomes too large. Results can generally be seen within 2-5 days after the first spraying. Do not reapply within 3 days, unless the infestation is extreme. If this is the case, wait 24 hours for reapplication.

WHAT ARE FLY ELIMINATORS?

The Sensible Alternative To Pesticides
Fly Eliminators are tiny ≈1/8” beneficial insects that parasitize flies in their developing pupal (cocoon) stage, before they can hatch into annoying disease-carrying adult flies. Scientifically they are referred to as Fly Parasites or Fly Parasitoids.

Fly Eliminators will only parasitize fly pupae and will not bother horses, cattle, livestock, pets, plants, or you.

HOW DO FLY ELIMINATORS WORK?

Adult female flies lay their eggs in decaying organic matter, especially manure. Only a few hours later, these eggs develop into microscopic larvae (maggot stage) and burrow down into the manure. The maggots grow until they form a pupa (cocoon stage).

Then, the female Fly Eliminators seek out the fly pupae and begin to deposit their eggs inside. The eggs grow into larvae that feed on the developing fly, stopping the adult pest fly from hatching.

Fly Eliminators reproduce in about 21 days, constantly strengthening the Fly Eliminator population. Pest flies reproduce at a faster rate than our Fly Eliminators, so we recommend they be replenished on a regular basis, approximately every 2-4 weeks.

WHO USES FLY ELIMINATORS?

Our customers are all types of horse owners, from the single horse owner to large breeder, including racetracks and farms with many types of animals.

- Boarding Facilities
- Dairy Facilities
- Stables
- Aquariaums
- Feed Lots
- Race Tracks
- Poultry
- Kennels
- Equestrian Hobbyists
- Urban Farmers
- Zoos
- Plus more

Please be sure to account for all of your livestock and other animals. Call for special reduced pricing for large facilities, mixed livestock areas and/or custom programs.

HOW DO I USE FLY ELIMINATORS?

Your Fly Eliminators will arrive in a clear plastic bag which contains parasitized fly pupae in wood shavings.

1. When your Fly Eliminators arrive, check for any signs of hatching.
2. Store in a warm, dry place. Once the Fly Eliminators begin to hatch simply disperse them near breeding sites: manure piles; under water troughs; under bedding; corners of pens and feeding sites.
3. Cover with dirt or manure to protect your Fly Eliminators. They will then start to burrow down and search for fly pupae to lay their eggs in.
4. Repeat every 2-4 weeks.

Philadelphia Park Recommends ARBICO’s Fly Eliminators

“I was introduced to Fly Eliminators 30 years ago at a Racetrack Symposium and have been using them ever since. They’ve done a fabulous job and I have recommended Fly Eliminators to many people! They’re a great product! Their Fly Eliminators Program was green before green was popular. Without a doubt, this is the way to go. ARBICO Organics is a very good company!”

– Roy Smith, Former Track Manager of Philadelphia Park
Use Your Fly Eliminators the RIGHT Way:

RIGHT Time
☑ Start your Fly Eliminators Program before or as soon as your infestation starts
☑ Release once you have 3 nights in a row of 40°F temperatures
☑ If you start late, just add more Fly Eliminators to your order

RIGHT Place
☑ Release at the end of the day – they’re nocturnal
☑ Release near manure, urine soaked areas, feeding, watering & bedding areas

RIGHT Amount
☑ The more Fly Eliminators, the fewer the flies

RIGHT Schedule
☑ Shipments every 2-4 weeks are best to break the fly lifecycle

Churchill Downs Chooses ARBICO Organics
“We started using Fly Eliminators back in 1983. We are still using them today. It’s a wonderful product and a successful program that everyone should use! All the big corporations are going green and we were one of the first to go green by using Fly Eliminators.”

– Butch Lehr, Former Track Manager of Churchill Downs

Del Mar Thoroughbred Club Relies On ARBICO Organics
“The Del Mar Thoroughbred Club horse racing facility has been using Fly Eliminators from ARBICO since 1985 with great success. Each summer nearly 2,000 horses and hundreds of thousands of race goers converge on this community making fly control a top priority for both the Del Mar Thoroughbred Club and the community that relies so heavily on the agricultural product we promote. We appreciate the years of timely and professional service ARBICO Organics has provided and look forward to many more good years ahead.”

– Joe Harper, Chief Executive Officer of Del Mar

**Sc Beneficial Nematodes**

Add Beneficial Nematodes For Ultimate Fly Control!

**TARGET:** Fly maggots and other subterranean pests.

**DESCRIPTION:** These live microscopic organisms (non-segmented round worms) occur naturally in soil throughout the world and are parasitic to fly maggots and other subterranean pests. Upon application, they will seek out and enter maggots through body openings. Once inside, the nematode releases bacteria which kill the host maggot within 24 - 48 hours. The bacteria create a food source for the nematodes to reproduce. As the food resources within the dead pest become scarce, the nematodes exit and immediately begin searching for a new host.

**SUGGESTED USE:** Apply nematodes to “hot spot” areas where flies are breeding such as compost and manure piles, around manure and urinating sites, and watering and feeding areas using a watering can, hose end, backpack or pump sprayer or through irrigation or misting systems. Use along with Fly Eliminators and Holistic Fly Defense for ultimate fly control!

### SCD Probiotics Barn Kleaner

**TARGET:** Manure odors and resultant pathogenic organisms and flies/insects that it attracts, manure composting operations, and cleaning of barns, corrals, paddocks, etc.

**DESCRIPTION:** Animal manures can contain harmful organisms, emit unpleasant odors and serve as natural breeding grounds for flies and other pesky insects. Composed from fourteen different species of beneficial microorganisms, this product can be used around animals to help clean areas where manure is present and can help accelerate the decomposition of manure. Use this product as part of a fly control program to stop adult flies from having a place to lay eggs and support new generations.

**SUGGESTED USE:** For barn cleaning apply approximately cup/2.5 gal. of water using a backpack sprayer or portable hand sprayer twice per week. Use on all bedding areas, directly on manure and on all surfaces, including floors, wall and ceilings. Store at room temperature and away from direct sunlight.

### balEnce™ Fly Spray

An Easy-To-Use Beneficial Insecticidal Spray To Fight Flies!

**TARGET:** Larval and adult flies.

**DESCRIPTION:** This EPA approved biological insecticide is suitable for organic programs. Consists of a liquid suspension of beneficial entomopathogenic fungi known as *Beauveria bassiana*. The fungus acts as a parasite on flies, causing white muscardine disease. When the microscopic spores of the fungus come in contact with the body of an adult or larval stage of a fly, they germinate, penetrate the cuticle and grow inside, killing the fly within a matter of days. Soon after, a white mold emerges from the cadaver and produces new spores that continue to infect more flies. After application, adult flies and fly larvae die in 24 to 72 hours. Product will continue to remain viable on residual surface areas for up to about 21 days.

**SUGGESTED USE:** Apply to animal rearing sites, housing and holding areas and manure piles. The 15 oz. container treats up to about 50,000 sq. ft. Apply using a backpack sprayer or fogging equipment. Use no more than 60 oz. per building/area per week. For best results, turn fans off or to lowest level in order to ensure maximum surface area coverage. Can be used in colder months to help curtail impending spring fly blooms. Check for evidence of reduced populations of fly pupae in manure and other breeding areas following application 21 to 35 days or up to 90 days in cooler temperatures.

### EM•1® Microbial Inoculant

**Faster Breakdown Of Organic Matter.**

**TARGET:** Accelerate decomposition & reduce odors.

**DESCRIPTION:** Consists of healthy bacillus from naturally fermented live microorganisms. Works with beneficial microbes in the area it is applied to, creating a synergy among microorganisms and larger forms of life including insects, worms, pets, livestock and people.

**SUGGESTED USE:** 2 tsp./gal. water, 1 qt./250 gal. water, 1 qt./acre up to 8 times/yr.

ADULT FLY TRAPS & REPELLENTS

Biting Fly Trap

No Poisons! No Baits! No Electricity!

TARGET: Biting flies, stable flies, black flies and bottle flies.

DESCRIPTION: As discovered by Dr. D. E. Williams of the USDA, biting flies are attracted to sunlight as it shines through a particular type of fiberglass. A cylinder has been created of this fiberglass and coated with a clear sticky substance. They will be drawn in by the glass but unable to escape the stickiness. One trap can catch up to 5,000 flies! Each package contains the following: 1 fiberglass cylinder, 1 wooden stake, 2 brass fasteners, 2 giant paper clips, 1 sticky sleeve, 1 replacement sleeve (additional sleeves can be purchased as needed) and complete instructions. Weight - 1.5 lbs. Box size - 12 1/4 x 26 1/2 x 1 1/2 inches.

SUGGESTED USE: Any place biting flies are a problem, i.e., stables, kennels, zoos, compost piles, backyards, swimming pools, golf courses and beaches.

Espree® Aloe Herbal Horse Spray

Contains A Natural Sunscreen!

TARGET: Repel and kill flies and other insect pests.

DESCRIPTION: This all-purpose fly repellent combined with natural coat conditioners and sunscreens is incredibly effective. This all natural, non-irritating spray will aid in the control of flies, mosquitoes, gnats and other insect pests.

SUGGESTED USE: Concentrated formula available in quart and gallon sizes. Dilutes 5 to 1 with water or 3 to 1 for tougher cases.

ACTIVE INGREDIENTS: Citronella, eucalyptus, and cedarwood in a combination of aloe and mineral oil that conditions the coat.

ARBICO Organics™ Solar Fly Trap

Captures Hordes Of Flies!

TARGET: Adult flies.

DESCRIPTION: This built-to-last, rust-free, heavy duty trap goes anywhere to reduce existing fly populations, fly blooms and migrant flies. Used by gardeners, pet owners, kennels, horse owners, breeding and training facilities, dairies, poultry and swine facilities, feedlots and other places where flies are a problem. Dimensions: 12” diameter x 10.5” tall.

SUGGESTED USE: Mix the yeast bait with water and pour into container at the bottom of the trap. Within seconds flies are lured into the trap. They enter into the confinement chamber and dehydrate from exposure to the sun. When it begins to fill up with flies, just empty, hose out and reset with new bait. Comes with one packet of bait, which is enough for approx. 5 weeks. Use 1 trap for 5-10 horses.

**MOSQUITO CONTROL**

**Mosquito Bits®**

**Harness The Power Of Bti For A Clean, Quick Kill.**

**TARGET:** Mosquitoes and Fungus Gnats

**DESCRIPTION:** Mosquito Bits uses the biological larvicide Bacillus thuringiensis v. israelensis (Bti) to quickly kill mosquito larvae in a wide range of habitats. When spread uniformly over the surface of water, the Bti will float down into the water where the larvae will consume it and die; usually within 24 hours. Bits are not harmful to people, animals or plants. Repeat after a 7-10 day interval. For Fungus Gnat control: Spread the granules over the soil until the area is covered. Moisture in the soil will dissolve the Bits. Re-apply every 3 weeks.

**SUGGESTED USE:** Sprinkle 1 teaspoon per 25 sq. ft. or 1 tablespoon per 75 sq. ft. (½ lb. per 2178 sq. ft.) over the surface of containerized standing water. This includes bird baths, water troughs, unused swimming pools, old automobile tires, water gardens, rain barrels and more. DO NOT APPLY to covered. Moisture in the soil will dissolve the Bits. Re-apply every 3 weeks.

**Mosquito Dunks®**

**Simply Place In Standing Water To Kill Mosquitoes Where They Grow.**

**TARGET:** Mosquitoes

**DESCRIPTION:** When placed in standing water, Mosquito Dunks will float on the water and they will slowly release the bacteria Bacillus thuringiensis v. israelensis (Bti) as they melt. This bacterium is a potent mosquito larvicide and as it disperses into the water it is eaten by, and kills, the mosquito larvae growing there. Dunks can be anchored with a string to keep them from washing away. They can also alternate between being wet and dry without losing effectiveness. Bti targets specific pests and is not harmful to people, animals or plants. Each dunk is effective for 30 days.

**SUGGESTED USE:** Use 1 dunk for 100 sq. ft. of water. Use in any containerized standing water found near the home, except finished, treated drinking water. This includes bird baths, water troughs, unused swimming pools, old automobile tires, water gardens, sump pumps and more.

**AQUABAC® 200G Granular Bti Mosquito Control**

**Use This Bti Larvicide Wherever You Have Mosquitoes Breeding**

**TARGET:** Larval stages of mosquitoes and black flies.

**DESCRIPTION:** AQUABAC 200G contains Bacillus thuringiensis var. israelensis (Bti), a bacteria that specifically targets mosquitoes and black flies in their larval stage, but is harmless to other living things. Once ingested, Bti will work quickly to damage cells and paralyze the larva. In addition, since AQUABAC 200G does not affect larva predators, they will continue their work alongside the Bti.

**SUGGESTED USE:** Can be applied to almost any habitat that supports mosquito or black fly larvae. Do not use directly in water sources for human consumption. Broadcast by hand or hand spreader in small areas or by standard ground or aerial dispersing methods for larger areas. If water is clear, broadcast at 2.4-10 lbs. per acre. If water is brackish, murky, polluted or full of algae, broadcast 10-12 lbs. per acre. Lasts for approximately 2 weeks.

**AQUABAC® Xt**

**Use This Powerful Biocontrol Liquid To Kill Mosquito Larvae In Water.**

**TARGET:** Larval stages of mosquitoes, fungus gnats, aquatic midges and nuisance flies.

**DESCRIPTION:** This Bacillus thuringiensis var. israelensis (Bti) offers the same powerful pest control in a convenient liquid form. Bti is a bacterial that expressly targets mosquitoes, fungus gnats, aquatic midges and nuisance flies in their larval stages. Once ingested, it will work rapidly to damage cells and fatally paralyze the larva. AQUABAC Xt will not harm any other form of aquatic life or beneficial insects.

**SUGGESTED USE:** This product can be applied via conventional aerial and ground application equipment (or metered release system) in nearly any habitat that supports the targeted pest larvae. For mosquitoes, use between .25-2.0 pts./100 gals. Higher rates apply when water is polluted, adult populations are high or there is a lot of algae. Do not apply this product in any type of irrigation system or in any sources of water that are for direct human consumption. More specific application rates can be found on the package label.

Natular® DT

These Easy-to-Use Fizzy Tablets Kill Mosquito Larvae For 60 days!

TARGET: Use to kill the larvae of container breeding mosquitoes, e.g., Aedes aegypti and Aedes albopictus.

DESCRIPTION: Use this Spinosad-based product to kill mosquito larvae in standing water. These small bi-layer tablets use a dual-release action to ensure a quick kill and continuous control. The first layer is effervescent and will bubble up, dissolve and spread within 60 seconds and begin killing larvae within 24 hours. The second layer dissolves more slowly over the next 60 days. Can be applied to sites that contain fish and plants. Poses no threat to honeybees and other beneficials. Tablets may be cut in half for use in smaller areas.

SUGGESTED USE: Use 1 tablet to treat up to 50 gallons (192 liters) or 25 sq. ft. For continuous action, keep tablet immersed in water. Can be allowed to remain in water where they breed, kills adult mosquitoes on contact and suffocates larvae in standing water within approximately 24 hours. Saturate all plants including grass, vegetables and trees. Applications last up to 4 weeks.

Natular DT - 60 day tablet - 12 ct. package
1211250 $11.75
1211252 $471.25

Natular® G30 WSP

An exceptional larvicide in convenient water soluble pouches.

TARGET: Most common vector and nuisance mosquitoes, including Aedes, Anopheles and Culex.

DESCRIPTION: Using Spinosad as an active ingredient, Natular G30 WSP is an extremely effective and easy-to-use mosquito larvicide. Spinosad is a potent nerve agent that provides exceptional control from the 1st-4th instar stages of larval. It is highly selective to insects, so there is very low toxicity to mammals, other non-target organisms, honeybees and beneficials. This eco-friendly formulation breaks down quickly in the soil and degrades rapidly in sunlight. Each pouch contains 10 grams of product and will dissolve quickly in water. These lightweight pouches come in a convenient re-sealable bag, so you can easily reach in and get just what you need.

SUGGESTED USE: Apply 1 or 2 pouches per listed site per 100 sq. ft. (up to 2 feet in depth), or 1 pouch per 750-1500 gallons. Use entire contents of water soluble pouch, do not break open or use partial contents of a pouch. Reapply after 30 days. More frequent applications may be made when conditions warrant. For applications in storm or water drainage areas, sewers and catch basins, place 1 or 2 pouches into each catch basin. For applications to small contained site (less than 100 sq. ft), use 1 single pouch per site.

Natular G30 WSP - single - 10 g pouches/50 ct.
1211140 $69.75
1211142 $22.99

Natular G30 WSP - 10 g pouches/50 ct./case of 10

Aunt Fannie’s Mosquito Spray
Tough On Mosquitoes But Gentle Enough To Use On Your Kids.

TARGET: For use as a topical mosquito repellent on children (6 months of age or older) and adults.

DESCRIPTION: The 5 essential oils in this spray (soybean, cedarwood, peppermint, lemongrass & geranium) will gently coat you in a light, wonderfully fragrant mist that will keep working up to 4 hours. Although, the oils are non-irritating to most skin, there is a small chance of an allergic reaction for some people. When applying to children, do not apply to hands. This bottle has a head that will dispense a fine mist for a nice, long spray at any angle (even upside down). DEET-free and contain no dyes, phenols, formaldehyde, neonicotinoids or pyrethrins.

SUGGESTED USE: Spray evenly over exposed skin every 4 hours. Use adult supervision when applying to children. Avoid contact with eyes and mouth.

1280681 Aunt Fannie’s Mosquito Spray - 150 ml $10.99

Aunt Fannie’s Mosquito Wipes
A Deet-Free Mosquito Repellent Wipe That Is Perfect For On-The-Go!

TARGET: Repels mosquitoes, gnat, black flies and other biting insects.

DESCRIPTION: These insect repellent wipes have a delightful scent, which comes from the fragrant botanical oils they’re made of: citronella, peppermint, cedar, lemongrass and geranium. Each towelette comes in an individually wrapped packet that is easy to slip into a purse, pocket, diaper bag or backpack. These wipes are 100% biodegradable, made from unbleached material, non-irritating, non-staining and DEET-free. They contain no dyes, phenols, formaldehyde, neonicotinoids or pyrethrins.

SUGGESTED USE: Apply evenly to exposed skin every 2-3 hours. Product can be applied to clothing. Use adult supervision when applying to children and do not use on children under 6 months old.

1280670 Mosquito Wipes - 10 Towlettes $9.99
1860675 Mosquito Wipes - Case of 12/10-Packs $95.00

Chig-R-Blok
Take Back Your Yard — Make The Outdoors Fun Again!

TARGET: Chiggers, ticks, mosquitoes and other flying insects.

DESCRIPTION: Finally, a natural and effective solution to all those itchy, nasty, biting pests. Made from a blend of botanical oils, herbs and essential oils, Chig-R-Blok creates a barrier to repel insects and also treats existing bites and rashes. Chig-R-Blok keeps chiggers, ticks, mosquitoes and other flying insects at bay and will stop the itching associated with poison ivy, poison oak and poison sumac; allowing your skin to heal faster. Available in two formulas: Chig-R-Blok Oil and Chig-R-Blok Balm.

- DEET free formula is made with cherry kernel, shea, almond, apricot, neem, karanja, hemp and pumpkin seed oils. It also contains geranium, carrot, patchouli, rosemary, frankincense, lemongrass, lavender, mint and myrrh essential oils.
- Water-resistant and can last 4-8 hours (depending on perspiration).
- Can be used for humans, dogs and horses. Not for cats.

SUGGESTED USE: As a Repellent: Avoiding the face area, apply to forearms, from the kneecap down to tops of feet, the waist area and the back of the neck. Don’t forget those tender areas that mosquitoes find irresistible.

As a Treatment: Apply Chig-R-Blok as needed to bites: allow at least 90 seconds for itching to subside. To aid in healing insect bites, apply twice daily.

1212005 Chig-R-Blok - 2 oz. Oil $10.49
1212004 Chig-R-Blok - 4 oz. Oil $14.99

Mosquitoes Transmit Serious Disease

Humans: Zika Virus, West Nile Virus, Malaria, St. Louis Encephalitis, La Crosse Encephalitis

Dogs and Cats: Dog Heartworm

Horses: Eastern Equine Encephalitis Virus, Western Equine Virus, West Nile Virus, St. Louis Encephalitis

Livestock: Encephalomyelitis, Anaplasmosis, Swamp Fever, Fowlpox
**PERSONAL REPELLENTS**

**BiteBlocker® Herbal Repellents**

**Protection From Biting Pests! “DEET Free”**

**BiteBlocker Insect Repellent Spray**

**TARGET:** Mosquitoes, black flies, gnats and no-see-ums (biting midges).

**DESCRIPTION:** This effective spray is safe to use on every member of your family and will last up to 3 hours. For optimum protection, re-apply every 2 hours. Contains soybean and geranium oils, plus inert ingredients.

**BiteBlocker Xtreme Insect Repellent**

**TARGET:** Mosquitoes, black flies, gnats, no-see-ums (biting midges) PLUS ticks and fleas.

**DESCRIPTION:** Protects up to eight hours from mosquitoes, black flies and other biting insects and ticks. Contains soybean, geranium and caster oils, plus inert ingredients.

**SUGGESTED USE:** For the entire family. Re-apply as needed.

**Bug Protector Spray Repellent - Mosquitoes**

**Don’t Let Mosquitoes Ruin Your Outdoor Life!**

**TARGET:** Mosquitoes, gnats and other insects.

**DESCRIPTION:** Mosquitoes can make any outing miserable and carry many serious diseases. This Deet-free spray repellent uses lemongrass, geranium, peppermint and cinnamon essential oils to provide full protection without the nasty smell, stickiness and harmful ingredients of toxic bug sprays. Mosquito-borne diseases are not limited to people; there are a number of potentially fatal diseases that affect animals and Bug Protector works just as well for animals as it does for people. It has been formulated so that you can apply the spray directly to your pet’s fur for thorough protection. In addition to the Spray Repellent, we offer Bug Protector Spray Pen Repellent and the Bug Protector Balm Stick Repellent. These are ideal for taking your bug protection with you wherever you go.

**SUGGESTED USE:** Thoroughly spray product on exposed skin or pet’s fur and allow to dry without wiping. Reapply as needed.

**Bug Bam! Mosquito Roll-On™**

**Protect Yourself From Blood-Sucking Pests With This Eco-Friendly, Lemony-Fresh Roll-On!**

**TARGET:** Repels mosquitoes, fleas, ticks, gnats and other flying, biting insects.

**DESCRIPTION:** Ditch the nasty, chemical-smelling insect repellents and use this lemony repellent to roll on DEET-free protection from annoying and dangerous biting, flying insects. This convenient roll-on allows you to control where and how much you apply, for targeted personal control. Made with an organic, non-GMO soy bean oil base and fragrant botanical oils, (including citronella, geranium, lemongrass and peppermint oils) this scientifically tested and proven formula is a great choice for any outdoor activity. Each application provides up to 3 hours protection.

**SUGGESTED USE:** Shake bottle for 3-4 seconds before opening and then remove cap. Place roller on exposed skin and apply liberally to any exposed areas. Replace cap when not in use. Reapply every 3 hours as needed.

Rich, vibrant soil is the key to a fertile and self-staining garden ecosystem. John & Bob’s creates soil products that build healthy, productive soils the way that nature does—with beneficial microorganisms, minerals and microbes. Create soil that is bursting with life with the four product system of Optimize, Maximize, Nourish-Biosol and Penetrate.

Maxicrop goes to the frigid waters off the Norwegian coast for the seaweed that they use in their products. There the confluence of arctic waters, mountain run-off and the Gulf Stream creates the perfect environment for the finest seaweed to grow. The quality of their products show the journey’s worth it.

SaferGro products are brought to us by SaferGro Labs, a facility focused on the research and development of organic and safe products for commercial and home garden use. By using SaferGro products, all growers can take advantage of this research. These products provide a safe way to enter into the world of earth-friendly growing.

Spiked Soil has everything you need for optimum results, without the hassle and expense of mixing different products. Developed by horticulture professionals with 30+ years of experience, Spiked Soil has created the ultimate plant cocktails. These three unique concoctions supply all you need every step of the way.

Neptune’s Harvest, a division of Ocean Crest Seafood, makes their fertilizers from the fish that they catch in the nutrient-rich North Atlantic Ocean. In this way, they utilize 100% of the seafood they harvest. These highly nutritious protein fertilizers are made by using a cold process employing enzymes (natural biological catalysts) to break down the flesh, and other parts of the fish, into simpler protein complexes. This process is called Hydrolysis and the result is an exceptional fish hydrolysate fertilizer.

JH Biotech, Inc. manufactures traditional and organic products for home and commercial use. Their products can be used in locations such as greenhouses, nurseries, field crops and gardens. Their Research Division is dedicated to improving food productivity without sacrificing quality or safety.

Down to Earth makes organic fertilizers that boost soil health and encourage plant growth in an earth-friendly and sustainable manner. Nutrients provided by the fertilizers give your plants that needed extra boost for vigorous growth and the countless microorganisms in the soil will thrive with the extra sustenance and keep your soil healthy. Have a small garden? Try the new “mini” sizes.

Maxicrop goes to the frigid waters off the Norwegian coast for the seaweed that they use in their products. There the confluence of arctic waters, mountain run-off and the Gulf Stream creates the perfect environment for the finest seaweed to grow. The quality of their products show the journey’s worth it.

Suståne products are made in the USA and exported to over 60 countries. Their granular fertilizers are made from aerobically composted turkey litter with added plant nutrients and soil amending ingredients and are backed by over 30 years of independent applied research. Each fertilizer is USDA Bio based certified and OMRI listed.
SOIL AMENDMENTS

ARBICO Organics™ Compost Plus

Our Premium Formula – Made Exclusively At ARBICO Organics!

TARGET: Soils lacking beneficial bacteria resulting in plants with low brix levels.

DESCRIPTION: This compost is super-charged with billions of beneficial bacteria that will increase your plants’ health making them grow faster, produce more and resist diseases and insect pests. It contains a specially formulated blend of fermented nitrogen and carbon materials that revitalizes soil, speeds up decomposition of organic matter and raises brix (sugar level – vitality) levels. Our compost has chitinase which has nematicidal properties.

SUGGESTED USE: Use 3-10 Tbsp./potted plant, mix. Use 1 lb./12 sq. ft. Use a 2 cubic ft. bag to treat 50 sq. ft. and use 2-4 tons/acre for farms.

1305601 Compost Plus - 1 lb. Bag $8.90
1305602 Compost Plus - 5 lb. Bag $11.50
1305610 Compost Plus - 1 Cubic ft. Bag $17.00
1305603 Compost Plus - (2) 1 Cubic ft. Bags $28.00
1305607* Compost Plus - 1/2 Ton Pickup Truck Load CALL

*Call to arrange pickup. Pickup in Catalina, AZ.

ARBICO Organics™ Compost Tea Bag

The Healthy Elixir For Your Plants!

TARGET: Plants that are stressed and need an extra boost!

DESCRIPTION: A highly concentrated extract of beneficial microorganisms.

SUGGESTED USE: Mix with up to 5 gallons of warm water. Steep for 8-48 hours. Agitate frequently. Use immediately (to preserve life of microorganisms) as a foliar spray or soil drench.

1305402 Compost Tea Bag - Small $9.00

ARBICO Organics™ Earthworm Castings

Will Help Suppress Disease, Improve Soil Structure & Will Not Burn Your Plants!

TARGET: Soils lacking nutrients and microorganisms.

DESCRIPTION: Castings add microbial life and nutrients to soil. One of the best ways to add nutrients to your soil.

SUGGESTED USE - Earthworm Castings:

- Seedlings: Use up to 20% Earthworm Castings by volume in potting mix.
- Vegetables & Annuals: Side dress with 1/2 cup of Earthworm Castings per plant every 2-4 weeks during growing season.
- Transplants: Place 1 in. of Earthworm Castings in planting hole before placing plant.
- Potted Plants: Mix 1 in. of Earthworm Castings with top of soil and water in. Take care not to harm shallow roots.
- Trees & Shrubs: Mix 1 in. of Earthworm Castings with the top of soil around base of plants every month during growing season.
- Compost Tea: Add 1 cup of Earthworm Castings per gallon of non-chlorinated water. Add 1 tsp. of unsulphured molasses and aerate for 24-48 hours by stirring frequently or by using an aquarium pump. Use weekly as a foliar spray or soil drench.

1308200 Earthworm Castings - 1 lb. Bag $4.95
1308201 Earthworm Castings - 5 lb. Bag $15.20
1308202 Earthworm Castings - 10 lb. Bag $25.00
1308203 Earthworm Castings - 25 lb. Bag $47.95

*Call to arrange pickup. Pickup in Catalina, AZ.

ARBICO Organics™ Earthworms - Eisenia fetida

Use In Your Garden & With The Worm Factory® - Fun For The Whole Family!

TARGET: Vermicomposting bins and soils.

DESCRIPTION: Earthworms (red wigglers) consume organic matter and convert it into enriching castings full of micro-organisms, nutrients and humic acids that improve, aerate, and condition soil. Castings work like highly nitrous fertilizers that contain about 5X the available nitrogen, 7X the available phosphorus, 3X the exchangeable magnesium, 11X the available potash, and 1.5X the calcium found in 6 inches of soil. For indoor and outdoor use; red wigglers are perfect for worm bins.

SUGGESTED USE: 1,000 per Worm Factory tray or 10 qt. worm bin. ≈2-3 worms/≈1 sq. ft., 1,000 worms/400 sq. ft.

1308003 ARBICO Organics Earthworms (=1,000) $34.00
1308020 ARBICO Organics Earthworms (=2,000) $49.50
1308050 ARBICO Organics Earthworms (=5,000) $99.00

**Inocucor™ Garden Solution**

Stimulate Root Growth & Boost Yields With This Special Blend of Beneficial Microbes & Enzymes.

**TARGET:** High value crops in farms, fields, greenhouses, hydroponic and aquaponics systems.

**DESCRIPTION:** This OMRI listed biological soil inoculant serves as a catalyst to stimulate root growth and microbial activity to boost harvest yield and quality. Proven effective, this blend is designed to benefit a wide-selection of high-value crops. It reduces the effects of abiotic stress factors like transplanting, drought and soil salt content. In addition to the beneficial microbes, Inocucor Garden Solution contains an optimal blend of enzymes to stimulate microbial colonization in the soil. This ensures development of a healthy and bioactive root zone and boosts overall plant vigor.

**SUGGESTED USE:** Dilute 100x in water (or 3 tsp. per gal.). Apply throughout growing season or every 30 days. For stressed plants, add 6 tbsp. per gal. and apply weekly.

**Simply Silica, 0-0-.5**

Get Improved Yields & Vigorous Growth In Any Growing Media.

**TARGET:** Crops grown indoors, outdoors and in hydroponics.

**DESCRIPTION:** Adding Silica to your plants offers numerous benefits; this is especially true in hydroponics, where plants have no soil to draw Silica from. It can increase growth rate by encouraging the development of cells, improve uptake of nutrients, provide more robust resistance to environmental stressors, improve use of CO2 and increase chlorophyll levels, strengthen resistance to pests and diseases, limit transplant shock and extend the life of cut flowers and plants. Simply Silica can (and should) be added to any fertilizer regime. For best results, add some with every single feeding throughout the growing cycle.

**SUGGESTED USE:** Use to improve plants’ growth and natural defenses to environmental stresses.

**Earth Alive™ Soil Activator™**

Bring Your Soil To Life With This Powerful Organic Soil Inoculant!

**TARGET:** For use on all types of plants and soils.

**DESCRIPTION:** This OMRI listed soil inoculant is a patent-pending mix of three naturally occurring soil microorganisms and an all-natural wood extract (a forestry by-product). The beneficial bacteria in Soil Activator solubilize phosphorus and fix atmospheric nitrogen for improved nutrient availability to plants and increased yields. They also encourage active root growth for robust plants from the root up. Can be used as a dry mix soil or as a soil drench.

**SUGGESTED USE:** Use at the beginning of each growth cycle or season. Option 1: 3.5 oz. of treats up to 21 gallons of soil. Mix with soil at seeding or transplant. Option 2: 3.5 oz. treats up to 1,080 sq. ft. of garden. Mix with at least 2 gallons of water and apply at the base of plants.

**Great White® Premium Mycorrhizae**

**Promote Strong Root Systems, While Reducing Water & Fertilizer Needs!**

**Target:** Use for seed starts, transplants and plants suffering from stress, low yields and poor health.

**Description:** Great White Premium Mycorrhizae is a concentrated formula that boosts nutrient and water absorption generating root development, plant growth and yield. Water soluble, this product is easy to apply and will quickly begin interacting with plants. It features:

- 15 different species of various endo and ectomycorrhizal
- 14 different species of beneficial bacillus bacteria
- 2 species of trichoderma (commonly found to help fight against fungal diseases, i.e., *Sclerotinia sclerotiorum*, *Botrytis*, *Fusarium*, and *Penicillium*)
- Plant vitamins

**Suggested Use:** For hydroponic, drenching or injection applications, mix at a ratio of about 1 tsp./2 gal. of water or ≈ 1 part/2 parts water.

**Plant Success Organics Granular™, 3-1-2**

Create A Living Soil With this Team Of Mycorrhizae, Beneficial Bacteria & Fertilizer.

**Target:** New plantings in a variety of soils and climates.

**Description:** Carefully crafted from mycorrhizae, bacteria, trichoderma and an all-purpose fertilizer, this granular formula will build a microbial system on and around plant roots while feeding the beneficial organisms. Root colonization encourages stronger and quicker root growth, increases water and nutrient uptake and creates a healthy soil that can better fight off soil-borne diseases. Apply by simply sprinkling into plant hole, or by mixing with soil, and see fast-growing, heartier plants in no time.

**Suggested Use:** Spread the granular at the bottom of the planting hole. When filling the planting hole, spread product in close proximity to the roots.

**Down To Earth™ Bio-Live, 5-4-2**

This Product Has It All – Including Mycorrhizal Fungi!

**Target:** Soils depleted of both nutrients and beneficial microbial activity.

**Description:** Made from fish bone meal, fish meal, feather meal, crab meal, alfalfa meal, K-Mag, humates, kelp meal, beneficial bacteria and Mycorrhizal fungi. This great all-purpose goes the extra mile by not only fertilizing but it also helps to stimulate soil root relationships.

**Suggested Use:** Apply 3-5 lbs./100 sq. ft. at planting and as needed.

John & Bob’s Maximize Microbes & Minerals

A Highly Concentrated Combination Of Essential Minerals & Microbes That Add Life & Vitality To Your Soil!

TARGET: Use as part of a complete soil improvement program along with John & Bob’s Optimize, Penetrate and Nourish.

DESCRIPTION: Maximize adds vital minerals and microbes that transform lifeless soil into a living community. Unlocks stored nutrients in the soil, making them available to plants.

SUGGESTED USE: Use 8 lbs. per 1,000 square feet of soil. Cast or spread onto soil or lawn and water in. Apply twice per year.

1332711 John & Bob’s Maximize - 8 lbs. (treats ≈1,000 sq. ft.) $24.95
1332712 John & Bob’s Maximize - 32 lbs. (treats ≈4,000 sq. ft.) $74.95

John & Bob’s Penetrate Organic Liquid Biotiller

This Liquid “Biotiller” Kit Breaks Apart & Transforms Hard Clay Into Rich, LOAMY SOIL!

TARGET: Helps break up hard, compacted clay soils and re-invigorates and opens up hard, dry, lifeless soil.

DESCRIPTION: Mix two bottles together.

• Bottle 1 contains dormant, beneficial bacteria.
• Bottle 2 contains food to enliven the dormant bacteria and saponin. Saponin is the extract from the Yucca plant which coats the clay particles that will help break up the hardest, compacted soil.

SUGGESTED USE: Use 8 oz. (1 each of A & B bottles) per 1,000 square feet mixed with 1 gal. of water. Mix equal parts of each bottle into a clean hose-end sprayer, watering can, or pump sprayer. Spray evenly over the soil or lawn. Use Penetrate twice per year for optimal effect.

1332713 Penetrate Organic Liquid Biotiller - 8 oz. $24.95
1332717 Penetrate Organic Liquid Biotiller - 32 oz. $64.95

John & Bob’s Grow Green Optimize Soil Optimizer

Feed Your Plants & Add Beneficial Microbes To The Soil!

TARGET: Part of a complete soil improvement program when used along with John & Bob’s Maximize, Penetrate and Nourish.

DESCRIPTION: Optimize consists of decomposed humus derived from leonardite, which is found in the top layers of the earth’s surface. In addition, Optimize contains calcium and iron, which work with humus to balance the soil and feed the beneficial microorganisms that are necessary for plant texture and health.

SUGGESTED USE: Broadcast at the rate of 3 lbs. per 1,000 square feet of soil or lawn and water in. For vegetable transplants or up to 5 gallon transplants, use 2 tbsp.

1332707 Optimize Soil Optimizer - 3 lbs. (treats ≈1,000 sq. ft.) $19.95
1332708 Optimize Soil Optimizer - 6 lbs. (treats ≈2,000 sq. ft.) $29.95
1332709 Optimize Soil Optimizer - 12 lbs. (treats ≈4,000 sq. ft.) $54.95
1332710 Optimize Soil Optimizer - 42 lbs. (treats ≈14,000 sq. ft.) $85.00

John & Bob’s Grow Green Nourish-Biosol®, 7-2-1

100% Vegetable Sourced Fertilizer!

TARGET: Nourish is a 100% vegetable sourced fertilizer. Use as part of a complete program for soil improvement along with John & Bob’s Maximize, Optimize and Penetrate.

DESCRIPTION: This fertilizer provides instant food for plants, available in just a few days for root uptake. Ingredients include fermented soybean and cottonseed meal, which are full of simple sugars to feed the beneficial bacteria supporting their activity in the soil needed to support healthy and quick plant growth.

SUGGESTED USE: Spread onto the soil or lawn at a rate of 6 lbs. per 1,000 square feet, then water it in. Apply twice per year.

1332713 Nourish-Biosol - 6 lbs. (treats ≈1,000 sq. ft.) $22.95
1332714 Nourish-Biosol - 24 lbs. (treats ≈4,000 sq. ft.) $59.95
1332715 Nourish-Biosol - 55 lbs. (treats ≈10,000 sq. ft.) $99.95

Restore Poor, Compacted Or Lifeless Soil With These Smart Soil Solutions.
### Neptune’s Harvest Fish & Seaweed Fertilizer 2-3-1

The Best Of Both Products For A Complete Fertilization Program.

**TARGET:** All types of plants and crops.

**DESCRIPTION:** Increase yields and improve shelf life of fruits and vegetables. Flowers and foliage will be stronger and more colorful. Great for hydroponics.

### Neptune’s Harvest Seaweed Plant Food 0-0-1

Contains Over 60 Naturally Occurring Nutrients & Amino Acids!

**TARGET:** Plants and crops exposed to stress.

**DESCRIPTION:** Enhances plant development, color and vigor. Increases plant hardiness and resistance to adverse conditions, such as early frost, extreme heat and lack of moisture. Can be used as a seed inoculant, increases and accelerates germination, for rapid development of a healthy root system.

**TOOLS**

**Brandt® Organics SKH Sticker**  
Keep Your Sprays On Your Plants With This OMRI listed Sticking Agent.  
DESCRIPTION: Brandt Organics SKH Sticker is a mineral-based premium sticker for foliar applications in high moisture conditions that contains an ingenious combination of Bentonite, Lactose and Casein. It will improve the effectiveness and increase the longevity of insecticides, insect growth regulators, nutritional sprays, fungicides and herbicides. Specially formulated to stand up to moisture, this product will resist rain and irrigation run-off and effectively adhere sprays to their target.  
SUGGESTED USE: Product is compatible with most agricultural chemicals. However, if the desired combination has not been previously used, a compatibility test is recommended. For ground applications with (a) insecticides and insect growth regulators use 3/4 lb. per 100 gallons of spray solution, (b) fungicides and herbicides: use 1-2 lbs. per 100 gallons of spray solution. For aerial applications use 2-3 lbs./acre in a minimum of 10 gallons of spray solution. If higher rates are recommended by a pesticide label, follow those label directions.  
1440100 Brandt Organics SKH Sticker - 5 lbs. $14.50  
Cannot be shipped to the following states: AR, HI, ID, KY, MS, TN, UT, WA, WV, WY
Chameleon Adaptable Hose End Sprayer

Get Perfect Application With This Highly Adjustable Sprayer.

DESCRIPTION: Multipurpose sprayer that works great with Beneficial Nematodes (see pages 17-19). This affordable, easy-to-use, light-weight multi-purpose sprayer is perfect for applying your natural biologicals, fertilizers, amendments, insecticides, herbicides & fungicides.

SUGGESTED USE: Any garden products requiring dilution and application with a sprayer, including applying Beneficial Nematodes.

1800006 Chameleon Adaptable Hose End Sprayer - 1 Sprayer $14.75

All Purpose Dispenser Tube

Dispense Milky Spore & Other Powdered Material Easily!

DESCRIPTION: Use with Milky Spore and other powdered products and fertilizers for quick and effective application in lawns and gardens! This all-purpose dispenser holds up to 40 oz. of Milky Spore powder. Dispensers are sold empty. Milky Spore powder sold separately (see page 23).

SUGGESTED USE: Fill dispenser tube and begin shaking dispenser while walking the area to be treated.

1216052 All-Purpose Dispenser Tube $14.50

ThermX™-70 Natural Wetting Agent

Overcome Adverse Water Conditions!

TARGET: Increases water & fertilizer uptake.

DESCRIPTION: This natural wetting agent is derived from yucca and contains 20% saponin extracted from Yucca schidigera. Saponin helps plants overcome adverse water conditions and is a great sticker for other sprays. Use ThermX-70 to increase crop’s ability to establish in stressed conditions and increase water and fertilizer uptake. Increases permeability in heavy clay soil and reduces salt and alkali problems by improving drainage. Stimulates root growth, extending the area irrigation reaches.

SUGGESTED USE:

Wetting Agent: ≈1/4 tsp./gal. water, ≈2-3 oz./acre
Soil: ≈1-2 tsp./gal. water, ≈16 oz./acre

1402403 ThermX-70 Natural Wetting Agent - 1 Quart $27.00
1402404 ThermX-70 Natural Wetting Agent - 1 Gallon $94.50
1402405 ThermX-70 Natural Wetting Agent - 5 Gallons $330.55
1402406 ThermX-70 Natural Wetting Agent - 55 Gallon Drum* CALL

WeedGuardPlus® Organic - Heavy Weight Rolls

This Tough Weed Block Will Hold Up Under The Elements!

TARGET: Use for weed suppression.

DESCRIPTION: This paper weed block is adaptable to nearly any size growing operation in nearly any environment. 100% biodegradable; no need to remove it. Saves time; just lay it down before planting and save yourself countless hours of weeding, spraying or disposing of materials. Or apply it right on top of existing weeds and/or invasive plant roots and smother them out. Saves money; no need to buy expensive herbicides. Improves yields; your plants will have a chance to establish themselves without competing with weeds. Porous yet strong; so plants can be watered by natural rainfall or by other means. Allows air flow, to overheating by the sun. Maintains this porosity through all but the most severe of weather. Can be applied by machine or by hand; the creped version is highly flexible and best for machine applications. These rolls are excellent for textured soils and/or those projects that are meant to be long-term. 54% heavier than the standard rolls and offers applications. These rolls are excellent for textured soils and/or those projects

TARGET:

Use for weed suppression.

DESCRIPTION:

SUGGESTED USE:

Put in place before you install transplants or seedlings, or before you sow seeds. Simply prepare the ground, place over the soil, and cover the edges with dirt. Product may be affected by variances in weather or soil conditions.

1453851 Heavy Weight - Smooth Finish - 36” x 100’ $24.99
1453852 Heavy Weight - Smooth Finish - 48” x 100’ $32.99
1453853 Heavy Weight - Smooth Finish - 36” x 100’ $30.99

Prevent Weeds & Feed Your Lawn With This Organic Corn Gluten Meal.

**TARGET:** Barnyard grass, Bermuda grass, crabgrass, creeping bentgrass, curly dock, dandelions, foxtail, lambsquarter, pigweed, plantains, purslane, redroot bigweed, smart weed and more.

**DESCRIPTION:** This OMRI listed corn gluten meal works wonders in 2 ways: it is a natural broadleaf pre-emergent that suppresses weeds to prevent them from establishing and it provides high levels of nitrogen to green up already established plants and turf. For use as an herbicide, apply before germination of seeds. Should not be applied to new seedlings or when laying sod.

**SUGGESTED USE:** Apply 6 lbs. per 1,000 sq. ft. with a broadcast spreader. Provides 0.54 lbs. of nitrogen per 1,000 sq. ft. A 30 lb. bag covers up to 5,000 sq. ft. Apply up to 20 lbs. per 1,000 sq. ft. for enhanced weed prevention.

1226810  Sustâne Spring Weed & Feed - 30 lb. Bag  $35.00

**Gluten-8 OLP™ Liquid Corn Gluten, 1.5-0-0**

This Easy-To-Apply Liquid Weed Control Plus Nitrogen Works Wonders!

**TARGET:** Knockdown control for annual grasses and broadleaf weeds.

**DESCRIPTION:** Gluten-8 OLP Liquid Corn Meal offers pre-emergent weed control with 1.5% nitrogen to feed your soil. This product is derived from water soluble corn gluten meal, which provides effective and economical pre-emergent control of annual grasses and broad leaf weeds with much less effort than the granular corn gluten. Gluten-8 also contains 1.5% nitrogen (lower than granular corn gluten), which can help you manage nitrogen loads. All ingredients are EPA Section 25-B exempt. DO NOT use on grass that’s been recently seeded; after the first mowing, apply at will. This 1 gallon bottle covers up to 4,000 sq. ft.

**SUGGESTED USE:** Greenhouses, agricultural crops, lawns, nursery stock, ornamentals, orchards, home gardens and more.

1273010  Gluten-8 OLP Liquid Corn Gluten, 1.5-0-0 - 32 oz. Hose End  $29.45

---

**SELECTIVE**

**Earth Harvest Gluten-8 Liquid Corn Gluten - Set of 2**

Easy-To-Apply Liquid Weed Control Without The Effort Of Lifting A Heavy Bag Of Corn Gluten Meal.

**TARGET:** Pre-emergent weed control and mild nitrogen fertilizer.

**DESCRIPTION:** Water-soluble and derived from corn gluten meal, it provides pre-emergent control of annual grasses and broadleaf weeds without the effort of applying the granular corn gluten. This product is packaged in a container that has a hose-end spray head for a reliable application.

**SUGGESTED USE:** A 2 quart set of Gluten-8 represents a 40 pound bag of corn gluten meal and treats approximately 2,000 sq. ft.

1273015  Gluten-8 Liquid Corn Gluten - Set of 2 - 32 oz. Hose End  $29.45

**BONIDE® Weed Beater® Fe RTU**

Kill Just The Weeds, Not The Lawn!

**TARGET:** Selectively controls/suppresses broadleaf weeds, moss, lichens, algae and certain diseases growing in lawns.

**DESCRIPTION:** This product uses iron to kill the targeted plant – but not the grass – right down to the root within hours of application with no unpleasant odor. Some grass blades or thatch may darken slightly if contacted, but the grass will recover and not be harmed. You can enjoy your lawn as soon as the spray has dried. It’s okay to re-seed 1 day after application and apply new grass in 1 week.

**SUGGESTED USE:** Do not dilute. Do not apply to drought-stressed grass or when daytime temps will exceed 85°F. Do not apply to bentgrass. Do not apply to newly seeded areas prior to grass seed germination. For best results, repeat treatment in 3-4 weeks, but don’t apply to the same area more than 4 times a year (not including spot treatments).

1453790  BONIDE Weed Beater Fe RTU - 1 Quart  $9.99
1453791  BONIDE Weed Beater Fe RTU - 1 Gallon  $28.99

Cannot be shipped to the following states: CA, DC, MI

---
**BioSafe Weed Control**

This Soap-Based Weed Killer Produces Visible Results Within 24 Hours.

**TARGET:** For control and burndown suppression of annual & perennial broadleaf and grasses. Also controls spore producing plants such as mosses and liverworts.

**DESCRIPTION:** BioSafe Weed Control is a non-selective herbicide that works on contact when applied as a foliar application with a manual sprayer. For best results, cover plant leaves thoroughly and uniformly with spray. Take care to avoid contacting wanted plants. This soap product uses Ammonium Nonanoate to penetrate the cell walls of the plant to disrupt their normal functioning and cause death. This product does not move through the soil or between plants and leaves no harmful residue.

**SUGGESTED USE:** Do not apply this product through any type of irrigation system. Use a hand-held or hose-end sprayer that produces a uniform spray; this will cover the most leaf area for optimal weed control. A 10-13% volume to volume (V/V) dilution (13-16 fl. oz. per gallon of water) is recommended for most situations. Larger weeds, perennial weeds and some grasses may require several applications. Also available in a ready-to-use formulation.

**Phydura™**

Replace Toxic Herbicides With This Wonderful-Smelling Knock Down Spray.

**TARGET:** Unwanted leaves and grasses.

**DESCRIPTION:** OMRI listed Phydura uses clove oil and other biodegradable ingredients to quickly knock down and kill unwanted leaves and grasses. These ingredients work by adhering to the weed and breaking down the cell structure through a burn down process. After application, plants will begin to wilt in 30-60 minutes and be actively dying within 24 hours. Phydura is a non-selective herbicide, which means that all plants that come in contact with the spray will be affected. You will need to take extra care not to allow spray to contact non-target plants. Phydura will not translocate in the soil to the roots of desirable plants.

**SUGGESTED USE:** For younger, smaller plants mix with water at 3:1. For older, larger plants mix at 2:1. Re-treatment will be required for established perennials.

**Disease Control**

**Bacteria:** Plant diseases caused by bacteria are not as prevalent as those caused by fungi, but can nonetheless be damaging. Common plant bacterial diseases include bacterial leaf spot, some blights and citrus greening (Huanglongbing). The damage caused by bacterial infection results primarily in the rotting of the plant tissue, but can exhibit symptoms like gall production, cankers, scabs and unsuitable crop harvest.

**Fungi:** Fungi, along with bacteria, serve as the planet’s main decomposers by breaking down organic material and many form symbiotic relationships with plants; however, the parasitic relationship some fungi develop with plants (e.g. rusts, fungal leaf spot, powdery mildew, etc.) can damage the plants and it is important to have a proper fungicide to minimize those effects.

**Viruses:** Viruses in plants are transmitted most often by sucking insects such as aphids, psyllids and whiteflies. Infected plants typically become partially damaged and weakened; however, some viruses will kill the plant.

---

**RootShield® Plus Granules & RootShield® Plus WP**

**Use This Biological Fungicide To Eliminate Hard To Control Diseases!**

**TARGET:** Plant pathogens and resulting diseases such as Phytophthora, Rhizoctonia, Pythium, Fusarium, Thielaviopsis, and Cylindrocladium.

**DESCRIPTION:** OMRI listed and EPA registered, this product will help eliminate damaging fungal pathogens by colonizing plant root systems and by boosting biological diversity of the rhizosphere. This unique product is comprised of live microbial beneficial fungi *Trichoderma harzianum* strain T-22 and the newly developed *Trichoderma virens* strain G-41, delivering an extended array of pathogen control.

**SUGGESTED USE:** For control and prevention of major fungal pathogens and resultant diseases on greenhouse and nursery vegetables, herbs, ornamentals, fruits, conifer tree seedlings, various trees, legumes, oil seeds and peanuts. One application will last for approximately 12 weeks, and can be used with a 0-hr REI. This product can be used in conjunction with certain other fungicides, see label and other online resources for details.

For granular usage, mix about 1.5-3 lbs. to 1 cu. yd. of mix or about four 40 lb. bags to 100 cu. yds. of soil mix. For WP, use about 6 oz. of powder to 100 gal. of water. For plug trays, flats and small pot with 1-3 in. of soil, use about 100 gal. mix/800 sq. ft. For beds and pots 4-5 in. deep, use about 100 gal. mix/400 sq. ft. For azalea pots 6 in. deep, use about 100 gal. mix/1600 pots.

**PreFence™ Biofungicide**

**Prevent And Control Fungal & Mold Diseases On Agronomic, Vegetable & Ornamental Crops.**

**TARGET:** For use against the following root diseases: Pythium, Fusarium, Rhizoctonia, Thielaviopsis and Cylindrocladium.

**DESCRIPTION:** OMRI listed PreFence contains mycelium and spores from a naturally occurring bacterial strain derived from Sphagnum peat. This bacterium encapsulates disease spores and stops them from causing devastating plant disease. In addition to controlling wilt and root diseases, it is also an exceptional tool to curb damping-off in propagation. It is most effective when used preventively before diseases have taken hold.

**SUGGESTED USE:** Can be dry mixed in potting soils, applied to soil, used for seed treatment or mixed with water for a dip, turf, spray or drench application. To make a suspension of water, mix in a small volume of water (such as 0.25-1.0 gal.) and let stand for approximately 30 minutes. Agitate as needed to evenly disperse PreFence before diluting to final volume (between 0.5-3 pints of water/100 sq. ft.).

**RootShield® Home & Garden**

**Help Your Vegetables, Flowers & Ornamentals Fight Root Diseases!**

**TARGET:** For use against the following root diseases: Pythium, Fusarium, Rhizoctonia, Thielaviopsis and Cylindrocladium.

**DESCRIPTION:** RootShield Home & Garden is an OMRI listed product that will protect your plants from root disease pathogens and give them that extra boost to make them really flourish. The active ingredient in this natural pesticide is *Trichoderma harzianum*, strain T-22, a beneficial fungus. This organism has been thoroughly developed and tested in over 18 years of university studies and is now ready to work for you. It will protect your plants’ roots from soil-borne diseases, which allows them to put their energy into growing and blossoming.

**SUGGESTED USE:** Mix RootShield Home & Garden with water (1-3 tbsp. per gallon) and apply immediately after mixing. Stir regularly during application. Use all your mixture, do not store product mixed with water. RootShield Home & Garden is designed for application to seeds, plant roots and soil for control of plant root diseases and not for spray application to foliage or fruit. **DO NOT APPLY** to sugarcane, pechay, rice, mushrooms, kiwi, tobacco, barley, oats, lemon, apple and chickpea. Not for use on aquatic crops.

Cease® - Biological Fungicide

For Control Of Soil Pathogens As Well As Fungal & Bacterial Plant Diseases!

TARGET: Botrytis, powdery mildew, anthracnose, leaf spot diseases including Alternaria and Entomosporium; bacterial diseases such as Pseudomonas, Erwinia, and Xanthomonas spp., as well as the soil diseases Rhizoctonia, Pythium, Fusarium and Phytophthora.

DESCRIPTION: Cease is a contact biological fungicide that contains Bacillus subtilis, that stops pathogens from developing on plant leaves.

SUGGESTED USE: Approved for NOP production. Use 2-8 qts./100 gallons of water approximately once per week. (see label online for specific crops and diseases.) This product is suitable for wet applications. Use with a spreader sticker such as ThermX™-70 Natural Wetting Agent (see page 49) in wet environments.

1332724  Cease - 1 Gallon  $75.50
1332727  Cease - 2.5 Gallons  $170.00
1332725  Cease - 1 Gallon, Case of 4  $240.00
1332728  Cease - 2.5 Gallons, Case of 2  $275.00

Serenade® Garden Disease Control

This Biofungicide Works Great For Treating A Broad Spectrum Of Plant Diseases.

TARGET: Black spot, powdery mildew, rust, gray mold, late blight, scab and many more.

DESCRIPTION: This biofungicide is made from a patented living microbial strain QST 713 Bacillus subtilis and can be used on roses, vegetables, fruits, nuts, flowers, houseplants, ornamentals, foliage, trees and landscape shrubs.

SUGGESTED USE: Apply in ~7 day increments up to and on the day of harvest. Apply at any time of day, in direct sun and at high temperatures. Treat prior to presence of plant disease and increase frequency in excess environmental moisture. Apply using pressurized hand-held sprayer or hose-end sprayer. For concentrate: depending upon the infection, mix between 2-4 fl. oz. per gal. of water.

2000080  Serenade 32. oz. Concentrate  $22.85
2000081  Serenade 32 oz. RTU Spray Bottle  $15.75
2000082  Serenade 32 oz. RTS Hose End  $26.00

Pvent

This Ultra-Concentrate Biofungicide Offers Long Lasting Protection.

TARGET: Alternaria, anthracnose (Colletotrichum), Bipolaris, Botrytis, Cladosporium, Colletotrichum, Didymella, Fusarium, Helminthosporium, Monilinia, Mycosphaerella, Penicillium, Phytophthora, Plasmodiophora, Plicaria, Pyrenochaeta, Pythium, Rhizoctonia, Sclerotinia, Verticillium, mildews and other plant diseases.

DESCRIPTION: This preventative fungicide provides an enzyme secreted by G. catenulatum, which ruthlessly attacks pathogenic fungi in 3 ways: it rapidly colonizes its host environment and begins working symbiotically in the plant rhizopheres, root zone and in all new growth; it feeds on fungi on treated surface and then reproduces on the same area to ensure against pathogenic re-infection and it promotes Induced Systemic Resistance (ISR) properties in existing plants. Protection lasts 3-4 weeks. Can be used in conjunction with other bactericides/fungicides.

SUGGESTED USE: Apply by spraying or drenching the growth substrate. Surfactants are not generally needed, but a non-ionic type may be used. Foliar Spray - 0.33 oz./5 gallons of water. Repeat every 7 to 14 days, depending on disease pressure. Field Chemigation or Drench - 0.16 oz./100 sq. ft. drip irrigation lines. Fogging - 0.016 oz./100 sq. ft. with a minimum water volume of 0.005 gallons per 100 sq. ft.

1222560  Pvent - 1/2 lb.  $145.99
1222561  Pvent - 1 lb.  $252.50
1222565  Pvent - 1/2 lb. - case of 12  $1,475.00
1222566  Pvent - 1 lb. - case of 12  $2,750.00
1222567  Pvent - 2.2 lbs. - case of 6  $2,880.00

BONIDE® Liquid Copper Fungicide

Use For The Control & Prevention Of Many Fungal Diseases!

TARGET: Works as a knockdown control for the following: anthracnose, bacterial blight, bacterial leaf spot, black spot, Botrytis, brown rot, Cedar apple rust, citrus scab, downy mildew, fireblight, Phytophthora, powdery mildew, and scab.

DESCRIPTION: Liquid copper fungicide helps prevent and treat many diseases on a wide variety of trees and ornamental plants. Liquid Copper can be used on grapes, vegetables, fruit trees, berry bushes, roses, pine, cedars and more. For garden use only.

SUGGESTED USE:
• Mix ~2-6 Tbs./gal. of water or 1 qt./100 gal. depending upon infestation.
• Repeat at 7-14 day intervals until harvest.
• Plant and crop-specific instructions included.

1455101  BONIDE Liquid Copper Fungicide - 16 oz. Conc.  $16.45

Serenade® Garden Disease Control
BioSafe Disease Control - Concentrate & RTU

Eliminate Bacteria & Fungi On Contact!

TARGET: Preventive and curative treatment against plant pathogens and diseases such as Alternaria, anthracnose, Aphanomyces, bacterial spot, bacterial speck, black spot, Botrytis (grey mold), brown spot, downy mildew, Erwinia, Fusarium (root rot), leaf spot, Phythophthora, Plasmopara, powdery mildew, Pseudomonas, Pythium, Rhizoctonia, rust, scab, smut, and Thielaviopsis.

DESCRIPTION: Using the rapid oxidative property of peroxygen, this is a great alternative to copper-based products for eliminating bacteria and fungi on contact. It is safe to use repeatedly on a variety of crops without cultivating resistance or leaving behind any visible residues or odor. It can also be used in hydroponic and aquaponic growing systems and is excellent for cleaning or disinfecting surfaces, tools, water filters and equipment.

SUGGESTED USE: Can be applied to field or greenhouse melons, tomatoes, peppers, snap and dry beans. The 32 oz. RTU formula will cover around 12,000 sq. ft. For concentrate, mix at indicated rates, and fully saturate foliage. For foliar applications, use at an initial rate of 1:150 parts water (.85 fl. oz. to 1 gal. water). For weekly preventative use, mix at a rate of about 1:200 parts water (0.64 fl. oz. to 1 gal. water). For turf treatments, use about 1.3 fl. oz. per gal. of water, 3-10 gals. of solution will cover about 1,000 sq. ft. of lawn. SUGGESTED USE: For field and greenhouse melons, tomatoes, peppers, snap and dry beans. The 32 oz. RTU formula will cover around 12,000 sq. ft. For concentrate, mix at indicated rates, and fully saturate foliage. For foliar applications, use at an initial rate of 1:150 parts water (.85 fl. oz. to 1 gal. water). For weekly preventative use, mix at a rate of about 1:200 parts water (0.64 fl. oz. to 1 gal. water). For turf treatments, use about 1.3 fl. oz. per gal. of water, 3-10 gals. of solution will cover about 1,000 sq. ft. of lawn.

1222504 BioSafe Disease Control - 32 oz. RTU $14.75
1222505 BioSafe Disease Control - 32 oz. RTS $20.99

MilStop® Broad Spectrum Foliar Fungicide

Excellent For Controlling Powdery Mildew & Other Fungal Diseases!

TARGET: Powdery mildew, Alternaria blight, anthracnose, black spot, Botrytis blight, Cercospora leaf spot, downy mildew, Phomopsis blight, and Septoria leaf spot.

DESCRIPTION: MilStop is an OMRI listed, WSDA registered foliar fungicide. Potassium bicarbonate-based fungicide that kills powdery mildew on contact by pulling water from spores and their growing strands. It also inhibits enzymes involved in fungal cell wall formation by altering the pH on the leaf surface. Foliar applications provide 1-2 weeks of residual protection.

SUGGESTED USE: Generally 2.5 lbs./100 gal. of water. (See label online for specific crops, diseases and application systems.)

1332753 MilStop Foliar Fungicide - 5 lb. Bag $63.00

Cannot be shipped to the following states: CA, AK

Actinovate® Lawn & Garden Fungicide

Prevents & Treats Lawn, Root & Foliar Diseases!

TARGET: Brown Ppatch (Rhizoctonia), dollarspot (Sclerotinia), take-all patch (Gaeumannomyces graminis), Pythium Blights, Pythium, Phytophthora, Rhizoctonia, Verticillium, Fusarium, late blight, powdery mildew, downy mildew, grey mold (Botrytis), fire blight (Erwinia), leaf spots, rusts and black spot (Diplocarpon rosae).

DESCRIPTION: Prevents and treats lawn, root, and foliar diseases. Contains Streptomyces lydicus beneficial microorganisms.

SUGGESTED USE: For vegetables, herb gardens, annuals, perennials, trees, shrubs and hydroponic growing. For soil diseases: water and drench soil with solution of 1-2 tsp./2 gals. water/cup of soil or 6” potted plant. For foliar disease, use solution of 1-2 tsp./2 gals. water per week. For indoor or hydroponic growing, use 1/2 to 1 tsp./gal. water every 2-6 weeks. For direct watering use 10 tsp./5 gal. water to cover 1,000 sq. ft. For pump sprayers, use 2 tsp./1 gal. water to cover 200 sq. ft. For hose end sprayers, use 2 tsp./4 oz. water to cover 200 sq. ft. and for severe issues, use 9 tsp./20 oz. water to cover 1,000 sq. ft. For best results apply with a wetting agent (see ThermX™-70 Natural Wetting Agent on page 48) and reapply every 4-8 weeks.

1420001 Actinovate Lawn & Garden - 2 oz. $27.00
Cannot be shipped to the following states: AK, HI, PR

BONIDE® Sulfur Plant Fungicide

Effective Against Several Key Insect Pests As Well As Fungal Diseases.

TARGET: Knockdown control for apple cedar rust, black rot, brown rot, chiggers, citrus red spider, fleas, frog eye, leaf spot, powdery mildew, quince rust, rust mite, scab, scale, sooty blotch, thrips, ticks, two-spotted spider mites and russet mites.

DESCRIPTION: The fine particles of this micron sulfur product provide optimum coverage, adhesion and disease control and work equally well whether applied as a dust or mixed with water for a spray. For best results, apply thoroughly to all leaf surfaces before diseases develop and repeat weekly to maintain control.

SUGGESTED USE: Specially formulated for use on berries, cherries, grapes, citrus, apples, cucurbits, apricots and currants. Do NOT use when an oil spray has been applied within the prior month or when temperatures are expected to exceed 80°F. This container covers approximately 500 sq. ft. at the general mix and application rate.

1454701 BONIDE Sulfur Plant Fungicide - 1 lb. Bottle $8.75
1454702 BONIDE Sulfur Plant Fungicide - 4 lb. Bag $17.00

Cannot be shipped to the following states: AK, DC
DISEASE CONTROL

Banish
Controls Downy & Powdery Mildew Pathogens With Geraniol.

TARGET: Use to control and prevent downy mildew and powdery mildews, including the following: Podosphaera fusca, Erysiphe nectar (Uncinula necator), Podosphaera leucotricha, Podosphaera aphanis and Oidium lycopersicum.

DESCRIPTION: This outstanding fungicide uses Geraniol, a natural geranium oil plant extract, to control common mildews in plants. Banish works in a two-fold process to prevent mildew growth and heal plants from the cell up. The Geraniol works by creating an unbalance of potassium (K+) ions in the mycelium. This unbalance inhibits spore germination and mycelium growth and will, ultimately, enter the pathogen cell and kill it. The result is a healthier, pathogen-free plant.

SUGGESTED USE: For use only as a foliar spray. The mix rate is .13 fl. oz. (3/4 tsp.) or 3.8 mL/gal water. Spray directly on all infected foliage until it’s evenly covered. Apply every 5-7 days until infestation is controlled. For prevention, apply every 10-14 days.

1458170 Banish - 2 oz. concentrate $30.00
1458172 Banish - 32 oz. concentrate $129.50
1458173 Banish - 1 gal. concentrate $299.50

Defender PM
You Can Use This Fungicide During Both Vegetative & Flowering Phases.

TARGET: Powdery mildew diseases caused by Erysiphales fungi.

DESCRIPTION: This Citrus Oil based fungicide is made with food grade ingredients and will not persist on plant leaves. It works on contact to surround and smother Erysiphales fungal spores and other powdery mildew pathogens. Use with your foliar regime to prevent and/or control outbreaks. Can be used in all growing methods and on all food crops.

1458120 Defender PM - 8 oz. $18.00
1458121 Defender PM - 16 oz. $37.00
1458122 Defender PM - 32 oz. $72.00
1458123 Defender PM - 64 oz. $135.00
1458124 Defender PM - 1 gal. $249.00
1458125 Defender PM - 5 gals. $1,090.00

Regalia®
OMRI Listed Control For Both Bacterial & Fungal Diseases.

TARGET: Powdery mildew, downy mildew, white mold, early blight, shot hole, Fusarium, bacterial spots and specks, brown rot, Rhizoctonia and more.

DESCRIPTION: This biofungicide uses a plant (Reynoutria sachalinensis) extract to protect crops from certain soil-borne or foliar diseases and to boost production by improving overall plant health. Regalia can be used in multiple application methods on field and edible crops in conventional, sustainable and organic production. Unique FRAC P₅ classification. 4-hour REI.

SUGGESTED USE: Use early for disease prevention and overall plant health and through the season for continued disease control. Small scale applications: 2 Tbsp./gal. of water. Foliar applications: Downy Mildew and White Mold: 2-4 qts/acre. Soil applications: Fusarium: 3-4 qts/acre.

1332970 Regalia - 2.5 Gallons $220.00

SuffOil-X®
OMRI Listed Pre-Emulsified Mineral Oil Suffocates Many Soft-Bodied Insects & Controls Certain Fungal Diseases.

DESCRIPTION: Made with highly refined pre-emulsified mineral oil, this suffocant creates the optimum in coverage with limited risk of plant damage. The pre-emulsified process used creates a lighter oil that dries faster, will not cause phototoxicity, burn or undue stress, leaves no toxic residue on plants and dilutes easily with water.

SUGGESTED USE: Can be used with a wide variety of crops indoors or outdoors. Do not apply through any type of irrigation system (chemigation), during periods of drought, or when plants exhibit moisture stress. Apply when oil will dry and evaporate in 1-2 hours and when relative humidity is less than 90%. Don’t spray in high wind or temps over 95°F. Application rates are generally 1-2 gallons of SuffOil-X per 100 gallons of water or 20-500 gallons of spray solution per acre.

1332805 SuffOil-X - 2.5 Gallons $62.00
1332806 SuffOil-X - Case of 2 ct./2.5 Gals. $112.00

Larger sizes available.

Shipping Restrictions: Cannot ship via US Mail or air shipping methods. Cannot be shipped to the following states: AK, DC
CLEANING & SANITIZING

**The Power of Peroxyacetic Acid**

Similar in chemical makeup, SaniDate 5.0 and OxiDate 2.0 are two very different products with very different uses.

**SaniDate 5.0** is a no rinse required sanitizer for greenhouse use. Using a peroxy compound, SaniDate can quickly and effectively reduce harmful pathogens. Not only can this product be used on hard surfaces in the greenhouse, it can be used for equipment sanitization, food prep surfaces and also irrigation lines. It can also be used as a post-harvest sanitizer. Mix SaniDate in your dip tank or spray directly onto harvested fruits and vegetables to prevent the pathogens that cause spoilage. SaniDate is a great, environmentally responsible alternative to chlorine.

**OxiDate 2.0** is a pre-harvest bactericide and fungicide. OxiDate can be used in certified organic and conventional agriculture. Not only does OxiDate help prevent plant pathogens, it works as a curative product by killing fungal spores and bacterial inoculum. OxiDate does not have a REI and can be used until harvest. This product can be tank mixed with fungicides and insecticides for extra protection and because of the active ingredient is peroxoxygen, there is not concern of resistance.

---

**SaniDate® 5.0**

An OMRI Listed Sanitizer/Disinfectant.

**TARGET:** Bacteria including Salmonella, Streptococcus, E. coli, Pseudomonas, Staphylococcus aureus, Listeria and molds, including mildew.

**DESCRIPTION:** Contains hydrogen peroxide and peroxoacetic acid as an alternative to chlorine to sanitize and disinfect post harvest equipment, fruit and vegetables and various hard surfaces. Usage industries include farms, dairies, beverage plants, food processing plants, greenhouses, etc. No dumping or run-off restrictions.

**SUGGESTED USE:** For general disinfection, sanitation of surfaces, food safety programs, irrigation systems and greenhouse use mix about 0.5 fl. oz./1 gal. of water. Solution can be applied various ways depending on desired usage. Applications can be made with mops, sponges, spraying devices, etc.

**WARNING**

Corrosive: Causes irreversible eye damage and skin burns. May be fatal if inhaled or absorbed through skin. Harmful if swallowed. Do not breathe vapors or spray mist. Do not get in eyes, on skin, or on clothing. Wear goggles, face shield, and rubber gloves when handling. Do not enter an enclosed area without proper respiratory protection. Wash thoroughly with soap and water after handling and before eating, drinking, using tobacco or using the toilet. Remove contaminated clothing and wash before reuse. Strong oxidizing agent. Do not use in concentrated form. Mix only with water in accordance with label instructions. Never bring concentrate in contact with other pesticides, cleaners or oxidative agents.

---

**Vital Oxide**

**Kill Dangerous Bacteria & Viruses On All Surfaces.**

**TARGET:** Kills MRSA, Pseudomonas aeruginosa, Escherichia coli, Salmonella enterica, Staphylococcus aureus, Legionella pneumophila, Aspergillus niger, norovirus, human immunodeficiency virus type 1 (HIV-1), Enterobacter aerogenes, Listeria monocytogenes, Acinetobacter baumannii, Rotavirus, H1N virus, hepatitis B, hepatitis C, Klebsiella pneumoniae and more.

**DESCRIPTION:** Vital Oxide uses chlorine dioxide to create a fast-acting, environmentally friendly, ultra-effective broad-spectrum antibacterial cleaner that provides odor elimination, allergen elimination, hospital disinfection, sanitation of food contact surfaces and mold/mildew removal and prevention. This product comes to you hospital-grade and ready-to-use or it can be diluted to fit your needs. It can be sprayed on, wiped on or used in a fogger. This EPA registered, non-corrosive cleaner will leave no strong odor or offensive taste.

**SUGGESTED USE:** Use full strength for heavy soil/filth, to disinfect hard non-porous surfaces, to prevent mold & mildew and to deodorize. Dilute for use on floors, carpets and food and non-food contact hard non-porous surfaces.

**OxiDate® 2.0**

**Clean Your Greenhouse & Tools With This Environmentally Friendly Alternative To Copper Fungicides!**

**TARGET:** Preventative and curative treatment against plant pathogens and diseases such as Alternaria, anthracnose, Aphanomyces, bacterial spot, bacterial speck, black spot, Botrytis (grey mold), brown spot, downy mildew, Erwinia, Fusarium (root rot), leaf spot, Phytophthora, Plasmopara, powdery mildew, Pseudomonas, Pythium, Rhizoctonia, rust, scab, smut and Thielaviopsis.

**DESCRIPTION:** OxiDate uses the rapid oxidative property of peroxygen to eliminate bacteria and fungi on contact. Use repeatedly on a variety of crops without cultivating resistance or leaving behind any visible residues or odor. OxiDate may also be used for cleaning surfaces, tools, water filters and equipment. Excellent for use in cleaning greenhouses.

**SUGGESTED USE:** Ensure that a minimum ratio of 1:100 is used.

**ANIMAL CONTROL**

**BONIDE® Repels-All® Animal Repellent**

**Natural Ingredients That Repel A Variety Of Critters!**

**TARGET:** Armadillos, beavers, birds, cats, crows, chipmunks, deer, groundhogs, mice, porcupines, rabbits, raccoons, rats, skunks, shrews, and voles.

**DESCRIPTION:** A comprehensive animal repellent for use on plants and property structures for up to 2 months per each application. Containing a mixture of dried blood, putrescent egg, garlic, fish oil, cloves, and onions it will repel animals with both smell and taste.

**SUGGESTED USE:** Rainfast after 6 hours. Do not use on edibles. Shake before using and mix the concentrate with appropriate amount of water. The 1 qt. concentrate will make up to 2 gallons of repellent. Apply as needed with any type of sprayer and water afterwards.

**Root Guard Gopher Wire Baskets**

**Stop Gophers From Damaging Plant Roots!**

**TARGET:** Use to protect small planting areas, bulbs, flowers, shrubs, trees, lawns, raised beds, planter boxes, and entire garden areas.

**DESCRIPTION:** Designed to keep the smallest and most pernicious gophers from ruining your garden or lawn. Built from long-lasting 20-gauge, double galvanized metal.

**SUGGESTED USE:** Pull basket sides apart, flatten out bottom fold, bend side seams flat against bottom, round sides and place in a pre-dug hole. There is a 3” green strip indicating how deep to place the basket. Leave green edge exposed to help deter above ground feeding. Place plant in the basket, fill hole with soil, and water as usual. When selecting proper size, choose a basket that is one size larger to allow for plant growth.

**Repeater™ & Little Pete® Multiple Catch Mouse Traps**

**Catch & Release Multiple Mice At Once!**

**TARGET:** Mice.

**DESCRIPTION:** These galvanized metal traps are designed to allow mice to enter the trap, while simultaneously latching door shut! See-through, and reusable. The smaller trap can hold up to about 9 mice at one time, the larger trap can hold approximately 30 mice!

**SUGGESTED USE:** Does not require bait. For best results, place a fragrant snack like peanut butter on a cracker into the trap. Place hinged side along floor boards and check trap regularly. Release mice promptly. Replace snack in trap, reset, and reuse!

**BONIDE® Mouse Magic Mouse Repellent**

**Repel Rodents With Essential Oils From Homes, Sheds, Garages, Campers, Barns, Cellars & More!**

**TARGET:** Mice.

**DESCRIPTION:** Repels with essential oils, such as spearmint and peppermint. Masks the scent of trails used to infest areas, and triggers escape and avoidance behaviors in rodents. One pack will treat an averaged sized room for approximately thirty days when used according to the directions.

**SUGGESTED USE:** Distribute where mice or rodents may feed, nest, or travel. Place near stored animal foods, near nesting and feeding entry ways, or under large appliances. Use one pack for an average size room, and increase the number of packs used, until desired level of control is reached.

**ANT CONTROL**

**Monterey Ant Control**

*Adios Ants! This OMRI Listed Product Is The Answer You Have Been Looking For!*

**TARGET:** Ants, earwigs, cutworms, sowbugs, pillbugs, crickets, slugs and snails. Not for: Fire ants, harvester ants, pharaoh ants and carpenter ants.

**DESCRIPTION:** This easy to apply granular product is made from iron phosphate and Spinosad – a beneficial bacteria that effects insects’ nervous systems.

**SUGGESTED USE:** For use outdoors and on edible crops. Use about 1 tsp./sq. yd. or 1 lb./2000 sq. ft. Apply uniformly on grounds or soil and can be applied with a hand spread for larger areas. Apply only 3x a month, and do not apply within 3 days of harvest.

- 1257895 Monterey Ant Control - 1 lb. Shaker Can $7.49
- 1257896 Monterey Ant Control - 2.5 lb. Jug $20.49

**Cannot be shipped to the following states:** DC, MO, ND, NJ, VA, WA, WV

**Orange Guard® Home Pest Control**

*Works Against A Broad Range Of Insects On Contact, Keeps Repelling For Weeks.*

**TARGET:** Crawling pest insects.

**DESCRIPTION:** Orange Guard has proven effective to provide effective control against a broad range of insects including cockroaches, ants, fleas, locusts, weevils, and many other hard to control insects. Orange Guard contains d-Limonene, which is steam distilled orange peel oil. Orange Guard may be used around food, humans and pets and is EPA registered. Smells great too!

**SUGGESTED USE:** For indoor use, spray from 12 inches directly on pest insects. Saturate until visibly wet. Wait 3 minutes, then wipe excess with damp cloth. Apply to pet bedding to repel fleas. Keeps repelling for weeks. For outdoor use, generously spray perimeter of home and anywhere pests can enter to make a barrier of protection.

- 1460001 Orange Guard Pest Control - 32 oz. RTU Spray Bottle $10.97
- 1460002 Orange Guard Pest Control - 1 Gallon with Sprayer $35.00
- 1460003 Replacement Sprayer for 1 Gallon Orange Guard $5.30

**Beneficial Nematodes - Triple Threat**

*Biological Control For Crawling Insects!*

The Triple-Threat Combo includes one package of each of the Beneficial Nematodes that ARBICO Organics supplies: *Heterorhabditis bacteriaphora*, *Steinernema feltiae* and *Steinernema carpocapsae*. Use the Triple Threat to combat a broad variety of soil developing pests! Safe for use around home and gardens! See pages 17-19 for more information.

**Orange Guard® Fire Ant Control**

*Control Fire Ant Control Without Risking The Health Of Your Family, Pets Or The Environment.*

**TARGET:** Fire ants.

**DESCRIPTION:** Orange Guard Fire Ant Control contains ingredients which are on the FDA GRAS list (generally recognized as safe). Orange Guard Fire Ant Control is water based, so further dilution is easy. It works by dissolving away the waxy coating on the ant’s exoskeleton, which clogs their spiracles (how they breathe), and they suffocate.

**SUGGESTED USE:** Puncture the mounds and then saturate them, using 1/2 gallon of either full strength or diluted (3 parts of water to 1 part Orange Guard Fire Ant Control). Dilution does not harm grass and covers approximately 8 mounds.

- 1460005 Orange Guard Fire Ant Control - 1 Gallon $32.75

**Cannot be shipped to the following states:** AK, CO, DE, DC, ID, IL, IN, IA, KS, KY, ME, MD, MA, MI, MN, MO, MT, NE, NV, NH, NJ, NY, ND, OH, OR, PA, RI, SD, UT, VT, VA, WA, WV, WI, WY

**FIRE ANT CONTROL**

**Terro® Ant Baits**

*Two Ways To Get Rid Of Ants!*

**TARGET:** Sugar and grease-eating ants including argentine, ghost, cornfield, pavement, acrobat, white footed, little black, odorous house, crazy and big headed ants.

**DESCRIPTION:** Comes in 2 formulations, RTU bait stations and Build-Your-Own.

**SUGGESTED USE:** Locate indoors or outdoors. Use remaining bait to make your own bait stations with paper or cardboard.

- 1257403 6 (Pre-filled) Bait Stations $7.89
- 1257401 Build-Your-Own Ant Killer Kit $5.40
BONIDE® Home Safe™ Household Insect Killer

Don’t Let The Pleasant Scent Fool You – This Is A Powerful Insecticide & Repellent!

TARGET: Ants, crickets, flies, gnats, spiders, earwigs, midges, mites, millipedes, moths, silverfish, stink bugs, water bugs and more.

DESCRIPTION: This versatile spray is made from fragrant botanical oils (citronella, clove & cedar) that will kill pest insects on contact and repel on surfaces. Because it is water-based, there’s no greasy residue. Use indoors in kitchens, pantries, basements, under sinks and behind appliances. Use outdoors along the foundation, around window frames/doorways, along eaves and around vents and utility line entry points.

SUGGESTED USE: No mixing required. Turn nozzle to ON position and hold spray container 10-12” away from surface. Spray directly on insects (contact as many insects as possible) and to areas where insects are found or normally occur. Spray until thoroughly wet but not soaking. Repeat as needed.

1460010 Home Safe Household Insect Killer - Quart RTU $9.99
1460020 Home Safe Household Insect Killer - Gallon RTU $22.99

EcoPCO® AR-X Multi-Purpose Insecticide

Quick Pest Knockdown In A Gentle Botanical-Based Formula!

TARGET: Ants, carpet beetles, carpenter ants, carpenter bees, centipedes, chocolate moths, clover mites, cockroaches, crickets, drugstore beetles, earwigs, elm leaf beetles, fleas, millipedes, pillbugs, power post beetles, scorpions, silverfish, spiders, termites, Tragoderma beetles and wood wasps.

DESCRIPTION: This Pyrethrin-based, multi-purpose insecticide is designed for use in sensitive areas and is approved for use in food handling areas like homes, hospitals, commercial kitchens, daycare centers, restaurants and food processing facilities. This unscented contact kill product is non-staining and contains no PBO or CFCs. Can be used inside and out, with the outside applications limited to direct applications to vegetation, foundations and crack and crevices. Not for exterior aerial applications.

SUGGESTED USE: Apply to cracks and crevices; release approximately 1 second of product per crack-crevice application and from 2-3 seconds per cubic foot of closed void space. For wood pests, locate infestation and drill holes 8-10” into insect tunnels and inject 5-10 seconds per hole. Apply more liberally for heavy infestations. Ensure contact with as many insects as possible.

1457403 EcoPCO® AR-X Multi-Purpose Insecticide $17.99

Harris Famous Roach Tablets

These Super Easy To Use Tablets Are Effective For A Long Time!

TARGET: Roaches, waterbugs, silverfish and ants.

DESCRIPTION: These tablets use Boric Acid, sugar, flour and a proprietary lure to create a food that insects crave. If kept dry, tablets can remain effective for several years. But, for best results, it’s recommended that you replace tablets yearly. Contact with insect spray will negatively affect the performance of the tablets. One box can treat an entire house. Can be used in domestic and non-domestic settings (i.e., new construction).

SUGGESTED USE: Before placing tablets, clean up any leaks, cover any garbage or food and block any areas where roaches may be gaining entrance or hiding. Use no more than 12 per room. Place in cracks and crevices, under and behind appliances, in cabinets and in and underneath drawers. Any tablet visible after application must be pressed into cracks and crevices or removed.

1219550 Harris Famous Roach Tablets - 6 oz. $6.25

Essentria™ G Granular Insecticide

A Granular That Handles A Handful Of Outdoor Pests!

TARGET: Ants, bermudagrass mites, centipedes, chiggers, chinch bugs, clover mites, cockroaches, crickets, earwigs, fall armyworms, fleas, leafhoppers, millipedes, sowbugs/pillbugs, and other insect pests.

DESCRIPTION: This quick and long-lasting natural granular insecticide uses essential botanical oils clove, thyme and wintergreen to treat various pests. Easy-to-use outdoors on landscapes, turf, building facilities and around organic operations, sensitive areas such as schools, and in aquatic environments.

SUGGESTED USE: Use with a hand spreader. For treatments around buildings, apply uniformly a band about 5-10 ft. wide. For landscapes and turf, use around 3-5 lbs./1000 sq. ft. Water in, applying about 1/8 in. - 1/4 in. of water without puddling. For ant mounds, use about 1-2 tsp./nest. For red imported fire ants, use around 1/2 cup/nest and make a 2 ft. band around nest.

1273050 Essentria G Granular Insecticide - 22 lbs. $67.50

Call 1-800-827-2847 or Order Online www.arbico-organics.com
**REVENGE® Pantry Moth Trap**

This Pantry Moth Trap Uses Pheromone Lures To Attract The Moths & Trap Them!

**TARGET:** Adult moths (Indian meal moths, almond moths and raisin moths).

**DESCRIPTION:** This trap attracts and captures adult flour moths. These moths are found in flour, rice, crackers, dog food, bird seed and cereal. Trap works by luring male moths into trap with a pheromone (insect hormone) that female moths use to attract males for mating. Reducing the number of male moths reduces egg laying and mating. It is a good idea to keep a few of these traps on hand. Traps work without harmful chemicals!

**SUGGESTED USE:** Use one or two traps for an average sized room or closet and they will last 3 months.

- **1280302** Revenge Pantry Moth Trap - 2 Pack $6.10
- **1280303** Revenge Pantry Moth Trap - 2 Per Pack/Pack of 3 $17.25
- **1280304** Revenge Pantry Moth Trap - 2 Per Pack/Pack of 6 $31.50
- **1280305** Revenge Pantry Moth Trap - 2 Per Pack/Pack of 12 $60.00

**BioCare® Clothes Moth Trap**

Uses A Natural Pheromone Lure!

**TARGET:** Adult male clothes moths.

**DESCRIPTION:** The Clothes Moth Trap attracts and captures adult male clothes moths. It signals when an infestation is present, but does not control larvae on clothing or personal objects. Female moths are especially attracted to oily or soiled fabrics, where they lay their eggs. The moths avoid light and are therefore difficult to find and identify. The Clothes Moth Trap catches webbing clothes moths during their mating season by using a natural pheromone lure. If moths are found in the trap, take immediate measures to control the larvae. Search out damaged fabrics and destroy, dry clean or freeze them (in a deep freeze for at least 14 days).

**SUGGESTED USE:** Open box carefully. Remove inner parts. Peel release paper from enclosed sticky pad. Remove lure from foil pouch and place in center of sticky pad. Fold top and bottom flaps inside box. Insert pad as shown on back of package. Place trap where moths occur (bedroom closets). Use tab on side of box to pin trap to a wall at eye level. Replace every 12 weeks, or sooner if full of insects. Use traps all year round.

- **1260702** BioCare Clothes Moth Trap $8.35
- **1260703** BioCare Clothes Moth Trap - Pack of 3 $23.25
- **1260704** BioCare Clothes Moth Trap - Pack of 6 $42.00
- **1260705** BioCare Clothes Moth Trap - Pack of 12 $81.00

**BioCare® Cockroach Traps**

Powerful Attractant Lures Cockroaches!

**TARGET:** Cockroaches.

**DESCRIPTION:** Uses a powerful natural attractant to lure roaches onto a sticky glue surface.

**SUGGESTED USE:** Should be placed along baseboards, under sinks, and near water pipes in warm, dark areas near a food supply. Each trap covers approximately 25 sq. ft. and will last for 2 months.

- **1260201** BioCare Cockroach Traps - 6-Pack $8.00
- **1260202** BioCare Cockroach Traps - (2) 6-Packs $14.75
- **1260203** BioCare Cockroach Traps - (4) 6-Packs $26.00

**Aunt Fannie’s FlyPunch!**

Pesky Fruit Flies Can’t Wait To Dive Into These Jars!

**TARGET:** For use against Fruit Flies (Drosophila).

**DESCRIPTION:** Fruit flies are not just nuisance pests; they can transmit many pathogens, including *Escherichia coli* (E.coli) bacteria. This unique formulation acts to attract, disable and kill fruit flies. The attractant will draw them into the dispenser and, once they touch the substance inside, it works to break down their exoskeleton. The disabled insect will be drawn down into the liquid and drowned.

**SUGGESTED USE:** No mixing or assembly required, simply open the DiveJar flip top and place near common fruit flies areas. One DiveJar covers an area about 500 cu. ft. FlyPunch! Is most potent for the first 2 weeks, but may last up to 30 days. Dispose of DiveJar when full.

- **1280650** Aunt Fannie’s FlyPunch! - 6 oz. $7.99
- **1280655** Aunt Fannie’s FlyPunch! - 6 oz./6 Pack $43.00

**BioCare® Window Fly Trap**

A Clear, Pesticide-Free Way To Catch Flies.

**TARGET:** Multiple species of flies.

**DESCRIPTION:** This trap will capture flies in your windows, where they are drawn by the heat and light. These unobtrusive, clear sticky traps work as a bright spot on the window to attract the fly’s attention and ensnare them.

**SUGGESTED USE:** Remove narrow strip release paper, attach to window and then remove front release paper quickly. Replace when full or every 3 months.

- **1280601** BioCare Window Fly Trap - 4-Pack $4.75

---

**For More Household Pest Control Solutions, Visit arbico-organics.com**
Hygea Natural Bed Bug & Lice Exterminator

Use These Stain & Scent Free Products To Rid Yourself Of Bed Bugs & Keep Them Away!

TARGET: Bed bugs, dust mites, fleas, lice and ticks.

DESCRIPTION: Formulated with naturally occurring enzymes and no animal products or by-products, you can be comfortable using this residue-free product regularly. And because bedbugs can live up to a year between feedings, you will want to be proactive by spraying as often as every day for prevention. Use with the laundry treatment for a perfect 1-2 punch.

SUGGESTED USE: Spray a light mist on linens, pillows, mattresses, box springs, headboards, furniture, carpets and other surfaces where bed bugs may hide. Do not saturate, a light mist is sufficient.

1219600 Bed Bug & Lice Exterminator - 3 oz. $5.99
1219602 Bed Bug & Lice Exterminator - 24 oz. $11.99
1219605 Bed Bug & Lice Exterminator - 1 gal. $39.99

Avenger® Natural Bed Bug Killer™ - RTU

Works Within Minutes To Kill All Life Stages Of Bed Bugs!

TARGET: Bed bugs (Cimex lectularius)

DESCRIPTION: This spray uses a base of natural plant extracts (clove and peppermint oils) to quickly and efficiently kill bed bugs in every life stage – adults, nymphs and eggs. This will knock out multiple generations to help prevent future infestations.

SUGGESTED USE: Thorough coverage of all areas where bed bugs hide is key to their control. Vacuum areas of suspected insect activity and then spray on all surfaces – even those around beds, such as floor cracks, bed frames, nearby wood surfaces, crevices in wooden furniture and baseboards. Spray entire mattress and box spring. Redo application in 2 weeks. Heavy infestation may take a third application. This 24 oz. bottle is adequate to treat a small bedroom once.

1888815 Avenger Natural Bed Bug Killer - 24 oz. RTU $21.50

Harris Bed Bug Killer

This OMRI Listed D.E. Product Is Effective Against So Much More Than Bed Bugs!

TARGET: Bed bugs, fleas, cockroaches, silverfish, ants, Asian lady beetles, boxelder bugs, cluster flies, carpet beetles, millipedes, centipedes, crickets, earwigs, slugs and more.

DESCRIPTION: Effective against bed bug adults, nymphs and hatchlings, this powder is also a potent weapon against other indoor and outdoor pests and those that travel in between, like fleas, crickets and ants. Virtually any insect that crawls through or jumps into this powder will suffer fatal damage to its exoskeleton, causing dehydration and death. This powder is odorless and non-staining and will remain effective for months, as long as it is kept dry and undisturbed.

SUGGESTED USE: Apply to cracks and crevices in dry areas by dusting with suitable equipment such as Insecticide Puffer (available online). Apply lightly and uniformly. Dust insects directly if possible and repeat treatment regularly. Spot treatments should not exceed 2 sq. ft. Amount of product to use should be in the range of 1-5 oz./100 sq. ft.

1219500 Harris Bed Bug Killer - 8 oz. Puffer Bottle $8.00
1219501 Harris Bed Bug Killer - 32 oz. Powder $12.00
1219502 Harris Bed Bug Killer - 64 oz. with Duster $16.29

ClimbUp®

Do You Worry About Bed bugs? This Device Can Help.

TARGET: Residential or commercial spaces where furniture and bedding should be monitored for bed bugs.

DESCRIPTION: ClimbUp is a tough, plastic, re-usable double well cup that is placed under the legs of beds (or other furniture that you rest or sleep on) to intercept any bugs entering or leaving the bed. ClimbUp contains no chemicals or pesticides so it will not outright kill the insects. They will eventually dehydrate and die in the trap. ClimbUp should be seen as a monitoring device and not an insect control measure.

SUGGESTED USE: Place ClimbUp devices under each leg of the furniture where people sleep or rest. Monitor frequently to determine presence of insects. Clean and re-lubricate as needed.

1250105 ClimbUp Original - 4 Pack $15.20
1250106 ClimbUp Original - 12 Pack $45.60

CRITICAL INFORMATION FOR CERTIFIED ORGANIC GROWERS
Please be aware that the certified status of a product can change at any time without notification from the manufacturer or OMRI. Although we make every attempt to assure that the status of the products listed as certified organic are current and up-to-date, when purchasing a product we advise you to protect your certification by checking with your certifying agency that it is acceptable or by going online to OMRI at www.omri.org.

OUR SATISFACTION GUARANTEES
For products other than live insects: If for any reason you are not satisfied with any of our products other than live insects, you can return the item(s) to us within 30 days in accordance with our Return Policy at www.arbico-organics/category/return-policy. Our Customer Care personnel will be happy to assist you with returns.

For live insects: We guarantee that you will receive live beneficial insects (mites and beneficial nematodes). If your insects perish en route, we will gladly send you a replacement order. But we cannot accept returns or make refunds for other reasons since these are perishable products with a limited lifespan and cannot be resold. We cannot guarantee results with live insects since we have no control over how the product is applied, the extent of the problem, and other variables. But if you are not satisfied with your results, we will cancel any unshipped orders and refund the portion of any prepayment that applies to unshipped orders.
