The Smart Lock feature keeps the system engaged during off-roading or slippery road conditions. Available on Sport, Overland and Mojave.

ROCK-TRAC® 4x4 SYSTEM

Rubicon® rides with this extreme 4x4 system. Its 4:1 low-gear ratio allows Jeep® Gladiator Rubicon to crawl at a low speed for greater control and increases the amount of torque available at the wheels. Standard on Rubicon.

ROCK-TRAC FULL-TIME 4x4 SYSTEM

This system offers the capability of Rock-Trac® with the added convenience of a full-time, active transfer case that can provide optimal traction over changing road conditions. Available on Rubicon.

THE GUTS TO GET YOU THERE

WHEN THE GOING GETS TOUGH, JEEP® GLADIATOR GETS YOU WHERE YOU NEED TO GO. YOU'RE SUPPORTED WITH A FULL LINEUP OF STANDARD AND AVAILABLE FEATURES THAT HELP YOU MANAGE YOUR PROGRESS AND PROTECT YOUR VITAL PARTS WHILE KEEPING YOU INFORMED OF VEHICLE PERFORMANCE ALL ALONG THE WAY.

SELEC-SPEED® CONTROL

Manages vehicle speeds of 0.6 mph to 5 mph in 4-LO while traversing off-road terrain without requiring the driver to control the throttle or the brake. This helps the driver focus on steering the vehicle, letting Gladiator put the right amount of power or braking onto the ground. Standard with 8-speed automatic transmission.

HILL START ASSIST (HSA)

Works to prevent Gladiator from rolling when starting on an uphill gradient. Standard.

STEEL BUMPERS Built with ultra-strong steel to take the punishment of the trails. The front bumper can accept a winch, features integrated LED fog lamps and has removable end caps to help maneuver through tight spots. Available.

SKID PLATES All models feature up to four standard skid plates/bars, made from lightweight high-strength steel, to protect the underbody. Both Rubicon® and Mojave add heavy-gauge steel rock rails for rocker panel protection, while Rubicon also includes rock rails mounted behind the rear wheels to protect the bed. Standard.

TOW HOOKS Every Gladiator Sport, Willys, Overland® and High Altitude gets two tow hooks up front and one in back. Rubicon stands out with Red-painted tow hooks, and on Mojave, they're a distinctive Orange color, with both models getting two hooks in front and two in the rear.

OFF-ROAD PAGES View real-time data like suspension travel, tilt-and-pitch, wheel turn and transmission temperature to help provide optimal performance. Available.

FORWARD-FACING OFF-ROAD TRAILCAM⁴ Provides a view of the trail directly in front of your vehicle, helping you pick your path. Available on Overland, Mojave and Rubicon models.

LOCKED IN YET FLEXIBLE

TRU-LOK® DIFFERENTIALS

Front and rear electronic-locking differentials deliver maximum torque to both wheels, maintaining forward momentum for the ultimate in 4x4 traction. An instrument-panel-mounted rocker switch can lock either the rear (on Mojave models) or both (on Rubicon® models) axles. Paired with the Rock-Trac® 4x4 system on Rubicon models. The rear axle can also be locked in 4-HI.

OFF-ROAD+

When engaged, it automatically deciphers the type of terrain Jeep® Gladiator is operating on and makes adjustments to key systems, including throttle, Selec-Speed® Control, traction control and transmission shift mode, for optimal performance. If enabled in 4-HI, it tailors operation for higher-speed sand performance. If enabled in 4-LO, it adjusts operation for low-speed rock-crawling maneuvers. Standard on Mojave and Rubicon models.

FRONT SWAY BAR DISCONNECT SYSTEM

Flip a switch and the sway bar can be disconnected in 4-LO and 4-HI, allowing the front suspension to travel up to an additional 30 percent. It reconnects automatically at speeds above 18 mph. Standard only on Rubicon models.
