

RC/RC F

2021

Can less weight lead to
more excitement?

Can the curves of a seat change the
way you experience the curves of a road?

Can your perspective completely
shift in 3.96 seconds?

To craft the most amazing
machines, you don't start
with machines at all.
You start with people.

The 2021 Lexus RC and RC F

RC 300

This bold luxury sport coupe touts an aggressive body style, a highly responsive 2.0-liter turbocharged engine delivering 241 horsepower,¹ a 7.3-second 0-60 time^{1,2} and an eight-speed Sport Direct-Shift transmission. For added connectivity, every RC model also features Android Auto™³ functionality. Rear-wheel drive (RWD).

RC 300 AWD

Assertive styling and the added comfort of heated front seats meet full-time all-weather performance, a powerful 260-horsepower¹ 3.5-liter V6 engine, a 6.3-second 0-60 time^{1,2} and a six-speed transmission with paddle shifters. All-wheel drive (AWD).

RC 350

Experience athletic performance with a highly rigid body and lateral performance damper (RWD), a powerful 311-horsepower¹ 3.5-liter V6, a 5.8-second 0-60 time (RWD)^{1,2} and an eight-speed Sport Direct-Shift (RWD) or six-speed (AWD) transmission with paddle shifters. Available rear-wheel drive or all-wheel drive.

RC F SPORT MODELS

Each model can be taken to the next level with more aggressive styling, plus a more dynamic F SPORT-tuned Adaptive Variable Suspension and an exclusively available Torsen®⁴ limited-slip rear differential (RWD). Additional upgrades include front sport seats with enhanced bolsters, performance-inspired instrumentation and 19-inch alloy wheels.⁵

RC F SPORT shown in Infrared⁶ (left), RC shown in Atomic Silver (right)

RC F FUJI SPEEDWAY EDITION

Taking the high-performance RC F to the extreme, the RC F Fuji Speedway Edition accelerates from 0-60 mph in a mere 3.96 seconds.⁷ It achieves a class-leading power-to-weight ratio⁸ with high-strength and lightweight components like titanium mufflers and a carbon fiber fixed rear wing, hood, roof, front spoiler, rocker-panel splitters and rear diffuser. Combining aggressive style and raceway performance, it adds forged alloy wheels by BBS,⁹ class leading standard carbon-ceramic brakes^{9,10} and new exclusively available Cloudburst Gray⁶ and Arctic Blast Satin⁶ exterior colors.

RC F

Experience a powerful 472-horsepower¹ 5.0-liter V8 and eight-speed Sport Direct-Shift transmission with Manual-mode torque converter lockup in gears two through eight. The RC F also features Launch Control¹¹ for lightning-fast acceleration off the line and an F-Adaptive Variable Suspension with adjustable damping. For aerodynamic performance, you'll also find a speed-activated rear wing. Inside, it features Amazon Alexa¹² compatibility. And with added Android Auto^{TM13} functionality, there are more ways than ever to stay connected on the go.

RC F Fuji Speedway Edition shown in Cloudburst Gray⁶ (left), RC F shown in Ultrasonic Blue Mica 2.0⁶ (right)

RC

RC shown in Atomic Silver

RC F SPORT shown in Ultra White[®] with White NuLuxe[®] and Dark Gray Streamline interior trim

RC F

The RC F's Carbon Package features exclusive carbon fiber components, fabricated at the same workshop used to develop those on the world-renowned LFA supercar. With distinctive style and the same structural rigidity as standard steel components, the carbon fiber roof and speed-activated rear wing help increase vehicle stability at higher speeds for more responsive handling.

RC F shown in Ultra White[®]

RC F Fuji Speedway Edition shown in Arctic Blast Satin⁶

HEART-RACING PERFORMANCE

From the RC and RC F SPORT models to the high-performance RC F and RC F Fuji Speedway Edition, every dose of adrenaline is more powerful than the last.

From the turbocharged RC 300 to the dynamic RC 300 F SPORT models, the RC puts peak responsiveness at your fingertips. The V6-powered RC 300 AWD and RC 350 deliver 260 and 311 horsepower,¹ respectively. A highly rigid platform, double wishbone-type front suspension and multilink rear suspension provide crisp turn-in and poise through curves. And for those craving more exhilaration, the RC F and RC F Fuji Speedway Edition feature a potent 472-horsepower¹ 5.0-liter V8 that's the largest engine in its class.⁸

RC shown in Atomic Silver

THE RC & RC F SPORT

VISCERAL POWER

RC 300

The RC 300 pairs an eight-speed Sport Direct-Shift automatic transmission with a 241-horsepower¹ twin-scroll turbocharged in-line four-cylinder engine. This highly responsive RC 300 is also easy on fuel consumption, with a 31-MPG highway EPA estimate.¹⁴ Meanwhile, the rear-wheel drive RC 300 F SPORT features a specially tuned Adaptive Variable Suspension and an available Torsen^{®4} limited-slip rear differential that maximizes your ability to power out of corners.

RC 300 AWD

The RC 300 AWD pairs a six-speed automatic transmission with a 260-horsepower¹ 3.5-liter V6. Featuring Variable Valve Timing with intelligence, the engine is designed to provide added torque at lower speeds and greater horsepower at higher speeds.

RC 350 / RC 350 AWD

Boasting direct and port fuel injection and an awe-inspiring sound reminiscent of the LFA supercar, the 3.5-liter V6 delivers 311 horsepower.¹ The all-wheel drive RC 350 features a six-speed automatic transmission, while the rear-wheel drive model is equipped with an eight-speed Sport Direct-Shift transmission. And in the rear-wheel drive F SPORT, you'll find a specially tuned Adaptive Variable Suspension and an available Torsen^{®4} limited-slip rear differential. It also offers class-exclusive Dynamic Rear Steering,¹⁵ which adjusts the angle of the rear wheels by up to two degrees to help provide optimal agility and stability.

ALL-WHEEL

DRIVE

Make the most of every commute with the enhanced control delivered by the all-wheel drive system on equipped models. By monitoring current conditions, the rear-biased system automatically distributes engine power from 30/70 to up to 50/50 between the front and rear axles to help provide optimum traction—even in inclement weather or on less-than-ideal road surfaces.

Torque split up to

50/50

RC F & RC F FUJI SPEEDWAY EDITION UNPARALLELED PERFORMANCE

Touting the largest engine and the only naturally aspirated V8 in its class,⁸ the RC F delivers performance as breathtaking as its design.

An unprecedented feat of precision engineering, the RC F delivers powerful torque, agile handling and an impressive differential gear ratio for lightning-fast acceleration. It also features a track-ready technology called Launch Control¹¹ that allows the driver to hold the optimal rpm for launch. The throttle control within this sophisticated system helps eliminate wheelspin and maximize grip, propelling the vehicle virtually instantaneously. And making its V8 even more stirring, the RC F emits throaty, specially tuned intake and exhaust notes as it screams to its blistering 7,300-rpm redline.

Infused with the DNA of the RC F GT3 racecar (right),¹⁶ the 2021 RC F brings you even closer to the track with the RC F Fuji Speedway Edition. Named after the world-renowned “Temple of Speed” in the foothills of Mount Fuji—the birthplace of Lexus high-performance—this unique edition embodies decades of development on this iconic track. Individually numbered between 1 and 60, it comes equipped with lightweight components, like a carbon fiber rear wing, front spoiler, roof and hood, as well as titanium mufflers. And it boasts an even lower center of gravity that further reduces rotational inertia.

Experience the result of the Fuji Speedway Edition’s massive weight savings: a best-in-class power-to-weight ratio⁸ with added responsiveness and enhanced torque that combine to propel it from 0 to 60 in a mere 3.96 seconds.⁷

3.96

RC F FUJI SPEEDWAY EDITION

RC F shown in Ultrasonic Blue Mica 2.0⁶

RC F & RC F FUJI SPEEDWAY EDITION

LIGHTWEIGHT MATERIALS.

GROUNDBREAKING AGILITY.

Every aspect scrutinized to push performance to its limits.

The greatest measure of a vehicle's response is the one it invokes in the driver. And it's precisely why every element of the high-performance RC F is painstakingly scrutinized to minimize weight while maximizing aerodynamics—and excitement. From hollow half shafts down to the smallest components, like a compact air conditioning compressor, every gram was purposefully shaved for optimal performance. Lexus engineers worked with the RC F GT3 racing team to create a unique aerodynamics strategy that increases downforce for better grip and control through every turn. Even the airflow inside the wheel wells was carefully calculated. Air exits through the fenders, allowing the suspension to perform without disruptive air pressure, simultaneously enhancing handling and stability. And taking traction to the next level, each tread line on the RC F's Michelin® Pilot® Sport 4 S tires¹⁷ features a specially developed compound to maximize grip.

TRACK-TUNED SUSPENSION

Lightweight aluminum front suspension components and a highly rigid chassis deliver responsive handling on every RC F.

AERODYNAMIC FRONT SPOILER

More commonly found on the raceway than the highway, a uniquely designed front spoiler lowers air pressure under the vehicle for maximum grip.

BRAKE-COOLING PERFORMANCE

While engine cooling has been optimized through larger openings in the front fascia, the grille also channels air to the Brembo®¹⁸ brakes with massive six-piston calipers to help reduce brake fade.

MICHELIN PILOT SPORT 4 S TIRES

Specially developed for the RC F to maximize dry grip, these tires resulted in a lap time on the development circuit that was a full second faster than the standard test vehicle.

SPEED-ACTIVATED REAR WING

The rear wing automatically activates at highway speeds for improved aerodynamics.

REAR DIFFUSER

Located in the center of the rear bumper, the rear diffuser accelerates airflow under the vehicle to create more downforce.

RC F shown in Ultra White⁶

With the sleek form and aggressive stance of the RC, the high-back sport seats and carbon fiber components of the RC F and the evocative available Premium Triple-Beam LED headlamps and taillamps of both, the RC and RC F are exhilarating inside and out.

HEAD-TURNING DESIGN

With daring styling and race-inspired components, the RC and RC F are striking from every angle.

RC F shown in Flare Yellow⁶

With a distinctive coupe body style that boasts sculpted lines and a wide, low stance, the 2021 RC line seamlessly balances eye-catching design with exhilarating performance.

The F SPORT takes style further with exclusive front sport seats. Featuring a unique foam-injected construction and enhanced bolsters designed to hold you tightly through aggressive turns, their low position helps place the driver's hip point as close as possible to the vehicle's center of gravity for a more dynamic driving experience.

RC & RC F SPORT DISTINCTIVE STYLE— INSIDE AND OUT

Experience daring design that demands attention at every turn.

The design of the RC echoes its dynamic performance. In front, a bold fascia and evocative headlamps announce its arrival, while strong character lines sweep toward its dramatic rear valance and LED taillamps. Inside, you'll find a performance cockpit that envelops the driver and passengers in stunning craftsmanship, with Linear Espresso and Linear Dark Mocha wood accents, meticulous stitching and more.

RC F COMMAND AND CONTROL

With bolstered high-back sport seats and track-ready components, the RC F holds drivers as tightly as it holds curves.

For optimal performance and control, exclusive F-badged high-back sport seats embrace you from hip to shoulder. Their unique design is constructed to disperse body pressure, increase support and help hold you firmly through turns. The stitching pattern on the seats was inspired by specially crafted athletic sportswear and is carefully calculated to help provide greater support and grip in high-G situations. Inside, bold digital instrumentation displays everything from the G-force meter to Launch Control¹ status. And to bring you even closer to the road, the RC F's lightning-fast eight-speed Sport Direct-Shift transmission with downshift rev-matching features optimally positioned paddle shifters for split-second upshifts all the way to its 168-mph top track speed.^{1,2}

The carbon fiber fixed rear wing of the RC F Fuji Speedway Edition is as functional as it is striking. After countless hours of working with the RC F GT3 development team, Lexus engineers found the perfect balance that increases downforce while simultaneously reducing the drag coefficient.

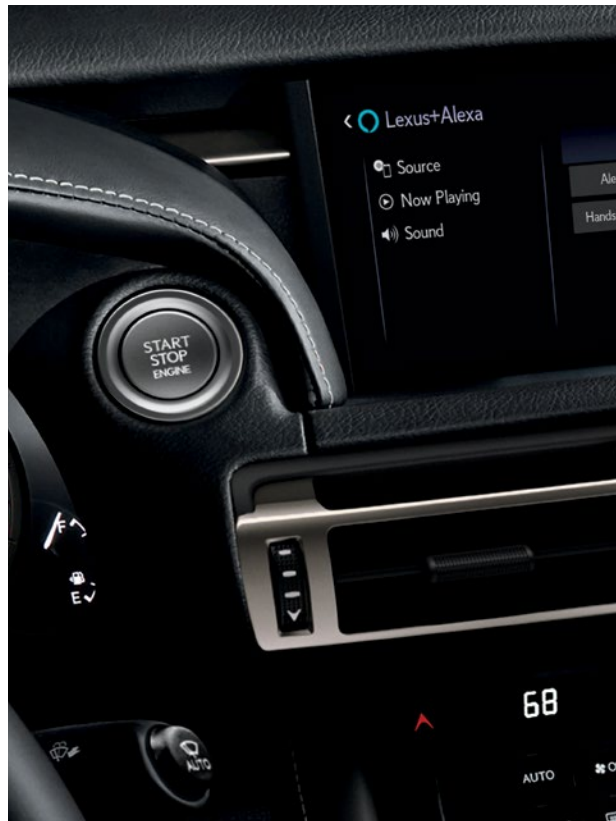

FORWARD-THINKING TECHNOLOGY

Apple CarPlay integration. Android Auto. Mark Levinson® surround sound. Experience the latest innovation at your fingertips.

The RC and RC F don't just connect you to the road—they connect you, period. In addition to Android Auto™³ and Amazon Alexa¹² compatibility, both models offer a large 10.3-inch high-resolution split-screen multimedia display with full-screen map view. For added convenience, you can start your engine remotely²⁰ with your smartwatch. And, to help you unlock a deeper appreciation of sound, the available 17-speaker, 835-watt Mark Levinson®²¹ Premium Surround Sound Audio System enables you to hear your music in its purest, highest fidelity.

RC F shown with Apple CarPlay®¹⁹ integration and Circuit Red and Black leather interior trim

THE CENTER OF IT ALL WITH YOU AT THE CENTER

With all the latest technology at your fingertips, you can focus on what matters most—the road ahead.

AMAZON ALEXA

Bring all the convenience of Amazon Alexa¹² on the road with the Lexus+Alexa¹² app. Using only your voice, you can easily access thousands of the same functions you get with Alexa at home. Listen to audiobooks, stream Amazon Music,¹² make lists, check the weather, get news briefings and much more. You can also use it to control compatible smart-home devices²² such as lighting, thermostat and security systems. Offering added in-vehicle convenience, Alexa can even sync to your Navigation System²³ or provide on-the-go directions via the Waze^{TM24} app on compatible devices.

APPLE CARPLAY

With Apple CarPlay^{®19} integration, you can access the same familiar interface from your iPhone^{®25} through the vehicle's multimedia display. Simply connect your iPhone to get directions, make calls, send and receive messages via Siri,^{®26} and get access to your favorite apps like Waze, Spotify[®] and Apple Audiobooks.^{TM27}

ANDROID AUTO

With Android Auto,^{TM3} you can now seamlessly cast your device's interface onto the vehicle's multimedia display. Play your music via your favorite apps such as Spotify and Pandora,[®] send messages through a range of commonly used apps like WhatsApp,^{®28} navigate with Google Maps²⁹ and request information—all with your voice. Just say "Hey Google" to get started. For added convenience, Android Auto can also help shorten your commute by automatically finding alternate routes if it detects heavy traffic.

MARK LEVINSON[®] AUDIO

The available 17-speaker, 835-watt Mark Levinson^{®21} Premium Surround Sound Audio System features patented, proprietary Clari-Fi^{®21} technology that restores audio quality from compressed music, resulting in crisp, clear, dynamic sound from almost any source. This, combined with technology designed to create an expansive "sweet spot" of audio, envelops every passenger in three-dimensional sound that rivals the finest home audio systems.

LEXUS ENFORM

Lexus Enform³⁰ elevates connected technology and provides concierge-level convenience. From emergency assistance and available onboard Wi-Fi³¹ to the ability to start your engine remotely²⁰ using your smartphone, smartwatch, the Lexus skill on Amazon Alexa built-in devices, or the Lexus Action on Google with your Assistant-enabled devices,²⁹ our premium suite of connected technology offers peace of mind with every drive.

INTUITIVE PARKING ASSIST

Available Intuitive Parking Assist³² utilizes inconspicuous sensors integrated into the front and rear bumpers that are designed to detect surrounding objects. Using audible tones and an indicator on the multimedia display, the system can notify you of a detected object's location and proximity, helping with routine tasks like parallel parking.

DELIVERY AND TECHNOLOGY SPECIALISTS

To help you get the most out of these and other features in your new Lexus, a Vehicle Delivery Specialist will walk you through nearly every setting and function you desire. And to answer questions that arise after delivery, a Vehicle Technology Specialist can offer expert guidance in person or without you ever leaving the driveway via camera-enabled apps like FaceTime.^{®33} Learn more about these services at lexus.com/specialists.

PEACE OF MIND, STANDARD

Presenting Lexus Safety System+, an integrated suite of class-leading standard active safety equipment.^{8,15,34}

PRE-COLLISION SYSTEM WITH PEDESTRIAN DETECTION

This system³⁵ is engineered to help detect a vehicle or a pedestrian in the path of your Lexus under certain conditions. Should it detect a potential frontal collision, it's designed to automatically prepare Brake Assist³⁶ for increased brake force and, in some cases, can even automatically brake the vehicle to a stop.

LANE DEPARTURE ALERT WITH STEERING ASSIST

This system³⁷ utilizes a camera to monitor visible lane markings. If an inadvertent lane departure is detected at speeds above 32 mph, the system is designed to warn you so that you can steer back into the lane, and can even take slight corrective measures to help keep you within your visibly marked lane.

HIGH-SPEED DYNAMIC RADAR CRUISE CONTROL

This system³⁸ uses radar and camera technology to help you maintain a preset speed and following distance from the vehicle ahead. If you get closer than the preset distance, the throttle is automatically reduced and the brakes may be applied. As soon as the road ahead clears, your Lexus returns to its preset speed.

INTELLIGENT HIGH BEAMS

To help provide greater visibility for you as well as other drivers, Intelligent High Beams³⁹ offer added illumination to help keep you focused on the road. When the road ahead is clear, the system defaults to high-beam mode, then temporarily switches to low beams when it detects the headlamps or taillamps of vehicles ahead.

RC STYLES

RC 300

Standard features:

241-horsepower¹ turbo with eight-speed paddle-shift transmission

Rear-wheel drive

Drive Mode Select

Lateral performance damper (RWD)

Steering-wheel-mounted paddle shifters

Vehicle Dynamics Integrated Management⁴⁰

Lexus Multimedia System⁴¹ with 7.0-in color display

Lexus Enform Wi-Fi.³¹ 4GB/three-month trial is included.

Lexus Enform Safety Connect⁴² and Service Connect.⁴³ Included for the first three and 10 years of ownership, respectively.

Lexus Enform Remote.²⁰ Accessible via Lexus app; works with Amazon Alexa¹² and Google Assistant.²⁹ Included for the first three years of ownership.

Bluetooth^{®44} and USB⁴⁵ smartphone connectivity

Voice Command

Apple CarPlay^{®19} integration

Amazon Alexa¹² compatibility

Android Auto^{TM3} integration

Lexus app (Enform Remote²⁰ engine start, service scheduling, Vehicle Health Reports/Alerts and more)

Color multi-information display

10-speaker Premium Sound System

Dual-zone climate control with interior air filter, smog sensor and automatic recirculation mode

10-way power-adjustable driver's seat (including lumbar).

Eight-way power-adjustable front passenger's seat and 60/40-split fold-down rear seats.

SmartAccess^{46,47} with push-button Start/Stop

Lexus Safety System+.³⁴ (Pre-Collision System with Pedestrian Detection.³⁵ Lane Departure Alert with Steering Assist,³⁷ High-Speed Dynamic Radar Cruise Control³⁸ and Intelligent High Beams³⁹)

Blind Spot Monitor⁴⁸ with Rear Cross-Traffic Alert⁴⁹

Bi-LED headlamps and LED taillamps

Backup camera⁵⁰

Eight standard airbags⁵¹

Complimentary scheduled maintenance services.⁵² (Please refer to the *Warranty and Services Guide* for details.)

RC 300 AWD

Includes RC 300 features, and adds or replaces:

260-horsepower¹ V6 with six-speed paddle-shift transmission

All-wheel drive

Heated front seats

RC 350

Includes RC 300 features, and adds or replaces:

311-horsepower¹ V6 with eight-speed paddle-shift transmission

Available rear-wheel or all-wheel drive

Cool-air intake

RC 300 F SPORT

Includes RC 300 features and Premium Package, and adds or replaces:

F SPORT-tuned Adaptive Variable Suspension with Sport S+ and Custom drive modes

Two-piece front brake rotors with high-friction brake pads¹⁰ (RWD)

F SPORT 19-in split-five-spoke alloy wheels with Dark Graphite finish and summer tires⁵

F SPORT heated and ventilated front seats with enhanced bolsters

F SPORT interior details including Dark Gray Streamline trim, aluminum pedals and black headliner

Perforated leather-trimmed shift knob and steering wheel with F SPORT logo

F SPORT exterior styling including unique front bumper and grille

Performance-inspired instrumentation with sliding bezel

Turbo-boost gauge

RC 300 F SPORT AWD

Includes RC 300 F SPORT features, and adds or replaces:

260-horsepower¹ V6 with six-speed paddle-shift transmission

All-wheel drive

F SPORT 19-in split-five-spoke alloy wheels with Dark Graphite finish and all-season tires

RC 350 F SPORT

Includes RC 300 F SPORT features, and adds or replaces:

311-horsepower¹ V6 with eight-speed paddle-shift transmission

Available rear-wheel or all-wheel drive

Cool-air intake
