SET**
Ford™

Three Heights, Two Lengths

With multiple options, you can design it tall enough for most people to stand comfortably inside. While parked, of course.

Add a Row, Lose a Row

Up-to-15 seating capacity lets you adjust space for max cargo, max seating, or somewhere in-between.

Two Engine Options

Choose between two engines. Either one engineered to help make your driving experience as smooth as possible.

Seating

Seats from two to up to 15 passengers comfortably. Offers 10-way power heated seats, available for both the driver's and passenger's seats.

Storage

Loads of space for hauling cargo. Available organization accessories help keep items secure while on the road.

New 8" Cluster Display

Keep your eyes on the essentials. Now standard, the updated instrument display gives you the goods at a glance – including a standard Tire Pressure Monitoring System (TPMS).

Long Length – 235.5"

Long Length – 235.5"

The spacious interior allows you to haul large items and higher quantities. Cargo volume behind first row: 349.6 cu ft

High Roof Height – 108.6"

Maximum cargo capacity. Comfortably accommodates tall items and provides ample space for your passengers to move around with a maximum cargo height of 77 inches.

Medium Roof Height – 99.2"

With increased cargo volume, compared to the Low Roof Height, you can transport any taller accessories or mobility equipment. Simply giving passengers an easier way in and out with a maximum cargo height of 67.6 inches.

Low Roof Height – 82.4"

Offers a good balance of cargo space and maneuverability with a maximum cargo height of 52.8 inches. Allows you to boldly travel through urban areas with height restrictions.

Extended Length – 263.9"

Confidently haul anything that wouldn't normally fit in standard vans. Cargo volume behind first row: 425.4 cu ft

Lane-Keeping Assist

This smart feature scans your vehicle's position between the lines in the road ahead and can alert you if you're starting to edge out of your lane. It can also activate Driver Alert, which sends warnings after repeated drifts to suggest the driver take a break.

Pre-Collision Assist®

With Automatic Emergency Braking, this feature can help detect a potential collision with pedestrians or vehicles ahead. If system sensors detect a potential collision with a vehicle or pedestrian ahead, a warning flashes, an alert sounds, and the brakes are applied if needed.

Rearview Camera with Trailer Hitch Assist

Put the car in reverse and the rearview camera turns on, showing what's behind the vehicle on the dashboard screen. Guidelines help you back up, showing your path and where it will go as the steering wheel turns.

Performance

Big Power for Big Plans

The Power of Choice

Choose the 3.5L V6 engine with the Ford-designed port-fuel/direct-injection (PFDi) system with 275 horsepower and 260 lb-ft torque. Or the 3.5L EcoBoost® V6 engine with 300 horsepower and 400 lb-ft torque. Both are partnered with our advanced 10-speed transmission for smooth shifts and performance.

Heavy-Duty Towing

Bring what you need for the road trip. Transit® van and the Heavy-Duty Trailer Tow Package allow you to tow up to 4,500 lbs. The package includes wiring provisions, connector assembly, a frame-mounted hitch receiver, and rear jumpers.

31-Gallon Tank

The biggest advantage of this available extra-capacity fuel tank is that you can go further between refueling. Enjoy your ride as you pass all those stations you would have previously had to stop at.

Intelligent All-Wheel Drive (AWD)

This available system is designed to help maximize traction and enhance handling. Seamlessly integrated into the vehicle's design so it doesn't raise the load floor or seat height. Keep your drive comfortable.

Impressive Payload

Haul just about anything, be it gear or the whole crew. Enjoy 5,103 lbs of max payload for cargo vans, and 3,401 lbs of max payload for passenger vans.
