Trailhunter

- 18-in. bronze alloy wheels with 33-in. Toyo all-terrain tires
- Old Man Emu 2.5-in. forged shocks with rear piggyback-style remote reservoirs
- ARB® roof rack

DESIGN

The new face of adventure.

The 2025 4Runner merges top-of-the-line engineering with elements of its beloved heritage for an elegantly rugged design that's more than beautiful: It eases your journey at every turn.

Premium LED Headlights

Bright LED headlights offer exceptional low-light visibility, so whether you're beating the crowd to surf before dawn or driving home from the trail after dusk, you're always in the clear.

Aggressive Stance

4Runner's wide, muscular stance nods to its dominant capability and the all-out confidence you feel in its driver's seat. TRD Pro and Trailhunter take it even further with 1.5-in. widened overfenders.

Third-Row Seating

Bring everyone along for the fun. 4Runner's available third-row seating easily folds up so you can comfortably seat up to seven people when you need to.

Heated and Ventilated Front Row Seats

As outside temperatures change, available heated front seats make chilly journeys more inviting, while available ventilation helps keep you refreshed on warmer days.

The Power Rear Window

The beloved power rear window raises and lowers with the push of a button, so you can easily grab gear from the cargo area or let your pup sniff the wind on a sunny day.

PERFORMANCE & CAPABILITY

Confidence to push boundaries.

Our most capable 4Runner is your advantage on the most ambitious treks. With up to 326 net combined horsepower beneath the hood and an available Stabilizer Disconnect Mechanism (SDM) that offers extra suspension articulation for wild trails, 4Runner is up for the challenge.

i-FORCE Gas Engine

4Runner's standard i-FORCE 2.4-liter turbocharged engine produces 278 horsepower and 317 lb.-ft of torque. It's mated to an 8-speed automatic transmission, delivering improved drivability and efficiency, with up to a 21 combined manufacturer-estimated mpg rating.

Part-Time & Full-Time 4-Wheel Drive

4Runner's available part-time and full-time 4-wheel drive systems provide power to the front and rear axles to improve traction and stability. Simply activate the part-time 4WD when the terrain gets tough or let full-time 4WD kick in automatically.

Stabilizer Disconnect Mechanism

Standard on TRD Pro and Trailhunter models, the new Stabilizer Disconnect Mechanism (SDM) helps you navigate across terrain with ease. With the touch of a button, the stabilizer bar disengages to give the front suspension increased wheel articulation, helping to keep all four wheels in contact with the ground.

Drive Modes

Three distinct drive modes tailor your drive with the touch of a button. Sport S Mode thrills with sharper acceleration, Eco Mode helps maximize fuel economy, and Normal Mode blends efficiency with performance. Available Comfort and Sport S+ Modes offer even more capability.

Multi-Terrain Select & Crawl Control

Explore with confidence. 4Runner's available Multi-Terrain Select (MTS) helps you navigate varying landscapes with improved traction at different speeds. Crawl Control (CRAWL) helps take on difficult terrain by automatically modulating the throttle and brakes, so you can focus on steering.

Electronic Locking Rear Differential

A staple for every off-road enthusiast, the available electronic locking rear differential gives you the ability to lock the rear wheels together, so they spin in tandem, regardless of traction differences, for a more confident and controlled off-road experience.

TECHNOLOGY

Smarter at every turn.

4Runner is no simple SUV: Its exceptional system of equipment puts you at the helm of adventure. From viewing the terrain beneath you in real time with the available Multi-Terrain Monitor (MTM) on the available 14-in. touchscreen, to taking your towing game to the next level with the available Tow Technology Package, 4Runner's tech makes your life better.

14-In. Touchscreen

4Runner's available 14-in. Toyota Audio Multimedia touchscreen heightens your interactions through sight, touch and even voice recognition that lets you activate the system with a phrase like, "Hey, Toyota." From listening to music to finding your destinations, and more—stay connected to every adventure.

3D Multi-Terrain & Panoramic View Monitors

4Runner's available Multi-Terrain Monitor (MTM) lets you check your immediate surroundings for obstacles, even on the terrain beneath you. Simply press a button to display front, rear, and side camera views. The available Panoramic View Monitor (PVM) uses the same cameras to display a top-down view of your vehicle for easy maneuvering in tight spots.

12.3-In. Digital Gauge Cluster

Customize the exceptionally clear available 12.3-in. digital gauge cluster to your liking with 12 display patterns to suit your preference, including four different gauge styles and three dial-layout choices for an optimal driving experience.

Tow Tech Package

4Runner's available Tow Technology Package features a digital rearview mirror, Trailer Backup Guide, Trailer Reverse Assist (TRA) and Trailer Blind Spot Monitor—all to help make your hauls a breeze.

TOYOTA

SAFETY & CONVENIENCE.

Ready for everything.

Power Open/Close Tailgate

When your hands are full, 4Runner's available hands-free power liftgate takes the pressure off. Simply wave your foot under the rear bumper with the key fob in your possession, and the liftgate opens so you can easily access your belongings. After loading or unloading, just press the Close-and-Lock button.

Blind Spot Monitor With Rear Cross-Traffic Alert

Available Blind Spot Monitor (BSM) with Rear Cross-Traffic Alert (RCTA) helps you identify vehicles that might be in a blind spot. When you use your turn signal and BSM detect a vehicle, it warns you with a flashing indicator light on the appropriate outside mirror. Rear Cross-Traffic Alert provides audible and visual indicators to help warn you of approaching vehicles when you're backing up.

Digital Rearview Mirror

Connected to a camera in the rear, 4Runner's available digital rearview mirror casts a clear, wide obstruction-free view of what's behind you. You can zoom in, zoom out and adjust the mirror to get a better perspective.
