

ICON. DRIVEN.
DB12

The world's first Super Tourer

DB12. Redefining and reinventing what it means to be a tourer. An icon. Epitomizing an all-round balance of pulsating dynamism, unmatched ride comfort, and ultra-luxury refinement. Reaching new heights of driver engagement, consummate performance, and unmatched road presence. Whether negotiating a twisting mountain road, powering down an autobahn, or cruising down a tree-lined boulevard.

This is no mere GT. This is the world's first Super Tourer.

Engineering and Performance

DB12 heralds a new era for Aston Martin. The first of the next-generation of sportscars. A hand-built 4.0-liter twin-turbo V8 engine. Producing 671 HP and 590 lb-ft of torque. Capabilities elevated. Performance enhanced. Dynamics sharpened. An all-new suspension system. New intelligent adaptive dampers. Benchmarks torn up. An icon reaffirmed.

PERFORMANCE. PERFECTED

Surging to a top speed of 202 mph. Delivering 0–60 mph in 3.5 seconds. An exceptional all-aluminum 4.0-liter twin-turbo V8 engine has been comprehensively re-engineered for DB12. Modified cam profiles. Optimized compression ratio. Larger turbochargers. Increased cooling. As seamless as it is relentless, DB12 elevates the grand into the echelons of super-powered.

GEARED FOR POWER

Spearheading fiercer performance and nonstop driver engagement from a mighty V8 heart. An automatic ZF eight-speed transmission is twinned with an Electronic Rear Differential. Quicker gear changes and a lower final drive ratio sharpens acceleration through the mid-range. Delivering a more dynamic drive in any conditions.

FIVE DRIVE MODES IN THE PALM OF YOUR HAND

DB12 has five easily accessed drive modes: GT, Sport, Sport+, Wet, and Individual. Each combines next-generation Electric Stability Control (ESC) with Electronic Rear Differential to optimize cornering abilities on track or road, whatever the weather. Distributing torque intelligently for better handling and performance. Tighter control. Increased confidence. Brilliantly agile and responsive. DB12 comes alive on challenging roads through immense front-end grip and unrelenting traction.

CARBON BRAKING

Steel brakes as standard provide superior stopping power. Or choose Carbon Ceramic Brakes—the first time we’ve offered these across Aston Martin’s core GT models. 15.7 inches at the front. 14.2 inches at the rear. Grooved and drilled to increase ventilation and improve thermal management. Saving 60 lb in unsprung mass. Lightweighting in action. Increasing braking performance and reducing brake fade at temperatures of up to 1,472°F. Facilitating later braking into corners. Giving more stability. More road connection. More confidence.

STEERING DYNAMICS INTO A NEW CLASS

The bonded aluminum structure sees a 7% increase in stiffness, bolstered by firmer anti-roll bars and enhanced performance through double wishbone suspension. Refinements to a range of underbody parts improve rigidity and lateral stiffness. With a greater focus on ride refinement and steering feel. A new generation of Bilstein DTX adaptive dampers offer pinpoint dynamics with lightning-fast reactions for greater stability. Giving drivers confidence to enter every bend at pace.

Interior

DB12 opens up a sensory haven for all occupants. Enriched by an all-new, ultra-luxury, driver-centric cabin. Balancing clean, contemporary design with timeless artisanship, connected technologies, and the finest materials. Shaping your senses with Bowers & Wilkins surround sound, next-gen infotainment, Pure Black digital touchscreens, and tactile analogue switchgear.

FINISHING TOUCH

DB12 is equipped with 10.25-inch Pure Black, 1,970 x 720 high-resolution screens with ultra-responsive (30-nanosecond reaction time) capacitive touch control. The highest definition for any car with equivalent touch control systems. This allows fingertip input and multi-finger gesture control, creating an immediate sense of connection. DB12 creates a pleasing balance between touchscreen commands and the positive tactility of physical switches for secure, eyes-off mechanical operations such as gear selection, drive selection, heating, and ventilation. The perfect blend of peerless technology and everyday usability.

SYMPHONY OF SOUND

Aston Martin's next-generation bespoke infotainment system. A formidable suite of connected technologies includes a spectacular surround-sound system from new audio partner, Bowers & Wilkins. Sound resounds from every corner of DB12 with 15 speakers and 1,170 watts steeping you in a deep-end aural ambience. Offering a breadth of acoustic soundscapes and Quantum-Logic Immersion. Technology reacts to ambient noise in the cabin, automatically adjusting the audio profile as you drive. Sound processing creates a truly intense sound stage for occupants to immerse themselves in. A sound system that demands an encore.

NEXT-GENERATION INFOTAINMENT

A major landmark for DB12. The introduction of Aston Martin's next-generation infotainment system. Entirely bespoke. Meticulously designed and developed. The marque's first in-house system. Supports wireless Apple CarPlay Ultra®* and Android Auto™. A fully integrated multi-screen system with driver displays using Pure Black high-resolution screens with ultra-responsive touch control. And voice control. To bring satellite navigation, favorite playlists, and any app you need under instant control.

FUTURE PERFECT

After 111 years of honing performance, power, and dynamism, DB12 now also places connectivity at the core of a car. The connected car ecosystem. Allowing engagement, control, and feedback direct from you to the car. A system constantly evolving with an arsenal of new products, services, security, and support with a stream of Over The Air (OTA) updates and diagnostics. All from the palm of your hand. An all-new navigation system, designed exclusively for DB12, offers 3D mapping with subdued hues for intuitive, clear instruction, lane guidance, and real-time traffic overlays. Connecting you with the now. And tomorrow.

Exterior

DB12. Exquisite lines. Cut with dynamic sharpness. A harmonious expression of power, prestige, and potency. Worthy of the world's first Super Tourer. Shaped with the immaculate style for which Aston Martin is renowned. A design that exudes confidence, commands attention, and elegantly hints at the supreme handling, connected technology, and ultra-luxury cabin space that lie in wait beneath.

GRILLE: OUR DNA. FRONT AND CENTER

The iconic vaned grille. A perfectly honed focal point. Aston Martin DNA emphatically on show. Where formidable form meets functional flow of air. A 56% increase in open area to aid cooling. An all-new, updated front-end design features S curves modeled on the classic 50s look but made bolder, wider, fiercer, and more assertive to announce the presence of the world's first Super Tourer.

WIDE BODY: WIDER BODY, BROADER HORIZONS

Progressive styling is further finessed with a wider more muscular stance, broader haunches pumped with purpose and positivity. Track widths increased by 0.2 in. at the front end and 0.9 in. at the rear. Clad in composite panels. Giving the DB12 increased stability and even greater road presence.

WHEELS: WHEELS OF PROGRESS

Mounted on new, 21-inch forged lightweight alloy wheels, trimmed to maximize harmony between tire and asphalt. DB12 debuts the new Michelin Pilot Sport S 5 tire. Developed alongside Michelin, they ensure the highest levels of reactivity for precision steering. A hand-spun compound maximizes lateral grip in both wet and dry conditions to dampen the effects of rain and cushion comfort into every roll of tread. The tires also feature noise-cancelling inserts to reduce tire noise by 20%. Further elevating refinement and driver comfort.

DB12 Volante

This is no mere GT. An icon reborn and reinvented. Smoothed and chiselled into the shape of a Volante and given free rein to cut through continents, erase expectations and completely redefine the open-top category. This is DB12 Volante.

As jaw dropping as it is roof raising. DB12 Volante cruises with a K-fold roof to take the grand to the super with scything style and an aesthetic side profile. Opening and closing in a class-leading time.

Engineering and Performance

Propelled by power and purified by performance. DB12 Volante is made piece by piece and inch by inch to seek the speed of missiles. While injecting the cockpit with a turbocharged tourer experience intensity.

THUNDERING YOUR SENSES

Blowing the top off performance. The twin-turbo V8 delivers a top speed of 202mph and comes forged with 800Nm of torque. Letting every ounce of power pour over the road without a roof to stop sound soaring around every edge of the cabin. Putting you at the heart of the ultimate roaring racing experience.

THE DYNAMIC DUET

An addition to the transmission. For the first time in an Aston Martin GT model, an automatic ZF 8-speed transmission comes twinned with an electronic limited slip rear differential. Working in harmony to thread each wheel with venom and pirouette power into place. Cutting acceleration time across the mid-range. Taking your super tourer to super racing heights.

TAMING DYNAMISM

The open-top DB12 Volante comes reinforced with five drive modes. Taking to tarmac with greater grip thanks to ESP. Pulling the road closer to your palms with tighter control. The electronic limited slip rear differential delivers torque intelligently for better handling at any speed. With the non-isolated steering column puts feedback immediately where you can feel it.

Exterior

An open-top model made to marvel. Sleek, beautiful and scythed with sharpness. Carved to let torque flow through its heart-stealing body. And embellished with a re-imagined and redesigned finely folded roof. Taking top-down driving to super levels while adding air to the already debonair.

ROOF: FOLDED TO PERFECTION

DB12 Volante is crowned by a K-fold roof, opening to the atmosphere in a class-leading 14 seconds. And able to close even when you're cruising at up to 35mph. All without impacting the aesthetic of the side profile. The roof canopy stands acoustically enhanced and incorporates eight layers of insulation materials for improved interior cabin comfort.

GRILLE: INHERITED AGGRESSION

Inherited and intended to cool. DB12 Volante bares a redesigned and remolded front bumper, fender and grille design. A honed focal point with a larger traditional 'DB' single-paned grille for a 56% increase in open area to aid cooling.

WIDE BODY: DOMINATING THE ROAD WITH BROADER SHOULDERS

DB12 Volante has been strengthened with a 6mm front and 22mm rear increase in track width flowing through to the body width. Bulking with broader shoulders for greater road presence and intimidating with every added inch.

WHEELS: A FINER CONNECTION TO THE ROAD

A revolution in rubber. DB12 Volante debuts the new Michelin Pilot Sport S 5 tire. A harmonious creation between Aston Martin and Michelin. Wrapped in a hand spun compound for super grip to reject every drop of rain and inspire smoothness from every turn of tread. And enveloped in the new tire are the 21-inch alloy wheels. Tailored, cut and threaded to create an assertive presence and an aggressive side profile.

Interior

An interior lined with digital intelligence, stitched with smarter sound and pulsing with never-seen-before infotainment. DB12 Volante wraps your senses in technology. Lines your cabin with the optimum blend of analogue controls and digital technology. The handcrafted past meets the fine-tuned future.

INTERLINKED WITH INTELLIGENCE

Gripped by driver centricity. DB12 Volante beats with intelligence, holding you close and cupping you in a precise place for a near-perfect hip/heel ratio. With the most minor of movements hanging on only the slightest twitch of your wrist or ankle.

A PREMIER FOR DB12

A premier screening. DB12 Volante courses with clarity thanks to the highest definition touch screen in any car in the category with full capacitive touch control. Imprinted with enlightened graphics, setting the precedent for every Aston Martin to come.

NOT ONE DECIBEL DAMPENED

Sound seeping from every corner. The world's first super tourer has the option of a sound system like no other. 15 speakers and 1170 watts wrap you in symphony. DB12 Volante's Bowers & Wilkins system, with QuantumLogic immersion™ technology is hand tuned to duet alongside every swatch of your interiors. Letting every beat bounce from the materials lining your cabin.

AN INFOTAINMENT DEBUT

Meet the infotainment system made to match the capabilities of the first ever super tourer. Designed, engineered and tailored in house. Built to support wireless Apple CarPlay Ultra®* and for the first time, born with voice control. Making satellite navigation, your favorite tracks and any app stand to attention. With your voice alone.

DB12 Goldfinger Edition

Aston Martin. James Bond. Arguably the most famous relationship in modern cinematic history. From the moment Q first introduced 007 to the Aston Martin DB5 in the 1964 spy thriller, Bond's timeless relationship with the iconic British sports-car began. The Silver Birch coupe has since become synonymous with the character of James Bond and of a life lived in the fast lane. Across the globe. Across the decades. Now, DB12, the world's first super tourer pays tribute to the world's most famous coupe. To celebrate the 60th anniversary of the seminal spy movie's release, the legendary partnership has been immortalized in a limited run of 60 super tourers. Introducing the exquisitely engineered Aston Martin DB12 Goldfinger Edition. Prepare to be stirred, not shaken.

GOLD, FOR YOUR FINGERS

Bond's knowledge and love of luxury is second to none. A cufflink. A wine label. The best temperature to serve saké. This appreciation of the detail-within-the-detail is captured in the exquisite 18ct gold-plated interior jewelry, which adorns the drive mode rotary dial and roller controllers. This golden theme continues through the DB12 Goldfinger Edition's trim inlays, with exquisite gold fibers woven into the 2x2 Twill Carbon Fiber.

DESIGNED TO THRILL

The new DB12 Goldfinger Edition showcases a unique tread-plate etched with the intricate Prince of Wales check pattern, and a polished sill plaque. 60 years of Bond's partnership with Aston Martin, suitably attired, and celebrated.

007 AND THE 8 OF HEARTS

An eight of hearts, subtly embroidered into the sun visor, will evoke sun-filled Miami memories whenever it is revealed. "That last draw was the eight of hearts ..." says Bond girl Jill Masterson as she reclines on a Miami hotel balcony spying on Goldfinger's unfortunate card game opponent. Bond glides into action, and Goldfinger's luck at cards takes a turn for the worse. A timeless scene, to be replayed at your leisure. Forever.

NOTCHED GEAR SELECTOR

In the iconic Goldfinger movie, when leaving the fictitious Royal St. Marks' Golf Club, 007 clamps a magnetized tracker inside the boot of Auric Goldfinger's vehicle. This iconic tracking device is the inspiration behind the gold-plated etched gear lever. Perfectly weighted and exquisitely styled. A subtle celebration of Q's legendary inventiveness.

Exterior

One of the standout scenes from Goldfinger was of James Bond gazing out over the famed Furka Pass in the Swiss Alps. The view was stunning. Both car and panorama. The 60th Anniversary DB12 Goldfinger Edition sports exactly the same Silver Birch paintwork that first caused the world of the 1960s to fall in love with the man. And the marque.

BESPOKE, MULTI-SPOKE

The unique envy-evoking spoked wheels of the original Aston Martin DB5 are now mirrored by the equally unique 21" silver-plated, multi-spoke wheels of the DB12 Goldfinger Edition, complimented by striking black brake calipers.

A GOLDEN TOUCH

Like most legendary stars of sixties celluloid, the original Aston Martin DB5 was instantly recognizable from every angle. In part, this was thanks to the iconic Aston Martin side strake, which adorns this DB12. This time, burnished in gold to mark 60 years of Goldfinger fame. Functionally, it draws air from the front wheel arches to reduce lift and enhance stability. Yet its form continues to draw starry-eyed glances from admirers of all ages.

A BADGE OF HONOR

The all-new super tourer continues to reward the eye of the onlooker with unique inlay enameled script badges that pay homage to the original badging on the Goldfinger DB5, and are also crowned in chrome with a bright 'Q' fender badge signifying this special edition.
