TECHNOLOGY

Up to 10 Camera Views

Available on AT4 and Denali, first-in-class* available underbody cameras include front- and rear-facing views underneath the vehicle and wash systems for both underbody cameras. A split-screen view shows both underbody cameras and high definition surround views together.

Driver-Focused Screens

- 11.3" diagonal center touchscreen
- 11.0" diagonal Driver Information Center
- First-in-class* 6.3" diagonal multicolor Head-Up Display that conveniently projects customizable vehicle info on your windshield – available on AT4 and standard on Denali.

Off Road Performance Display

Track real-time, off-road performance data on Canyon's 11.3" diagonal center touchscreen while conquering trails.

EXTERIOR

Multistow Tailgate

Carry the provisions you need wherever the action takes you with Canyon's first-in-class* available integrated tailgate storage system with included drain.

Versatile Cargo Bed

- Eight standard tie-downs to securely stow your gear
- Remote locking/unlocking tailgate for extra convenience and security
- Available CornerStep rear bumper for a sure-footed grip and easy access
- Available half-gate position for transporting long objects
- Available 120V outlet for your off-road power needs
- Available spray-on bedliner

INTERIOR

Premium Bose System

Enjoy powerful sound on the road or trail with an available Bose* 7-speaker audio system.

Premium Materials

- Exclusive Jet Black cloth interior and soft-touch instrument panel materials on Elevation
- Exclusive Jet Black interior with Timber accents and available leather-appointed front seats on AT4
- Exclusive Premium Jet Black interior with Teak accents and laser-etched open-pore wood trim on Denali
- Obsidian Rush interior on the available AT4X Package

Power Driver Seat

Ride in comfort with an available 8-way power driver heated front seat with power lumbar support.

CAPABILITY

Turbomax™ Engine

The TurboMax™ engine delivers 310 horsepower and 430 lb.-ft. of best-in-class* standard gas engine torque and max towing of up to 7,700 lbs.*

Off-Road Suspension

Factory lift:

- 2" on Elevation, AT4 and Denali
- 3" on AT4X Package
- 4.5" on AT4X AEV Edition Package

Off-Road Hardware

- Driver-selectable front and rear electronic locking differentials, which help assure both wheels spin together regardless of the amount of resistance – only on the available AT4X Package
- Automatic rear locking differential, standard on Elevation, AT4 and Denali
- Autotrac two-speed transfer case with push-button controls, standard on AT4 and Denali, so you can switch into four-wheel drive as your adventure leads off-road

Selectable Drive Modes

Selectable modes include:

- Baja (only on the available AT4X Package)
- Terrain
- Off-Road
- Normal
- Tow/Haul*

CANYON SAFETY AND DRIVER ASSISTANCE TECHNOLOGIES

Rear Cross Traffic Braking

When in reverse, this feature alerts you or automatically provides hard emergency braking to help prevent a collision with detected vehicles crossing behind you.

Rear Park Assist

When in Reverse, this feature provides distance alerts of nearby detected vehicles and objects behind your vehicle to help you park and avoid collisions.

Blind Zone Steering Assist With Trailering

Can provide a brief, urgent turn of the steering wheel when a potential crash is detected with a moving vehicle in the lane you're entering.

Forward Collision Alert And Automatic Emergency Braking

These two features work together to help you avoid or reduce the severity of a front-end collision. They can warn you if they detect a potential collision with a vehicle you're following and automatically provide hard emergency braking, or enhance your hard braking.

CANYON SAFETY AND DRIVER ASSISTANCE TECHNOLOGIES

Following Distance Indicator

Displays the gap time in seconds between your vehicle and a detected vehicle you're following. This can help you maintain a safe following distance.

Front Pedestrian And Bicyclist Braking

Can help you avoid or reduce the severity of a front-end collision with a pedestrian or bicyclist it detects directly in front of you. It provides pedestrian alerts and can even automatically provide hard emergency braking, or enhance the driver's hard braking. It has limited nighttime and low visibility performance.

Lane Keep Assist With Lane Departure Warning

Can alert you if you might be unintentionally drifting out of detected lane lines so you can quickly take action. It will not alert you if you're using your turn signal or it detects you may be intentionally leaving your lane.

Intellibeam

Detects lighting conditions and other vehicles, and turns the high beams on and off as needed, depending on vehicle speed.
