- 12-way power front seats w/massage

AWD Pro S Plus

Highlight Features:

- EPA Estimated Range of 263 miles
- 12.9" display w/ Backlit Sliders
- 21" alloy wheels

Electric Performance

Gone in 4.9 seconds.

From the moment you hit the pedal on the ID.4 with AWD, you'll feel the instant torque, kicking things into high gear from 0-60 in an impressive 4.9 seconds. If torque is your thing, then you're really going to love the Performance Drive Unit in Pro models. It offers even more torque than the previous model year.

A massage chair behind the wheel

Stay cozy when it's cold and keep cool when it's hot with heated and available ventilated front seats in the ID.4. The coziness continues with available front seat 12-way power controls with 4-way lumbar massage and a memory function that saves your seat positions.

Media & Displays

12.9-inch Touchscreen Display

The 12.9" touchscreen is your central hub for your drive. It's equipped with voice control, useful features like interactive navigation, climate control and more. So, you can get where you're going, and stay comfortable along the way.

Sit to start

The ID.4 senses your presence and intuitively starts when you have your key fob and you sit in the driver's seat, "waking up" automatically after the press of the brake pedal. Screens blink on, and the car is ready for the road. Just put your foot on the brake, move the gear shift to drive and you're off!

Your room is ready

There's a place for just about everything when it comes to the ID.4's cargo capability. Simply fold down the rear seats to enjoy 64.2 cubic feet of generous space enveloped in high design.

Plus, the roof rails are perfect for those times you're feeling extra adventurous.

Lighting

A brighter future

Talk about a glow up—with LED taillights, and illuminated door handles, the ID.4 practically radiates. Plus, you can electrify your style even more with the available Premium LED projector headlights, illuminated front Volkswagen logo with connecting line, and rear illuminated logo.

IQ.DRIVE

Drive peace of mind with driver assistance technology that helps enhance safety.

Discover the confidence that comes with driver assistance technology that helps enhance safety. No matter your destination, enjoy the drive from A to B without much of the stress, thanks to IQ.DRIVE.

Features:

- Travel Assist
- Adaptive Cruise Control (ACC)
- Active Blind Spot Monitor
- Rear Traffic Alert
- Front Assist
- Emergency AssistLane Assist

Driver Assistance

Park Assist Plus

The Park Assist Plus feature puts into perspective the “will my car fit” debate when you come across the perfect parking spot. Not only can it sense the size of a space, but it will also help you do the parking, from start to finish, as you supervise. Parallel, perpendicular, or reversing is no problem.

Park Distance Control with Maneuver Braking

The available Park Distance Control helps take the guess work out of parking your car, while Maneuver Braking helps apply the brake automatically to help mitigate the chance of a collision with stationary objects while reversing into a spot. With Park Distance Control’s audio beeps and visual support, you’ll know if you’re getting too close to detected obstacles in front of or behind your car. It’ll also share additional information on your display, so you can see what’s behind your car as you reverse within a parking spot.

Light Assist

When driving at 18 mph or faster and your surroundings get dark, the Light Assist driver assistance feature turns on to help make sure the road ahead is lit, and when your speed slows to 12 mph, it turns off. You can set the high beams into “auto” mode, so they’ll automatically activate when there’s low light, and turn off when there’s an oncoming vehicle, or you enter an area that’s well lit by the environment or by traffic conditions.

Dynamic Road Sign Display

From traffic signs to speed limits, when you need a reminder about the signs on the road, Dynamic Road Sign Display helps share the information you want. It also features warnings for speed, restricted traffic zones and more, so you can remain focused on the road ahead.

Overhead Camera View (Area View)

Sometimes the best way to see what’s happening around you is through cameras that can give you a wider view of those hard to see angles that surround us. Area View does just that by providing an expanded view of your car’s surroundings.
