

Bentayga Range

The definitive luxury SUV

A choice without compromise

With a V8 petrol engine, a high-performance V8 or a V6 hybrid powertrain, the Bentayga is packed with the latest lifestyle-enhancing technology, from driver assistance systems to connected services. With a choice of 4-seat, 4+1 and 5-seat configurations, you can take everyone and everything with you, wherever you go.

The phenomenal Bentayga Speed combines stunning sports styling with unprecedented V8 performance, in the most powerful Bentayga ever built. The Bentayga Azure, meanwhile, puts the focus on elevated comfort and wellbeing. The Bentayga model is the quintessential luxury SUV, offering the perfect balance of craftsmanship and driving pleasure.

A visionary statement

Bentayga

The definitive Bentley

Extended Wheelbase

Four levels of unrivalled luxury

The Bentayga EWB offers an interior environment unlike any other SUV. Far more than just a luxury car, this extended wheelbase SUV is a showcase of wellbeing-enhancing technology – from seats that can proactively monitor and improve the comfort of their occupants to stunning lighting that combines the best of Bentley's craftsmanship and innovation.

There are four models available, offering increasing levels of luxury. The unparalleled Bentayga EWB Mulliner heads up the range, offering the pinnacle of SUV craftsmanship while the exquisite Azure places particular emphasis on wellbeing features and technology.

Technology

Enhanced wellbeing

In addition to ionisers in the rear of the cabin, a new air conditioning system uses filters to optimize interior air quality and reduce the number of airborne pollutants – including harmful PM2.5 particles. Air quality levels inside and outside the vehicle are displayed in the driver's information panel. It can even detect whether anyone is sitting in the rear seat and adjust the system accordingly, to conserve energy.

Unrivalled driving assistance

With Intelligent Park Assist, your Bentley can park itself. If the parking space is particularly tight, you can even get out before beginning the maneuver and activate the system from your smartphone, using the My Bentley app. Maneuver Assist protects your car from bumps and scrapes in tight spaces, and 3D surround view gives you a three-dimensional, real-time view of your surroundings, based on the input from all four of the car's cameras.

Effortless cruising

The Touring Specification is as standard on the Azure and Mulliner models, and available as an option across the rest of the range. It includes Adaptive Cruise Control with Lane Guidance, which will keep your Bentley at a safe distance from the car in front, due to congested traffic. It will also work to keep you in the center of your lane, alerting you to any drift and correcting your course. Predictive Adaptive Cruise Control will control your speed for you on major roads beyond the highway. It can adapt to changing speed limits automatically, while taking junctions, traffic lights and roundabouts in its stride.

Perfect preparation

On hybrid models, the My Cabin Comfort* feature allows you to set the cabin temperature before you set off using your mobile phone, even defrosting the windows in advance of your departure. It's just one life-enhancing feature in the suite of My Bentley connected services.

*All Driver Assistance systems and Connected Car technology are subject to regional availability. Please contact your local Bentley dealer for full details.

Download your choice of apps

The new My Bentley App Studio allows you to download your choice of apps directly to your Bentley's infotainment system, from a wide and growing range. It means, for example, that you can use your preferred navigation app and give it access to all the relevant vehicle data, such as fuel and range information. Consider it an app store for your car.

* All Driver Assistance features and Connected Car technology are subject to regional availability. Please contact your local Bentley retailer for full details.

Dolby Atmos

If you opt to add one of the Naim for Bentley or Bang & Olufsen for Bentley sound systems, and you use either of the Tidal or Amazon Music apps, you can now experience full Dolby Atmos sound. This cutting-edge audio technology delivers incredible definition and crystal-clear spatial awareness, so you can even identify where the sounds of individual instruments are coming from.

Performance

All-wheel drive, wherever you drive

The Bentayga has been built to perform perfectly at lateral and longitudinal angles of up to 35°, with a wading depth of up to 500 mm. Its Torsen all-wheel drive system delivers power to all four wheels, for complete driving confidence at all times.

Bentley Dynamic Ride

All V8 models now feature Bentley Dynamic Ride – an innovative, electronic anti-roll system that makes adjustments automatically in response to driving conditions. It helps keep the cabin stable when cornering at speed, while also reducing vibrations and improving ride quality on the open road.

Available Jet Appearance Package

Well-styled 22-inch high-gloss Ebony-painted wheels, black exterior detailing, an eye-catching grille, and an ebony and black onyx interior amplify the allure of this package.

All-wheel steering

The V8 models also feature all-wheel steering, which offers the dual benefit of a tighter turning circle at low speeds, combined with the ability to change lane and overtake much more smoothly and comfortably when travelling at high speeds.

Unrivalled seating comfort

Advanced seating features are available across the range, and installed as standard on some models. Postural Support gently and almost imperceptibly varies the pressure on different muscles to reduce fatigue, while Seat Auto Climate uses sensors to monitor the humidity and temperature at the surface of the seat and vary the heating and ventilation levels accordingly.

Accessories

Fixed Still Step

Highly suited to an off-road lifestyle, Fixed Sill Steps allow passengers to enter and exit the SUV with even greater ease. Available with impeccably finished inserts in Black, Bentley-branded Carbon Fiber and Moonbeam they are ideal complements to the Bentayga Styling Specification and Blackline Specification.

Paint Protection Film

PPF is a clear, high performance film that prevents chips and light scratches in paint work. When heat is applied, any fine scratches and swirl marks will be removed, ensuring your car's exterior finish remains as good as it was the day it left the factory.

Cross Bars

Cross Bars are the base of Bentayga's roof storage system. Designed to support the SUV's aerodynamic performance, they lock to the car's roof rails to ensure safe transit and confidence in all conditions.
