- Engine 3.0L inline-6 turbo with mild hybrid drive
- 5.3 seconds acceleration 0-60 mph
- 375 hp power @ 5,500-6,100 rpm
- 369 lb-ft torque @ 1,600-4,500 rpm

SUV

DESIGN.

A born leader never rests. The GLE SUV continues to advance its legacy with intuitive technology, rich refinement, and all-hybrid power including a plug-in model. From safety to style, leadership is a GLE family value.

ALL DIGITAL, EVEN MORE PERSONAL.

The widescreen dash features twin 12.3-inch screens with reconfigurable displays. Their seamless design extends to how they interact with you, with more intuitive touch controls for the multimedia screen and steering wheel. A color Head-Up Display is available, too.

CLEANER LOOKS, WITH CLEARER VISION.

Stylishly designed headlamps and taillamps are part of the GLE's 100-percent LED lighting, inside and out. Distinctive visual elements help get you noticed, and admired, by other drivers. Standard automatic highbeams and available active LED headlamps brighten the night.

AUDIO STREAMING, WITH STUDIO STAGING.

Burmester® Surround Sound, standard on Exclusive and Pinnacle Trims, combines the engineering of Germany's renowned crafter of high-end audio with new ways to enjoy it: Online Music Streaming, Dolby Atmos® and Sound Personalization are included.

COUPE

DESIGN.

Wrap the adventurous spirit of a Mercedes-Benz SUV in the sleek profile of a coupe and you get a vehicle whose sharp curves blur the lines between traditional categories. Spacious, sumptuous and sporty, the new GLE 450 4MATIC Coupe redefines elegance, boldly.

AT YOUR FINGERTIPS, IN THE MOMENT.

Twin 12.3-inch screens create a seamless widescreen cockpit with displays you can reconfigure and personalize. The central multimedia screen, steering wheel and console all feature Intuitive touch controls.

TOUCHPOINTS WITH A SPECIAL TOUCH.

The cabin is generous with room, rich in refinement, and available with more. To the heated front seats you can add ventilation and massage, plus heating of the armrests and steering wheel. Wood/leather and sport steering wheels are also available.

FEEL THE SKY, SAVOR THE STARS

A large, power-operated tinted glass panel supersizes the sunroof. It tilts open for ventilation, or slides back for a breeze. And with its power internal sunshade, you can relax in the shade or bask under a blanket of stars.

SUV & COUPE

INNOVATION.

When the GLE pioneered its market segment as the M-Class 25 years ago, it introduced numerous safety and comfort firsts to SUVs and Coupes. Innovation leadership remains its driving force, with even greater attention to your well-being.

VIRTUAL ASSISTANT, ACTUAL ASSISTANCE.

Using Artificial Intelligence, MBUX can turn your words into your GLE's action. Just say "Hey, Mercedes" to operate features with your natural voice. Ongoing advancement lets it learn your habits and new phrases, and it can distinguish if you or your co-pilot is speaking.

FAMILIAR FACES.

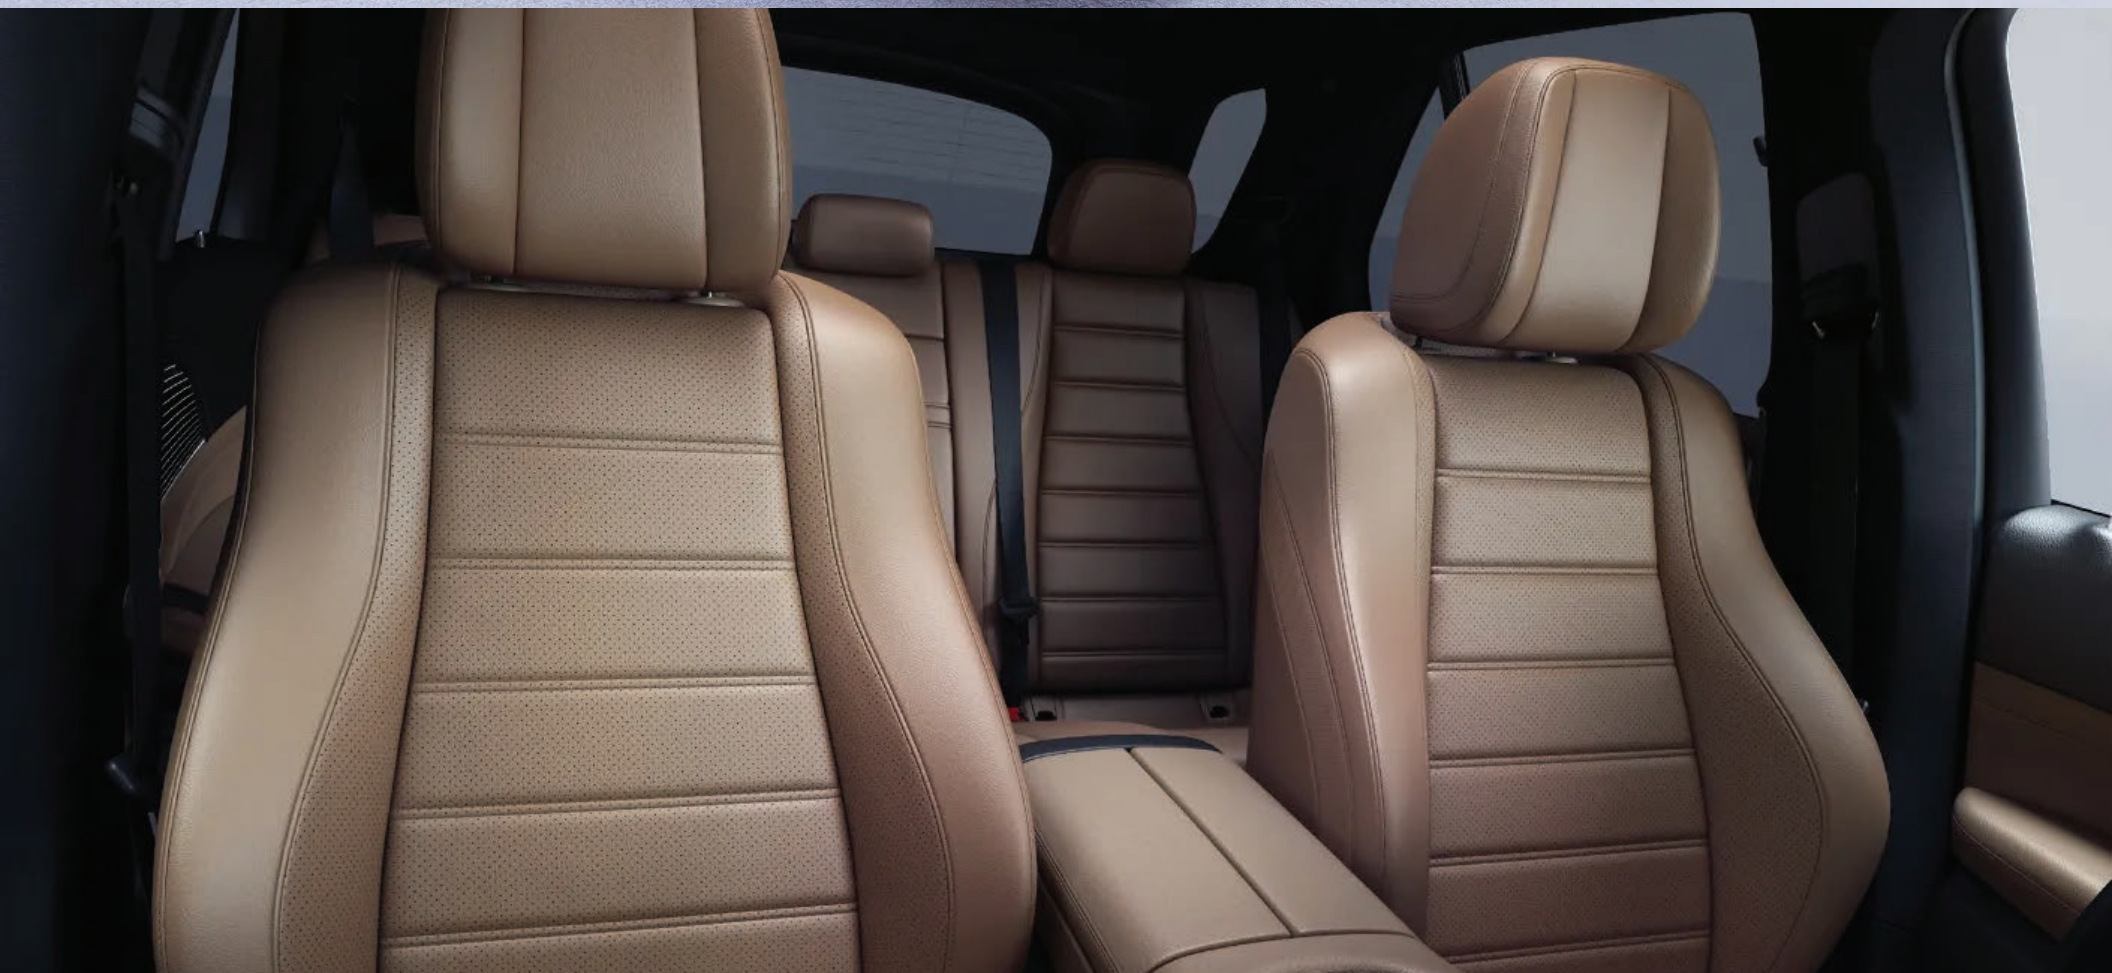

No need to plug in your phone to recharge it on the go. And along with wireless charging, wireless Apple CarPlay® and Android Auto are standard, too. So you can enjoy the interfaces you know without a hitch, or a cable.

PROGRESSIVE BACKING.

The available trailer hitch lets you tow up to 7,700 lbs with your GLE. It includes Trailer Stability Assist to help arrest trailer sway. Trailer Maneuvering Assist is an innovative option that can help you back up and straighten your rig more easily.

COUPE

SUV & COUPE

THE CAR THAT GETS INTO YOU.

MBUX lets you customize countless settings, then save them in your personal profile in the Mercedes-Benz app for Apple iPhone®, Apple Watch® and Android-based phones. Your fingerprint is one of several ways your GLE knows if it's you or another family member driving.

CONFIDENCE FROM COMPETENCE.

Agile, efficient 4MATIC® adds all-wheel driving confidence from slippery roads to dry corners. To help turn grip into go, 4MATIC can vary the front-to-rear torque distribution from 0 to 100% based on road conditions and driving situations.

MODES FOR YOUR DRIVING MOODS.

DYNAMIC SELECT lets you dial in the performance character of your GLE just by tapping a console switch. Driving modes from ECO to Sport to customizable Individual can vary the throttle feel, shifting, suspension options and more to suit the conditions.

SPACIOUS AND SPONTANEOUS.

The GLE's wide rear seat welcomes three adults to comfort more like a luxury sedan. The hands-free power liftgate opens to reveal a roomy, richly finished cargo area that you can expand progressively by folding down the 40/20/40-split rear seatbacks.

POWER TO ALL THE PEOPLE.

Everyone needs to charge up their device on the go these days, and the GLE is ready to bring power to the people. There are two USB-C ports in the first row, plus a fast-charging pair in the second row. Add the 3rd-row seats, and you get two more ports.
