

2023 Edge

2023 Edge trim level differences

SE

This base Ford Edge comes reasonably well equipped with:

- 18-inch wheels
- LED headlights
- Dual-zone automatic climate control
- 12-inch infotainment screen
- Apple CarPlay and Android Auto smartphone integration
- Six-speaker audio system
- Keyless entry with push-button start
- Ford Co-Pilot360

SEL

The SEL trim is similar to the SE but adds:

- Synthetic leather upholstery
- Power-adjustable, heated front seats
- Nine-speaker audio system
- Ford's SecuriCode entry keypad
- The SEL is offered with a cloth seating package as a no-cost option; it eliminates the leather-wrapped steering wheel as well.

ST-Line

The ST-Line is basically an Edge SEL with some sporty design touches, plus some extra standard features, including:

- Black exterior trim and lower front and rear fascias
- Body-color bumpers and lower cladding
- 20-inch gloss black wheels
- ActiveX faux leather seats
- Red accent interior stitching
- Standard Convenience package

Titanium

The Titanium trim gives the Edge a more premium feel with:

- 19-inch wheels
- Hands-free liftgate
- Leather upholstery
- More power adjustments for the front passenger seat
- Wireless smartphone charging pad
- Remote engine start
- Rain-sensing wipers
- 12-speaker Bang & Olufsen audio system
- Front parking sensors (alert you to obstacles that may not be visible in front of the vehicle when parking)
- Standard Convenience package

ST

The Edge ST is the sportiest model in the lineup and comes with a turbo-charged V6. It builds on the SEL trim with:

- 20-inch black-painted wheels
- Sport suspension
- Black and body-color exterior trim that's similar to the ST-Line's
- Front sport seats with silver stitching
- Leather and suede-like upholstery
- 12-speaker Bang & Olufsen audio system

Versatile Performance

Offering exceptional performance in both of its two engine options, the 2023 Edge is ready for highways, and its standard Intelligent AWD system allows you to instantly take to off-road trails with ease. The base engine is a twin-scroll 2.0-liter that delivers enough muscle for most drivers with its 250-horsepower output.

If you're looking for more power and adrenaline-pumping thrills, there's also a 335-horsepower 2.7-liter that pairs with the Sport Mode button, a feature that optimizes the vehicle's engine response for a sportier driving experience on highways. This edition also gets excellent fuel economy, with an estimated 28 mpg on highways when opting for the 2.0-liter engine.

Comforts and Technology

The vehicle's cabin provides all the comfort and luxury needed to make road trips and everyday commutes a pleasure, like the leather-wrapped steering wheel, the leather-trimmed seats that all offer heating settings, ambient lighting with multiple colors to choose from, and a standard dual-zone climate control that allows front-seat passengers to set a different temperature than that of the driver's side.

Plenty of stunning technology can also be found inside, like the SYNC 4A infotainment system and 180-degree camera. When paired together, you have all the entertainment and navigation assistance you need to enhance your drives, while a split-screen display shows you expansive views in front of the vehicle to make off-roading easier. The Wi-Fi hotspot is also convenient, as you can connect multiple smartphones or laptops to it from anywhere within a 50-foot radius of the vehicle.

Safety Monitoring Features

Many hi-tech, sophisticated safety features are offered with this edition as well, including the Lane-Keeping System, which can help you get back to the center of your lane by applying light steering torque when you've drifted away from it. There's also BLIS, a blind spot alert system that instantly warns you if it senses other vehicles moving into any of the hidden areas around the Edge.

When in parking lots, the convenient Rear View Camera makes it easier to see vehicles and objects behind you when you have taller passengers sitting in the rear seats. If you approach other vehicles too quickly while on highways, Pre-Collision Assist can warn you of this.
