- Multi-link rear axle
- Multimode DCC® and Adaptive Chassis Control
- VAQ limited-slip front differential lock
- Dynamic steering system
- Sunroof and more!

Performance

Jetta: 1.5-liter turbocharged direct-injection TSI® engine

This engine makes driving your new favorite thrill, providing a substantial 158 horsepower and 184 lb-ft of torque. Now that's a good time.

Jetta: 8-speed automatic transmission with Tiptronic® and Sport Mode

With the Volkswagen automatic transmission, you can switch to Sport Mode to make driving even more fun. We don't tell you how to drive, we just give you great options.

Jetta GLI: 2.0L TSI® engine

Get where you're going the fast (and the fun) way with fuel-injected 228 horsepower and 258 lb-ft of peak torque. This car just might make you wish the road were longer.

Jetta GLI: Adaptive Chassis Control

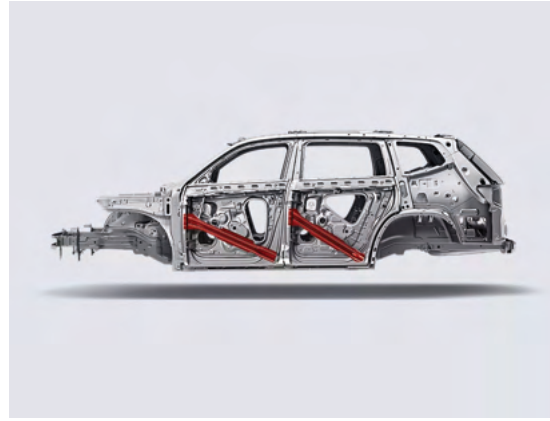

Select your driving mode and the Adaptive Chassis Control will monitor and react to maximize your ride. It manages your suspension to deliver an exhilarating, comfortable ride that's made just for you.

Safety

Rear View Camera System

Benefit from the view of a wide lens when you want it. It can help you see obstacles when backing up, a feature so helpful you'll wonder how you ever managed without it.

Safety Cage

Front and rear crumple zones help absorb crash energy, while a rigid safety cage helps distribute forces away from the driver and passengers.

Intelligent Crash Response System (ICRS)

In the event of a collision that deploys the airbags, the ICRS can turn off the fuel pump, unlock the doors, and activate the hazard lights. It helps react if you might not be able to.

Six stability-enhancing systems

From Electronic Brake-pressure Distribution (EBD), which helps maintain appropriate stopping power during a hard-braking situation, to Electronic Stability Control (ESC), which can adjust engine throttle and apply corrective forces to the wheels that need them most, your vehicle is equipped with a total of six stability-enhancing systems.

Tire Pressure Monitoring System (TPMS)

Monitoring and maintaining proper air pressure in your tires helps with efficiency and safety. The TPMS helps alert you to a loss of tire pressure so you know when to add air.

Automatic Post-Collision Braking System

Not every collision brings a car to stop. That's why our vehicles include the Automatic Post-Collision Braking System. It can also help slow the vehicle down after a collision, helping reduce the chance of any additional impacts.

Remote Features

Available keyless access with push-button start

We can give you a hand unlocking your doors and getting started with available keyless access with push-button start. Leave the keys in your pocket and leave it to us.

Displays

Floating touchscreen center display

We focused on making an elegant floating 8" touchscreen display that's a convenient way to explore music and media. And access key information and driver settings. So you can focus on the road.

VW Digital Cockpit Pro

The 2025 Jetta GLI keeps you in the know with VW Digital Cockpit pro. Get the viewpoint you've been looking for with innovative features, sharp resolution, and the ability to customize your experience. You can even get the big picture with available full screen navigation view. It's the information you need to see, where you need to see it.

IQ.DRIVE

Drive peace of mind with driver assistance technology that helps enhance safety.

Discover the confidence that comes with driver assistance technology that helps enhance safety. No matter your destination, enjoy the drive from A to B without much of the stress, thanks to IQ.DRIVE.

Features:

- Travel Assist
- Adaptive Cruise Control (ACC)
- Active Blind Spot Monitor
- Rear Traffic Alert
- Front Assist
- Emergency Assist Lane Assist

Light Assist

When driving at 18 mph or faster and your surroundings get dark, the Light Assist driver assistance feature turns on to help make sure the road ahead is lit, and when your speed slows to 12 mph, it turns off. You can set the high beams into “auto” mode, so they’ll automatically activate when there’s low light, and turn off when there’s an oncoming vehicle, or you enter an area that’s well lit by the environment or by traffic conditions.

Overhead Camera View (Area View)

Sometimes the best way to see what’s happening around you is through cameras that can give you a wider view of those hard to see angles that surround us. Area View does just that by providing an expanded view of your car’s surroundings.

Park Distance Control with Maneuver Braking

The available Park Distance Control helps take the guess work out of parking your car, while Maneuver Braking helps apply the brake automatically to help mitigate the chance of a collision with stationary objects while reversing into a spot. With Park Distance Control’s audio beeps and visual support, you’ll know if you’re getting too close to detected obstacles in front of or behind your car. It’ll also share additional information on your display, so you can see what’s behind your car as you reverse within a parking spot.

Dynamic Road Sign Display

From traffic signs to speed limits, when you need a reminder about the signs on the road, the available Dynamic Road Sign Display helps share the information you want. It also features warnings for speed, restricted traffic zones and more, so you can remain focused on the road ahead.

Exit Warning System

We know you check your surroundings before getting out of your car. But, with the Exit Warning System you’ll get an alert if pedestrians, cyclists, or another vehicle is approaching from behind while you’re parked. It’s like an extra set of eyes as you exit your vehicle.

Lighting

LED taillights with rear light bar

The all-new LED light bar extends from the LED taillights to highlight the rear Jetta logo. And it spotlights the integrated rear spoiler. That's a lot of light.

Ambient interior lighting

Lighten the mood with available 10 color interior ambient lighting and bask in the fun of the drive.

Sound & Audio

Music—and more — to your ears

With its innovative features and a variety of premium content, SiriusXM with 360L curates a personalized experience for every driver. Try it out with a three-month Platinum Plan trial subscription.
