Available 4MOTION[®] all-wheel drive

8-speed automatic transmission

Interior

Engine

Available panoramic sunroof

Available leather seating surfaces with ventilated front seats

65.9 cu ft of cargo capacity with rear seats folded

Technology

Rear View Camera System

Benefit from the view of a wide lens when you want it. It can help you see obstacles when backing up, a feature so helpful you'll wonder how you ever managed without it.

Six stability-enhancing systems

From Electronic Brake-pressure Distribution (EBD), which helps maintain appropriate stopping power during a hard-braking situation, to Electronic Stability Control (ESC), which can adjust engine throttle and apply corrective forces to the wheels that need them most, your vehicle is equipped with a total of six stability-enhancing systems.

Automatic Post-Collision Braking System

Not every collision brings a car to stop. That's why our vehicles include the Automatic Post-Collision Braking System. It can also help slow the vehicle down after a collision, helping reduce the chance of any additional impacts.

Tire Pressure Monitoring System (TPMS)

Monitoring and maintaining proper air pressure in your tires helps with efficiency and safety. The TPMS helps alert you to a loss of tire pressure so you know when to add air.

Intelligent Crash Response System (ICRS)

In the event of a collision that deploys the airbags, the ICRS can turn off the fuel pump, unlock the doors, and activate the hazard lights. It helps react if you might not be able to.

VW Digital Cockpit

8" infotainment display

Lighting

LED projector headlights and available Adaptive-front-lighting system (AFS)

Available illuminated grille

LED taillights with rear light bar and illuminated VW emblem

IQ.DRIVE

Drive peace of mind with driver assistance technology that helps enhance safety.

Discover the confidence that comes with driver assistance technology that helps enhance safety. No matter your destination, enjoy the drive from A to B without much of the stress, thanks to IQ.DRIVE.

Features:

- Travel Assist
- Adaptive Cruise Control (ACC)
- Active Blind Spot Monitor
- Rear Traffic Alert
- Front Assist
- Emergency Assist Lane Assist

Driver Assistance

Light Assist

When driving at 18 mph or faster and your surroundings get dark, the Light Assist driver assistance feature turns on to help make sure the road ahead is lit, and when your speed slows to 12 mph, it turns off. You can set the high beams into “auto” mode, so they’ll automatically activate when there’s low light, and turn off when there’s an oncoming vehicle, or you enter an area that’s well lit by the environment or by traffic conditions.

Park Distance Control with Maneuver Braking

The available Park Distance Control helps take the guess work out of parking your car, while Maneuver Braking helps apply the brake automatically to help mitigate the chance of a collision with stationary objects while reversing into a spot. With Park Distance Control’s audio beeps and visual support, you’ll know if you’re getting too close to detected obstacles in front of or behind your car. It’ll also share additional information on your display, so you can see what’s behind your car as you reverse within a parking spot.

Dynamic Road Sign Display

From traffic signs to speed limits, when you need a reminder about the signs on the road, the available Dynamic Road Sign Display helps share the information you want. It also features warnings for speed, restricted traffic zones and more, so you can remain focused on the road ahead.

Sound and Audio

We don't tell you what to listen to, we just make it sound good.

With its innovative features and a variety of premium content, SiriusXM with 360L transforms your ride with an extensive and personalized audio experience. Try it out with a three-month trial subscription included with your new vehicle.

Remote Features

You've got the power in your hand.

Start your car remotely and get your drive started when you want. These available features give you the power to kick things off, even from a distance.
