Performance

There's nothing like having control.

You'll face all different kinds of roads in all different kinds of conditions. The 2026 Tiguan will be right there with you, with available adaptability, right in your hands.

Available 4MOTION® all-wheel drive

Exterior: The touches that make the difference

We've put a lot of thought into the details that make owning the 2026 Tiguan something special, from the moment you set eyes on it.

Available hands-free Easy Open and Easy Close liftgate

Available panoramic sunroof

Available 20" alloy wheels

Interior: Carefully designed comfort

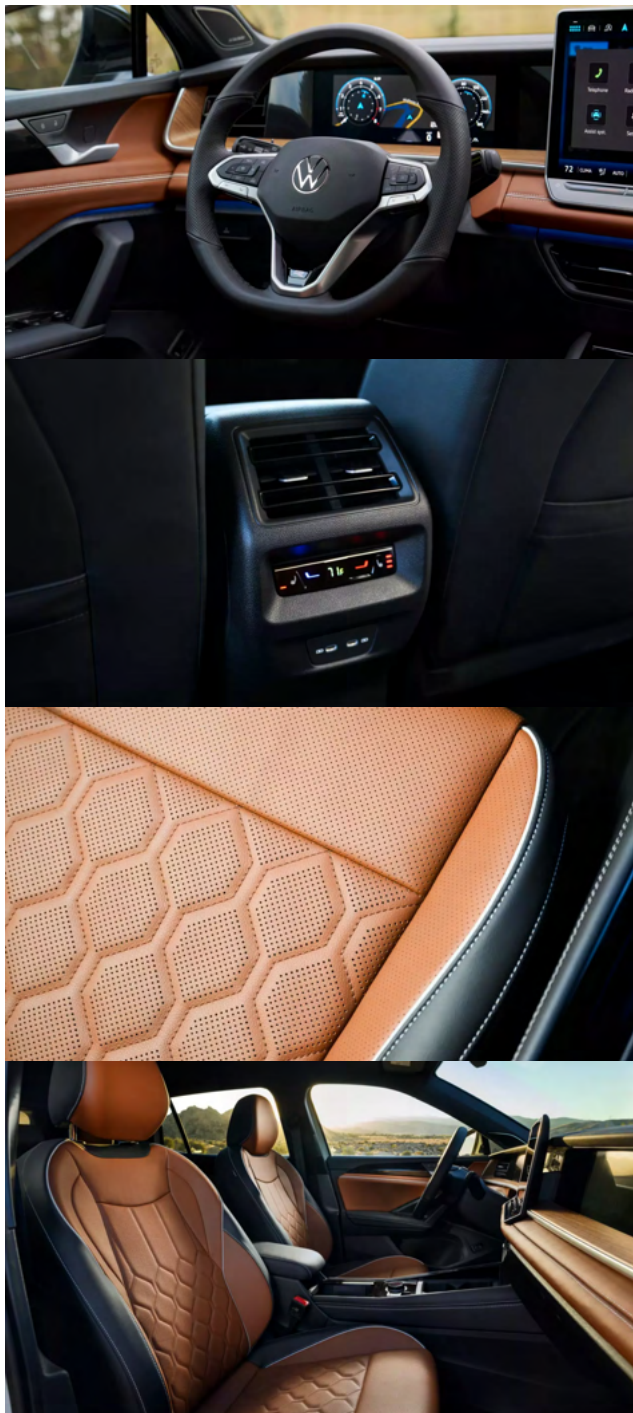

This luxurious interior design is all about the details, the touches, the feeling. Space and comfort and room to stretch out, all designed with care.

Available leather-wrapped, heated steering wheel

Available Climatronic® three-zone automatic climate control

Available massage and ventilated front seats with leather seating surfaces and diamond stitching detail

Standard 1st row and available 2nd row heated seats (outboard seating positions)

Cargo

Space exploration

The 2026 Tiguan offers 33.8 cu. ft. behind the 2nd row and 69.8 cu. ft. with rear seats folded. Whatever you're leaving home to discover, pack your supplies with storage space that gives you plenty of options.

69.8 cu. ft. of cargo space with rear seats folded and cargo underfloor smart floor storage.

Safety-Enhancing Technology

Rear View Camera System

Benefit from the view of a wide lens while you're reversing. It can help you see obstacles when backing up. It's a little extra help where you want it.

Safety Cell

Front and rear crumple zones help absorb crash energy, while a rigid safety cage helps distribute forces away from the driver and passengers.

Intelligent Crash Response System (ICRS)

In the event of a collision that deploys the airbags, the ICRS can turn off the fuel pump, unlock the doors, and activate the hazard lights. It helps react if you might not be able to.

Six stability-enhancing systems

From Electronic Brake-pressure Distribution (EBD), which helps maintain appropriate stopping power during a hard-braking situation, to Electronic Stability Control (ESC), which can adjust engine throttle and apply corrective forces to the wheels that need them most, your vehicle is equipped with a total of six stability-enhancing systems.

Automatic Post-Collision Braking System

Not every collision brings a car to stop. That's why our vehicles include the Automatic Post-Collision Braking System. It can also help slow the vehicle down after a collision, helping reduce the chance of any additional impacts.

Displays

Standard 12.9" and available 15" touchscreen display

Volkswagen Digital Cockpit Pro

Available Head-up display

Lighting: Highly visible

It's not just in the LED headlights, and LED Daytime Running Lights, it's in the sleek designs, the creative options, and the high-tech quality—in everything we do to light up your driving experience.

Available integrated light bar in front grille and illuminated VW emblem

LED taillights and available rear light bar

Available 10 and 30-color interior ambient lighting

Available Atmospheres mood selection

Available VW logo puddle lights on side mirrors

IQ.DRIVE

Drive peace of mind with driver assistance technology that helps enhance safety.

Discover the confidence that comes with driver assistance technology that helps enhance safety. No matter your destination, enjoy the drive from A to B without much of the stress, thanks to IQ.DRIVE.

Features:

- Travel Assist
- Adaptive Cruise Control (ACC)
- Active Blind Spot Monitor
- Rear Traffic Alert
- Front Assist
- Emergency Assist (automatic transmission only)
- Lane Assist

Park Assist Plus

The available Park Assist Plus feature puts into perspective the “will my car fit” debate when you come across the perfect parking spot. Not only can it sense the size of a space, but it will also help you do the parking, from start to finish, as you supervise. Parallel, perpendicular, or reversing—Park Assist Plus can help with them all.

Exit Warning System

We know you check your surroundings before getting out of your car. But, with the Exit Warning System, your vehicle can alert you if pedestrians, cyclists, or another vehicle is approaching from behind while you’re parked. It’s like an extra set of eyes as you exit your vehicle.

Light Assist

When driving at 18 mph or faster and your surroundings get dark, the Light Assist driver assistance feature turns on to help make sure the road ahead is lit, and when your speed slows to 12 mph, it turns off. You can set the high beams into “auto” mode, so they’ll automatically activate when there’s low light, and turn off when there’s an oncoming vehicle, or you enter an area that’s well lit by the environment or by traffic conditions.

Driver Assistance

Dynamic Road Sign Display

From traffic signs to speed limits, when you need a reminder about the signs on the road, the available Dynamic Road Sign Display helps share the information you want. It also features warnings for speed, restricted traffic zones and more, so you can remain focused on the road ahead.

Overhead Camera View (Area View)

Sometimes the best way to see what's happening around you is through cameras that can give you a wider view of those hard to see angles that surround us. Available Area View does just that by providing an expanded view of your car's surroundings.

Park Distance Control

Park Distance Control helps take the guess work out of parking your car, while Maneuver Braking helps apply the brake automatically to help mitigate the chance of a collision with stationary objects while reversing into a spot. With Park Distance Control's audio beeps and visual support, you'll know if you're getting too close to detected obstacles in front of or behind your car. It'll also share additional information on your display, so you can see what's behind your car as you reverse within a parking spot.

Sound and Audio

Available Driving Experience Dial

Available Harman Kardon® premium audio system

SiriusXM with 360L
