

THE 2023 MAZDA CX-30

DESIGN

LIGHT BECOMES ART

Our Kodo design captures a sense of movement, even at a standstill. In the CX-30, a sweeping S-curve along the doors captures the interplay of light and shadow, constantly shifting and reflecting the world around you—inspiring you to seize the moment.

PERFORMANCE

AVAILABLE TURBOCHARGED ENGINE & STANDARD I-ACTIV AWD®

No matter where your path leads, the 2023 Mazda CX-30 is made to help you follow it. The available Skyactiv®-G 2.5 Turbo engine delivers up to 250 hp and 320 lb-ft of torque. Paired with our standard i-Activ AWD®, this CUV offers dynamic performance that makes every moment worth savoring.

- 360° View Monitor
- Smart Brake Support–Rear Crossing
- Traffic Jam Assist

TECHNOLOGY

MAZDA CONNECTED SERVICES

Remotely start the engine, check vehicle status reports and more through the MyMazda App on your phone or smartwatch with Mazda Connected Services, complimentary for three years. And so you don't miss a moment, your vehicle can also be equipped with in-car Wi-Fi capabilities and provide access to emergency services—like automatic 911 dialing and roadside assistance.

REMOTE ENGINE START

Start your CX-30's engine and return to the previously set interior temperature before you even get in. It's comfort and convenience right at your fingertips.

VEHICLE FINDER

Forgot where you parked your car? The MyMazda App pins the location of your vehicle on the map and shows you its exact spot, as well as activates the hazard lights and horn to make it easier to find.

VEHICLE HEALTH AND STATUS

The MyMazda App can notify you when something may need your attention. Find out when your oil, lights or tire pressure should be checked; or when it's time for service—before you get on the road.

SAFETY

SMART BRAKE SUPPORT - REVERSE

This available feature can alert the driver of objects and/or pedestrians in the vehicle's reverse path and activate automatic emergency braking if a potential collision is predicted.

SMART BRAKE SUPPORT - REAR CROSSING

When reversing at low speeds this available feature can provide automatic emergency braking addition to the audible and visible alerts of Rear Cross Traffic Alert when an imminent collision with vehicles crossing from either side is detected.

BLIND SPOT MONITORING

This standard feature can detect vehicles in the driver's blind spots and provide visual alerts. If the driver signals a lane change while a vehicle is in their blind spot, an additional audible alert can activate.

LANE KEEP ASSIST

When traveling above about 40 mph, this standard feature can provide momentary steering assistance if it detects the driver might be deviating from their lane without signaling.

LANE DEPARTURE WARNING SYSTEM

When traveling above about 40 mph, this system can give audible and visual alerts when it detects that the driver might be deviating from their lane without signaling.

CRUISING & TRAFFIC SUPPORT

Once engaged, this available feature can provide headway support of adaptive cruise control, maintaining the following distance from the vehicle ahead, while also providing lane centering assistance under certain conditions from 0 mph up to highway speeds.

SAFETY

VEHICLE EXIT WARNING

When stopped, this standard feature can detect vehicles or bicycles approaching from the rear and provide warnings to alert exiting occupants.

DRIVER ATTENTION ALERT

When traveling above about 40 mph, if the driver's steering pattern or lane position indicates fatigue or inattentiveness, this standard feature can encourage the driver to take a rest by activating audible and visual alerts.

360 VIEW MONITOR

For this available feature, cameras positioned around the vehicle's exterior create a 360 degree view visible on the Mazda Connect screen to give the drivers a greater awareness of their surroundings when navigating small spaces or parking.
