2.5L Hybrid Engine

The standard 2.5L hybrid engine combines gas and electric motor performance. So you can go far with fewer breaks.

2.0L EcoBoost® Engine

The available 2.0L Eco-Boost® turbocharged gas engine kicks out a mighty 250 horsepower, with an equally powerful 280 lb-ft of torque.

FX4® Off-Road Package

The FX4® Off-Road Package, available on XLT, will inspire you to dive into the thick of things. Features include performance suspension, skid plates, and all-terrain tires.

Tremor® Model

Trail-focused engineering lets this Maverick truck tackle challenging terrain. So you can get as far away from the things — and the people — you want to get away from.

Selectable Drive Modes

There's a drive mode for just about any situation or road condition. Choose from Off-Road, Normal, Sport, Tow/Haul, Slippery, or Eco. And Maverick Lobo™ models come with Lobo mode for enhanced performance on the road.

Towing and Hauling

Don't Just Dream Big. Tow Big, Too.

1,500 lbs. Max Payload

Select Maverick® trims are rated to haul up to 1,500 lbs of payload. Bring a couch, a lawnmower, or a dirt bike — and perhaps a few friends, too.

4K Tow Package

The weekend has arrived. With a tow rating up to 4,000 lbs,⁷⁹ the available 4K Tow Package lets you hitch up and split town. Features include a trailer hitch (Class III) 2" receiver with 4-pin and 7-pin connector, trailer brake controller, and upgraded cooling fan. On models equipped with an EcoBoost® engine, there's also a higher capacity radiator.

Pro Trailer Hitch Assist™

This system uses the rear camera and corner radar to help guide your truck into place for hitching. Guide lines are shown on the 13.2" center display.

Pro Trailer Backup Assist™

With Pro Trailer Backup Assist, reversing is as easy as turning a knob. It only takes one time to enter a few trailer measurements into the system and calibrate the trailer. Then rotate the knob in the direction you want the trailer to go, while the system controls the steering wheel.

Interior

Room for Five. Ready To Roam.

Party of Five

Up to five people can ride in style comfortably. Available ActiveX®-trimmed seats are durable and easy to clean. They repel grime and hold up to the wear and tear of almost any outing.

Under-Seat Storage

The cargo bed can hold a lot. There's also additional storage under the rear seat. Use it for more space — or to help securely keep your tools and sports gear inside the cab.

Accommodating Door Pockets

Smart use of space means you can find storage throughout the Maverick® pickup. There's even a custom-designed door pocket, sized just right for most water bottles.

Cargo Bed

The cargo bed offers 33.3 cu ft of space inside the side-walls with the multi-position tailgate fully closed — enough for 16 standard bags of mulch.

In-Bed Power

The two standard pre-wired 12-volt connections can keep a mini-fridge or other essentials humming. Meanwhile, an available Pro Power Onboard™, 110-volt outlet lets you charge your devices, power drill, or air pump.

LED Projector Headlamps

See the road ahead clearly with available LED projector headlamps — while LED accent lights help ensure you'll be seen clearly, too. Comes standard on the Maverick Lobo™, Lariat®, and Tremor® model.

Technology

Smart Stuff Happens Here

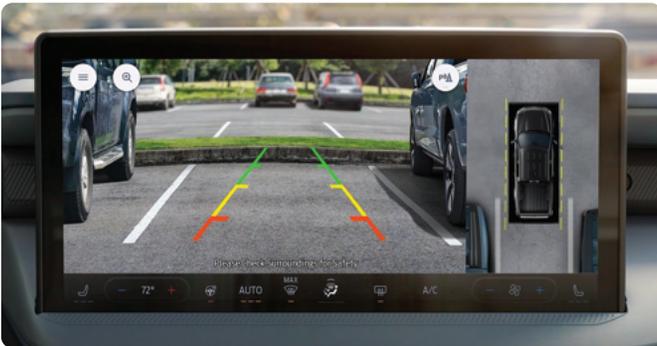

Ford Connectivity Package

New for 2026, the available Ford Connectivity Package — included for a year — helps keep you connected with an unlimited Wi-Fi® hotspot powering up to 10 devices, and connectivity for available Connected Navigation, voice assistant, karaoke - and while parked - YouTube streaming. Features vary by model.

SYNC® 4 Capability

SYNC 4 with enhanced voice recognition provides convenience and wireless connectivity to your compatible phone via Apple CarPlay® and Android Auto™

BLIS® (Blind Spot Information System with Trailer Coverage)

The available BLIS with Trailer Coverage can help ease lane-change anxiety – even with a trailer in tow. It can alert you not only when a vehicle is spotted in your blind spots but also when one is alongside the trailer.
