SUBARU

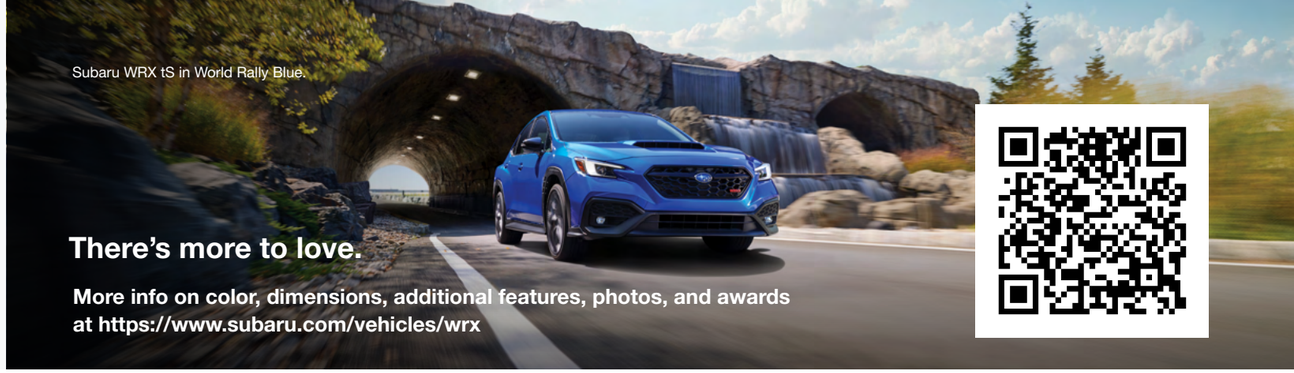

Meet the 2026 Subaru WRX

The rally legend for the next generation.

A 19-time U.S. Rally Champion[1], the 2026 Subaru WRX is engineered to thrill. The legendary 2.4-liter twin-scroll turbocharged SUBARU BOXER® engine delivers 271 horsepower for instant response and maximum torque. The 6-speed manual provides ultimate engine control, paired with standard Symmetrical All-Wheel Drive for power on the ground with outstanding traction in all kinds of weather and terrain.

Trim Levels

Base

- 271-hp turbocharged 2.4-liter SUBARU BOXER® engine
- Subaru Symmetrical All-Wheel Drive
- 6-speed manual transmission with Incline Start Assist
- Sport-tuned suspension
- EyeSight® Driver Assist Technology[2]: Pre-Collision Braking System, Lane Departure and Sway Warning with Lane Departure Prevention, and Advanced Adaptive Cruise Control with Lane Centering
- DriverFocus® Distraction Mitigation System[3]
- 18-inch alloy wheels with Dark Gray finish
- 11.6-inch Multimedia Plus Audio System with wireless Apple CarPlay® and Android Auto™ integration
- Dual front USB-A and USB-C charge ports
- MySubaru® Connected Services enabled[4]
- 7 airbags (SRS)[5]: dual-stage deployment driver and front-passenger, driver's knee, front and rear outboard occupant side curtain, and seat-mounted front side impact

Premium

Information current at time of printing.

1 Subaru Motorsports USA has won overall Rally America and American Rally Association (ARA) championship titles 19 times between 2006 – 2025. 2 EyeSight® is a driver assist technology, which may not operate optimally under all driving conditions. The driver is always responsible for safe and attentive driving. System effectiveness depends on many factors such as vehicle maintenance, weather and road conditions. The Pre-Collision Braking System is designed to provide automatic braking that either prevents a collision or reduces the severity of a frontal impact. Pre-Collision Throttle Management is designed to reduce acceleration and minimize the severity of certain frontal impacts. Advanced Adaptive Cruise Control, Brake Light Recognition and Automatic Emergency Steering are designed to assist the driver and are not substitutes for safe and attentive driving. Automatic Emergency Steering requires Blind-Spot Detection and works in conjunction with and after Pre-Collision Braking has been activated by providing steering support at speeds lower than 50 mph to try and help avoid a collision. Lane centering function operates only when used in conjunction with Advanced Adaptive Cruise Control. The Lane Departure and Sway Warning with Lane Departure Prevention operates only when the lane markings are visible, and its effectiveness depends on many factors. See your Owner's Manual for complete details on system operation and limitations. 3 The DriverFocus Distraction Mitigation System is a driver recognition technology designed to alert drivers if their attention to the road wavers or if the driver's face appears to turn away. The driver is always responsible for safe and attentive driving. System effectiveness may be affected by articles of clothing worn on the head or face. See your Owner's Manual for complete details on system operations and limitations. 4 Activation with subscription required. Includes a three-year trial subscription to Safety services and a six-month trial subscription to Safety and Security services. The Concierge plan can be purchased annually or monthly. A credit card on file will be required for specific packages and for renewal purposes. Features and availability vary by model and trim level. May not be available in all states. Please contact your local authorized Subaru retailer for more information. 5 The Supplemental Restraint System (SRS) (airbags) affords the driver and the front passenger additional protection in moderate to severe frontal and side-impact collisions and outboard 2nd-row passengers additional protection in moderate to severe side-impact collisions. This system provides supplemental protection only, and seatbelts must be worn in order to avoid injuries to out-of-position occupants upon airbag deployment and to provide the best combined protection in a serious accident. Children should always be properly restrained in one of the rear seats. See your Owner's Manual for recommended seating position. 6 Blind-Spot Detection, Lane Change Assist and Rear Cross-Traffic Alert are systems designed to assist the driver by monitoring the rear and side areas of the vehicle during a lane change or reversing and are not a substitute for safe and attentive driving. 7 The Reverse Automatic Braking System is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as vehicle maintenance, weather, and road conditions. Always exercise caution and use vehicle mirrors and the Rear-Vision Camera when backing up. See your Owner's Manual for complete details on system operation and limitations. 8 Limited availability. See your Subaru retailer for details. 9 Premium paint at additional cost. See your Subaru retailer for details. 10 WRX Series. Yellow only. 11 Mirrors with integrated turn signals.
