

The 2025 Lincoln Corsair SUV

Choose your Lincoln Corsair® SUV

Corsair Grand Touring with Jet Appearance Package

The available Jet Appearance Package on the Lincoln Corsair Grand Touring plug-in hybrid model adds a distinctive look with 20-inch wheels and black body-color exterior elements.

Corsair Grand Touring model

A 2.5L plug-in hybrid engine lets you decide how to power your drive — gas, stored battery power, or a combo of both. This model adds two additional modes to better utilize stored battery power.

Corsair Reserve with Jet Appearance Package

The available Jet Appearance Package adds a sleek and dynamic look while 20-inch black aluminum wheels exude a sporty stance.

Corsair Reserve model

Elevate your journey with available leather-trimmed seating, ambient lighting featuring seven different colors, and more.

Corsair Premiere with Jet Appearance Package

The available Jet Appearance Package adds a unique grille, body-colored trim, and impressive 20-inch wheels to the Premiere model.

Corsair Premiere model

Enjoy the ride with a standard turbocharged 2.0L engine, SYNC 4 with software updates, Lincoln Co-Pilot360 2.1 technology, and a sliding second-row seat.

Performance & Powertrain

Corsair Grand Touring overview

The best of both worlds — gas, stored battery charge, or a combination. Charge at home or on the road, courtesy of an included Lincoln Mobile Power Cord.

Additional Lincoln Drive Modes

Two additional drive modes in the Lincoln Grand Touring model let you choose how best to use your vehicle's electric power. Select the Preserve EV drive mode for full-hybrid performance using both engine and electric motor or Pure EV for electric-only driving. Both modes provide a smooth driving experience on city streets and highways.

Available all-wheel drive

All-wheel drive optimizes performance by automatically switching between front- and all-wheel drive in response to road conditions.

Available adaptive suspension

A suite of sensors monitor the vehicle's suspension motion, body movement, steering, and braking to help the vehicle smoothly glide over uneven road surfaces.

Media & Technology

Available Revel[®] 3D Audio System

With Revel QuantumLogic[®] Surround 3D technology, three custom listening modes, and 28 speakers throughout the cabin, your music is all around you.

SYNC[®] 4 with Enhanced Voice Recognition

The SYNC 4 Technology system offers Enhanced Voice Recognition and software updates, which lets you wirelessly receive feature updates. You can seamlessly connect your iPhone with Apple CarPlay[®] and Android Auto[™] compatibility.

The Lincoln Way[®] app

The Lincoln Way app lets you control common vehicle functions, keep track of maintenance, schedule service, and much more

Alexa Built-in

Use Alexa for convenient voice commands to check your calendar, play music, and more with complimentary access to Alexa Built-in and Lincoln Premium Connectivity.

Driver-Assist

Available Lincoln Co-Pilot360 Vision 2.0

Adding to Lincoln Co-Pilot360 2.1, Vision includes a 360-Degree Camera with side-mounted cameras to help provide a clear view of what's around you. Additional front and rear parking sensors and Reverse Brake Assist help ensure you are in the clear.

Adaptive Pixel LED Headlamps

The Adaptive Jeweled LED Headlamps place light both on and off the road. At highway speeds, speed-dependent lighting is designed to shine light farther into the distance; at slow speeds, the light array widens, helping drivers to detect pedestrians and potential hazards. Light-bending functionality uses camera technology to read road signs and lane markings to pre-illuminate the direction the road is heading.

Adaptive Cruise Control 2.0

Adaptive Cruise Control (ACC) 2.0 lets you set a cruising speed and distance from the vehicle ahead of you. When the vehicle ahead slows down, so do you. When traffic picks back up, you resume your preset speed and distance.

Pre-Collision Assist

Pre-Collision Assist with Automatic Emergency Braking scans the road ahead and offers audible and visual warnings if there are things or pedestrians detected in your path.

Lane-Keeping System

The Lane-Keeping System with Blind Spot Assist uses camera technology to monitor road lane markings and detect unintentional drifting toward the outside of a lane.

Cabin Experience

Perfect Position seats

Available Perfect Position front seats with Active Motion® massage offer custom comfort with 24-way adjustability, heating, and ventilation, as well as five available massage settings.

Personal profiles

The Lincoln Corsair SUV can recognize drivers by their key fob and automatically adjust to preselected settings, including seat positions, audio, and available driver-assist system preference.

Available Auto Air Refresh

Auto Air Refresh is a holistic air filtration and active air monitoring system. Using the standard cabin particulate and odor filter, Auto Air Refresh helps clean the cabin air by filtering out particles caused by atmospheric dust, smoke, smog, and allergens, including pollen.

Sliding second-row seats

Adjust your vehicle's passenger and cargo space with a second-row sliding seat.

Expanded cargo capacity

The Corsair SUV integrates flexible cargo areas and configurations — like the available package tray and underfloor storage — and can create a flat cargo space with EasyFold second-row seats.

Symphonic Chimes

Custom composed by a world-renowned orchestra, Symphonic Chimes create a harmonious balance of instrumental chimes to help guide your attention.

Design details

The Lincoln Embrace

Lincoln Embrace activates to invite you in every time you approach your vehicle, and sideview mirrors will fold out when you get in and fold in when you park and lock the doors.

Wheel lineup

Choose from the Premiere model's 18-inch Warm Alloy-painted wheels to the 20-inch black aluminum wheels of the available Jet Appearance Package on all models.

Hands-free power liftgate

The available hands-free liftgate opens with a simple kick under the rear bumper to help when loading and unloading.

LED lighting

Inside and out, the 2025 Lincoln Corsair® SUV employs LED lighting for a cool and crisp look.
