

THE NEW 2026 BMW i7 SEDAN.

Excellence in every detail. Crafted with dedication.

Precision in every line.

The rear design of the BMW i7's sleek, elongated lights accentuates the broad, sporty stance of the vehicle, giving the i7 an appearance of clarity and dynamism.

Design that inspires.

The front of the BMW i7 Sedan features striking, clear monolithic lines, reduced to their essence. On the sides, the Ceremonial Light Carpet creates a captivating, welcoming experience.

The interior. Digital perfection.

A new kind of visual information.

The new BMW Panoramic Vision projects personalized content virtually across the entire width of the windshield. The new BMW 3D Head-up Display provides precise 3D visualizations of important driver information directly within your line of sight.

Your space, your lighting design.

The ambient lighting strip extends across the entire width of the cockpit. It creates a horizon of colored light, perfectly synchronized with the mood lighting of your selected My Mode. By day, it looks soft and translucent. By night, it reveals dynamic lighting effects.

BMW Passenger Screen: a dedicated screen for the front passenger.

With the large 14.6" BMW Passenger Screen, the front passenger can access a diverse range of entertainment. On the full HD display, they can watch films, play games, or stay productive while on the go. Headphones and game controllers can be connected via Bluetooth.

SAFETY & TECHNOLOGY

Control that exceeds expectations.

The Shy Tech controls on your BMW multifunction steering wheel are only visible when available. The surface responds to touch and provides tactile feedback. This means you can take care of important tasks without taking your eyes off the road.

The interior—a place of inspiration.

The BMW Intelligent Personal Assistant helps with navigation, communication, and entertainment while you're on the road. The ambiance can be tailored to suit your individual requirements. Discover next-level driving pleasure every time you drive your BMW i7 Sedan.

State-of-the-art assistance systems for enhanced safety features.

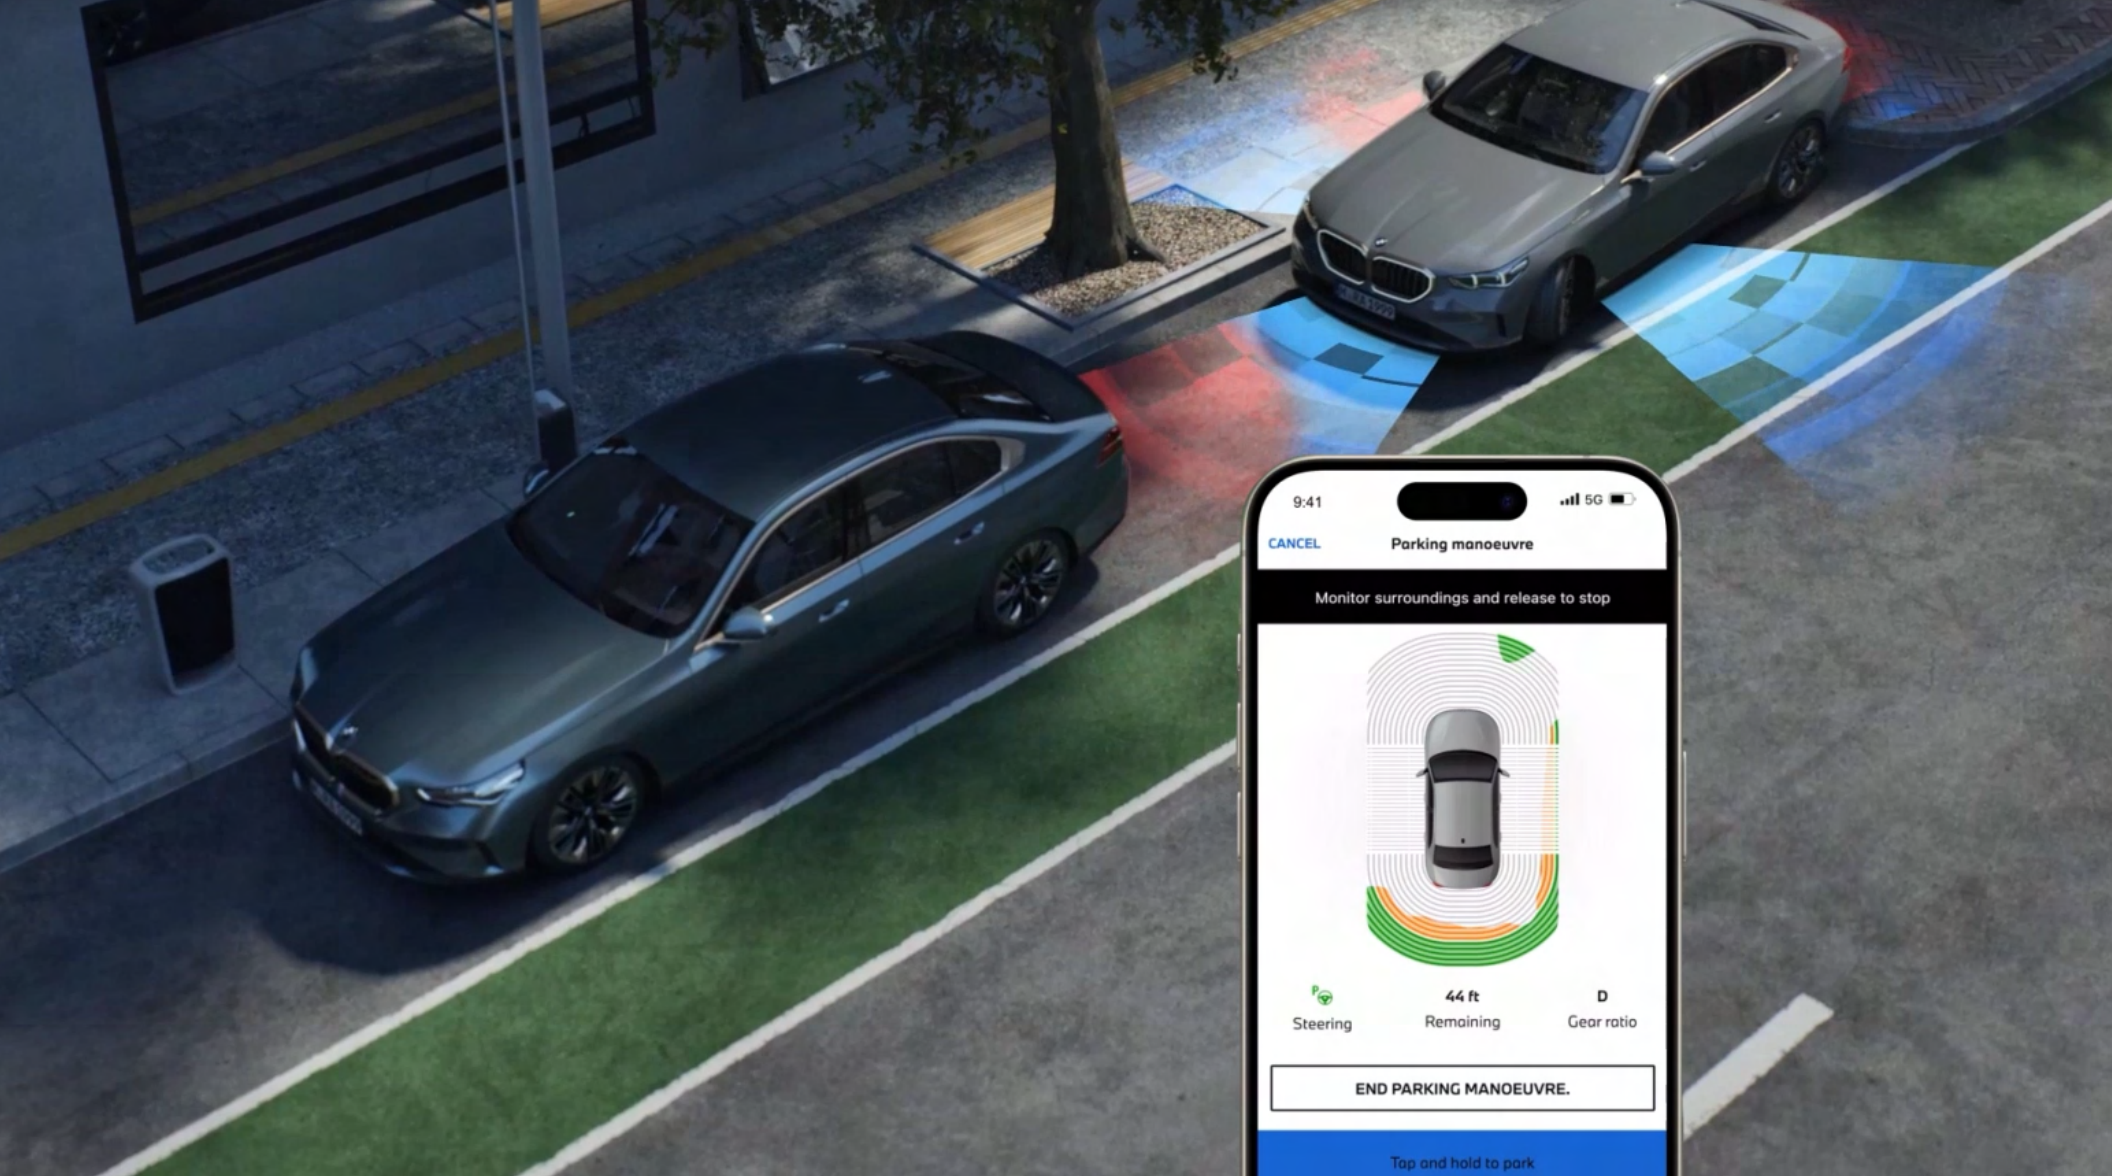

With the BMW Symbiotic Drive and the driver assistance systems, the BMW i7 Sedan delivers a completely new driving experience. The driver's intended acceleration, braking, and steering actions blend seamlessly and intuitively with the AI-supported at all times, generating a whole new level of driving pleasure. These driver assistance features are already included in the basic and standard equipment.

Self-maintained highway driving.

With available Highway & Commuting Assistant, your BMW maintains speed, distance, and steering. When the system is ready, you can take your hands off the steering wheel at speeds up to 85 mph, provided that you pay attention to the traffic and take back the wheel if necessary. You can also confirm lane changes by checking the exterior mirror.

Exemplary driving dynamics and comfort.

My Modes optimally adapts your drive, suspension, ambient lighting, sound, and displays to suit your situation. Whether you prefer relaxation in Personal, Efficient, or Silent mode, or a dynamic performance environment in Sport mode, your vehicle intuitively responds to your preferences. You can also upload a personal photo for even more customization.

Let your BMW park itself.

Park your BMW without having to sit inside it. The available Parking Assistant Professional system automatically pulls in and out of parking spaces. Simply perform the maneuver once to save it for future use.

PERFORMANCE

Specifications based on the 2026 BMW i7 xDrive60.

0-60 mph: 4.6 seconds; Maximum horsepower: 536; Dual Motor: All-Wheel Drive

Feel the driving dynamics on every journey.

The fully electric BMW i7 Sedan invites you to discover powerful and immediately responsive dynamics. The adaptive 2-axle air suspension automatically adapts the dampers to the road surface. With Integral Active Steering, the rear axle steering enhances stability, increases agility, and reduces the turning circle. To achieve this, the rear wheels are turned by up to 3.5 degrees.

At low speeds, rear-wheel steer means the rear wheels turn in the opposite direction to the front wheels. Parking in tight garages is noticeably easier. At high speeds, the rear wheels turn in the same direction, making your BMW i7 Sedan even more stable during rapid lane changes. At the same time, the spacious second row of seats offers a high level of comfort.

With direct power delivery and a virtually silent driving experience with an estimated range of up to 350 miles, your driving pleasure only ends when you decide it should.

INTERIOR HIGHLIGHTS

The interior, individuated to your needs.

Your personal retreat starts here. The interior of the BMW i7 Sedan reveals a world designed entirely according to your wishes, featuring exquisite materials in stylish combinations. With an exclusive selection of available BMW Individual features, you can experience the luxury of the BMW i7 Sedan. Choose interior trims of real wood or soft Alcantara or surround yourself with the finest Merino leather combined with cashmere wool.

Experience luxury: your private lounge.

The BMW i7 Sedan offers an elegant welcome into your personal Executive Lounge. With a simple touch on the high-resolution Central Display in Free-Cut Design, the driver can open the rear door for you, a feature that combines luxury and convenience.
