Base Line 600

Powered by a Briggs & Stratton or Honda gas engine or dual-electric 12-volt motor, the BL-600 and BL-800 insert spreaders feature a stainless steel inverted-V and drag chain conveyor system for even distribution of snow and ice removal material. The extra-large capacity hopper fits into short or long bed pickup trucks and is built to withstand anything Mother Nature can throw at it.

\$6,000

Popular with contractors and other vocational users, the Polyhawk is powered by your choice of a Honda or Briggs & Stratton gas engines or a dual, 12-volt electric motor. The Polyhawk can even be operated by your vehicle's central hydraulic system. Available in 6' and 8' lengths, Polyhawks are perfect for spreading bulk materials like rock salt with sand mixed in it.

6' - \$7,000 | 8' - \$8,000
