DESCRIPTION Our 24VDC Ribbon Star ThinLux LED Strip Light measures only 3.5mm wide (0.15") and outputs an astonishing amount of light. The thin and low profile makes this strip light easy to hide for projects with limited mounting space, ideal for furniture designers, cabinet makers, costume designers, stage designers, sculptures and architectural designers. The ThinLux LED Strip requires 24VDC constant voltage power and consumes 4.4W of power per foot to operate. This strip light can be dimmed by a compatible 24VDC PWM type dimmer or by a 24VDC dimmable power supply. This strip light can be cut every 1.97" and reconnected by soldering wires to the copper pads between the cut marks. ETL Listed, RoHS and CE approved.
