DESCRIPTION	Our high density Ribbon Star 4 in 1 LED strip lights provide a dense array of color changing plus white surface mount diodes to create bright and vivid lighting with less noticeable dots or hot spots. With six 4 in 1 LED chips and cuttable sections every 2.8" each 3 meter roll (118") has a total of 252 5050 size chips. The 4 in 1 chip is designed to create RGB color changing lighting as well as a white or warm white output. Being a higher density strip light with more LEDs than our standard RGBWW 4 in 1 strip, this product requires 8.2 watts of 24VDC power for every foot of lighting. Each strip light comes with a 3M adhesive backing for easy peel and stick application to any clean, dry, and smooth surface. This product is ETL listed and requires a 24VDC source and RGBW 4 channel controller to operate, we recommend that you solder wires after cutting to reconnect.
