

Product Description

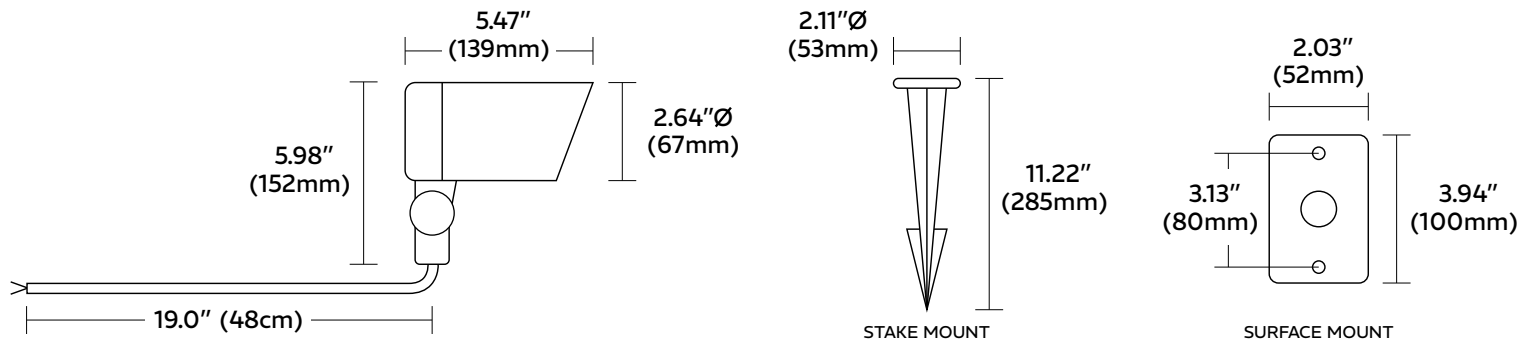

A stylish, compact and durable RGBW LED landscape light for enhancing outdoor features with color changing + 3000K soft white illumination. Constructed of a black die-cast aluminum housing and a 5mm thick tempered glass front, sealed with silicone rubber gasket and AkzoNobel corrosion-resistance coating with excellent self cleaning performance. This fixture is built to last while 3 on board OSRAM RGBW LEDs with optical lens provide bright and vivid radiance with an array of color choice plus warm white output. A small visor creates a special design for anti-glare application.

Features

- Sleek Black Die-cast Aluminum Housing
- 5mm Thick Tempered Glass Front
- OSRAM High Efficiency RGBW LEDs
- L70 @ 50,000 hours (77°F)
- IK08 Impact Resistance
- AkzoNobel Corrosion-resistant Coating

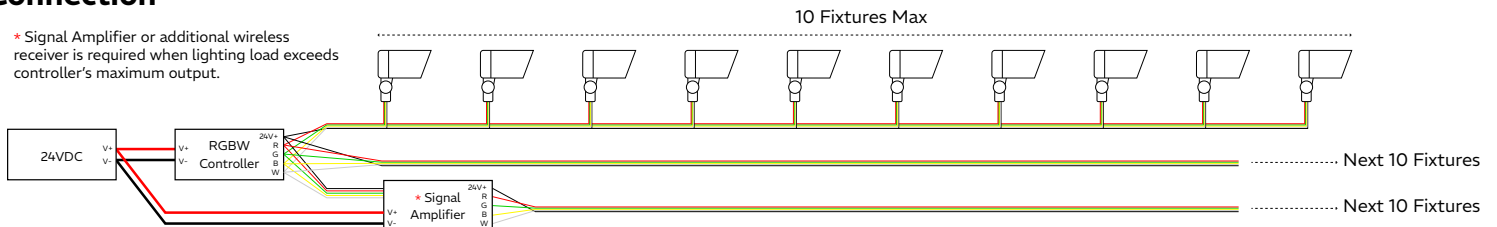

Dimensions

Connection

* Signal Amplifier or additional wireless receiver is required when lighting load exceeds controller's maximum output.
