

Custom Thermal Cover

Name _____ Address _____ City _____
 State _____ Zip _____ Phone _____ E-mail _____
 Date _____ Additional Comments _____

Well Location

(ex. Back of House, Room Name) _____

1.) Please select the number that best represents the shape of the window well.

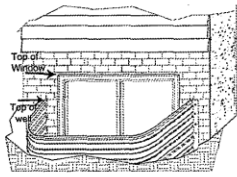

- All measurements must be taken **Outside to Outside**.
- Covers are designed with a 1" - 2" overhang.
- For #2 please provide width of concrete/brick/wood.
- For D1, D2 start tape measure at corner of well, and measure the furthest distance directly across.
- Measure projection straight across (DO NOT measure on an angle).

2.) Measure and write down the corresponding **outside to outside** measurements for the window well.

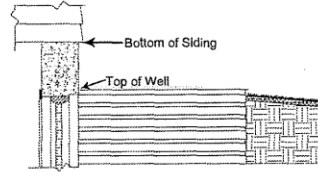

| Provide the following measurements (inches) | | | | | | | | |
|---|----------------|------------------|-----------------|-----------------|------------------|--------------------|--------------------|--------------------|
| Width at House (W-H) | Projection (P) | Width Front (WF) | Diagonal 1 (D1) | Diagonal 2 (D2) | Width at 6" (W6) | Width at 12" (W12) | Width at "24 (W24) | Width at 30" (W30) |
| | | | | | | | | |

3.) Measure the distance from the top of the well to the top of the window (if below N/A)

_____ Inches

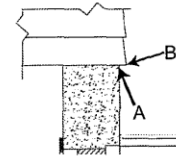

4.) Measure from the top of the well to the bottom of the siding.

_____ Inches

5.) Does the window swing open away from the house? Yes No
