2019 ANNUAL CATALOG
FIRST QUALITY COMPOSITE MATERIALS GUARANTEED

NEW UNIDIRECTIONAL CARBON FIBER SLEEVES
NEW INFUSION EPOXY RESINS
NEW CHROMAGLAST PREMIUM PAINT FOR COMPOSITES

WOMAN-OWNED SMALL BUSINESS WITH BIG BUSINESS CAPABILITIES
1.800.214.8568 • 8AM - 7PM EST MON - FRI
ISO 9001:2015 CERTIFIED
FIRST QUALITY COMPOSITE MATERIALS GUARANTEED

Serving Our Customers Since 1957

FIBRE GLAST DEVELOPMENTS

Since 1957 Fibre Glast Developments has specialized in the distribution of fiberglass and composite supplies. We are proud to offer the largest and most comprehensive composite catalog available and are glad you have chosen to consider us for your fiberglass and composite needs.

Fibre Glast materials are suitable for the most demanding applications, like aerospace, marine, military, and racing. We only supply first quality materials and that is one reason why we are:

1K, Plain Weave Carbon Fiber Fabric
2.5 oz/sq yd, 42" Wide, 0.009" Thick, 1K, Plain Weave

This unique carbon fiber fabric is used in the most demanding applications requiring carbon properties and stiffness at a minimum weight. Plain weave construction provides excellent stability and easy handling.

42" Wide:
#3263-A 1 YD Roll $249.95
#3266-B 3 YD Roll $69.95
#3260-C 5 YD Roll $189.95
#3260 10+ YARDS $169.95/YD
#3260 25+ YARDS $149.95/YD
#3260 50+ YARDS $129.95/YD
#3260 100+ YARDS $109.95/YD

Same-Day-Shipping! If ordered before 2:30PM EST

First Quality Composite Materials Guaranteed

3K, Plain Weave Carbon Fiber Fabric
5.7 oz/sq yd, 0.012" Thick, 3K, 12.5 x 12.5 Plain Weave

For lightweight aerodynamic parts, plain weave carbons are a commonly selected fabric style, delivering uniform strength in both horizontal and vertical directions. In fact, these fabrics boast an ultimate tensile strength of at least 610 KSI - most competitors offer only around 500 KSI. They wet out quickly and handle easily. Only three layers are typically necessary to produce non-structural pieces.

50" Wide:
#1690-A 1 YD Roll $59.95
#1690-B 3 YD Roll $199.95
#1690-C 5 YD Roll $399.95
#1690 10+ YARDS $49.95/YD
#1690 25+ YARDS $44.95/YD
#1690 50+ YARDS $40.95/YD
#1690 100+ YARDS $35.95/YD

3K, 2X2 Twill Weave Carbon Fiber Fabric
5.7 oz/sq yd, 0.012" Thick, 3K, 2X2 Twill Weave

Twill weave is our most popular carbon fiber fabric, with a signature appearance that is highly desirable for modern composite parts in the auto, marine, and sporting goods industries. As compared to plain weave counterparts, the twill weave offers greater conformability and delivers a slight edge in strength. In fact, our #1069 boasts a tensile strength of at least 610 KSI, most competitors offer around 500 KSI.

50" Wide:
#1069-A 1 YD Roll $59.95
#1069-B 3 YD Roll $199.95
#1069-C 5 YD Roll $399.95
#1069 10+ YARDS $49.95/YD
#1069 25+ YARDS $44.95/YD
#1069 50+ YARDS $40.95/YD
#1069 100+ YARDS $35.95/YD

6K, 2X2 Twill Weave Carbon Fiber Fabric
10.9 oz/sq yd, 60" Wide, 0.017" Thick, 6K, 2X2 Twill Weave

This twill weave fabric features a tight weave and a cosmetically perfect 2x2 twill pattern. As a midweight carbon, it is a bit stiffer than 3K, meaning it is best used on flatter surfaces requiring less drapability. It retains the signature appearance that is highly desirable for modern composite parts in the auto, marine, and sporting goods industries. This fabric is frequently used for structural applications, offering improved economics to fabricators when compared to multiple layers of lighter fabrics.

50" Wide:
#1073-A 1 YD Roll $79.95
#1073-B 3 YD Roll $219.95
#1073-C 5 YD Roll $399.95
#1073 10+ YARDS $64.95/YD
#1073 25+ YARDS $62.95/YD
#1073 50+ YARDS $59.95/YD
#1073 100+ YARDS $57.95/YD

12K, 2X2 Twill Weave Carbon Fiber Fabric
19.8 oz/sq yd, 60" Wide, 0.033" Thick, 12K, 2X2 Twill Weave

This twill weave will add bulk to your laminate quickly. Due to its heavier weight and thickness, this fabric is slightly more difficult to form than lighter weight carbon. While it’s not generally used for small, complex shapes, it is excellent for flat parts and high strength requirements. This fabric is frequently used for structural applications, offering improved economics to fabricators when compared to multiple layers of lighter fabrics.

50" Wide:
#1072-A 1 YD Roll $89.95
#1072-B 3 YD Roll $249.95
#1072-C 5 YD Roll $399.95
#1072 10+ YARDS $65.95/YD
#1072 25+ YARDS $63.95/YD
#1072 50+ YARDS $60.95/YD
#1072 100+ YARDS $57.95/YD

6K, 5H5 Satin Weave Carbon Fiber Fabric
10.9 oz/sq yd, 60" Wide, 0.024" Thick, 6K, 5H5 Satin Weave

With twice the fiber density of the 3K type, this fabric is ideal for structural applications. 5H5 stands for five harness satin weave which is produced by one warp fiber traveling over four and under one fill fiber. Because of its unique satin weave, one side of the fabric will look different than the other. Fabricators will usually invert half the plies when looking to produce a symmetrical laminate. Also, the 5H5 weave allows it to work even with the most complex shapes. This fabric builds lightweight parts with virtually no flex.

50" Wide:
#566-A 1 YD Roll $78.95
#566-B 3 YD Roll $218.95
#566-C 5 YD Roll $399.95
#566 10+ YARDS $64.95/YD
#566 25+ YARDS $62.95/YD
#566 50+ YARDS $59.95/YD
#566 100+ YARDS $57.95/YD

www.fibreglast.com | 1.800.214.8568
UNIDIRECTIONAL CARBON FIBER FABRIC

These unidirectional fabrics are made without the typical hot melt process. Consequently, there is no crimping of the fiber and only minimal binder is used. This results in the highest property unidirectional dry reinforcement available. The 4 oz ultralight dry reinforcement is popular for smaller scale projects like UAV’s, model boats, or sporting goods. The 9 oz is used in many marine applications such as boat hulls, as well as hockey sticks and bicycles. The Intermediate Modulus 4.3 oz Unidirectional is used in aerospace and racing applications where maximum single directional properties are critical. Our 22.3 oz is a thick, quilted unidirectional that provides quick lay-up and extreme structural strength for architectural applications and renovations.

PREPREG UNIDIRECTIONAL CARBON FIBER

These popular weights of unidirectional fabrics feature a pre-impregnated epoxy resin that provides a nearly perfect fiber-to-resin weight ratio for ultimate strength. The resin also ensures a beautiful, glossy finish free of pinholes and dry spots. The 4.3 oz and 9 oz fabrics used in these parts are the same as our #2596 and #2583 fabrics, respectively. The #2112 is ideal for marine and recreational applications, while the #2114 Intermediate Modulus fabric is designed for use in aerospace applications.

PREPREG 3K, 2X2 TWILL WEAVE CARBON FIBER

This prepreg carbon fiber fabric features our most popular twill weave carbon, pre-impregnated with an epoxy resin system, that is formulated to offer an excellent glossy surface while maintaining ultimate strength. The near-perfect resin content maximizes the strength properties of the carbon fabric, similar to our #1069 (#221) boasts a tensile strength of at least 510 KSI, and makes great looking, repeatable, uniform parts.

CARBON FIBER VEIL

Graphite veils are frequently used in applications when corrosion resistant barriers are required. The nonwoven construction allows a resin-rich surface that increases chemical stability and reduces the risk of micro-cracks forming in the composite surface. Carbon veils can also be used for grounding a composite structure, minimizing the build-up of static electricity that could prove dangerous when in contact with explosive liquids and gases. BRAIDED CARBON FIBER SLEEVES
For Precision, Repeatable, High-Strength Parts

These braided carbon biaxial sleeves have the cosmetically desirable appearance of a 2x2 twill pattern but as a sleeve, they can be slid over a prepared mandrel or tube to create straight or tapered tubing. The sleeves can be increased from their base diameter up to 30% and decreased up to 70%. This means that a 2" diameter can be used in a single application ranging from 2.6" diameter down to 0.6". Laying up sleeves is predictable, repeatable, and suitable for precise manufacturing of composite parts. Warning: Cancer Harm - www.P65Warnings.ca.gov

UNIDIRECTIONAL CARBON FIBER SLEEVES
For Tapered, Curved, or Irregular Shaped High-Strength Parts

These unidirectional carbon fiber sleeves are ideal for tapered, curved or other irregular shapes and feature ultimate strength in one direction. These sleeves are braided with small elastic bias yarns offering conformability, fitting snugly while uniformly distributing the axial reinforcements around the perimeter of the part. Our unidirectional carbon fiber sleeves even conform to parts with varying diameters, irregular shapes, or varying cross-sections like prosthetics and hockey sticks.

CARBON FIBER TAPE
7.3 oz/4 yd, 0.012" Thick, 3K, Plain Weave

Carbon fiber tape is ideal for selective reinforcement of carbon fiber fabrications, sleeve winding, lap joining, and repairs of cracks on graphite surfaces. Just like their wider carbon fabric counterparts, these standard modulus tapes offer higher ultimate tensile strength and stiffness-to-weight ratios than any other commonly available reinforcements. They are ideal for use in auto racing, aerospace, competition marine, and light industrial applications.

**KEVLAR®/CARBON FIBER HYBRID**

5.4 oz/oz. yd, 50” Wide, 0.012” Thick, 2x2 Twill Weave

This first quality hybrid fabric offers 3K Carbon warp fibers and 1500 Denier KEVLAR® fill fibers for maximum drapability and drop-dead good looks. Use as a single layer for cosmetics only or back with another layer in the cross direction for a maximum balance of properties.

**KEVLAR® PLAIN WEAVE**

5.2 oz/oz. yd, 50” Wide, 0.011” Thick, 11400, Plain Weave

KEVLAR® in plain weave form is the most popular KEVLAR® in composites. Although it is slightly stiff for highly contoured molds, it offers uniform properties, maximum stability, and simple surfacing characteristics. Its good stiffness, light weight, and high abrasion resistance make it a great selection for applications that include kayaks, canoes, high-speed boats, aircraft fuselage panels, pressure vessels, sporting equipment, wind turbines, and much more.

**KEVLAR® TAPES**

5.0 oz/oz. yd, 0.011” Thick, 17x17 Plain Weave

KEVLAR® tape is ideal for selective reinforcement of KEVLAR®, fiberglass, or carbon laminations and repairs. Its plain weave pattern matches our #2469 fabric and offers uniform strength and drapability for wrapping or laying in strips, particularly for applications of unique shape. They are ideally suited for marine and sporting goods applications.

**KEVLAR® TWILL WEAVE**

5.3 oz/oz. yd, 50” Wide, 0.011” Thick, 11400, 2x2 Twill Weave

This KEVLAR® 49 fabric is ideal for impact-resistant applications that call for excellent specific tensile strength and minimum weight. The signature colored twill pattern makes for improved drapability and delivers impressive cosmetics where show-through is a factor. Common applications include kayaks, canoes, boats, and sporting goods equipment.

**2” BRAIDED KEVLAR® BIAXIAL SLEEVES**

2”, 8.9 oz/oz. yd, 50” Wide, 0.018” Thick

These KEVLAR® sleeves are highly impact and abrasion resistant. They can be slid over a prepared mandrel or cylinder to create straight or tapered tubing. In addition, braided sleeves will completely conform to the shape of products with changing geometries like prosthetics and hockey sticks, improving overall performance, minimizing weight, and maximizing strength. The sleeves can be increased from their base diameter up to 30% and decreased up to 70%. This means that our 2” sleeve can be used in a single application ranging from 0.6” to 2.6” in diameter.

www.fibreglasc.com | 1.800.214.8568
PREPREG STYLE 7781, E-GLASS
8.7 oz/oz yd, 50” Wide, 0.009” Thick, 6H Satin Weave

This fiberglass fabric features our 7781 E-Glass, part #543, pre-impregnated with a high-strength epoxy resin system formulated for high flow and minimum surface porosity. This near-perfect resin content maximizes the properties of the fiberglass fabric, often chosen for aerospace and structural applications, and makes the way for repeatable, uniform parts.

STYLE 7781, E-GLASS
4.3 oz/oz yd, 12” Wide, 0.006” Thick, 12K, 1M, Unidirectional Prepreg

Frequently specified in aerospace applications, this fabric offers excellent strength, formability, and surfacing characteristics. This fabric's glass fibers are bundled and woven repeatedly to float over seven bundles, then under one. As a result, the fabric is flatter and more easily draped over the most complex shapes. Meets MIL-C-9084C.

STYLE 6781, S2-GLASS
9 oz/oz yd, 50” Wide, 0.009” Thick, 57 X 57 6H Satin Weave

This 9-ounce fabric selection is much like our #543 9-ounce E-Glass, except that it is woven from S2 fibers. As a result, this S2-Glass features extraordinary strength with a superior look and finish. Style 6781 is one of the most popular fabrics for modern aerospace applications.

STYLE 7725, BI-DIRECTIONAL E-GLASS
4.0 oz/oz yd, 36” Wide, 0.010” Thick, 2X2 Twill Weave

This high-performance, loose weave, 2x2 twill weave fabric is both strong and formable. When cut off the roll on a 45° bias, it will drape over virtually any contour. It was developed for the light aircraft market, but it can be used anywhere high strength, fast wet-out, and drapability are desired. Like other woven fabrics, it delivers uniform strength in both horizontal and vertical directions, with warp and fill fibers at 0° and 90° degrees.

STYLE 120, E-GLASS
5.7 oz/oz yd, 50” Wide, 0.012” Thick, 3K, 2X2 Twill Weave Prepreg

This fabric is extremely tightly woven and is commonly used in aerospace and high-quality fabrications due to its 4H Satin Weave pattern. The 4H Satin Weave, in particular, is very lightweight and tightly woven, with fiberglass bundles repeatedly woven to float over three bundles, then under one. Meets MIL-C-9084C.

FIBERGLASS SAMPLE PACK

This convenient Sample Pack contains 4” x 6” swatches of all of our fiberglass fabrics. It is ideal for determining which material you would like to try for your application. Plus, this Sample Pack includes a coupon for $25 off your next order of $100 or more when purchased within a 60 days!
**SAERTEX® 4800 G/M² (12.5OZ/YD²)**

Stitched Biaxial (45/45), 50” Wide

This Saertex biaxial cloth adds strength in two directions for finished composite parts. Equal-sized bundles of fiberglass are stitched at +/- 45 degrees using high-strength polyester, with stabilization fibers throughout. Fibers are not cramped and fabric lays smooth, promoting maximum strength properties.

**SAERTEX® 9550 G/M² (280OZ/YD²)**

Stitched Unidirectional, 50” Wide

This Saertex unidirectional cloth adds strength in one direction for finished composite parts. Reinforced polyester threads are used to stitch large bundles of fiberglass at zero degrees, and small bundles at 90 degrees. Fibers are not cramped and fabric lays smooth, promoting maximum strength properties.

$25 OFF COUPON INCLUDED WITH PURCHASE

Saertex Fabrics are commonly used in the wind energy industry because their non cramped fibers deliver superior strength while still being lightweight.

www.fibreglast.com | 1.800.214.8568
1.5 OZ CHOPPED STRAND MAT
1.5 oz/40 yd, 0.045" Thick

Mat can be used along or in conjunction with fiberglass fabrics or woven roving in larger fabrications. Mat is commonly used in build-up such as plywood decking and between layers of fabric when molding. Our mats meet MIL-M-43248C, Type 1, Class 2, Grade A. Chopped strand mat contains a binder to prevent proper bonding with epoxy resin. Use our polyester or vinyl ester resin with this material.

CONTINUOUS STRAND VEIL SURFACING MAT
36" Wide, 0.011" Thick

This surfacing mat is a thin ply of continuous strand fibers that are randomly looped throughout the roll of material. It is commonly used as a surface coat to minimize print-through, and permits surface sanding of finished parts. It is also used with sandwich core, being placed directly over core materials to optimize bond-line thickness. Additionally, it keeps excess resin from draining into honeycomb cells.

SYNTHETIC SURFACING VEIL
1.2 oz/40 yd, 47" Wide, 0.011" Thick

Our #1581 Synthetic Surfacing Veil offers great protection for your laminate against corrosion, abrasion, and weathering. This white, formable, polyester veil offers fast wet-out, excellent appearance, and surface smoothness. Adding a polyester surface veil ensures superior impact strength while acting as an exceptional cosmetic print blocker.

SCRIM FABRIC - WHITE
1.6 oz/40 yd, 47" Wide, 0.009" Thick, 10 x 30 Leno Weave

Scrim cloth can be used in repair applications or for reinforcement of other types of materials including fiberglass, concrete, and some plastics. When fully cured, the scrim cloth will add reinforcement and mimic the expansion and contraction of the surrounding substrate.

FIRST QUALITY COMPOSITE MATERIALS GUARANTEED
2" BRAIDED FIBERGLASS BIAXIAL SLEEVE
10.4 oz/sg yd, 2" Wide, 0.011" Thick, Biaxial

This E-Glass sleeve will conform to shapes with changing geometries. Great for use in prosthetics, hockey sticks, and much more. It can be slid over a prepared mandrel or tube to create straight or tapered tubing. Biaxial sleeves can be increased from their base diameter by 30% and decreased up to 70%. This means that a 2" diameter can be used in a single application ranging from 2.6" diameter down to 0.6". Laying up sleeves is predictable, repeatable, and suitable for precise manufacturing of composite parts.

2" S/A
#2510-A 1 YD ROLL $16.95
#2510-B 3 YD ROLL $27.95
#2510-C 6 YD ROLL $43.95
#2510-D 10+ YARDS $6.65/YD
25+ YARDS $5.45/YD

MAT TAPE
1.5 oz/sg ft, 4" Wide, 0.43" Thick

Chopped Strand Mat Tape is ideally suited to reinforce the seams, corners, or edges of larger parts made from chopped strand mat or other fiberglass fabrics. Fabricators generally tear apart this tape, rather than cut it. This maintains the length of fibers along the torn edge, which create stronger bonds with subsequent layers.

4" WIDE
#482-C 1 YD ROLL $7.95
#482-D 8 YD ROLL $45.95

WOVEN FIBERGLASS TAPES
7.8-9.5 oz/sg yd, Plain Weave

Woven fiberglass tape is used to reinforce laminate edges, seams of molding, and pipe winding applications. The fully seam edges avoid the problems caused by cutting narrow strips from full width fabrics. These tapes saturate easily and in most respects are similar to a 10oz fabric. Their finished edges offer easier handling, a clean, finished appearance, and keep the tape from unraveling. Their plain weave construction builds in uniform strength in both horizontal and vertical directions.

CHOPPER GUN
Chop Clean for Quick Fiber Build-Up

Our #1171-A is a hand held, variable speed air powered chopper gun that is primarily used for coating molds or parts with fiberglass or carbon fiber. Continuous glass roving is fed into the rear of the gun and is then chopped into short pieces and deposited onto the mold. By altering the number and location of chopper blades, the length of the fibers can be varied from 4" down to 5/16". Replacement parts sold separately.

#1171-A CHOPPER GUN $299.95
#1155-A CHOPPER BLADE $38.95
#1155-A WHITE MAX ROLLER SLEEVE $4.95
#1152-1 BLADE "A" RING $1.95
#1153-A ANVIL ROLLER ASSEMBLY $44.95
#1154-A FEED ROLLER $11.95
#1155-A FEED ROLLER ASSEMBLY $24.95
#1156-A CUTTER ASSEMBLY $54.95

GUN ROVING
Available in 50-Pound Rolls

This versatile roving chops cleanly and wets rapidly and completely. It demonstrates good laminate properties and wet strength retention. It is an excellent choice for mold and radii conformance, rolls out easily, and can be used in many different chopper guns and transfer systems. Gun roving is designed for use with resin systems to create high-strength, low-weight composites. Yields 208 yards per pound.

ROVING

#526-B CASE 12 ROLLS $685.95
#526-C CASE 12 ROLLS $1,334.45

www.fibreglast.com  |  1.800.214.8568
MARINE EPOXY FAIRING COMPOUND

#4118 Epoxy Fairing Compound is a smooth, creamy paste system for fairing surface imperfections on composites, wood, and primed metal parts, boasting excellent bonding during cure. This tough Epoxy Fairing Compound can be used to fill voids and provides a smooth transition in offset or stepped areas. It is also specially formulated for easy sanding and is moisture resistant, so the cured surface is blush-free and won’t gum sandpaper during finishing. #4118 Epoxy Compound cures to be slightly flexible, which helps to resist cracking under stress or vibration for thin layers. However, if necessary, it can be applied up to 1-1/2 inches thick—special “wet” spreadable viscosity prevents nearly any sagging, even at elevated temperatures.

DUE TO MARKET VOLATILITY IN EPOXIES, PRICING IS AVAILABLE ON OUR WEBSITE.

LIGHTWEIGHT EPOXY FILLER

This extremely Lightweight Epoxy Filler can be used to smooth the surface of repaired parts, fill the weave on moldless or male-molded parts, and shape fillets in corners and joints. It provides superior adhesion to most surfaces including SMC, foam, wood, fiberglass, many metals, and even common construction materials. #1100 Lightweight Epoxy Filler exhibits no shrinkage, so there’s no need to continually re-apply. It spreads smoothly with few sags, even upside down! Final contours are easily sanded with standard shop tools.

DUE TO MARKET VOLATILITY IN EPOXIES, PRICING IS AVAILABLE ON OUR WEBSITE.

EPOXY PASTE BONDING ADHESIVE

Our #101 Epoxy Paste Bonding Adhesive is a high strength structural adhesive used to bond and assemble sub-components to form rigid final structures. The high viscosity provides excellent gap filling characteristics that strengthen loose fitting joints and panels. It forms tough durable bonds to composites, SMC, foam, wood, fiberglass, many metals, and even common construction materials. Parts A and B are mixed in a 1:1 ratio. Cure time is relatively quick, 5-8 hours at 77°F, allowing for sufficient “green strength.” WARNING: This product can expose you to chemicals including Bisphenol A (BPA), which is known to the State of California to cause birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

DUE TO MARKET VOLATILITY IN EPOXIES, PRICING IS AVAILABLE ON OUR WEBSITE.

HIGH VISCOSITY EPOXY SURFACE COAT

Formulated for Strong Interlaminar Bonds

Our #1099 High Viscosity Epoxy Surface Coat is a white, thickened epoxy material used to create the durable surface coat on room temperature epoxy molds. This surface coat can be brushed on thick without developing runs or sags. It is specially formulated to provide strong interlaminar bonds with the reinforcing materials, even if it is left unsupported overnight. #1099 resists chipping and cracking, and retains its high gloss. WARNING: This product can expose you to chemicals including Bisphenol A (BPA), which is known to the State of California to cause birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

DUE TO MARKET VOLATILITY IN EPOXIES, PRICING IS AVAILABLE ON OUR WEBSITE.

EPOXY SURFACE COAT

Easy-to-Use Durable Surface Coat

Our #1098 Epoxy Surface Coat is an off-white, paste designed to form a tough, durable surface on patterns, fixtures, and epoxy molds. It can be brushed or spread onto detailed surfaces without trapping air bubbles. It provides excellent surface gloss, resists chipping, and cracking. At room temperature, #1098 Epoxy Surface Coat will completely cure with no heat added. When applied in a thin film it will cure tack free (16 to 18 hours at 77°F). WARNING: This product can expose you to chemicals including Bisphenol A (BPA), which is known to the State of California to cause birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

DUE TO MARKET VOLATILITY IN EPOXIES, PRICING IS AVAILABLE ON OUR WEBSITE.

HIGH TEMP EPOXY SURFACE COAT

Dissipate Heat and Extend the Life of your Mold

Our #1096 High Temp Epoxy Surface Coat is a two-part, low viscosity thixotropic system. This aluminum filled epoxy surface coat system is designed for demanding tooling applications with frequent intermediate/high temperature exposure. It is well suited to resist cracking and crazing during these temperature fluctuations. High Temp Epoxy Surface Coat will gel hard at room temp. Before initiating an oven post-cure, allow this surface coat to gel at room temperature. WARNING: This product can expose you to chemicals including Bisphenol A (BPA), which is known to the State of California to cause birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

DUE TO MARKET VOLATILITY IN EPOXIES, PRICING IS AVAILABLE ON OUR WEBSITE.
SYSTEM 1000 LAMINATING EPOXY RESIN

Tough Epoxy for Quick Repairs and Fabrication

System 1000 Epoxy resin is an easy to use epoxy system with two hardeners providing different working times and a variety of uses. This system has a very low mixed viscosity, so it will quickly wet out fiberglass, carbon, and aramid fibers when laminating, allowing for a more rapid fabrication. System 1000 outperforms other general purpose and quick-turnaround epoxies. Cured parts yield a very high heat resistance, so they are more stable for long-term use, even for problem-prone applications. Two high performance hardener systems are available for the System 1000 resin, 10 minute and 25 minute pot life versions. Simple parts or quick repairs should use the 10 minute hardener. Larger and more complex parts can use the 25 minute pot life hardener. This resin is also specifically formulated for excellent moisture resistance for parts, making it ideal for the construction or repair of boat hulls or other marine applications.

SYSTEM 2000 LAMINATING EPOXY RESIN

Get Impressive Strength in a Quick-Cure Turnaround

System 2000 Epoxy Resin is a medium viscosity, light amber laminating resin that is designed to offer high strength for a room temperature epoxy. Test results have proven superiority over room temperature epoxies. This epoxy system does not contain methylene diamine (MDA), or any other potentially harmful aniline derivatives. Three hardener systems are available: 20 minute, 60 minute and 120 minute pot life. WARNING: This product can expose you to chemicals including Bisphenol A (BPA), which is known to the State of California to cause birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

SYSTEM 4500 INFUSION EPOXY RESIN

Low Viscosity Infuses Epoxy

Our System 4500 is a low viscosity epoxy system designed for the fabrication of parts and structures by the resin infusion method. This system flows extremely well, and produces dense, void-free laminates. The superior cured properties of this system produce items with good strength and toughness with excellent long-term stability. Combine this resin system with any of our Carbon Fiber, Kevlar or most fiberglass fabrics for lightweight, superior-strength composite parts. This Infusion Epoxy System is available with two hardener options, a 30 minute pot life and a 60 minute pot life. The two hardener options are identical except for reaction time, so no matter which hardener is chosen, you can expect the same high performance properties. WARNING: This product can expose you to chemicals including Bisphenol A (BPA), which is known to the State of California to cause birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

SYSTEM 3000 HI-TEMP EPOXY KIT

Best for High Temp Parts

#3000/3120 combine to make our System 3000 High Temp Industrial Epoxy Kit. This kit is engineered to create composite components that will operate in intermediate/high temperature service environments, up to 50°F. It easily wets-out reinforcing fabric for stable fabrications. With the capability to post cure off of the tooling, you can use room temperature tooling for lower fabrication costs. Post-cured, this unfilled, amber epoxy laminating resin offers maximum stability in service applications involving frequent heating and cooling cycles. This epoxy system does not contain methylene diamine (MDA), or any other potentially harmful aniline derivatives.

SYSTEM 3300 HI-TEMP TOOLING EPOXY

Use for High Temp Tooling

For high performance, high temperature composite tooling that will provide excellent long term service in high temp curing cycle environments, use this High Temp Tooling Epoxy. When post-cured, this unfilled, amber epoxy laminating resin system offers maximum stability in service applications involving frequent heating and cooling cycles. #3300/3330 High Temp Tooling Epoxy wets-out tooling fabrics readily.

SYSTEM 4600 HI-TEMP INFUSION EPOXY RESIN

Hi-Temp and Low Viscosity Epoxy System

Our System 4600 Hi-Temp Infusion Epoxy is an excellent option for composite tooling that requires higher service temperatures. This low viscosity epoxy system has found good acceptance for use in vacuum infusion fabrication and tooling processes. The low mixed viscosity of this system allows it to penetrate the reinforcing materials easily and completely, producing a void-free, dense composite component and making it an ideal selection for molds and tooling. System 4600 has excellent “hot strength”, so cured parts or tooling fabricated with it can provide good service in elevated temperature operating conditions up to 300°F.

www.fibreglast.com | 1.800.214.8568
**POLYESTER FAIRING COMPOUND**

Durable and Highly Adhesive with Low Shrinkage

Polyester Fairing Compound is a fibrous filler for structural repairs, bonding, and part fabrication. This structural putty is great for rebuilding broken or damaged areas in composites. Polyester Fairing Compound exhibits low shrinkage, high impact strength, excellent temperature and chemical resistance. It is easy to mix, has excellent adhesive qualities, low moisture absorption, and can be applied in varying degrees of thickness.

**WARNING:** This product can expose you to chemicals including Styrene, Talc containing asbestos fibers, and Titanium Dioxide (airborne, unbound particles of respirable size), which are known to the State of California to cause cancer.

For more information go to www.P65Warnings.ca.gov.

| #4100-A | QUART (2.35 LBS) | $49.95 |
| #4100-B | GALLON (11 LBS)  | $169.95 |
| #4100-254-A | QUART W/ WHITE BPO HARDENER | $52.95 |
| #4100-254-B | GALLON W/ WHITE BPO HARDENER | $174.95 |

---

**LIGHTWEIGHT POLYESTER COSMETIC FILLER**

High Quality No-Shrink Surface Filler

Lightweight Polyester Cosmetic Filler is a versatile, creamy paste designed to fill, seal, repair, and finish surface damage on composite materials. When applied, it quickly forms an exceptionally rigid and strong surface which can easily be sanded to a feather edge. It will not shrink, sag, or pin-hole after curing, and it can accept virtually any paint or finish without any special surface preparation. After 15-20 minutes, it can be sanded to final finish.

**WARNING:** This product can expose you to chemicals including Styrene & Titanium Dioxide (airborne, unbound particles of respirable size), which are known to the State of California to cause cancer.

For more information go to www.P65Warnings.ca.gov.

| #4116-A | QUART (1 LBS) | $39.95 |

---

**POLYESTER MOLDING RESIN**

General Purpose Resin for Part/Mold Fabrication

#77 Molding Resin is ideal as a orthophthalic fiberglass resin for general purpose part fabrication and for building low cost molds. It features an internal thickening agent which results in a high thicknephic index. This prevents drainage when applied to vertical surfaces, yet this polyester resin retains the low viscosity required for rapid wet out. #77 Polyester Resin is easy to work with, and since it is wax free, you don't have to sand between coats. Formulated for 1.2% MEKP. **WARNING:** Cancer and Reproductive Harm - www.P65Warnings.ca.gov.

| #77-F | QUART (2 LBS) | $32.95 |
| #77-A | GALLON (9 LBS) | $95.95 |

| #77-00-A | GALLON W/ HARDENER | $99.95 |
| #77-00-AK | 4 GALL W/ HARDENER | $259.95 |

---

**ISOPHTHALIC POLYESTER RESIN**

Build Strength and Stability for Tough Parts

#90 Isophthalic Polyester is perfect for making dimensionally stable polyester molds, fabrication of corrosive service parts, and as a durable repair material for tank linings. This iso polyester resin offers fast wet-out in spray or hand laminates. The 225°F service temperature resists exotherm and post cure problems. #90 has better strength properties than a general purpose polyester resin, which allow it to be used in more demanding applications. Formulated for 1.2% MEKP. **WARNING:** This product can expose you to chemicals including Styrene which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.

| #90-F | QUART (2 LBS) | $37.95 |
| #90-A | GALLON (9 LBS) | $70.95 |
| #90-B | 5 GALLON (40 LBS) | $389.95 |

| 10-5 GALLON PAILS | $274.95/6 GALL |
| #90-DRAIN | DRAIN (560 LBS) | $2,229.95 |
| #90-00-F | QUART W/ HARDENER | $38.95 |
| #90-00-A | GALLON W/ HARDENER | $79.95 |
| #90-00-AK | 4 GALL W/ HARDENER | $299.95 |

---

**VINYL ESTER RESIN**

Corrosion Resistant and Blended for Toughness

Our #1110 Vinyl Ester resin is formulated for corrosion resistance to most fuels, vapors, and both acidic and basic chemicals. It is also heat resistant and blended for toughness. This makes it perfect for repairing tank linings, blistering boat hulls, as well as fabricating tough all-around parts. The properties of this resin allow it to withstand impacts and repeated flexing without developing cracks. Formulated for 1.2% MEKP. **WARNING:** Cancer and Reproductive Harm - www.P65Warnings.ca.gov.

| #1110-F | QUART (2 LBS) | $44.95 |
| #1110-A | GALLON (9 LBS) | $99.95 |
| #1110-B | 5 GALLON (40 LBS) | $374.95 |
| 4-5 GALLON PAILS | $344.95/5 GALL | $319.95/6 GALL |
| 10-5 GALLON PAILS | $319.95/6 GALL |
| #1110-DRAIN | DRAIN (560 LBS) | $2,586.49 |
| #1110-00-F | QUART W/ HARDENER | $46.95 |
| #1110-00-A | GALLON W/ HARDENER | $104.95 |
| #1110-00-AK | 4 GALL W/ HARDENER | $374.95 |
**STYRENE THINNER**

**General Purpose Styrene**

#70 Styrene Thinner is primarily used to thin polyester and vinyl ester resin and gel coat before use. We recommend adding styrene at no more than 5% by volume, in order to maintain the physical properties of the resin or gel coat. **WARNING:** Cancer and Reproductive Harm - www.P65Warnings.ca.gov

- #70-A QUART (2 LBS) $24.95
- #70-B GALLON (7.5 LBS) $49.95

**STYRENE WAX**

**Get a Complete Cure for Polyester Resins**

#71 Styrene Wax is a 5% paraffin dissolved in styrene. When paraffin is added to resin, the wax will float to the surface and protect the curing resin from the inhibiting action of the air. Mix #71 at 5% for thin coatings – approximately one to two tablespoons for every pint of resin. **WARNING:** Cancer and Reproductive Harm - www.P65Warnings.ca.gov

- #71-B QUART (2 LBS) $44.95
- #71-C GALLON (7 LBS) $109.95

**MEKP HARDENER**

**Industry Standard Catalyst**

#69 Methyl Ethyl Ketone Peroxide, or MEKP; is required with all polyester resins, gel coats, and vinyl ester resins. It is required in different concentrations as defined for each resin product. Each resin product is available as a kit with the correct amount of hardener. However hardener may be purchased individually.

- #69-A 1 LBS $7.95
- #69-E CASE (6 GALS) $171.95

**WHITE GEL COAT**

**Durable, Lasting Protection for Boats and Molds**

#682 White Gel Coat is a highly durable ISO gel coat and is the industry production standard for molding applications. Our gel coats provide superior performance in critical use environments with outstanding cosmetics and exceptional in-process application properties. One gallon of gel coat will cover approximately 40-80 sq ft. Formulated for 1.5% MEKP. **WARNING:** Cancer and Reproductive Harm - www.P65Warnings.ca.gov

- #682-A QUART (2 LBS) $44.95
- #682-B GALLON (5 LBS) $99.95
- #682-C 5 GALLON (46 LBS) $699.95
- #682-DRUM DRUM (560 LBS) $2,399.95

**NEUTRAL GEL COAT**

**Designed to Deliver Superior Color Quality**

#684 Neutral Gel Coat is a premium quality ISO gel coat formulated specifically for use with pigment to obtain superior color consistency and opacity. #684 cures to a brilliant gloss and is ideal for applications needing an opaque, lustrous, and colorful surface. #684 is compatible with underwater and marine applications. One gallon of gel coat will cover approximately 40-80 sq ft. Formulated for 1.5% MEKP. **WARNING:** Cancer and Reproductive Harm - www.P65Warnings.ca.gov

- #684-A QUART (2 LBS) $44.95
- #684-B GALLON (5 LBS) $99.95
- #684-C 5 GALLON (46 LBS) $699.95
- #684-DRUM DRUM (560 LBS) $2,399.95
- #684-65-A QUART W/ HARDENER $46.95
- #684-65-B GALLON W/ HARDENER $104.95
- #684-65-8K 4 GALLON W/ HARDENER $384.95

**CLEAR GEL COAT**

**Get a Crystal-Clear, High-Gloss, Protective Finish**

#180 Clear Gel Coat is a high performance, premium quality gel coat for both airless and air atomized spray applications. #180 offers UV light stability, excellent clarity, crack and chemical resistance. This non-yellowing gel coat is compatible with underwater and water contact marine applications as well as sanitary ware such as showers and tubs. One gallon of gel coat will cover approximately 40-80 sq ft. Formulated for 1.5% - 2.5% MEKP. **WARNING:** This product can expose you to chemicals including Styrene, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.

- #180-A QUART (2 LBS) $44.95
- #180-B GALLON (5 LBS) $99.95
- #180-C 5 GALLON (46 LBS) $699.95
- #180-65-4 4 GALLON (50 LBS) $349.95/5 GAL
- #180-65-A QUART W/ HARDENER $46.95
- #180-65-B GALLON W/ HARDENER $104.95
- #180-65-4K 4 GALLON W/ HARDENER $384.95

**TOOLING GEL COAT**

Tooling Gel Coat is an abrasion resistant gel coat for making molds where gloss retention, superior hardness, grade resistance, and minimum distortion are needed. Build thickness to 20-25 mils. Formulated for 1% - 2.5% MEKP. **WARNING:** This product can expose you to chemicals including Styrene, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.

www.fibreglast.com | 1.800.214.8568
**1/4" CHOPPED GRAPHITE FIBERS**
Localize Strength for High-Performance Parts

Chopped carbon fiber is commonly compounded with resins to create an easily molded composite that is great for filling cavities or reinforcing parts requiring optimized electrical conductivity, high strength, and modulus. These precision-chopped graphite fibers are chopped from a 24K tow.

#571-A 1/2 GALLON (1 LBR) $98.95
#571-B CARTON (6 LBS) $254.95
#571-C BOX (50 LBS) $1,008.95

#544-A 1/2 GALLON (2 QTS) $119.95
#544-B CARTON (1 LBS) $139.95
#544-C CARTON (10 LBS) $474.95

**KEVLAR® PULP**
Reinforce High-Impact Areas

Kevlar® Pulp is the lightest of the fillers and highly abrasion resistant. Areas of high impact can be reinforced easily with this strong and durable material. It can also be used to make beveled fillets along edges of honeycomb cores to smooth the transition of fabric fibers.

#23-A 1/2 GALLON (9 QTS) $129.95
#23-B CARTON (7 LBS) $162.95
#23-C CARTON (10 LBS) $319.95
#23-D BOX (50 LBS) $757.95

**THIXOTROPIC SILICA**
Prevent Sags on Vertical Surfaces

Thixotropic Silica is a fine grade fumed silica thickening agent similar to Cab-O-Sil and is added to resin systems to prevent run-off and sags on vertical surfaces. Mix in the ratio of 1 part by volume #23 to 2 parts resin for general use. Cab-O-Sil is a registered trademark of Cabot Corporation.

#23-C CARTON (7 LBS) $162.95
#23-D BOX (50 LBS) $757.95

**1/4" CHOPPED GLASS FIBERS**
Build Strength for Resin Systems

These longer glass fibers are used to increase tensile and compressive properties of any resin, and even other traditional building materials including concrete. Fibers will strengthen castings and reinforce fillets in difficult-to-laminate areas of parts like edges and corners.

#30-A 1/2 GALLON (1.5 LBR) $16.95
#30-B CARTON (5 LBS) $58.95
#30-C BOX (60 LBS) $109.95

#229-A 1/2 GALLON (2 LBS) $21.95
#229-B CARTON (10 LBS) $64.95
#229-C BOX (25 LBS) $119.95
#229-D BOX (50 LBS) $224.95

**1/16" CHOPPED GLASS FIBERS**
Short Fibers with High-Strength Results

These short fibers offer high strength results! Mix with any body filler or casting material to increase strength and reduce shrinkage. Blend with vinyl ester resin to create a strong and corrosion resistant blister repair putty for deeper hull damage. Or blend with any of our resins for high strength repair.

#39-A 1/2 GALLON (1.5 LBR) $17.95
#39-B CARTON (5 LBS) $59.95
#39-C BOX (60 LBS) $109.95

**1/32" CHOPPED GLASS FIBERS**
Small Fibers for High-Strength Parts

These small fibers improve finishing characteristics for surface applications. Great for reinforcing detailed castings, or blend with epoxy to make a tough outer surfacing coat. This filler is compatible with epoxy, polyester, and vinyl ester resin systems. Add filler after adding catalyst to resin.

#229-A 1/2 GALLON (2 LBS) $21.95
#229-B CARTON (10 LBS) $64.95
#229-C BOX (25 LBS) $119.95
#229-D BOX (50 LBS) $224.95

**GLASS MICROSPHERES**
Lightweight, Sandable Filler for Surface Layers

These hollow glass spheres make a lightweight sandable filler when blended with resin. Use to fill fabric weaves, shallow blisters, and surfaces of core materials. The average bubble is less than 70 microns, about a quarter of a grain of salt. It is this small particle size which makes the paste easy to spread evenly.

#22-A 1/2 GALLON (4 QTS) $31.95
#22-B CARTON (25 LBS) $89.95
#22-C CARTON (50 LBS) $119.95

#1131-A 1/2 GALLON (12 LBS) $119.95
#1131-B CARTON (10 LBS) $149.95
#1131-C BOX (50 LBS) $449.95

**TALC**
Coat-Effective Filler for Sanding

Talc is often added to smooth the finish of fiberglass laminations. It provides a balance of film reinforcement, and anti-cracking properties as part of a surface layer. This filler is compatible with epoxy, polyester, and vinyl ester resin systems. WARNING: This product can expose you to chemicals including Talc containing asbestos, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.
PIGMENTS

Opaque Pigments for Parts or Repairs

Our color pigments are pastes for tinting polyester, vinyl ester, epoxy resins, and polyurethane foams. Pigments are added to the resin prior to the addition of catalyst. Our primary colors may be mixed to provide nearly any shade or hue. Keep an assortment of pigments on hand for color matching repairs or blending your own custom colors. When used to pigment our gel coats and resins, they are normally added at 6-8% by weight or 1/2 pint of pigment per gallon of resin. We have made every effort to accurately represent the cured color of our resins with these pigments.

WARNING: This product can expose you to chemicals including Titanium dioxide, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov

GLITTERFLAKE

Catch the Light with Metallic Edge

Glitterflakes are commonly used to repair damaged bass boats or to make any project stand out from the crowd. Flakes are 0.015” metalized polyester and are recommended for use with our 180 Gel Coat—a clear marine gel coat with excellent weathering properties and a high gloss suited to enhance the metallic glitter.

Get best results with Glitterflake by using it as one of three standard layers in lamination. For finished parts, these include:

- A layer of pigmented gelcoat at the base, used to conceal layers of reinforcement below.
- The layer of Glitterflake blended with clear gelcoat.
- Ultimately, a protective layer of clear gelcoat at the part’s surface to optimize the metallic appearance of the flakes.

NON-SKID RUBBER ADDITIVE

Durable non-skid additive for Gel Coats

The Fibreglast Non-Skid Rubber Particles are ideal for creating a durable, safe, non-skid surface to any gel coat or painted surface, such as a boat deck or patio. It is also ideal for skis or surf board surfaces, sporting equipment handles, and much more.

Rubber particles form a more comfortable and durable non-skid surface than silica sand, and create a lasting texture that can withstand extreme traffic.

Available in two particle sizes, our fine grit is ideal for surfaces in contact with bare feet or hands where the medium grit is perfect for surfaces where footwear is worn.

For fast and easy application, particles can be mixed directly into gelcoat before application and applied with a roller, sprayer (2 or 2.5 mm or larger nozzle), or brush in single or multiple layers. For a more controlled, denser texture, particles can be broadcast onto wet gelcoat until refusal, and protected with an additional layer of gelcoat.

Based upon standard 10% Glitterflake/Gel Coat mixture. Mixture can be increased to as much as 20%. More than 20% Glitterflake by weight is not recommended.

WANT TO LEARN MORE? READ OUR GEL COAT APPLICATION GUIDE IN THE LEARNING CENTER ON OUR WEBSITE!

Gel coat is the most common surface coating used in the fabrication and repair of fiberglass reinforced products. Gel Coat is a specially formulated two-part polyester resin that is designed to be the first layer of resin applied to a mold when making a polyester or vinyl ester composite part. It is intended to create an opaque surface which will completely block glass pattern show-through. Polyester resins in general, and specifically gel coats, are naturally UV resistant and properly cured parts can be submerged in water. Most boats are made using gel coat with polyester resin and fiberglass.

**GEL COAT CUP GUN**

**Efficient & Affordable: Unique Gel Coat Spray Gun**

An inexpensive gel coat gun for spraying small to medium size molds. Avoids the high cost of catalyst injector systems and at the same time avoids the pitfalls of a regular spray gun. The resin and catalyst mixture is fed by disposable paper cups, the lid and nozzle assembly are pressed on, and the cup is placed on the gun. With the cup in place, the trigger is depressed to release the air stream and the air pressure picks up the gel coat and provides a uniform, high velocity spray pattern. For clean up, merely remove the cup from the gun, and just clean the lid and nozzle. Cup capacity is one quart. Ships with a 3/16" ID nozzle, others sold separately. Replacement Parts Available.

- Pressure Required: 60-100 psi
- Compressor required: 5 HP
- Air Consumption: 5.8 CFM at 80 psi
- Air Connection 1/4" NPT
- Dry Weight: 2.0 lbs

#120-A  $174.95

**PRESSURE-FED HVLP GUN**

**For ChromaGlast® Paints and Primers**

This ergonomically designed paint gun is just what you need to add a clean, protective finish to your composite part. This HVLP (High Volume, Low Pressure) paint gun controls the air pressure to ensure a greater paint transfer efficiency, resulting in less overspray and less paint wastage. You'll end up with a smooth, beautiful paint finish. Rebuild Kit and 1.4mm Nozzle Tip are also available.

- 1/4" NPS air inlet
- 1.6mm spray tip
- 1 Quart Capacity

#229-A 1L PRESSURE-FED HVLP SPRAY GUN  $210.95
#230-A 1.4MM NOSLE TIP  $139.95
#227-A REBUILD KIT  $99.95

**0.6 LITER GEL COAT TOUCH-UP SPRAY GUN**

**Customize your Spray Pattern for Heavy-Duty Jobs**

This is a heavy duty gun offering a range of adjustments that will allow the spray pattern to be customized to the specific project. This gun is ideal for larger repairs and small to medium projects, with a wide variety of patterns and pressure adjustments to suit the needs of your project. This gun comes fitted with a 2.5mm nozzle, which is ideal for any of our gel coats. Ships complete with a one pint cup, cleaning brush, and 1 mini filter. Replacement Parts Available.

- Pressure Required: 40-80 psi
- Compressor required: 1.5 HP
- Air Consumption: 4.7-7.1 CFM
- Air Connection 1/4" NPT
- Dry Weight: 1.55 lbs

#126-A  $118.75

**1L HIGH-PRESSURE GEL COAT SPRAY GUN**

**The Capacity and Customization Needed For Any Project**

The #134 1 Liter High Pressure Gel Coat Spray Gun excels at large surface spraying, such as new mold construction, composite finishing, and large boat repair.

- Pressure Required: 44-58 psi
- Compressor required: 1.5 HP
- Air Consumption: 4.7-7.7 CFM
- Air Connection 1/4" NPT
- Fill Capacity: 33 ounces

#134-A 1L HIGH PRESSURE SPRAY GUN  $129.95
#134-B LINERS FOR SPRAY GUN (PACK OF 1000)  $19.95

**GRAVITY-FED HVLP GUN**

**Great for ChromaGlast® Paints**

This ergonomically designed paint gun is just what you need to add a clean, protective finish to your composite part. This HVLP (High Volume, Low Pressure) paint gun controls the air pressure to ensure a greater paint transfer efficiency, resulting in less overspray and less paint wastage. You'll end up with a smooth, beautiful paint finish. Rebuild Kit is also available.

- Tip Size: 1.4mm
- CFM: 8 (min), 12.4 (Max)
- PSI: 15 (min); 28 (28)
- Capacity: 1 Quart

#229-A 1L GRAVITY-FED HVLP SPRAY GUN  $200.95
#229-A REBUILD KIT  $34.95

**PREVAIL SPRAYER**

**No Battery. No Cord. Just Right for Small Jobs.**

This portable sprayer is perfect for misting coats of PVA Release Film over waxed mold surfaces. Use this versatile applicator for all kinds of liquids. Great economical alternative to other air-powered spray guns. Ready to spray in seconds with no batteries or hoses. Simple for small projects and touch-ups. Comparable performance to other professional airless sprayers. Consistent spray flow for single pass coverage. Professional Finish - Quality Results. +Power Unit, Glass Reservoir and Caps

SOLD SEPARATELY.

#2223-A PREVAIL SPRAYER KIT  $14.95
#2221-A PREVAIL SPRAYER KIT  $13.75/EA
#2220-VA PREVAIL SPRAYER KIT  $12.45/EA
#2224-A PREVAIL SPRAYER V-GRIP KIT  $18.75/EA
#2225-A PREVAIL SPRAYER V-GRIP KIT  $17.75/EA
#2227-A PREVAIL SPRAYER VALUE PACK  $38.95
#2226-A PREVAIL SPRAYER VALUE PACK  $37.75/EA
#2226A-VA PREVAIL SPRAYER VALUE PACK  $36.55/EA

1.800.214.8566 | www.fibreglast.com
DURATEC® STYROSHIELD PRIMER

Spray on Styrofoam™ to Create a Plug

DURATEC® StyroShield Primer is a polyester primer that is meant to be applied directly to polyurethane foam (also known as Styrofoam™). StyroShield contains microspheres that, when cured, insulate and protect polystyrene foam from the chemicals in polyester-based laminating resins, gel coat, and other Duratec products. With StyroShield, low-cost polystyrene can be substituted for urethane foam in plug, mold, and pattern-building applications.

WARNING: This product can expose you to chemicals including Styrene & Talc containing asbestiform fibers, which are known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.

CUPS FOR SPRAY GUNS

Make Gel Coat Application Clean-up Easier

One-quart (32 oz.) Reusable Plastic Tub (8121-A) are translucent and graduated for easy-to-see measurement. Keep several at the ready for applications where one tub after another will be used. They can be cleaned with acetone for multiple uses.

One-quart (32 oz.) Disposable Paper Tub (#887) fit snugly into the gel coat cup gun, #120-A, for use with spray-on applications. Tubs are unwaxed, but polystyrene, so as to not get soggy during use. After use, simply dispose of tubs to ensure a clean, safe shop.

DURATEC® SUNSHIELD CLEAR TOPCOAT

High Gloss Clear Top Coat for Epoxy Parts

DURATEC® Sunshield Clear Topcoat is polyester topcoat that offers excellent gloss levels and UV stability. 1045 is compatible with epoxy, vinyl ester and polyester resins. It offers a durable surface and has great scratch resistance. Sunshield offers excellent anti-yellowing, making it a perfect coating for epoxy or vinyl ester parts. It offers a fast build for smooth, pit-free surface, reducing cycle time and labor. WARNING: This product can expose you to chemicals including Styrene, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.

DURATEC® THINNER

Easy Thin for Plugs and Molds

#2006 Duratec® Thinner can be added to any Duratec® product to enhance the flow and leveling properties. This thinner also reduces orange peel and porosity while allowing for a smoother spray flow. WARNING: This product can expose you to chemicals including Styrene, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.

www.fibreglast.com | 1.800.214.8568
Choose from over 900 colors! Fibre Glast offers premium polyester gel coat that can be color matched every time. Whether you select an RAL favorite, or choose one of over 700 Instint® colors, all of these gel coats feature UV and blister resistance with excellent adhesive properties. All colors are available in a one-quart can for $62.95, a one-gallon can for $143.95 or a five-gallon pail for $529.95. RAL 9001 and RAL 9010 are available in gallon and five-gallon sizes only. Please note, one gallon of gel coat will cover approximately 40-80 sq feet. MEKP hardener is required for each color and is sold separately.

NOTE: The gel coat colors displayed in this catalog only use a four-color display (CMYK), and will not reflect the exact color of the final gel coat. For the most accurate depiction of the gel coat colors that we produce, we recommend you rent or purchase the Instint® Color Book and the RAL Color Book.

**RAL COLOR BOOK**

Color Match for Traditional Favorites

188 Colors. This color book has RAL standard colors that we can precisely create in a batch of gel coat made just for you. No more experimenting to get the color you need. Our high quality machine, software, base and pigments are quite simply the best available. You'll receive consistent, high standard, perfectly matched color every time.

#4100A RAL COLOR BOOK $18.95
#4100-RENTAL RAL COLOR BOOK - 30 DAY RENTAL $19.95

**INSTINT® COLOR BOOK**

Choose from Hundreds of Colors

730 Colors. Choose your desired gel coat from the huge selection of colors contained in this book! This Instint® Color Book has 730 colors that we can precisely create in a batch of gel coat made just for you. Our high quality machine, software, base and pigments are quite simply the best available. You'll receive consistent, high standard, perfectly matched color every time.

#4400A INSTINT® COLOR BOOK $49.95
#4400-RENTAL INSTINT® COLOR BOOK - 30 DAY RENTAL $49.95

**CUSTOM COLOR GEL COAT**

Premium Gel Coat with over 900 Color Options

Our Custom Color Gel Coats feature either our #682 White or #684 Neutral Gel Coats as a base. Color Gel Coat is designed to be used in mold to produce UV resistant, blister resistant, high quality parts when laying up polyester or vinyl ester parts. #682 and #684 are both isophthalic Polyester Gel Coats and are compatible with a wide variety of projects, including underwater, and marine applications. Requires 1.5% MEKP. **WARNING**: Cancer and Reproductive Harm - www.P65Warnings.ca.gov

#710/65 A QUART WITH HARDENER $54.95
#710/65 B GALLON WITH HARDENER $140.95

**Premium SINGLE STAGE PAINT**

for fiberglass and composites

RAL COLORS NOW AVAILABLE IN SINGLE STAGE PAINT!

---

**CHROMAGLAST™ PREMIUM PAINT FOR FIBERGLASS AND COMPOSITES**

Chromaglast™ is the best solution for beautifying and protecting your composite project. It is compatible with fiberglass, carbon fiber, Kevlar®, SMC, and prepared metal surfaces. This premium paint is a high-gloss, urethane-based system developed by PPG, so it will hold up for years of use and abuse. It is also painter-friendly - simply mix the paint with the hardener and drying agent and spray in a single coat just as you would most any paint. Paint will not sag and it builds up clean. The high-solids single-stage formula provides a beautiful, high-gloss, rich finish. Chromaglast™ paint is suitable for automotive, fleet, aerospace, or above-water-line marine use. It provides outstanding corrosion, chemical, and UV resistance. Also Chromaglast™ features a low 2.8 (max) VOC formula to comply with EPA regulations. 1 mil of dry paint will provide coverage up to 952 ft² per gallon. 1.5 - 3.0 mil DFT is appropriate for most. This system is sold in 1/4 quarts and 1/4 gallons, which will mix to an even quart or gallon after mixing required #5025 Drying Accelerator and #5027 Paint Hardener. Due to the varying prices of different components, Chromaglast™ Paints are priced by the color. Please see our website, our #5040 Color Book Price List for the price of your select color. There are 300 colors in the to choose from in the #5040 Color Book. All colors may be ordered online or by phone. Colors include solids and metallics. CHROMAGLAST™ HIGH SOLIDS PRIMER SURFACER & SEALER

Dual-Purpose Undercoating System

Chromaglast™ High Solids Primer Surfacer Sealer is a dual-purpose undercoating system that can be used as a Primer Surfacer for rougher finishes and mixed materials, but can also be used as a dry film pigmented Primer Sealer on ready-to-coat finishes. The first-class epoxy-based formula is designed to protect composite and metal substrates from corrosion and chemicals, while providing excellent paint adhesion and consistency. Application is also flexible, as this primer is easy to mix and can be sprayed, brushed, or rolled onto the substrate.

As a dual purpose product, the high solids formula can be sprayed or rolled as a Primer Surfacer (3-5 coats) for surfaces that need some sanding and finishing before coating, without the need for additional sealer. Or, spray as a Primer Sealer (1-2 coats) for smooth Glass A surfaces that are ready to coat, while providing a base tint for your color. Chromaglast™ #5060 Primer features a low 2.1 VOC (max).

This premium primer is available in White (#5060), Gray (#5062), and Black (#5064) to best complement your topcoat color with less paint coats. A simple 1:1 mix ratio is used with the specialized hardener (#5061). WARNING: This product can expose you to chemicals including Titanium Dioxide, Toluene, Bisphenol A (BPA), Carbon Black, and Crystalline Silica, which are known to the State of California to cause cancer, developmental harm, and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

- #5064/5061-B 1/2 GALLON KIT $109.95
- #5064/5061-C 2 GALLON KIT $509.95

CHROMAGLAST™ PAINT HARDENER

Required for Chromaglast™ Paints

This Paint Hardener is made exclusively for our Chromaglast™ Premium Paint for Fiberglass and Composites. It is packaged into a convenient 8 oz. bottle for easy measuring into your Chromaglast™ paint mix. For every quart of paint, simply use one bottle of hardener, or otherwise a 3:1 ratio for any quantity.

#5027-A CHROMAGLAST™ PAINT HARDENER 8 OZ $37.95

CHROMAGLAST™ DRYING ACCELERATOR

Required for Chromaglast™ Paints

We have packaged our exclusive drying accelerator into a convenient 1.5 oz. bottle for easy measuring into your Chromaglast™ paint mix. For every quart of paint, simply use one bottle of accelerator. This drying accelerator is required for your Chromaglast™ Paint, and offers an ideal mid-rate dry time for all environments.

#5025-A CHROMAGLAST™ DRYING ACCELERATOR 1.5 OZ $10.95

CHROMAGLAST™ EXEMPT SOLVENT

Compatible with Chromaglast™ Products

The #5028 Solvent is the best option for reducing any of the Chromaglast™ paints, primers, and sealers. Our high quality solvent is designed to be compliant for use in our low VOC paint with its exempt formula. Using this specialty solvent will reduce paint-finish errors like orange peeling and pin holes. This solvent is packaged in a 32 oz. metal container for easy storage between projects.

#5028-C CHROMAGLAST™ EXEMPT SOLVENT 32 OZ $24.95

CHROMAGLAST™ COLOR BOOK

Over 250 Available Colors

Looking for the perfect shade of awesome for your new project? Our color book has 300 different solid and metallic single-coat paints to choose from. All colors are mixed from proprietary PPG recipes, trusted by OEM’s from around the world. Each color book includes a price list, so you’ll know exactly how much your color will be by the quart or gallon.

#5043-A PURCHASE $39.95
#5043-Rental 30 DAY RENTAL $39.95 (50% REFUND AFTER RETURN)

CHROMAGLAST™ GRAY EPOXY PRIMER SEALER

Compatible with Chromaglast™ Products

Chromaglast™ #5052 Gray Epoxy Primer Sealer is a first-class undercoating designed to protect composite and metal substrates while providing excellent paint adhesion and consistent color. This premium formula is easy to mix, easy to spray, and fast drying. It is compatible with properly cleaned fiberglass, carbon fiber, SMC, and Kevlar using polyester, vinyl ester, and epoxy resins. It can also be used with aluminum and carbon steel, but must be primed immediately after sanding. Our primer can be used with new work or repairs with a formula that is trusted by OEM manufacturers worldwide. Chromaglast™ #5052 Primer features a low 2.1 VOC (max). One gallon Ready-to-Spray will cover up to 708 ft² at 1 mil Dry Film Thickness (DFT). Use 1-2 coats at 1-3 mils DFT each. Requires #5028-A Exempt Solvent for proper mixing. WARNING: This product can expose you to chemicals including Ethylene Benzene & Toluene, Titanium Dioxide, and Carbon Black, which are known to the State of California to cause cancer and developmental harm. For more information go to www.P65Warnings.ca.gov.

#5082/5052-B QUART KIT $89.95
#5082/5052-C GALLON KIT $349.95

FIRST QUALITY COMPOSITE MATERIALS GUARANTEED
**INFRARED THERMOMETER WITH TYPE K THERMOCOUPLE**

Track Maximum, Minimum, Average and Differential Temperatures

Our infrared thermometer is perfect for monitoring the temperature of your composite part during the cure and post cure processes. Insufficient temperatures during these processes can lengthen the cure times needed, as well as hinder the overall performance quality of your part. This infrared thermometer is ideal for measuring the surface temperature of the substrate or mold that you are working on. In autoclave and oven cured laminates, it is vital to track the temperature of your part, not the temperature of the oven. The infrared thermal allows you to track those temperatures accurately and safely. Infrared thermometers can also measure the temperature of your resin and gel coats.

- #3804-A  INFRARED THERMOMETER $158.95
- #3805-A  INFRARED THERMOMETER W/ NIST CERTIFICATION $309.95

**COMPACT INFRARED THERMOMETER**

**Perfect for Monitoring your Composite Part During Cure**

Our Compact Infrared Thermometer offers the same non-contact benefits as our (#3804) Infrared Thermometer, but in a smaller size. This infrared thermometer will measure the surface temperature of your laminates, substrates and molds, as well as resins and gel coats. It will also help track the temperature of your part during ramp-up and cool-down phases of oven cured parts. Its compact size, almost half the size of other infrared thermometers, makes it easy to handle, carry and store. The Compact Infrared Thermometer is also available with NIST certification. This is an assurance program that certifies that a laboratory, manufacturer or individual product is fully equipped to calibrate equipment to National Institute of Standards and Technology (NIST) standards.

- #3802-A  INFRARED THERMOMETER $79.95
- #3803-A  INFRARED THERMOMETER W/ NIST CERTIFICATION $224.95

**STAINLESS STEEL DIGITAL STEM THERMOMETER**

**Ideal for Testing Resin Temperature**

Ensuring proper resin temperature is critical, and our Digital Stem Thermometer will help you monitor your resin throughout the layup process. This thermometer is made from stainless steel and features an easy-to-read LCD display. The display is updated every 2 seconds, giving you a continuous feed of the temperature of your product. The Digital Stem Thermometer is capable of measuring temperatures ranging from -40 to 450°F (-40 to 230°C) and includes an easily accessible calibration screw for quick adjustments. The Digital Stem Thermometer is available with NIST certification. This is an assurance program that certifies that a laboratory, manufacturer or individual product is fully equipped to calibrate equipment to National Institute of Standards and Technology (NIST) standards. The Digital Stem Thermometer also includes a 1.5V battery and a protective probe cover.

- #3800-A  STEM THERMOMETER $19.95
- #3801-A  STEM THERMOMETER W/ NIST CERTIFICATION $104.95

**PINLESS MOISTURE METER**

Test Moisture Content without Penetrating the Surface

The Pinless Moisture Meter measures moisture content in composite materials, as well as substrates such as foam and wood, by simply running the probe over the surface. This non-destructive moisture detector is capable of measuring up to 1.6” (40mm) into the surface of the material. The Pinless Moisture Meter is used prior to laminating over a substrate like wood to check its moisture content. It can also be used to measure the moisture content of reinforcement fabrics that have been packed in plastic or stored in high humidity environments. Excessive moisture can impede proper cure and affect the physical properties of your laminate. This moisture meter is a must-have when performing repairs to any surface that has direct exposure to water or high humidity levels. It is not recommended to laminate over substrates when the moisture content exceeds: Wood- 50%, Concrete - 30%, Fiberglass - 20%.

- #3808-A  PINLESS MOISTURE METER $189.95

**LASER DISTANCE METER**

**Measure The Surface Area of Your Composite Project**

Our Laser Distance Meter can measure up to 148 feet (45 meters) and has the ability to calculate area and volume simultaneously. It is ideal for projects which require a large area to be measured easily and accurately, such as wind blades, deck surfaces and fiberglass tanks. This measuring tool was designed for one handed operation and features a large backlit multi-line LCD display for easy viewing. It’s built-in area and volume formulas will aid in calculating your composite project needs. The Laser Distance Meter will also retain the last 10 maximum and minimum readings in its memory. Our Laser Distance Meter is available with NIST certification. This is an assurance program that certifies that a laboratory, manufacturer or individual product is fully equipped to calibrate equipment to National Institute of Standards and Technology (NIST) standards.

- #3817-A  LASER DISTANCE METER $54.95
- #3818-A  LASER DISTANCE METER W/ NIST CERTIFICATION $229.95

**DIGITAL CALIPER - 6”**

Accurately Measure Composites within 0.001”

Our Digital Caliper is a rugged electronic caliper made from hardened steel. It’s perfect for measuring mold and flange thicknesses, pipe and tube diameters and finished composite laminates. This digital caliper features a zero-adjustment button and locking screw for accurate measurements. The large 6-digit LCD display makes it easy to record the measurements of your composite part or individual fabric piles. Our Digital Caliper is well suited for use in fabricating and quality assurance departments, as well as general industrial use. Included is a 1.5V battery, a screwdriver and a hard-carrying case. Our Laser Distance Meter is available with NIST certification. This is an assurance program that certifies that a laboratory, manufacturer or individual product is fully equipped to calibrate equipment to National Institute of Standards and Technology (NIST) standards.

- #3819A  DIGITAL CALIPER $99.95
- #3819B  DIGITAL CALIPER W/ NIST CERTIFICATION $199.95
TEMPERATURE AND HUMIDITY DATALOGGER

Record up to 32,000 Temperature and Humidity Readings

Tracking the environment throughout the duration of a project is often beneficial in precision fabrication. Many government, wind energy and aerospace contracts require environmental conditions be recorded, especially when laminating is performed in uncontrolled environments. While most environmental requirements are dictated by Contract Specifications, determination above 70% RH is not recommended. The Temperature and Humidity Datalogger has the ability to record up to 32,000 ambient temperature and relative humidity readings. Simply connect the datalogger to a computer to set up desired parameters (sampling rate, min/max alarms) and disconnect to begin recording. This datalogger features a real-time clock with day/time stamp and LCD display to see live measurements. The Temperature and Humidity Datalogger also comes with USB Cable, software, security lock, and 3.6V battery.

#3806-A DATALOGGER $119.95
#3810-A DATALOGGER W/ NIST CERTIFICATION $499.95

DIGITAL PSYCHROMETER / THERMO-HYGROMETER

Fast and Accurate Humidity and Air Temperature Readings

This Digital Psychrometer/Thermo-Hygrometer provides simultaneous relative humidity and air temperature readings, as well as automatically calculating wet bulb and dew point temperature. Monitoring and controlling the relative humidity and air temperature is vital during the laminating process of any composite material. Most resin manufacturers do not recommend open-mold laminations if the RH exceeds 70%. If the humidity is too high, it may result in improper cure of your finished composite part. Fiberglass does not recommend the use of our polyester resins below 55°F and our System 2000 Epoxy requires a minimum of 77°F, so measuring ambient air temperature during the laminating process is also critical. The Digital Psychrometer/Thermo-Hygrometer is also available with NIST certification.

#3804-A DIGITAL PSYCHROMETER/ THERMO-HYGROMETER $94.95
#3803-A DIGITAL PSYCHROMETER/ THERMO-HYGROMETER W/ NIST CERTIFICATION $379.95

ULTRASONIC THICKNESS GAUGE

Our Ultrasonic Thickness Gauge is capable of measuring the thickness of a wide variety of materials, including composite substrates and laminates. This instrument gives you the ability to gauge thickness measurements when instruments such as calipers cannot reach both sides of the test piece. This is particularly beneficial when measuring blade thickness, large aerospace components, and industrial fiberglass tanks and piping. The Ultrasonic Thickness Gauge can measure a wide range of materials down to 0.01mm. It is equipped with a large, easy-to-read, backlit LCD display, and its internal memory can store up to 500 measurements at a time. Our Ultrasonic Thickness Gauge comes complete with ultrasonic couplant gel, probe, batteries and a hard-carrying case. Our Ultrasonic Thickness Gauge is available with NIST certification (National Institute of Standards and Technology).

#3814-A ULTRASONIC THICKNESS GAUGE $99.95
#3815-A ULTRASONIC THICKNESS GAUGE W/ NIST CERTIFICATION $120.95

GEL COAT THICKNESS GAUGE

Simple, Precise Measure for Gel Coat Thickness

This simple tool can save hundreds of dollars in damaged material and labor. This is the only accurate method to determine gel coat thickness, and to achieve repeatable high quality results. Place the edge into the wet film, the last tooth marked is the thickness.

#122-A GEL COAT THICKNESS GAUGE $10.75

VIDEO INSPECTION CAMERA - RECORDABLE

Ideal for Inspecting Aircraft, Automobiles, and Piping Systems

Our Video Inspection Camera allows you to inspect hard-to-reach places such as composite vessels, tubes, and piping in a non-destructive manner. It features a 360° gooseneck cable with 9mm camera. The gooseneck design allows the video cable to retain its configured shape when in use. The 9mm camera is waterproof and features 4 high visibility LED lights to provide illumination in dimly lit environments. The high-resolution camera feed is displayed on the 2.8” LCD color monitor. The Video Inspection Camera also features a comfortable pistol grip handle design for easy use. A camera mountable magnet and a hook-and-mirror set to assist with specific applications are included.

#3913-A VIDEO INSPECTION CAMERA - RECORDABLE $159.95

ULTRASONIC LEAK DETECTOR

The Ultrasonic Leak Detector converts ultrasound signals produced during the vacuum bagging process into easily recognizable audible sounds. This ensures that your finished part remains under vacuum for the entirety of its cure cycle. The loss of vacuum pressure during cure can cause the surface of your laminate to become porous, which decreases your finished part’s physical and cosmetic properties. This unit includes a transmitter that generates a 40 kHz signal, headphones for use in loud environments, and a soft carrying case.

#3819-A ULTRASONIC LEAK DETECTOR $299.95

SAME-DAY-SHIPPING!

IF ORDERED BEFORE 2:30PM EST

www.fibreglast.com | 1.800.214.8568
**STRETCHLON® 200 BAGGING FILM**

High Stretch Conforms to Nearly Any Shape

Stretchlon® 200 is a thin bagging film that stretches up to 500% of its original length. It's designed to stretch over multiple contours and compress deep into every area within a mold, even corners, reducing the need for plies. While it will conform to autoclave pressures, it's not suited for temperatures over 250°F. For use with higher temperatures, consider Stretchlon® 800. Stretchlon® 200 is a registered trademark of Atech International.

**POLYETHYLENE BAGGING FILM**

Tubing Format for Easy Use in Room Temperature Applications

Our Polyethylene Bagging Film is an economical way to make quick and easy vacuum bags when making composite parts. This bagging film is produced in a tube format so you can easily slide your part in and seal both ends.

**STRETCHLON® 800 BAGGING FILM**

Suitable for High-Temp Applications up to 400°F

Stretchlon® 800 bagging film stretches up to 450% of its original length. It's designed to cover multiple contours and compress all the areas of your mold, even for more complex shapes. For even greater stretch in your bagging film, consider Stretchlon® 200, #1678/1778. Stretchlon® 800 is slightly thicker than its counterpart, but offers higher temp usage. Stretchlon® 800 is a registered trademark of Atech International.

**BREATHER AND BLEEDER CLOTH**

Binder-Free, Conforms Closely to Contours of Part

This high fill non-woven polyester will easily drape and conform closely to the contours of your part. It does not contain any binders which could close off air flow within the mold, and it will readily soak up excess resin. Use the 4 oz. format (#1779) for applications working under 40 psi. The 7 oz. format (#1779) can be used at higher pressure cycles (between 40 and 85 psi), and provides a lower amount of surface porosity.

**NYLON BAGGING FILM, BELOW 300°F**

Particularly Soft and Pliable, Won't Dry Out

When stored and used properly, this Nylon Bagging Film is extremely conformable to the contours of your part, which decreases the likelihood of troublesome wrinkles and pinholes in your bagging system. This film is 0.002" thick and is suitable for use with temperatures below 300°F, and can be used in a variety of styles. For the 60" Tube format, please see our part number #1785. This Nylon Bagging Film can be used with epoxy, polyester, or vinyl ester resin.

**NYLON BAGGING FILM, ABOVE 300°F**

High Temp, High Pressure, High Performance

This Nylon Bagging Film is formulated to be less affected by moisture content in the air, so it resists getting dry and brittle. When stored and used properly, it remains soft and conformable to your composite part, and decreases the likelihood of troublesome wrinkles and pinholes in your bagging set-up. This Nylon Bagging Film can be used with epoxy, polyester, or vinyl ester resin.
PTFE COATED FIBERGLASS

PTFE Coated Fiberglass is a versatile release fabric very similar to Teflon® by Chemours. This release fabric is designed to be in direct contact with your laminate during vacuum bagging and infusion processes. PTFE is resistant to all solvents, adhesives, and resins normally encountered in composite fabrication.

58" WIDE - NON-PERFORATED
#586-A 1 YD ROLL $16.95
#586-B 3 YD ROLL $48.95
#586-C 5 YD ROLL $81.95
60" WIDE - NON-PERFORATED
#586-6-A 1 YD ROLL $21.95
#586-6-B 3 YD ROLL $61.95
#586-6-C 5 YD ROLL $92.95
10-YARDS $12.95/YD
25-YARDS $11.95/YD
50-YARDS $10.55/YD
100-YARDS $9.55/YD

HIGH TEMPERATURE RELEASE FILM

High Temperature Release Films are extremely durable and highly conformable. These films are designed to be in direct contact with your laminate. Due to its superior non-stick performance, it is especially easy to pull from your part once vacuum bagging is complete. These high elongation release films are more pliable than other release films and are suited for use in temperatures up to 500°F. Our High Temperature Release Films are available in two different styles:

60" WIDE - NON-PERFORATED
#3782-A 1 YD ROLL $22.95
#3782-B 3 YD ROLL $64.95
#3782-C 5 YD ROLL $100.95
#3782-D 10-YARDS $17.95/YD
25-YARDS $16.55/YD

#3783-A 1 YD ROLL $27.95
#3783-B 3 YD ROLL $78.95
#3783-C 5 YD ROLL $123.95
#3783-D 10-YARDS $21.95/YD
25-YARDS $20.55/YD
50-YARDS $18.95/YD
100-YARDS $17.55/YD

LOW TEMPERATURE RELEASE FILM

High Gloss Film, With or Without Perforations

Available perforated and non-perforated, our Low Temperature Release Film makes for an easy release of vacuum bagging materials from your part once the process is complete. When used directly next to your laminate, it generally produces a smoother, glossy surface finish for your part. This Release Film is suited for use in temperatures up to 315°F.

60" WIDE - NON-PERFORATED
#1650-A 1 YD ROLL $0.85
#1650-B 3 YD ROLL $2.95
#1650-C 5 YD ROLL $4.55
#1650-D 10-YARDS $8.75/YD
25-YARDS $8.25/YD
50-YARDS $7.75/YD
100-YARDS $7.25/YD

60" WIDE - PERFORATED
#1781-A 1 YD ROLL $4.05
#1781-B 3 YD ROLL $10.55
#1781-C 5 YD ROLL $13.95
#1781-D 10-YARDS $22.95/YD
25-YARDS $21.45/YD
50-YARDS $19.95/YD
100-YARDS $19.45/YD

POLYESTER PEEL PLY

Ideal for Secondary Bonding

When laid directly next to your laminate in the vacuum bag, Polyester Peel Ply leaves behind a rougher surface on your part, which is then compared to nylon films, once the process is complete. This surface improves mechanical bonding between your finished part and other resins, fabrics, or adhesives. Although tightly woven, it also allows excess resin and air to flow through, eliminating voids in your part.

58" WIDE
#583-A 1 YD PKG $11.25
#583-B 3 YD PKG $29.95
#583-C 5 YD PKG $44.95
#583-D 10-YARDS $7.75/YD
25-YARDS $7.25/YD
50-YARDS $6.75/YD
100-YARDS $6.25/YD

NYLON RELEASE PEEL PLY

A Must-Have for Release from Laminate

Nylon Peel Ply creates a smooth, consistent surface finish for your laminate once the bagging process is complete. Although tightly woven, when laid directly next to your laminate in lay-up, it allows excess resin and air to flow through, eliminating voids in your part.

58" WIDE
#582-A 1 YD PKG $14.45
#582-B 3 YD PKG $39.95
#582-C 5 YD PKG $58.95
#582-D 10-YARDS $11.25/YD
25-YARDS $10.75/YD
50-YARDS $10.25/YD
100-YARDS $9.75/YD

ECONOSTITCH® PEEL PLY

Visible Before and After Cure

Econostitch® is an economical, heat set and secured peel ply used with both polyester and epoxy resins. It has red tracers with high visibility to reduce the risk of peel ply being left on the part. Econostitch® is designed to work in resin infusion or hand lay-up processes. It features a fine weave but when laid directly next to your laminate in lay-up, it allows excess resin and air to flow through, eliminating voids in your parts. It reduces the need for sanding or abrading on your composite laminate. Econostitch® is a registered trademark of Arttech International

58" WIDE
#1582-A 1 YD PKG $8.06
#1582-B 3 YD PKG $23.95

ENKA® FUSION NYLON FLOW MEDIA

Enka® Fusion Nylon Flow Media is designed to facilitate resin infusion and provides the fastest flow rates of all flow media available at FibreGlas.com. Randomly oriented nylon filaments create a fluid, open structure that expedites resin flow, permits a complete wet-out, and keeps resin retention to a minimum. Use it at the surface, or as a separation layer between layers of reinforcement within your composite. Enka® Fusion Nylon Flow Media is a registered trademark of Low & Bonar PLC.

RED LDPE INFUSION FLOW MEDIA

Central Resin Flow for Smaller Infusion Projects

Our #1405 Red LDPE Infusion Flow Media is used for small to medium resin infusion projects, up to 50 sq/ft, that require predictable, controlled resin flow. This flow media is designed to assist resin flow through your composite part during the resin infusion process. In addition to having a higher degree of conformability, this LDPE does not fray or roll up when cut, making it easy to position within your vacuum bag. This flow media has a service temperature of 160°F and is compatible with all of our resins.

GREEN HDPE INFUSION FLOW MEDIA

Central Resin Flow for Larger Infusion Projects

Green HDPE Infusion Flow Media is designed to facilitate resin flow that is quick, controlled, and predictable for resin infusion projects up to 90 square feet. It can be used for larger projects if multiple ports and flow channels are installed. Use it at the surface, or as a separation layer between layers of reinforcement within your composite. #1406 Green HDPE Infusion Flow Media is compatible with polyester, vinyl ester, and epoxy resins, and has a maximum service temperature of 200°F.

LANTOR SORIC® XF

Conformable to Parts, Facilitates Resin Flow

Lantor Soric® is the most conformable of our flow media for resin infusion. This product features unique hexagonal flow channels across a carrier sheet that create a steady, even resin front. Lantor Soric® quickly builds thickness with up to 35% less resin retention than all-glass laminates. Lantor Soric® is compatible with polyester, vinyl ester, and epoxy resin systems, and can also be used as core material and/or a print blocker. Lantor Soric® is constructed of a nonwoven polyester material available in a 50” width.

DIVINYCELL® DIVINYMAT

Resin Flows Easily for Vacuum Bagging

Our #1024 Divinycell was engineered specifically for vacuum infusion. Featuring grooves, perforations, and cross scoring, this core material creates flow channels for resin while adding strength. Divinymat is a 3.8 b DIAB Divinycell® H with cross scoring and offers the highest structural properties of any available flow media. Bonded to a light scrim cloth, this core will conform to most simple curves and shapes. Sold by the sheet. Each sheet measures 1/8” thick x 52” x 48”.

VACUUM INFUSION SAMPLE PACK

Feel and Compare our selection of Infusion Media.

This convenient Sample Pack contains 4” x 6” swatches of all of our resin infusion flow media. It is ideal for determining which material you would like to try for your application. Plus, this Sample Pack includes a coupon for $25 off your next order of $100 or more when purchased within a 60 days.

OMEGA FLOW CHANNEL

Reusable Resin Infusion Lines

Omega Flow Lines are designed for use under the bag in resin infusion applications, replacing spiral tubing. Omega Flow Lines incorporate an "Omega section" internally to transport resin along the surface and into the part. Simply attach your resin feed lines to the Omega Channel. Once the channel is full, resin will be dispersed into your part. Omega Flow Lines are made from translucent silicone rubber and are reusable. Apply mold release to the inside of the channel prior to use and thoroughly clean the channel once removed from your part. These flow lines leave minimal or no mark off on the part when used in conjunction with our flow media and peel ply.

| #6463 | 1 FT | $15.95 |
| #6463 A | 25 FT | $14.95/FT |
| #6463 B | 50 FT | $12.95/FT |

SPIRAL TUBING

Extended Lines or Vacuum Bagging and Infusion

Our #1403 Spiral Tubing is used in both vacuum bagging and vacuum infusion processes. A vacuum infusion standard, this tubing is ideally suited for in-bag vacuum line extenders or resin feed lines. To ensure flow is not impeded, we recommend wrapping spiral tubing in nylon or polyester peel ply. Our tubing is 1/2" ID and is compatible with all of our hose fittings.

| #1403-A | 10 FT SPOOL | $15.95 |

ENKA® FUSION FILTER JACKET

Create Fast-Moving Channels for Resin Infusion

Increase the productivity of your resin infusion process with Enka® Fusion Filter Jacket. This 4" wide mat has a unique flow media that permits a wider path for resin dispersion over the entire feeder surface, resulting in more even resin dispersion. This filter jacket features three-dimensional "V" shaped nylon mat core encased in a thermally bonded, nonwoven polyester sock. Enka® Fusion Filter Jacket is a registered trademark of Low & Bonar PLC.

DOUBLE-BACKED TAPE

Perfect for holding Spiral Tubing

Our Double-Backed Tape is a double-sided fabric reinforced tape with a rubber based adhesive on both sides. It is designed specifically for holding down plastic spiral tubing used as a vacuum manifold in the resin infusion process. It can also be used to hold honeycomb cores during machining while allowing the core to be removed without residue. The thick adhesive coating ensures that material is held firmly in position. This tape is suitable for use with metallic and non-metallic core.

| #3636-A | 1 ROLL | $24.95 |

| #3669-B | CASE (24 ROLLS) | $99.95 |

RESIN TRAPS WITH 1/2 INCH FITTING

Capture Excess Resin and Protect your Pump

Protect your equipment! These vacuum-sealed tanks are installed in the vacuum bagging process between the mold and the vacuum pump to capture excess resin that enters the vacuum line before it can damage your equipment. Resin traps are an integral part of all vacuum infusion and vacuum bagging processes. Our durable 300 Series Stainless Steel resin traps come equipped with clear, polycarbonate lids that allow you to easily monitor resin accumulation. Resin traps come complete with vacuum gauge, fittings for use with 1/2" vacuum tubing, brass ball valve and instruction manual. Apply mold release to all interior surfaces of the resin trap prior to lay-up for easy clean-up once the vacuum process is complete. PLEASE NOTE: For larger projects install multiple in-line resin traps.

WANT TO LEARN MORE ABOUT VACUUM INFUSION?
READ OUR VACUUM INFUSION GUIDE IN THE LEARNING CENTER ON OUR WEBSITE!

The Vacuum Infusion Process (VIP) is a technique that uses vacuum pressure to drive resin into a laminate. Dry materials are laid into the mold and the vacuum is applied before resin is introduced. Once a complete vacuum is achieved, resin is literally sucked into the laminate via carefully placed tubing. In a typical hand-lay-up, reinforcements are laid into a mold and manually wet out using brushes, rollers, or through other means. An improvement on that method is to use a vacuum bag to...

**0.03 HP COMBO PRESSURE/VACUUM PUMP**

Light, Portable, Economical

This oil free vacuum pump is perfect for basic vacuum bagging applications. It is quiet, compact, and portable. While it is not designed for continuous use, this pump is perfect for completing a small, quick project where vacuum is needed for less than 2 hours. It features a 0.033 HP motor capable of 39 cfm, 21.3” Hg, and max pressure of 53 psi. At only 5 lbs, it’s lightweight and easy to use. This is an excellent entry-level pump for small vacuum bagging projects.

- **Power Rating:** 0.0033 hp
- **Open Flow:** 0.39 cfm
- **Max Vacuum:** 21.3” Hg
- **Weight:** 6 lbs
- **Pressure/Vacuum Pump:** 115V, 60Hz 1 phase
- **100% Oil-less**

**0.3 HP ROTARY VANE VACUUM PUMP**

Medium Duty, Low Maintenance

This oil free rotary vane vacuum pump is ideal for applications in small shops and university labs where part sizes and shapes are constantly changing. It comes equipped with carbon vanes, built-in suction filter, vacuum regulating valve, and is integrated flanged to a 0.3 HP, 110-220 volt, 50/60 Hz, 1 phase, TEFC motor. It’s ideal for applications where air is the gas and the discharge must be totally free of oil. Very low maintenance requirements, long vane life, and low noise levels are key features of this pump.

- **Power Rating:** 0.30 hp
- **Open Flow:** 1.3 cfm
- **Max Vacuum:** 25.5” Hg (mercury)
- **Weight:** 25 lbs
- **Pressure/Vacuum Pump:** 110V, 60Hz 1 phase
- **100% Oil-less**

**0.56 HP INDUSTRIAL VACUUM PUMP**

Industrial Grade for Big Jobs, Tough Environments

Simplicity of design is the key to this heavy-duty 0.56 HP pump that’s suited for nearly any size vacuum bagging or resin infusion application. It features 100% oilless, rotary vane operation, and is designed to run continuously with very little maintenance—perfect for handling the work load in a busy shop. Operates on a continuous basis throughout a range of pressure, from atmospheric pressure to 25.5” Hg (mercury). Wired for 110v-100% oil-less.

**1.2 HP COMMERCIAL ROTARY VANE VACUUM PUMP**

Heavy Duty, Long Life

At twice the horsepower and triple the CFM of our Industrial Vacuum Pump, this 100% oil free rotary vane vacuum pump is designed for heavy-duty applications and can handle multiple vacuum bagging and infusion projects simultaneously. This pump is perfect for use where operation will be continuous throughout the day. Each pump comes equipped with self-lubricating graphite composite vanes, 10 micron inlet suction filter, vacuum regulating valve, and vibration isolators as standard equipment. It is integrated flanged to a 1.2 HP, 110-220 volt, 50/60 Hz, 1 phase, TEFC motor and is ideal for applications where oil or water is objectionable. Very low maintenance requirements, long vane life, and low noise levels are key features of this pump. This pump is designed to be professionally installed and comes equipped with a three-foot power cord for hard-wiring.

**VACUUM GENERATOR**

Easily Converts Your Air Compressor into a Vacuum

Our Vacuum Generator is a low cost and reliable way to generate vacuum needed for vacuum bagging or resin infusion if you already have a good air compressor. This venturi style vacuum generator pulls 2.2CFM 21” of Hg vacuum when coupled in-line to an air compressor capable of producing 30-70psi at 3.5CFM. This Vacuum Generator features no moving parts for zero maintenance and ships fully assembled and features a quick-connect fitting for attachment to air supply. **WARNING:** This product can expose you to chemicals including Nickel, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.

- **Power Rating:** 1.0 hp
- **Open Flow:** 1.99 cfm
- **Max Vacuum:** 24.5” Hg (mercury)
- **Weight:** 40 lbs
- **Pressure/Vacuum Pump:** 110V, 60Hz 1 phase
- **100% Oil-less**

**HIGH EFFICIENCY VACUUM GENERATOR**

Create Vacuum from a Minimal Air Source

Our High Efficiency Vacuum Generator is a low cost and reliable way to generate vacuum pressure for the vacuum bagging or resin infusion process even if you have only a small air compressor. This venturi style vacuum generator pulls 0.95CFM at 26” or Hg vacuum when coupled in-line to an air compressor that produces as little as 1 CFM at 30-75psis. This Vacuum Generator features no moving parts for zero maintenance and ships fully assembled and features a quick-connect fitting for attachment to air supply. **WARNING:** This product can expose you to chemicals including Nickel, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.

- **Power Rating:** 0.5 hp
- **Open Flow:** 0.95 cfm
- **Max Vacuum:** 25.5” Hg (mercury)
- **Weight:** 10 lbs
- **Pressure/Vacuum Pump:** 110V, 60Hz 1 phase
- **100% Oil-less**
BRASS/PLASTIC TWO-WAY SHUTOFF VALVE

Restrict or Seal Vacuum Lines

Our 1/2" OD Barb Fittings create a tight, reliable seal when used with our #893 Vacuum Tubing in vacuum bagging or resin infusion applications. Barb fittings can be threaded into the #910-A Through Vacuum Connector or other vacuum bagging components to reduce the use of hose clamps and/or permit the installation of Quick Disconnects.

#2224-A BRASS BALL VALVE $10.95  #900-A TWO-WAY SHUTOFF VALVE $16.95

SMALL REGULATOR/FILTER

Control Air Pressure and Keep Moisture Out

This compact Regulator/Filter is designed to filter your air and keep debris and liquids from getting inside your equipment. Additionally, it permits you to dial in and maintain the correct air pressure. Install the Regulator/Filter in-line, close to your air source between the air source and any of the following: #2229-A or #1148-A Vacuum Generators, #1171-A Chopper Gun, or any of the Gel Coat Spray Guns (#120-A, #123-A, #126-A). Our Regulator/Filter includes a polycarbonate cup to catch liquid and debris that could cause potential damage.

#2215-A $12.95

MALE TO MALE FITTING

Durable Connector for Vacuum Bagging

This fitting is used to connect the #2224-A Brass Two-Way Shutoff Valve to the #2218-A Vacuum Gauge with T-Fitting, #898-A T-Attachment Assembly, #902-A Bleed-off Valve Assembly or a combination of male to male connections.

#2220-A $4.05 EA

QUICK DISCONNECT & NIPPLES

Durable Connector for Vacuum Bagging

This fitting is used to connect the #2224-A Brass Two-Way Shutoff Valve to the #2218-A Vacuum Gauge with T-Fitting, #898-A T-Attachment Assembly, #902-A Bleed-off Valve Assembly or a combination of male to male connections.

2219-A SCREW-OFF DISCONNECT $10.95  2222-A MALE QUICKCHANGE STEEL NIPPLE $4.95
10+ DISCONNECTS  $18.95 EA  10+ NIPPLES  $3.95 EA

2220-A FEMALE QUICKCHANGE STEEL NIPPLE $4.95  10+ NIPPLES $4.75 EA

BRASS/PLASTIC BARB FITTINGS

Fast, Reliable Connections

Barb Fittings create a tight, reliable seal when used with our #893 Vacuum Tubing in vacuum bagging and resin infusion applications. They can be threaded into the #910-A Thru-Bag Vacuum Connector or other vacuum bagging components to reduce the use of hose clamps. Both fittings feature a 1/2" threaded diameter on one end, with a 1/4" Barb on the opposite. WARNING: Cancer and Reproductive Harm - www.P65Warnings.ca.gov

2220-A BRASS BARB FITTING $6.95  901-A PLASTIC BARB FITTING $16.95
4+ BARB FITTINGS $4.95 EA 4+ BARB FITTINGS $10.95 EA

VACUUM GAUGE

Accurate and Easy to Read

Measure and control the vacuum pressure of your vacuum bagging applications. Our #896 features a 2" wide acrylic lens with easy-to-read markings, and 1/4" NPT threaded socket at the bottom for attachment.

#896-A $24.95 EA

THRU-BAG VACUUM CONNECTOR

Versatile for the Professional Fabricator

The Thru-Bag Vacuum Connector gives the experienced fabricator a number of opportunities for vacuum bagging techniques and accurate readings. Draw air directly from the vacuum bag with a conventional air hose, steel nipple makes installation quick and easy. Insert base within vacuum bag, make a small hole for opening, and screw the remaining part of the mechanism onto the bag. Use with temperatures up to 500°F. Install our #896 Vacuum Gauge directly to nipple and monitor pressure within the bag.

#910-A $39.95 EA
**T-Fitting**

Accomplish Twice the Vacuum with One Pump

When used with 1/2” Vacuum Tubing (#893), this T-Fitting can be used to draw down two bags with a single pump, or to install multiple vacuum ports in a single bag. Barbed connectors are reliable and resistant to leaks. It can also be used with 1/2” Spiral Tubing (#1403) to extend vacuum lines inside the bag, or be used to extend resin feed lines in a vacuum infusion application. T-Fitting is autoclavable polypropylene, with a maximum service temperature of 200°F.

#006-A T-Fitting $3.25
4+ Fittings $2.85 EA
10+ Fittings $2.75 EA

---

**Vacuum Connector**

Reusable, Leak-Free Vacuum Connection

This Vacuum Connector is the most economical choice for a reusable, leak-free vacuum port in a basic vacuum bagging or resin infusion installation. Installation is simple. Insert base within vacuum bag, then pull threaded opening through a small hole made in the film, slide on O-ring, followed by the nut. Air can be drawn directly from the vacuum bag by attaching 1/2” Vacuum Tubing (#893), secured with our continuous band Hose Clamps (#789).

#891-A Vacuum Connector $5.25
4+ Connectors $4.85 EA
10+ Connectors $4.45 EA

---

**Equal Angle Y Connector**

Create Multiple Ports in a Tight Space

Our #807 Equal Angle Y Connector is compatible with our 1/2” Vacuum Tubing. With equally spaced serrated arms, this fitting permits multiple vacuum ports to be installed in a tight area. Push 1/2” Vacuum Tubing onto the arms and secure with one of our #789 Hose Clamps.

#807-A Equal Angle Connector $8.85
4+ Connectors $8.49 EA
10+ Connectors $7.95 EA

---

**Bleed Off Valve Assembly**

Introduce Vacuum Relief

Our #802 Bleed Off Valve Assembly permits the installation of a vacuum gauge at the pump, while also allowing you to introduce vacuum relief if reduced pressure is desired. Vacuum Gauge sold separately.

#802-A Bleed Off Valve Assembly $99.95

---

**T-Attachment Assembly**

Fast and Easy Install for Vacuum Gauge

A T-Attachment Assembly is the fastest and easiest way to install a vacuum gauge regardless of your vacuum bagging setup. By screwing the male threaded fitting into your pump, you can monitor vacuum pressure at the source. Available with gauge (#2218-A) or without (#8999-A). The barbed fittings allow easy and leak-free connection of our 1/2” Vacuum Tubing.

#800-A T-Fitting Only $29.95
#2218-A T-Fitting with Gauge $39.95

---

**Air Hose Assemblies**

Speed Time on your Part – Not on your Set-Up

Our industrial quality air hoses have been pre-fitted with 1/4” quick disconnect fittings to make your setups and tear down a breeze. Simply snap in the hose and you’ll be ready to go. This high quality hose is suitable for daily use in a general industrial environment and will not degrade under moderate contact with oils or resins. Our air hose assemblies are rated for a maximum continual use temperature of 190°F. When properly equipped, you can easily connect these hoses to your air source, our #2229-A or #1148-A Vacuum Generators, our #2215-A or #2216-A Regulator/Filters, any of our Gel Coat Spray Guns and our #1171-A Chopper Gun.

#2217-A 5 Feet $34.95
#2217-B 10 Feet $39.95
#2217-C 25 Feet $89.95
#2217-D 50 Feet $99.95

---

**Plumber’s Tape**

Leak-Proof your Vacuum Joints

Keep connections air-tight. Plumber’s Tape should be wrapped around the threaded end of all brass fittings within your vacuum bagging and infusion set-up to ensure leak-proof joints.

#2275-1 1 Roll $3.95
10+ Rolls $3.75 EA
25+ Rolls $3.65 EA
100+ Rolls $3.30 EA

---

**Hose Clamps**

Secure Tubing and Prevent Leaks

These clamps are designed to secure vacuum or resin tubing for leak-proof connections. With continuous band construction, you can tighten these clamps without cutting or digging into tubing.

#789-A 1 Hose Clamp $1.75
11+ Clamps $1.55 EA
100+ Clamps $1.45 EA

---

1.800.214.8568 | www.fibrelast.com

**Connect with Us**

Facebook · Twitter · Instagram · YouTube
**FLASH TAPE**

Secure Materials within Vacuum Bag Lay-Ups

This multipurpose polyester tape is used within the bag to hold other materials in place before the vacuum is pulled. It can also be used as a release film by applying it to mandrels and molds before lay-up. Highly recommended for temperatures over 400°F. 72 yards per roll, 1" and 2" wide rolls.

1" Wide
- #984-A 1 Roll $29.95
- 11+ Rolls $26.95/Roll
- 25+ Rolls $23.95/Roll
- 50+ Rolls $21.95/Roll

2" Wide
- #1764-A 1 Roll $54.95
- 11+ Rolls $49.95/Roll
- 25+ Rolls $44.95/Roll
- 50+ Rolls $41.95/Roll

**GRAY SEALANT TAPE**

Easy Seal for Lamination, Easy Strip after Cure

This tape will seal the bag to aluminum, steel, fiberglass, nickel, and graphite tool surfaces yet strips easily after cure. Use to plug leaks and tears in the bag that can develop during cure. Maximum service temperature is 400°F. 1/2" Wide, 1/8" thick, and 25' per roll.

- #581-A 1 Roll $19.95
- #581-B Case (40 Rolls) $379.95
- 0+ Cases $229.95 Per Case

**YELLOW SEALANT TAPE**

Aggressive Adhesive to Eliminate Vacuum Bag Leaks

This tape will seal the bag to aluminum, steel, fiberglass, nickel, and graphite tool surfaces while providing more aggressive tackiness than #581. Maximum service temperature is 400°F. 1/2" Wide, 1/8" thick, and 25' per roll.

- #580-A 1 Roll $7.95
- #580-B Case (40 Rolls) $229.95
- 0+ Cases $209.95 Per Case

**20% SHRINK TAPE**

Create mechanical pressure without vacuum

Shrink Tape is a polyester compaction film used to wrap laminates and create mechanical pressure during cure. Unlike vacuum bagging, this tape creates pressure by way of heat, rather than vacuum. When heated, it shrinks up to 20%, compacting (or squeezing) the composite within, eliminating excess resin and air. As a result, parts feature a better fiber-to-resin ratio and improved physical properties.

1 1/2" Wide
- #1761-A 1 Roll $39.95
- #1761-B Case (10 Rolls) $349.95

2 1/2" Wide
- #1762-A 1 Roll $74.95
- #1762-B Case (10 Rolls) $689.95

**FLOW REGULATOR**

Easy Clamp to Control Resin Flow

Clamping off tubing to begin and end resin flow is a critical step in any infusion project, and these devices make it easy. Create the tubing t block off flow and then lock into place using this regulator.

- #1696-A Flow Regulator $2.95
- 20+ Regulators $2.19 EA
- 100+ Regulators $1.75 EA

**HOSE CUTTERS**

Easy View Window Permits Clean, Accurate Cuts

The easiest way to cut tubing, these handy hose cutters do the job quickly and keep you moving. Use with any of our tubing for clean cuts every time, even at awkward angles.

- #151-A Hose Cutter $4.95
- 10+ Cutters $2.95 EA
- 25+ Cutters $2.49 EA
- 100+ Cutters $2.09 EA

**VACUUM BAGGING MATERIALS SAMPLE PACK**

This convenient Sample Pack contains 4" x 6" swatches of all of our Vacuum Bagging Materials. It is ideal for determining which material you would like to try for your application. Plus, this Sample Pack includes a coupon for $25 off your next order of $100 or more when purchased within a 60 days!

- Sample Pack #4002-A
- Individual Swatches $1.95 Each

**3M SUPER 77 ™ SPRAY ADHESIVE**

Creates Strong, Temporary Bonds

3M Super 77™ Adhesive Spray works great to bond sheets of foam together, or to secure materials within a vacuum bagging layup. **WARNING:** This product can expose you to chemicals including n-Hexane, which is known to the State of California to cause harm to the male reproductive system. For more information go to www.P65Warnings.ca.gov.

- #1404-A 3M Can (11.75 oz) $29.95
- #1404-A 3M Can (11.75 oz) $29.95

**STETHOSCOPE**

Target Air Leaks in Vacuum Bag Lay-Ups

Our Stethoscope is a reliable means to create set-ups that are air tight without making a larger investment. Manufactured to surgical standards, it's designed to pinpoint smaller noises that can cause big problems, like vacuum leaks that can compromise your composite.

- #1404-A Stethoscope $19.95

32
2 LB. POLYISOCYANURATE FOAM SHEETS

Easy Cut and shape for Pattern Making

Our 2 lb/cubic foot Polyisocyanurate Foam Sheets are best suited for moldless pattern-making and for sandwich core applications where insulation is a factor. The properties of this foam are similar to those of our 2 lb Mix and Pour Foam (#24/25), so it can be easily cut and shaped with a sharp knife or sandpaper. Pattern-making has never been quicker! You can also glue together several sheets to form blocks as thick as necessary for shaping functional moldless-type parts.

#448-C 3/4” X 4FT X 2FT (GET OF 33) $54.95
#441-C 1” X 4FT X 2FT (GET OF 33) $69.95
#442-C 1 1/2” X 4FT X 2FT (GET OF 33) $89.95
#443-C 2” X 4FT X 2FT (GET OF 33) $109.95

6LB. POLYISOCYANURATE FOAM SHEETS

Easy Cut for More Detailed Patterns and Molds

Our 6 lb/cubic foot Polyisocyanurate Foam is a rigid, closed-cell foam used in insulation, sandwich core, and casting applications where strength is key. The properties of this foam are similar to those of our 6 lb Mix and Pour Foam (#624/625), so it can be easily cut and shaped with a sharp knife or sandpaper, and its density is suited to hold greater details. Pattern-making has never been quicker! You can also glue together several sheets to form blocks as thick as necessary for shaping functional moldless-type parts.

#A448-D 1” X 4FT X 2FT (GET OF 4) $199.95

NOMEX® HONEYCOMB

Lightest Possible Construction

Fabricators use this sandwich core when high strength-to-weight ratios are required. This honeycomb is an aerospace-grade aramid fiber constructed from DuPont Nomex® paper that is phenolic coated. Over-expanded cell structures allow it to be more flexible, which also makes it perfect for use in tight radius curves. Honeycomb is available in two densities: 1.8 lb/cubic foot (#1562) and 3.0 lb/cubic foot (#2562), both are 0.210” thick with over-expanded cells, measuring 3/16”.

Nomex® is a registered trademark of E. I. du Pont de Nemours and Company and are used with permission.

#1562-A 1 LB. - HALF SHEET (40” X 48”) $124.95
#1562-B 1 LB. - FULL SHEET (40” X 100”) $224.95
#1563-C 1 LB. - CASE OF FULL SHEETS $1,979.05
#2562-A 3 LB. - HALF SHEET (40” X 48”) $151.95
#2562-B 3 LB. - FULL SHEET (40” X 100”) $249.95
#2562-C 3 LB. - CASE OF FULL SHEETS $2,170.95

END GRAIN BALSA

Conforms to Most Curves – Marine Grade

End Grain Balsa is the most widely used core material, and is best suited for dynamic structures where performance and efficiency are key. Sheets are constructed from small individual blocks of end grain balsa wood, each bonded to a light scrim fabric that holds blocks together during lamination. As a result, this core will conform to practically any simple curve and most gradual compound curves. Sheets are sold in 24" X 48" sheets.

1/4”
#229-A 1 SHEET $24.95
5+ SHEETS $22.95/SHEET
10+ SHEETS $21.95/SHEET
50+ SHEETS $19.95/SHEET

3/16”

2 LB. POLYURETHANE MIX AND POUR FOAM

Fill Cavities for Insulation and Reinforcement

Our #24/25 is a two-part, equal mix, self-rising, 2lb/cu. ft. density closed-cell foam system. Foaming begins within 45 seconds after the two liquids are mixed and continues for several more minutes. The foam expands approximately 30 times its liquid volume before curing, and will fill any shape cavity. It does not react with oil or gasoline and it will not absorb water. #24/25 is ideal for floating applications and provides 60 pounds of flotation per cubic foot of foam. Unlike polyester foams, polyurethane foam is compatible with both polyester and epoxy resins. Before filling cavities for insulation, flotation or reinforcement, determine how much foam you'll need. First, calculate the volume of your container in cubic feet. For example 1 ft. high x 1 ft. long x 2 ft. deep = 2 total cubic feet. Second, for 2 lb. foam, multiply that total by 2.5. In this case, 2 cubic ft. x 2.5 = 5 lb. of required foam. This foam is designed to meet USCG Title 33, Chapter 1, Part 183 when mixed properly.

#24/25-A & #24/25-B
25 Quarts (2.5 Gal.) $125.95 EA
40 Gal. Drum $320.95 EA
60 Gal. Drum $370.95 EA

3LB. DIVINCELL: VINYL FOAM

Superior Mechanical and Insulative Properties

DIAB closed cell vinyl foams are valued for their superior structural and mechanical properties. These foams are often used as a structural sandwich core for weight-sensitive aircraft and automotive applications. They combine ultra-low weight, improved stiffness, and impact resistance. At 3 lb/cubic foot, the density of these foams is similar to that of industry honeycombs, though strength properties do not match up to costlier honeycomb alternatives. The low density allows our 3 lb Vinyl Foams to be used extensively in weight-sensitive aircraft and automotive applications.

#1022-A & #1022-B
1/8 INCH 32"X48" SHEET $139.95
6 SHEETS $239.95
10 SHEETS $349.95
50 SHEETS $1,709.95

4LB. DIVINCELL: VINYL FOAM

Strikes Balance Between Strength and Weight

Due to their outstanding structural properties, DIAB closed cell vinyl foams are an excellent choice for sandwich core material in composite parts. When used as a structural sandwich core, 4 lb vinyl foams strike a balance between strength and weight, while offering insulative properties. Vinyl Foam sandwich cores significantly reduce weight and increase stiffness while maintaining or increasing strength compared to a thick reinforced laminate. 4 lb foam is used extensively in marine (leisure, military, and commercial) and automotive applications.

#1403-A & #1403-B
3/8 INCH 32"X48" SHEET $58.95
6 SHEETS $353.95
10 SHEETS $589.95
50 SHEETS $2,949.95

5LB. DIVINCELL: VINYL FOAM

Highest Strength Sandwich Core, Form with Heat

DIAB closed cell vinyl foam is an ideal sandwich core where ultimate laminate strength is critical. With compressive strength over 200 psi, the 5 lb/cubic foot foam offers more strength to a laminate than other lightweight core materials, like honeycomb, while adding only slightly more weight. Because it is still significantly lighter than other traditional options, 5 lb. foam is used extensively in high-strength structural building, aerospace, and design applications.

#1495-A & #1495-B
3/8 INCH 32"X48" SHEET $109.95
6 SHEETS $659.95
10 SHEETS $1,109.95
50 SHEETS $5,549.95

SANDWICH CORE & FOAM | VACUUM BAGGING

www.fibreglast.com | 1.800.214.8568
SINCE 1892, THE FINEST NAME IN MODELING CLAY

Chavant has been producing non-drying modeling clays for over 100 years. Chaude Chavant, a French chemist, developed the original formulas in 1892. These fundamental recipes have been modified throughout the years to meet the changing demands of sculptors while maintaining compatibility with many associated emerging technologies.

Today, Chavant manufacturers the widest variety of premier quality, reasonably priced modeling clays available. Chavant clays are used by sculptors in the Fine Arts, Special Effects/Stage Props, Consumer Products, and Transportation Design Industries to name a few.

CHAVANT AUTOSTYLE INDUSTRIAL DESIGN CLAY
Smooth, Medium-weight for Prototypes

Professionals want the workability of a sulfur-based clay...without the risk of compromising their metal equipment. Chavant AutoStyle Industrial Design Clay is the answer. This light brown, medium clay contains no sulfur, so there's no risk of corrosion to metal workstations, tools, or ovens. It heats up quickly to a comfortable, creamy consistency, with recommended working temps between 125°F - 135°F.

CHAVANT Y2-KLAY INDUSTRIAL DESIGN CLAY
Create Accurate Prototypes and Patterns

This dark brown, hard styling clay can be used to create accurate prototypes and patterns. Y2-Klay is workable at 135°F and is hard at or below room temperature. This sulfur-free, low odor formula of Y2-Klay makes for a better working environment, and is 30%-40% lighter than other industrial styling clay, making the models easier to move and handle. Resistant to shrinking and cracking, Y2-Klay holds excellent surface detail and can be milled or shaped with tools.

CHAVANT MONU-MELT HARD DESIGN CLAY
Meltable Clay that can be Brushed onto Foam

This dark, forest green colored, sulfur-free modeling clay offers a new option when creating plugs for new tooling. With a low melting temperature and hard modeling characteristics, this clay is meant to be brushed onto a foam plug and can be further modeled and detailed like any other of our popular modeling clays. Like our other Chavant clays, this oil-based clay never dries out or cracks, and allows PVA separator to be applied to it when building tooling.

CHAVANT LE BEAU TOUCHE CLAY (CREAMY)

Extremely smooth with excellent adhesion.

This cream-colored, sulfur-free modeling clay is extremely smooth and has excellent adhesive qualities. This non-drying, oil-based clay can be carved and shaped easily and will not crack. It is workable at room temperature but can be warmed to a maximum of 90°F to achieve softer, stickier clay. Very sensitive to heat variations, this original Le Beau Touché formula can easily be warmed and softened with the friction from rubbing it in your hands.

#1120-A 2 Lb. Block $10.95
#1120-B 40 Lbs. Case of 20, 2 Lb. Blocks $100.95

CHAVANT LE BEAU TOUCHE CLAY HM (BROWN)

Smooth and adhesive for high working temps.

This brown-colored, sulfur-free modeling clay is extremely smooth. This non-drying, oil-based clay can be carved and shaped easily and will not crack. Unlike the original #1120 Chavant Le Beau Touché, this HM (High Melt) formula is less sensitive to heat variations and is suggested for use where the working environment is expected to exceed 90°F. HM is also slightly firmer and less tacky than the original. This clay is workable at room temperature but it can be warmed to soften and work quite readily at about 105°F (115°F Maximum). When it returns to room temperature, it will return to its original firmness.

#1121-A 2 Lb. Block $10.95
#1121-B 40 Lbs. Case of 20, 2 Lb. Blocks $100.95

SCULPT LIKE A PRO WITH PROFESSIONAL TOOLS

OLYTIC CLAY MODELING TOOLS - MONUMENTAL

Variety of shapes for professional modeling

The Olytic modeling tools are made for professional modeling and are made from high quality materials to last a lifetime. The wire tips are ideal for shaping and detailing clay model parts. Made for crafting larger scale models or plugs, the Monumental set is proportioned to work larger areas than finer detail tools. Handles are approximately 8" in length, with removable loops that fit in each handle. This modeling tool set features wider, sharp blades for large curves and shapes that might appear in full scale models. The loops are serrated on one side for faster shaping, and smooth on the other. The handle is 8" long and the steel loops are approximately 4" wide. Includes: Handle, isosceles triangle loop (MLT1), teardrop loop (MLT2), Sharkfin loop (MLT3), right triangle loop (MLT4), oblong loop (MLT5).

#1129 - OLYTIC CLAY MODELING TOOL SET $99.95

OLYTIC SET STANDARD CLAY TOOLS

Professional quality clay modeling tools

The Olytic modeling tools are made for professional modeling and are made from high quality materials to last a lifetime. The wire tips are ideal for shaping and detailing clay model parts. The Standard Set includes a variety of shapes of loops allowing you to form everything from broad curves to fine corner details on full size plugs or scale models. Small and medium loops are tempered steel, where the large loops are half-round stainless steel wire. Three 6" handles, four small loops, seven medium loops, and ten large loops are included. This set of Olytic Standard Clay Tools in combination with Chavant clay will help achieve a flawless class-A finish.

#1127-A OLYTIC SET STANDARD CLAY TOOLS $164.95

INDUSTRIAL DESIGN CLAY TOOLS STARTER SET

Achieve professional results on your clay mockup

The Industrial Design Tool Kit features several of the most popular and required tools for shaping industrial clay. Hardened wire is shaped and hand-ground to the half-moon cutting and shaping edge. Cutting wires are brazed together and inserted 2" into pre-drilled wooden handles, and epoxied into place with brass ferrule for a long-lasting secure bond.

Kit includes: 3" Straight Rake, 3" Curved Rake, 1-1/4" (P38) Cutting & Shaping Wire - 1-1/2" (P40) Cutting & Shaping Wire - 1-1/2" (P51) Cutting & Shaping Wire - 1" (B52) Cutting & Shaping Wire - 1-3/4" (F18) Finisher Blade - 0.010" x 7" (SE) Tempered Steel.

#1125-A INDUSTRIAL DESIGN CLAY TOOL STARTER SET $299.95

URETHANE CASTING RESIN – SHORE A
Create Flexible, Tear-Resistant Parts and Molds

Pour tough, flexible parts and molds with Urethane Casting Resin Shore A. Available in two hardness variations, 40 Shore A and 60 Shore A. These urethane casting resins make it easy to create softer more resilient parts and tooling. These urethane casting resins have been designed specifically for the pouring of prototype and production parts. They can also be used to create fast, flexible molds with good life. They offer some undercut or negative draft. While silicone can be used to create more flexible and lower cost molds, Urethane offers superior tear strength and 3-4 times the mold life. ▲WARNING: Reproductive Harm - www.P65Warnings.ca.gov

40 Shore
#3440-A QUART KIT $90.95
#3440-B GALLON KIT $249.95 + 4 GALL.

60 Shore
#3440-A QUART KIT $90.95
#3440-B GALLON KIT $249.95 + 4 GALL.

URETHANE CASTING RESIN – 60 SHORE D
Easy Pour for Durable Foundry Parts and Tooling

This 60 Shore D hardness Urethane Casting Resin is well suited for demanding industrial applications. Extremely tough, this urethane casting resin system exhibits very high tensile and tear strength, excellent elongation, and good abrasion resistance. Easily pour this amber, lower viscosity material over open casts and closed molds to produce incredibly durable foundry tools, patterns, or parts. #3400 Urethane Casting Resin – 60 Shore D can completely cure at room temperature, but can also be heat cured up to 165°F. Typically, full properties of this urethane casting resin develop in 7 days at room temperature (75°F). ▲WARNING: Reproductive Harm - www.P65Warnings.ca.gov

60 Shore
#3400-A QUART KIT $99.95
#3400-B GALLON KIT $299.95 + 4 GALL.

URETHANE CASTING RESIN – 75 SHORE D
Get Superior Stiffness for Detailed Castings

For final parts and short-run castings, this white Urethane Casting Resin with 75 Shore D hardness can create detailed parts with superior cosmetic qualities. #3475 Urethane Casting Resin has a simple 1:1 mix ratio, and its low mixed viscosity makes it an ideal material to fill complicated molds. Cured castings are bright white and have great physical properties including; good tensile strength and superior stiffness in thin sections. #3475 Urethane Casting Resin is a great material for high performance parts and castings. It can be used for the casting of prototypes to simulate molded parts or for the preproduction checking of injection molds. Common applications include automobile, aircraft and marine parts and tooling. ▲WARNING: Reproductive Harm - www.P65Warnings.ca.gov

75 Shore
#3475-A QUART KIT $90.95
#3475-B GALLON KIT $249.95 + 4 GALL.

FAST SET TOOLING/PROTOTYPING URETHANE KIT
Put Parts into Service within a Day!

#4113 Fast Set Tooling / Prototyping Urethane Kit is a two-part urethane casting system for molds or parts. This metallic grey urethane cures rapidly, so it can be mixed, poured, and demolded very quickly. Most castings made with this fast setting tooling urethane can be demolded in 30 to 40 minutes and can be put into service within a day.

#4113-A GALLON KIT $189.95

URETHANE PIGMENTS
Create Durable Urethane Parts

These Urethane Pigments are a paste for tinting Urethane Casting Resins. Add pigments 2% - 4% by weight to the urethane resin prior to the addition of catalyst. We have made every effort to accurately represent the cured color of our resins with these pigments.

#143-B 1/2 QUART $15.95
#143-C QUART $54.95
#142-D GALLON $199.95

EASY CLEAN MOLD RELEASE FOR URETHANES
Easy to Apply, Easy to Clean Off

Easy Clean Mold Release for Urethanes promotes simple separation of urethane resins from epoxy or metal tooling in production applications. This release agent provides a glossy surface finish with minimal buildup on the mold and can be washed off final urethane parts with soap and water. ▲WARNING: This product can expose you to chemicals including Benzene, and Toluene which is known to the State of California to cause Cancer, and Toluene which is known to the state of California to cause Birth Defects or other Reproductive Harm. For more information go to www.P65Warnings.ca.gov.

#4120-A QUART $39.95
#4120-B CASE (10 QUARTS) $189.95

PLASTIC STIRRER FOR URETHANES
Moisture-Free and Reusable Stir Sticks

Our reusable Plastic Stirrers are ideal for mixing any product, but are necessary whenever you’re working with moisture-sensitive urethane casting resins. This Plastic Stirrer for Urethanes measures in at 11.5” long and 1” wide with alternating 1/4” and 3/16” mixing holes to assist in the mixing process. Wooden paint stirrers can trap moisture and contaminate urethanes if used for mixing prior to cure.

#2333-B PLASTIC STIRRER FOR URETHANES $6.95 EA
MEQUIAR'S MOLD POLISH AND RELEASE WAX

Meguiar’s Mirror Glaze® products comprise a complete production mold system based upon proper mold preparation and a paste wax. The advantages of this system are many; it yields parts with a very high gloss, involves no time consuming sprays, and with proper care, provides trouble-free releases. This system is compatible with PVA for added release insurance.

#110-A 11 OZ TIN $21.95
#110-B CASE 12 - 11 OZ TINS $230.05

PARTALL® PARTING WAX

Simple and Reliable Mold Release Wax

Partall® Parting Wax is a non-silicone green wax specifically formulated to produce a tough, durable, high gloss surface. Excellent release characteristics are achieved when used with #113 PVA. We recommend that new molds are coated with four layers before use.

#1016-A 24OZ TIN $12.25
#1016-B 7 LB TUB $44.95

MOLD RELEASE CLIP SYSTEM

Quick, Sturdy Fastening System for Molds

Make the finishing stages of mold-making go much smoother. This unique clamping system is designed to quickly join multiple-piece molds during final assembly and hold them tightly to prevent slipping or misalignment. Clips work with 1/8" drilled holes and be easily attached and removed using the Fastening Clip Plier, our part #792

#792-A FASTENING CLIP PLIERS $21.55
5-PIECES $39.45 EA
#795-A FASTENING CLIPS $2.45
11-CLIPS $22.05 EA

RELEASE WEDGES

Safe, Reliable Tools for Mold Release

Fabricators use plastic release wedges to help remove medium to large parts from a mold. Wedges are inserted around the perimeter of the mold, between the mold and the part, and then gently driven in until the piece pops out. It is necessary to use a sufficient number of wedges at the perimeters, particularly for larger parts—one wedge will not do the job. Each wedge should be tapped, in turn, as you progress around the mold. Wedges are made of soft polyethylene, so as to not damage the mold or the part. White wedges are more rigid in nature, the pink are slightly more flexible.

#95A 3-1/8 X 10" RIGID $8.25
#96A 3-1/8 X 10" FLEXIBLE $6.45 EA
#365-A 1-3/4 X 10" RIGID $4.25
#365-B 1-3/4 X 10" FLEXIBLE $4.65 EA
#364-A 1-3/4 X 10" THIN FLEXIBLE $4.25
#364-B 1/4 X 10" THIN FLEXIBLE $4.06 EA
#102-A 2-1/4 X 6" RIGID $4.25
#102-B 2-1/4 X 6" FLEXIBLE $4.65 EA
#795-A 1-1/4 X 4" RIGID $2.35
#102-B 1-1/4 X 4" FLEXIBLE $2.20 EA
#797-A 1-1/4 X 4" FLEXIBLE $2.35
#102-B 1-1/4 X 4" FLEXIBLE $2.20 EA

NON-SILICONE HIGH TEMPERATURE WAX

Mold Release for High Working Temp

This High Temp Paste Wax is specifically designed to release epoxy and polyester for application temperatures ranging from 75° to 375°. This Non-Silicone High Temperature Paste Wax can be applied to polyester, epoxy, steel, and aluminum molds with assurance of no silicone contamination.

#4121-A 1 LB CAN $19.25
#4121-B CASE 12 - 1 LB CANS $109.95

PVA RELEASE FILM

Easy Spray-On — Easy Release for Molds

Inexpensive and effective barrier PVA (Polyvinyl Alcohol) should be used with #1016 Wax to aid in the release of parts from a mold. It should be applied in three mist coats over nonporous, waxed mold surfaces. After the final wax coat has dried, begin by spraying a light tack coat of PVA. Typically, within 5 minutes the final heavy coats can be added. The PVA dries to a smooth, glossy film. After part release, the residual film can be removed with water. We recommend using our #126-A Touch Up Spray Gun for larger molds, but for smaller molds, use our #2251 Preval Sprayer. PVA can also be sprayed over any polyester repair to provide an airless tack-free cure.

#13-A QUART $18.75
#13-B GALLON $64.75
#13-C CASE (4 GALLONS) $84.95

FIBRELACE®

For Effortless, One-Step Release of Parts

Save time, effort, materials, and money with Fibrelace®. With just one quick misting onto the mold surface, you’ll get multiple releases with proven results. No wax is involved. Fibrelace® is water based and contains no harmful solvents, VOC chemicals, or silicones—so it’s worker safe, environmentally safe, and paint shop ready. Application is extremely easy but before applying Fibrelace® keep this in mind. Always start with a Class “A” polished mold surface. WARNING: This product can expose you to chemicals including 1,4-Dioxane, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov

#1153 QUART 122 FLUID OZ $39.95
5-QUARTS $135.85 EA
10-QUARTS $234.75 EA
25-QUARTS $273.75 EA
50-QUARTS $271.75 EA

www.fibreglast.com | 1.800.214.8568
STEP 1 AND 2 MOLD POLISH
Produce Lasting, High-Gloss Polished Surfaces

Step 1 - Fast cut after sandpaper. Step 1 is a water-based polishing compound which begins work where sandpaper stops. 600-1000 grit scratches will rapidly be removed with this fast cutting compound. Step 1 Mold Polish also removes styrene and wax buildup from existing molds. Use this economical compound and achieve great results with only half the normal amount of compound material. Water-base material is safe for use in the paint shop environment. Step 2 Mold Polish will remove finer scratches and polish FRP parts, molds, and even painted surfaces to an exceptionally glossy surface. This economical polish uses half the material to achieve the results from typical compounds. Suggested buffing speed: 2500 rpm minimum, and a #1104-A buffering pad is recommended for best results.

BUFFING PADS
Quick Cutting with Polishing Compounds

When time is of the essence, wool buffing pads cut quickly. This half lamb's wool-half synthetic pad is designed to work with our #1102 Step 1 and #1103 Step 2 Mold Polishes, and will withstand the 2500 rpm minimum buffing speed suggested for both. PLEASE NOTE: You must change pads when changing compounds or the small dust particles trapped in the pad from the previous grade will continue to cut the surface.

SANDING SPONGES
Smooth Out Tooling Marks

These popular abrasive pads are coated on two sides with silicon carbide and are extremely flexible. Use them to easily smooth out marks on flat, shaped, and curved surfaces. Sponges measure 4" x 5" and are available in 100, 150, and 220 grit.

MEQUIAR'S MACHINE GLAZE
For Dramatic Surface Shine and Conditioning

Step 3 in the mold polishing sequence use this compound to condition the mold surface prior to waxing. #113 eliminates any swirl marks which may be present at this stage. Additionally, this formula actually "feeds" the surface with a wax-like petroleum product which deepens the effect of later coats of release wax. This product contains no silicones, making it safe for the paint shop environment. Suggested buffing speed: 2500 rpm minimum, and a #1104-A buffering pad is recommended for best results.

3M® WETORDRY™ SPONGE PAD
For Light-Pressure Finish Sanding

3M® WETORDY™ Sponge Pads are ideal for eliminating fine scratches and finger waves on a surface once it's fair and level. Simply wrap with fine grit sandpaper and apply light pressure to achieve a finished surface. These sponges work best with light pressure applied.

HARD RUBBER SANDING BLOCK
Ideal for Heavy Hand-Sanding

Our #961 Hard Rubber Sanding Block allows you to hand sand your mold, plug, or composite part without leaving finger pressure marks. By using a rubber block, you can quickly and effectively sand flat surfaces. This product is also great for removing materials from only high areas until they blend well with the overall surface. This versatile block can be used wet or dry with any grade of sandpaper during rough hazing of the plug or finish sanding of the clear gel coat on a cosmetic repair.

3M® WETORDRY™ SANDPAPER
Achieve Near-Perfect Surface Quality

Your carbon fiber parts will have much greater depth if the surface is perfectly level, smooth, and finished. Using consecutively finer grades of sandpaper from 240-600, orange peel, texture from PVA, or other imperfections in the mold surface or finished part can easily be removed. Each combination pack includes 240, 320, 400, 500, and 600 grit sandpaper.

1.800.214.8568 | www.fibreglast.com
DISPOSABLE LAB COAT

Comfortable, Safe Coverage, Easy Clean-Up

Laminating can be a dirty job. Make sure you keep the chemicals and dust off your clothes—and away from your skin. Disposable Lab Coats made from Maxshield offer a double layer of full upper body protection that holds out dirt, dust, aerosols, spills, and splashes. The material this lab coat is made out of is designed for enhanced strength and flexibility to resist rips and punctures.

#640-A  LARGE - DISPOSABLE LAB COAT $7.65
10+ LARGE LAB COATS $8.95 EA

#650-A  X-LARGE - DISPOSABLE LAB COAT $7.65
10+ X-LARGE LAB COATS $8.95 EA

#651-A  XX-LARGE - DISPOSABLE LAB COAT $7.65
10+ XX-LARGE LAB COATS $8.95 EA

DISPOSABLE PANTS

Slide-on, Slide-off Protection

Keep the chemicals and dust off. Disposable Pants offer protection for your lower half that holds out nearly everything from dust to lead paint. Elastic waistbands make them easy to take on and off as your tasks change. They're lightweight, breathable, and resist rips and puncture. Keep several pair on-hand—simply put them in the trash when the project's done.

#652-A  LARGE - DISPOSABLE PANTS $6.45
10+ LARGE PANTS $5.65 EA
25+ LARGE PANTS $5.35 EA

#653-A  X-LARGE - DISPOSABLE PANTS $6.45
10+ X-LARGE PANTS $5.65 EA
25+ X-LARGE PANTS $5.35 EA

DISPOSABLE BOOT COVERS

Protect Footwear and Keep Floors Clean

The physics are simple: when spills are made or dust flies, particles usually make their way to the floor and often onto your shoes. This is where Disposable Boot Covers get two jobs done at once. Maxshield Disposable Boot Covers feature non-slip soles that provide excellent grip, tear, and skid resistance. They are not recommended for use with a washing machine.

#655-A  DISPOSABLE BOOT COVER $3.15
10+ BOOT COVERS $2.95 EA
25+ BOOT COVERS $2.75 EA
100+ BOOT COVERS $2.45 EA

DISPOSABLE BODY SUIT

Full Body Protection in One Piece

Laminating can be a dirty job. Make sure you keep the chemicals and dust off your clothes—and away from your skin. Disposable Body Suits made from Maxshield offer a double layer of full-body protection that holds out dirt, dust, aerosols, spills, and splashes. Zip-up fronts make this body suit easy to step in and out of. They're also extremely lightweight and breathable so you'll be comfortable while you work.

#654-A  X-LARGE - DISPOSABLE BODY SUIT $10.75
10+ X-LARGE BODY SUITS $9.85 EA
25+ X-LARGE BODY SUITS $9.55 EA
100+ X-LARGE BODY SUITS $9.15 EA

#655-A  XX-LARGE - DISPOSABLE BODY SUIT $10.75
10+ XX-LARGE BODY SUITS $9.85 EA
25+ XX-LARGE BODY SUITS $9.55 EA
100+ XX-LARGE BODY SUITS $9.15 EA

TWO STRAP DUST AND MIST MASK (BOX OF 20)

A Simple Measure for Safety

The smallest particles can cause the greatest discomfort—and even health issues. Keep them out of your airways! Our two-strap mask is electrostatically charged to enhance filtration of fine dust and mists, and provides low breathing resistance for more comfortable use. Ideal for dusty environments, it protects against coal, cadmium, lead, cotton dust, and even silica. Double-shell construction resists collapse and will withstand humid conditions for extended life and potential re-use. Head straps are made from durable, latex-free polymer NIOSH/MSHA approved for dusts and mists with a PEL not less than 0.05 mg/m³. Meets OSHA standards for use up to 10x PEL.

#651-B  TWO STRAP DUST MASKS BOX OF 20 $32.35

ORGANIC VAPOR RESPIRATOR

Stay Safe, Stay Comfortable

Our #350-A is a NIOSH approved 3M™ Half Facepiece Respirator which is molded in comfortable silicone, and features a four point cradle suspension that won't slide down the back of the head. The low profile design keeps cartridges out of field of view and permits glasses or goggles to be worn. We supply the mask complete with headgear, one pair of organic vapor cartridges, and one pair of prefilters so it is ready to be used right out of the box. Replacement Cartridges, Prefilters, and Prefilter Retainers can be purchased separately as well.

#350-A  ORGANIC VAPOR RESPIRATOR $86.35
#351-A  PREFILTER RETAINERS PACK OF 29 $8.15
#352-A  PREFILTERS PACK OF 21 $5.85
#354-A  CARTRIDGES (PACK OF 2) $15.95
#355-A  COMBINATION CARTRIDGE $44.95

www.fibreglast.com | 1.800.214.8568
SAFETY SUPPLIES | SAFETY

VINYL GLOVES

Heavy Duty Protection, Even Against Solvents

These heavy-duty vinyl gloves stand up to resins and solvents unlike their latex counterpart, but make a slight compromise where "feel" is concerned. They are pre-powdered and ambidextrous for easy slide onto either hand, and meet USDA standards for use.

#21-A SMALL (BOX OF 100) $28.05
#21-B SMALL (CASE OF 4 BOXES) $99.35
#26-A LARGE (BOX OF 100) $28.05
#26-B LARGE (CASE OF 4 BOXES) $99.35
#75-A X-LARGE (BOX OF 100) $28.05
#75-B X-LARGE (CASE OF 4 BOXES) $99.35

LATEX GLOVES

Protect Hands for Most Lamination Projects

For most lamination projects, these affordable latex gloves will last for several hours at a time. They are pre-powdered and ambidextrous for easy slide onto either hand, and offer an excellent feel for working with your parts. PLEASE NOTE: These gloves will not withstand solvents and may need to be changed during a project, depending on conditions.

#3-A SMALL (BOX OF 100) $10.35
#3-C SMALL (CASE OF 20 BOXES) $319.05
#10-B LARGE (BOX OF 100) $10.35
#10-D LARGE (CASE OF 20 BOXES) $319.05

FLOCK LINED LATEX GLOVES

For Extended Use with Resin and Solvents

For some projects, standard latex and vinyl gloves just don’t get the job done. These thicker, heavy-duty latex gloves are just right for protecting hands that work continuously in resin and solvent. Gloves are tight-fitting, feature an embossed grip, and are nearly one foot long, reaching well beyond the wrist for added protection. They may be cleaned for more than one use, or simply Pitched when the project is complete.

#616-A LARGE - SINGLE PAIR $2.15
#616-B LARGE - 12 PAIRS $21.55
#616-C LARGE - CASE (144 PAIRS) $179.95
#617-A X-LARGE - SINGLE PAIR $2.15
#617-B X-LARGE - 12 PAIRS $21.55
#617-C X-LARGE - CASE (144 PAIRS) $179.95

NITRILE GLOVES

Excellent for General Use

Nitrile gloves are excellent general use gloves in a chemical or solvent environment and are an excellent alternative for anyone with latex allergies. They are tight fitting and offer excellent dexterity. But don’t hold up for more than about 10 minutes with styrene. They are pre-powdered and ambidextrous.

#16-A LARGE - BOX OF 100 $29.95
#17-B X-LARGE - BOX OF 100 $29.95

SAFETY GOGGLES

Impact Resistant and Ventilated for Comfort

Protect your eyes from vapors and potential splashes in the workshop. Safety goggles come with a wide, coated polycarbonate lens to resist impact and nearly 100% of harmful UVA/UVB rays. Goggles are also ventilated to prevent fogging and for added comfort.

#509-A SAFETY GOGGLES $12.95
10+ GOGGLES $12.35 EA
25+ GOGGLES $11.85 EA
100+ GOGGLES $11.25 EA

SAFETY GLASSES

Compatible with Respirators and Most Eyeglasses

Take this simple precaution to prevent particles and potential splashes from getting into your eyes. They’re made to work with half-face respirators and most prescription eyewear.

#560-A SAFETY GLASSES $5.95
10+ GLASSES $5.65 EA
25+ GLASSES $4.95 EA
100+ GLASSES $4.45 EA

WANT TO LEARN MORE ABOUT HOW TO SAFELY WORK WITH COMPOSITES?
READ OUR SAFETY IN COMPOSITES GUIDE IN THE LEARNING CENTER ON OUR WEBSITE!

The two components of composite work (reinforcement and resins) always require attention to safety. Reinforcements will tend to provide a problem when cutting. The small fibers will travel through the air so care must be taken to avoid breathing these fibers. Often a dust mask is satisfactory, but a respirator offers more complete protection. Additionally, you will need to vacuum frequently to avoid having the fibers continue to circulate in the air. Reinforcements can also be irritating to the skin. Some people seem to be more susceptible than others to this problem, but sensitivity can also be developed over time. The best way to protect your skin is to...

Read the full article in our Learning Center!
COMMERCIAL ELECTRIC CUTTER

Strong, Fast, Durable - Cuts Reinforcements for You

These electric scissors are ideal for cutting any of the traditional composite reinforcements: fiberglass and carbon fiber. Don't get hand fatigue or waste time. Our Commercial Electric Cutter will pay for itself many times over. With a rugged construction, long-life battery, and durable tungsten steel blades, it will not only make your composite project easier, it will be ready for many projects in the future. These electric cutters can cut most composite materials, including dry fiberglass, dry carbon fiber and prepreg, vacuum bagging materials like bagging film and peel ply; and even thicker materials like heavier stitched fiberglass.

#1740-A COMMERCIAL ELECTRIC CUTTER $124.95
#1741-A REPLACEMENT BLADE $34.95
#1742-A REPLACEMENT BLADE M/SHOE $34.95
#1743-A BATTERY $44.95
#1744-A CHARGING BASE $44.95
#1746-A COM ADAPTER $34.95
#1748-A AC ADAPTER $38.95

FIBERGLASS DETAIL TRIMMER

6-1/2" Detail Trimmer

Our extremely sharp #2732-A Straight Blade Detail Trimmers are designed for everyday industrial use on smallers, detailed jobs. They are ideal for trimming excess carbon fiber, fiberglass, and other composite reinforcement fabrics from tooling edges, or stray fibers from any layup. The straight blade design with a fine point provides accurate control for making small, delicate cuts on intricate parts. These trimmers have a very comfortable, ambidextrous handle with large finger holes that can even be used with gloves. They are the best trimmers for composites that you will ever use! Made in the U.S.A.

#2732-A FIBERGLASS DETAIL TRIMMER $18.95
3+ TRIMMERS $18.95 EA
10+ TRIMMERS $17.95 EA
25+ TRIMMERS $16.95 EA

FEATHERWEIGHT SCISSORS

Lightweight, Durable, and Extremely Sharp

Gingher® Featherweights are a great all around scissor because they are light-weight, extremely sharp, and comfortable to use. These 2-1/2" oz scissors are perfect for a variety of purposes during a wet lay-up and can be soaked in acetone for easy clean-up. They are compatible with fiberglass, carbon fiber, and all vacuum bagging consumables. Wet or dry, prepreg or film; these scissors are versatile enough to tackle most jobs.

#838-A FEATHERWEIGHT SCISSORS $29.95
6+ SCISSORS $27.95 EA
10+ SCISSORS $25.95 EA
25+ SCISSORS $23.95 EA

12" RESHARPENABLE FIBERGLASS SCISSORS

Resharpenable Shear with Extra Leverage

The #2735-A is a bent shear that provides extra leverage and comfort for cutting large amounts of material. The extremely sharp cutting edge can easily cut through carbon fiber, fiberglass, and other thin reinforcement fabrics and fibers. These trimmers have rubber coated handles that provide additional control. They are the best scissors for reinforcement fabrics that you will ever use! These Resharpenable Fiberglass Scissors feature chrome, high-carbon steel blades that maintain a sharp cutting edge, but can be sharpened over and over, and are professionally honed and ready to cut right out of the box. Made in the U.S.A.

#2735-A 12" RESHARPENABLE FIBERGLASS SCISSORS $74.95
6+ SCISSORS $68.95 EA
10+ SCISSORS $54.95 EA
25+ SCISSORS $62.95 EA

CARBON FIBER BENT SCISSORS

Extra Leverage and Comfort for Long Cuts

The #2734-A is a bent shear that provides extra leverage and are comfortable for cutting large amounts of material. The extremely sharp cutting edge can easily cut through carbon fiber, fiberglass, and other thin reinforcement fabrics and fibers. These trimmers have a right-handed Sarlink® handle that provides lasting comfort. The high-leverage design provides a consistent, comfortable cutting angle. They are the best scissors for reinforcement fabrics that you will ever use! Made in the U.S.A.

#2734-A CARBON FIBER BENT SCISSORS $29.95
6+ SCISSORS $22.95 EA
10+ SCISSORS $29.95 EA
25+ SCISSORS $24.95 EA

MODIFIED KEVLER® SCISSORS

Easily cut through KEVLER® without pulling fiber!

The #2733-A is specially designed and made specifically for cutting Kevlar®, aramid, carbon, fiberglass, and other hard-to-cut reinforcement fabrics. Small teeth machined into the blade allow the scissors to “bite” into the fibers without letting them slip. These scissors have right-handed Sarlink® handle that provides lasting comfort. The high-leverage design provides a consistent, comfortable cutting angle. They are the best scissors for hard-to-cut composites that you will ever use! Made in the U.S.A.

#2733-A MODIFIED KEVLER® SCISSORS $34.95
6+ SCISSORS $28.95 EA
10+ SCISSORS $29.95 EA
25+ SCISSORS $27.95 EA

OLFA® CUTTING MATS
Protect Fabric from Snags — Protect your Tabletop.
Lightweight OLFA® Cutting Mats make the ideal surface for working with fabric reinforcement. Lay them out on a solid tabletop for measuring fabric and making clean, consistent cuts every time. They are designed to withstand punctures and slices associated with rotary cutters, razor blades, and scissors. **WARNING:** Cancer and Reproductive Harm - www.P65Warnings.ca.gov

OLFA® ROTARY CUTTER
Sleek Thru Fabrics with Smooth, Clean Cuts.
Forget the jagged cuts and snagged fibers caused by scissors or shears. The OLFA® Rotary Cutter slices through fiberglass, carbon fiber, and Kevlar® for clean cuts every time. The sharp blade can cut through up to six layers of dry fabric, and is great to use when cutting braided sleeves. **WARNING:** Cancer and Reproductive Harm - www.P65Warnings.ca.gov

| #1706-A OLFA® ROTARY CUTTER | $29.95 |

OLFA® ROTARY CIRCLE CUTTER
Cut Perfect Circular Patterns Every Time.
With our OLFA® Rotary Circle Cutter you can cut perfect circular patterns every time. This convenient rotary circle cutter features an easily adjustable center spike that measures out the exact radius you desire. You can use your circle cutter to create circles ranging from 1-1/8" to 8-1/2" in diameter. The ratchet handle is designed for right and left-handed use and reduces wrist fatigue. Rotary blade locks quickly into safety position for storage. Rotary cutters offer smooth, clean cuts when used with dry or prepreg reinforcement fabrics.

| #1707-A OLFA® ROTARY CIRCLE CUTTER | $29.95 |

EXACT YARDAGE TAPE
Non-Adhesive, Easy Measure for Yards of Fabric.
Our Exact Yardage Tape provides an easy way to measure out your reinforcement fabrics in 1/8th yard increments. Simply roll this tape simultaneously with your fabric to calibrate your counter or to get a perfect yardage measurement. 100 yards per roll.

COMPOSITE MARKERS
Handy for the Workshop.
Create and cut your own patterns for composite parts of any size. These pens make it easy to mark cut lines on your reinforcement or laminate without the need for tracers that may or may not fit your design. The Pilot® Marker is better suited for marking hard laminate parts with a non-porous surface. It features a paint-like ink that is applied with only minimal pressure and dries quickly. Use the Sharpie® Marker for marking dry reinforcement. The tip of the pen glides easily along the surface of fabric without dragging fibers along with it. Permanent silver ink provides a clear contrast that is easy to see, whether you’re working with carbon fiber, fiberglass, Kevlar®, or prepreg fabric.

DRITZ® FRAY CHECK
Keep Fabrics from Fraying.
Prevent the fraying associated with looser weaves of fabric or cut fabric edges. Driz® Fray Check™ is uniquely designed to hold loose ends together. Simply apply a line of this unique liquid along your cutting line, allow it to dry; then make the cut. Fray Check should only be used on portions of fabric that will be cut away from your finished laminate. Areas of fabric saturated with Fray Check will NOT saturate with resin. This can impact performance and cause delamination. Fray Check is a nylone plastic dissolved in an alcohol base. Once dry, it may appear white against darker fabrics and can yellow over time, potentially impacting cosmetics.

THE PERFECT LINE TAPE
Make Clean, Straight Cuts and Prevent Fraying.
Our #1735 Perfect Line Tape is such a reliable way to preserve the integrity of fabric, we use it ourselves. Every roll that leaves our shop is cut using Perfect Line Tape! To use, apply the tape to the reinforcement fabric and cut along the dashed line. You'll receive an even cut, and prevent fraying on both edges. This low cost item is an effective solution to the fraying associated with cutting expensive fabrics. This tape features a medium-tack adhesive for easy removal.

THREE ROLL FABRIC RACK

Convenient for the Fabricator Workshop

This mid-size rack is capable of holding up to three rolls, with each bar able to hold up to 150 pounds. It accommodates 60" wide materials and is predrilled to accept Fabric Rack Casters (#1721, sold separately), for easy movement.

Dimensions: Width: 74" - Height (without rolls): 40-1/2" - Depth: 42"

#1721 A THREE ROLL FABRIC RACK $574.95
5+ FABRIC RACKS $549.95 EA
10+ FABRIC RACKS $529.95 EA
25+ FABRIC RACKS $499.95 EA

FOUR ROLL FABRIC RACK

Perfect for Vertical Spaces

This Four Roll Fabric Rack comes pre-drilled for floor mounting hardware. The extremely stable design does not require any top mounting and will accommodate 60" wide fabric rolls and heavy mats. It is designed for single-sided access, but does not need to be installed near a wall. PLEASE NOTE: This rack is designed for floor mounting only and is not suitable for casters. Wedge Anchors are recommended for floor mounting.

Dimensions: Width: 74" - Height (without rolls): 75-1/2" - Depth: 28-3/4"

Weight rating of 150 lbs per bar.

#214 A FOUR ROLL FABRIC RACK $679.95
5+ FABRIC RACKS $645.95 EA
10+ FABRIC RACKS $615.95 EA
25+ FABRIC RACKS $589.95 EA

SIX ROLL FABRIC RACK

Stable and Convenient Storage for Multiple Fabrics

Designed specifically for composites, this rack will hold up to six rolls of fabric and is suitable for even the heaviest materials. This rack is extremely stable and does not require rolls to be counter-balanced. Rack accommodates 60" wide materials and is predrilled to accommodate Wedge Anchors (#1738) or Casters (#1721), both sold separately. Install this rack with wedge anchors and create a stationary two-sided rack. Attach Casters and you have a portable, easy-to-move rack that brings your materials to your workspace. Dimensions: Width: 80" - Height (without rolls): 73-1/2" - Depth: 46"

#2720 A SIX ROLL FABRIC RACK $889.95
5+ FABRIC RACKS $854.95 EA
10+ FABRIC RACKS $824.95 EA
25+ FABRIC RACKS $794.95 EA

FABRIC RACK CASTERS (SET OF 4)

Put your Fabric Rack on Wheels

These high-quality swivel casters are fitted with 5" polyurethane wheels and can be easily installed on our Six Roll or Three Roll Fabric Racks (#1720 and #1719). Larger wheels are designed to roll over debris commonly found in a composite production environment, so that even larger racks—holding multiple fabrics remain stable. Each caster features a brake to stop and secure the rack in place while unrolling and cutting fabrics and films.

#1721 A FABRIC RACK CASTERS $179.95

SAME-DAY-SHIPPING!
IF ORDERED BEFORE 2:30PM EST

COMPLETE COMPOSITE WORKCENTER

Keep Materials Organized, Clean and Accessible

This workcenter has everything you need to keep your fabric and supplies organized and accessible. The single fabric rolling bar is 65” wide, holds up to 200 pounds, and is capable of handling a roll up to 32” in diameter. This is ideal for even heavy mats, fiberglass, carbon fiber or Kevlar® fabrics, and woven roving. The extra large work table is 96” wide and 36” deep. With a tension guide and tension bar, your fabrics can be held in place and the large work area allows plenty of room to maneuver. Two 72” wide shelves are plenty for your tools and supplies. The top shelf is 13” deep and comes with 7 dividers that can be positioned to suit along the multiple installation points. The lower shelf is 8” deep and allows you to store objects up to 10” tall. This workcenter is also equipped with an extra sturdy storage drawer for easy access to your cutting tools and supplies. Ergonomically designed at 35” from the floor, there is no need for stooping. Have a more efficient composite manufacturing work space.

Dimensions: Width: 96” Height: 76” Depth: 36”

#1722-A COMPLETE COMPOSITE WORKCENTER $1,845.95
5+ WORKCENTERS $1,765.95 EA
10+ WORKCENTERS $1,735.95 EA
25+ WORKCENTERS $1,705.95 EA

CUTTING STATION

A Must-Have for the Busy Composite Workshop

This composite cutting station is ideal for storing and cutting composite reinforcement fabrics. It has two bars for holding fabrics, each up to 52” wide, with the lower bar holding up to 150 pounds and the top bar holding up to 70 pounds. With a tension bar and tension guide, fabrics can be pulled onto the table and kept smooth and even. The table area is 30” deep by 64” wide allowing plenty of room to cut your fiberglass fabric and still offering enough room to work on your part. Nearly a yard off the floor, the ergonomic height is ideal for most adults.

Dimensions: Width: 64” Height: 59” Depth: 30”

#1722-A CUTTING STATION $949.95
5+ CUTTING STATIONS $919.95 EA
10+ CUTTING STATIONS $799.95 EA
25+ CUTTING STATIONS $779.95 EA

WHAT DO I NEED TO SET UP A COMPOSITE WORKSHOP?

WANT TO LEARN SET UP YOUR OWN COMPOSITE WORKSHOP?
READ OUR SETTING UP A COMPOSITE SHOP ARTICLE IN THE LEARNING CENTER ON OUR WEBSITE!

Over the past fifty years, FibreClast Developments has supplied thousands of new customers with materials they had never seen, and taught them to use them successfully. However, we rarely discuss the lessons we have learned about organizing the composite shop itself. One of the most challenging hurdles a fabricator will face is just “how” to begin. This includes setting up their first composites shop. In the “Perfect” environment, there are always plenty of spaces to work, warm temperatures to quickly cure resin, and no fumes. In reality, most shops are cramped, dark and dirty. The ideal composite shop should be safe, clean, and well ventilated. To keep the work fun and comfortable, cutting racks and benches can also be built to store materials and hold molds at appropriate working heights. Safety is one of the most important features for any fabricator.

**PERMA-GRIT® COARSE Grit Hand Tools**
Shape, Cut, and Clean-up Edges for Laminates

Perma-Grit® Coarse Hand Tools feature tough tungsten carbide grit welded to steel planks. As a result, they're extremely robust and outlast traditional sandpaper by thousands of times. Use them to cut aggressively in any direction, make slots, finish edges, and shape composites, including carbon fiber and fiberglass. Coarse grit tools are especially useful for cleaning up the edges after other tools have been used to make larger cuts. They will not fray or shatter the edges of your part. #1921 is a comprehensive 8-piece kit containing the most popular hand tools as noted below, and includes a Velcro-fastened tool roll for organized storage.

#1921-A 8 PIECE GROOVE HAND TOOLS $89.95

**PERMA-GRIT® FINE Grit Hand Tools**
Give a Hand-Finished Touch to Laminates Parts

Perma-Grit® Fine Hand Tools are ideal for precise shaping and finishing of the highest quality composite parts. Tools feature tough tungsten carbide grit welded onto steel planks. As a result, they're extremely robust and outlast traditional sandpaper by thousands of times. Use them to sand in any direction, make slots and shape carbon fiber and fiberglass parts. They will not fray or shatter the edges of your part. Remember, it is always recommended that you work from a coarse grit to a fine grit before moving on to a rubbing compound or wax when creating a surface finish. #1922 is a comprehensive 8-piece kit containing the most popular hand tools as noted below, and includes a Velcro®-fastened tool roll for organized storage.

#1922-A 8 PIECE FINE GROOVE HAND TOOLS $89.95

**PERMA-GRIT® JIGSAW BLADES**
Best Solution to Cut Finished Composites

Perma-Grit® Jigsaw Blades are perfect for making large cuts or for cutting along flat pieces of laminate composites, like fiberglass and carbon fiber. Tungsten carbide abrasive grit is welded to steel shafts to create Perma-Grit® Jigsaw Blades. After repeated use, they have proven to maintain their edge without breakage, and cut even more aggressively than more expensive diamond materials.

#1903-A BLADES TO FIT BLACK & DECKER 5-BLADES $5.95 6-BLADES $4.85 EA
#1904-A BLADES TO FIT BLACK & DECKER 5-BLADES $5.95 6-BLADES $4.85 EA

**SOLID CARBIDE FIBERGLASS BURR BIT FOR ROUTERS**
Strong Enough to Drill Tough Laminate Parts

Customize your finished laminate part. This solid carbide router bit is strong enough to easily make windows, shapes, or interlaminate holes in your finished carbon fiber or fiberglass composite. Shank measures 1/4” and is compatible with nearly all hand-held and table-mounted routers. Count on this router bit for a long life of easy cutting and finishing.

#2302-A SOLID CARBIDE FIBERGLASS BURR BIT $34.95 5-BURR BITS $22.95 EA 10-BURR BITS $20.95 EA 25-BURR BITS $20.95 EA

**PERMA-GRIT® ROTARY ATTACHMENTS**
Smooth Edges for Finished Composites

Perma-Grit® Sanding Blocks feature a unique tungsten carbide grit that outlasts traditional sandpaper by thousands of uses. For composite laminates, they are particularly effective for creating straight edges, squaring off, producing perfect dihedral angles, block sanding large areas, profiling leading edges, feathering trailing edges, and more. Sheets of tungsten carbide grit are bonded to an anodized aluminum extrusion for each block. They are designed to be lightweight, clean, and easy to handle for sanding fiberglass, carbon fiber, and other composite materials.

#1905-A PERMA-GRIT® SQUARE BLOCK 6" X 2" $29.95 5-SQUARE BLOCKS $122.95 EA 5-SQUARE BLOCKS $39.95 10-SQUARE BLOCKS $79.95 EA 5-COARSE CONTOUR BLOCKS $22.95 EA 10-COARSE CONTOUR BLOCKS $45.95 EA 5-FINE SQUARE BLOCKS $22.95 EA 10-FINE SQUARE BLOCKS $45.95 EA 5-WEDGE BLOCKS $22.95 EA 10-WEDGE BLOCKS $45.95 EA

**WANT TO LEARN MORE ABOUT HOW TO CUT LAMINATES? READ OUR LEARNING CENTER ARTICLE!**

Cutting composites is uniquely difficult when compared to cutting wood, metal, or other more traditional building materials. There are a few reasons for this, but there are three primary factors which impact tool selection when cutting laminates.

First, reinforcement fibers are abrasive. Since carbon fiber, fiberglass, and Kevlar® fibers can be abrasive, tools with traditional cutting edges dull quickly, effectively shortening tool life. In addition to...

www.fibreglast.com | 1.800.214.8568
ALUMINUM ROLLERS WITH WOOD HANDLES

Remove Air from Stiffened Fabrics and Laminations

Aluminum Rollers are perfect for laminations where increased pressure is necessary to release air bubbles. They are straight across the width of the head and provide excellent air relief for nearly all applications.

129-A 1/2" DIAMETER X 3" WIDE ROLLER $17.25
10-ROLLERS $16.65 EA
25-ROLLERS $16.15 EA
50-ROLLERS $15.65 EA

129-A 1" DIAMETER X 3" WIDE ROLLER $18.85
10-ROLLERS $18.35 EA
25-ROLLERS $17.85 EA
50-ROLLERS $17.35 EA

129-A 1 1/2" DIAMETER X 3" WIDE ROLLER $20.45
10-ROLLERS $19.95 EA
25-ROLLERS $19.45 EA
50-ROLLERS $18.95 EA

SLOTTED PADDLE MINI ROLLER

Reaches Where Other Rollers Cannot

This all-metal roller is made to last and small enough to go where other rollers cannot. Slotted paddle fins are rigid to eliminate air in tight areas, particularly for unidirectional fabrics.

308-A SLOTTED PADDLE MINI ROLLER $10.50
10-ROLLERS $10.00 EA
25-ROLLERS $9.50 EA
100-ROLLERS $9.00 EA

PLASTIC RADIUS ROLLER

Best Air Pockets in Narrow Spaces

Radius Rollers, also known as filler or corner rollers, are uniquely in size and match a specific inside corner radius. They are generally sized like a wheel, with a larger diameter and smaller width.

415-A 2" DIAMETER X 1/4" WIDE ROLLER $12.95
10-ROLLERS $12.45 EA
25-ROLLERS $11.95 EA
100-ROLLERS $11.45 EA

ALUMINUM ROLLERS WITH PLASTIC HANDLES

Designed to Eliminate Air from Lightweight Fabrics

These Aluminum Rollers are durable and just right for releasing air from lightweight fabrics. Both sizes feature large parallel fins with more shallow grooves. All have sturdy plastic handles, and are approximately one foot in total length.

708-A 1/4" DIAMETER X 1-1/2" WIDE ROLLER $11.85
10-ROLLERS $11.35 EA
25-ROLLERS $10.85 EA

708-A 3/8" DIAMETER X 1-1/2" WIDE ROLLER $12.95
10-ROLLERS $12.45 EA
25-ROLLERS $11.95 EA

THIN FIN MINI ROLLER

Eliminate Air in Tight Spots

These all-metal rollers are made to last and small enough to reach tight, complex spots. Thin vertical fins saturate fabric with resin and push out trapped air. Rollers are approximately 6" in total length.

388-A 1/8" DIAMETER X 1" WIDE ROLLER $9.95
10-ROLLERS $9.45 EA
25-ROLLERS $9.05 EA
50-ROLLERS $8.65 EA

387-A 1/4" DIAMETER X 1" WIDE ROLLER $9.95
10-ROLLERS $9.45 EA
25-ROLLERS $9.05 EA
50-ROLLERS $8.65 EA

PLASTIC ROLLERS

Eliminate Air on Flat Surfaces and Gradual Curves

These Plastic Rollers are straight across the width of the head and provide excellent air relief for nearly all applications. All three sizes feature thin parallel fins with deep grooves.

411-A 1/2" DIAMETER X 3" WIDE ROLLER $11.85
10-ROLLERS $11.35 EA
25-ROLLERS $10.85 EA

412-A 1" DIAMETER X 3" WIDE ROLLER $12.95
10-ROLLERS $12.45 EA
25-ROLLERS $11.95 EA

413-A 1 1/2" DIAMETER X 3" WIDE ROLLER $13.95
10-ROLLERS $13.45 EA
25-ROLLERS $12.95 EA

BARREL ROLLERS

Concentric Head for Small, Tight Areas

These rollers feature a barrel-shaped head that is wider in diameter at the center and slightly tapered to both ends. Also referred to as "radius" rollers, as they are well suited for curved or concave surfaces.

315-A 1/2" DIAMETER X 1-1/2" WIDE PLASTIC BARREL ROLLER $11.95
10-ROLLERS $11.45 EA
25-ROLLERS $10.95 EA

415-A 1" DIAMETER X 1-1/2" WIDE PLASTIC BARREL ROLLER $13.95
10-ROLLERS $13.45 EA
25-ROLLERS $12.95 EA

ECONOMY WIRE HANDLE ROLLERS

Remove Air from Smaller, Flatter Applications

Plastic roller heads are straight across their width and provide excellent air relief for most smaller applications. Both sizes feature thin, parallel fins.

541-A 1/2" DIAMETER X 2" WIDE ROLLER $7.55
10-ROLLERS $7.05 EA
25-ROLLERS $6.65 EA

542-A 1" DIAMETER X 2" WIDE ROLLER $7.55
10-ROLLERS $7.05 EA
25-ROLLERS $6.65 EA

1.800.214.8568 | www.fibreglast.com
**BRISTLE ROLLER**

**Stiff, Flexible Bristles Work Out Trapped Air**

The bristles on this unique roller are stiff, but flexible, to release air trapped in irregular surfaces. They are frequently used for skin coats and mold construction. PLEASE NOTE: Bristles can be tough to clean.

**POLYESTER AND MOHAIR ROLLER COVERS**

**Tough Enough to Handle Resins and Cleaners**

Will your paint roller stand up to resin? Because a dissolving roller is not the way to start a fiberglass project. All of our rollers are backed with two layers of polypropylene to get you through each lamination, start to finish. Clean them with acetone for use on multiple projects, or dispose of them after creating each part—they’re affordable enough to keep a few on hand.

**QUICK CHANGE ROLLER CAGES**

**Tough Enough to Withstand Pressure and Solvents**

These Quick Change Roller Cages are the perfect tool for the composites workshop. They are compatible with any of the Saturation Sleeves and Roller Covers available on our site. Cages tightly secure covers and sleeves when on, and feature just enough flex to quickly and easily change them out.

**FIRST QUALITY COMPOSITE MATERIALS GUARANTEED**

**PROFESSIONAL GRADE ALUMINUM ROLLER SLEEVES**

**ALUMINUM SLOTTED PADDELS ROLLER SLEEVES**

Get More Air Released from Heavily Filled Resins

These sleeves slide conveniently onto our Quick Change Roller Cages. Wider roller heads feature raised “paddles” with deep grooves that run along their circumference and width. They are used to evenly saturate fabric and eliminate air from parts with heavily filled resin. Often preferred for use with unidirectional fabrics.

**ALUMINUM FINNED ROLLER SLEEVES**

Evenly Distribute Pressure to Larger Composites

These sleeves slide conveniently onto our Quick Change Roller Cages. Wider roller heads feature thin, parallel fins with deep grooves that run along their entire width. They are used where greater pressure must be applied in order to saturate fabric and eliminate air for larger laminations. Aluminum construction makes them easy to clean.

**ALUMINUM BUBBLE BUSTER ROLLER SLEEVES**

Deflate Air Pockets in Hard-to-Reach Areas

These sleeves slide conveniently onto our Quick Change Roller Cages. Wider roller heads feature rigid nubs that run along their circumference and width. These nubs penetrate deep air pockets that might not be reached otherwise in order to fully saturate reinforcement. Bubble busters not recommended for use with chopped strand mat.

**ALUMINUM LONG GROOVE ROLLER SLEEVES**

Saturate Large Surface Areas and Eliminate Air

These sleeves slide conveniently onto our Quick Change Roller Cages. Wider roller heads feature long, thin, parallel fins with deep grooves that run along their entire width. They are used to evenly saturate fabric and eliminate air within larger composite parts. Often preferred for use with unidirectional fabrics.

CHINA BRISTLE BRUSHES
Quality Stippling Tool Saves Time, Money, Headache

Fabricators know that a good quality brush is essential for hand lay-ups and repair. These China Bristle Brushes deliver the strength and stiffness required to stipple resins into mat and composite fabrics. Bristles are potted in epoxy, so they resist falling out, even when used with cleaning solvents. Along with easy-grip wooden handle, these brushes deliver durability you can count on. PLEASE NOTE: They are not recommended for use with finish coats of any lamination. Bristle Length 1-1/2".

POLYESTER FINISH BRUSH
Professional Finishing Brush - Styrene Resistant

Although we recommend spraying gel coat whenever possible, sometimes it's necessary to apply by brush. A standard stippling brush will leave bristles and an imperfect surface. These top-quality polyester brushes will hold up to gel coat, resin, and styrene to deliver a professional finish—in mold or for surface repairs. Clean with acetone, and feature wooden handles.

CUT BRISTLE BRUSH - 2" wide
Perfect for Stippling Resin into Mat and Fabric

Quality laminates begin with quality tools. These Black China Bristle Brushes feature shorter, stiffer bristles that are less likely to fall out—and perfect for stippling resin into mats and fabric, and applying smooth surface coats. Along with an easy-grip wooden handle, these brushes resist solvents and deliver durability you can count on.

ACID BRUSHES
Spread Resin into the Smallest, Detailed Surface

Durable Acid Brushes are inexpensive and ideal for applying surface coat or casting resins into the most detailed, complex molds. The tough, horsehair bristles minimize air bubbles, while the entire tool is heat and solvent resistant. Best of all, you can simply dispose of them when you're done!

PAINT CAN OPENER
Simple and Handy

Easy open for cans of gel coat, wax, pigment, glitterflake, and more.

SQUEEGEE
The Simplest, Must-Have Tool for Laminating

Squeegees are essential for the workshop, particularly when it comes to laminating high-performance fabrics. Plastic squeegees are the fastest way to evenly distribute resin in most full-scale applications. They are useful for spreading fillers and for general-purpose fiberglass work. Rubber squeegees are excellent for forcing resin through high performance fabrics without the fear of snagging or distorting costly fibers. Rubber naturally conforms to contours within the mold and, likewise, provides better control than the plastic varieties.

SAME-DAY-SHIPPING!
If ordered before 2:30PM EST
QUART STARTER KIT
Get Started with a Quart-Sized Lamination

This starter kit has everything you need to do a typical lamination involving a quart of resin. This kit includes:
- (1) 1/2" x 3" Wire Handle Plastic Roller
- (2) 1" Brushes
- (2) 1-1/2" Brushes
- (2) Squeegees
- (4) Pairs of Gloves

#581-A QUART STARTER KIT $15.75

GALLON STARTER KIT
Get Started with a Gallon-Sized Lamination

This starter kit has everything you need to do a typical lamination involving a gallon of resin. This kit includes:
- (1) 7" Breadcrumb Roller
- (6) 7" Roller Covers (1/4" Nap)
- (1) 1" x 3" Plastic Roller
- (6) 5" Brushes
- (6) Squeegees
- (12) Pairs of Gloves

#582-A GALLON STARTER KIT $42.15

5 GALLON STARTER KIT
Tools to Tackle a Larger Lamination Project

This starter kit has everything you need to do a typical lamination involving 5 gallons of resin. This kit includes:
- (1) 7" Breadcrumb Roller
- (12) 7" Mohair Roller Covers (1/4" Nap)
- (1) 1" x 3" Plastic Roller
- (6) 3" Brushes
- (6) 2" Brushes
- (6) Squeegees
- (50) Pairs of Gloves

#583-A 5 GALLON STARTER KIT $58.35

QUART MIXING SET
All You Need to Mix a Quart of Resin

This mixing set contains everything required to mix a quart of resin and corresponding hardener. Includes:
- (5) 1-Pint Paper Cups
- (1) 9 Oz Cup
- (1) 4 Oz Cups
- (1) 1 Oz Cup
- (1) Teaspoon/Tablespoon
- (5) Mixing Sticks
- (5) Pairs of Gloves

#608-A QUART MIXING SET $8.95

GALLON MIXING SET
All You Need to Mix a Gallon of Resin

This mixing set contains everything required to mix a gallon of resin and corresponding hardener. Includes:
- (5) 1-Quart Paper Cups
- (3) 1-Pint Paper Cups
- (2) 9 Oz Cups
- (2) 4 Oz Cups
- (2) 1 Oz Cups
- (1) Teaspoon/Tablespoon
- (5) Mixing Sticks
- (8) Pairs of Gloves

#609-A GALLON MIXING SET $18.15

5 GALLON MIXING SET
Supplies for Mixing Gallons of Resin

This mixing set contains everything required to mix 5 gallons of resin and corresponding hardener. Includes:
- (6) 10-Pint Paper Cups
- (6) 1-Pint Paper Cups
- (8) 9 Oz Cups
- (6) 4 Oz Cups
- (6) 1 Oz Cups
- (1) Teaspoon/Tablespoon
- (12) Mixing Sticks
- (12) Mixing Paddles

#610-A 5 GALLON MIXING SET $37.75

1 PINT PAPER & PLASTIC MIXING TUBS
Convenient Mixing Cups for the Shop

Our Plastic Measuring Tub will stand up to resins, thinners, and solvents, however, our Paper Mixing Tubs are ideal for mixes of all sorts but will not stand up to Acetone.

#885-A 1 PINT PAPER (SLEEVE OF 250) $13.95
#885-B 1 PINT PAPER (SLEEVE OF 500) $23.75
#886-A 1 PINT PAPER (BOX OF 500) $211.65
#886-B 1 PINT PAPER (CASE OF 1000) $410.35
#818-A 1 PINT PLASTIC (CASE OF 25) $8.85
#818-B 1 PINT PLASTIC (CASE OF 500) $107.95

PAPER TUBS
Workshop Must-Have for All-Purpose Mixing

Our paper mixing containers are ideal for mixes of all sorts. They will not break down under resins, but will now stand up to Acetone.

#14-A 10-PINT PAPER MIXING TUB (EA) $4.25
#14-B 10-PINT PAPER TUBS - CARTON OF 100 $40.35
#12-A 8-PINT PAPER MIXING TUB (EA) $3.15
#12-B 8-PINT PAPER TUBS - CARTON OF 100 $302.35

PLASTIC MIXING BUCKETS
Stands Up to Resins, Thinners and Solvents

Our plastic mixing buckets will stand up to resins, thinners, and solvents.

#585-A GALLON PLASTIC MIXING TUBS $4.75
#586-A GALLON PLASTIC MIXING TUBS - CARTON OF 100 $56.35
ClicSeal Pour Spouts

Take the Guess and Mess Out of Pouring

ClicSeal Pour Spouts are uniquely designed with a precision spout and plastic closure blade for fast, accurate pouring without messy leaks and spills. Improved venting allows you to dispense just the right amount into graduated containers when trying to volume-match mixed solutions: one tool, one pour.

MEKP Dispensers

Safe, Accurate, Easy Dispense of MEKP

MEKP should be handled with the utmost care—and these unique, graduated bottles are designed for just that. Once the catalyst has been poured into the holding container, simply squeeze until the upper vial reaches your desired amount. Release pressure on the bottle and leave a precisely measured amount of catalyst in the vial.

Polypropylene Jars

Air-Tight Storage for Resins, Pigments, Gel Coat

When used together, polypropylene jars and twist-on lids provide easy, air-tight storage of nearly any liquid in the workshop. They’re especially handy for applications that require pre-mixing pigment and resin for color match—in advance of adding catalyst for laminations. They’re available in 8-, 16-, and 32-ounce varieties. **Quantity Discounts Available.**

Resin Pumps

Eliminate Messy Cans, Drips, and Spills

Easy single-stroke pumps fit right into cans with accurate dispensing every time! If you have a 3:1 mix, simply depress the pump 3 times for resin and once for cure. It’s that simple.

Jiffy Mixers

Thorough Mixing for Fillers and Pigments

Jiffy Mixers are the standard of the industry for mixing pigments and fillers with resins. These units will not splash and yet ensure a thorough mix by pulling dense materials off the bottom and light materials off the top.

Spatula Heads

Clean & Easily Dispense Resin & Gel Coat

These mini spatula heads are ideal for scraping out the last bit of gel coat from our open top quart and gallon cans.

Graduated Measuring Cups

Pour, Scoop, and Measure Just about Anything

Get it all done with one simple tool. Keep both convenient, handheld sizes in the workshop. These handy cups are ideal for resins, foam, fillers, or mixes.

Plastic Cups

Graduated and Solvent-Proof to Suit Needs

Long a staple of composite shops, these graduated cups are ideal for quick, and easy mixing and measuring.

MIXING STICKS & PADDLES

Keep a Handful Around the Shop

Mixing Sticks and Paddles are an easy and effective way to mix resins and gel coat.

Graduated Measuring Cups

Pour, Scoop, and Measure Just about Anything

Get it all done with one simple tool. Keep both convenient, handheld sizes in the workshop. These handy cups are ideal for resins, foam, fillers, or mixes.

1.800.214.8568 | www.fibreglast.com
EZ MIX CONTAINERS

Take the Guess and Mess Out of Pouring

Graduates display volumetric ratios for all kinds of mixes, but are especially helpful for mixing epoxy resin and polyurethane foam. Pour in epoxy, then add hardener right on top. Keep several pitchers on hand when mixing foam: pour each part into its own pitcher, then mix as needed. In addition to the various mix ratios, the 16- and 24-ounce cups are graduated in milliliters and ounces. The 2-1/2 quart pitcher is graduated in quarts, ounces, liters, and milliliters.

#2276-A 16 OZ. EZ MIX CUP $1.05
10+ CUPS $0.95 EA
25+ CUPS $0.85 EA

#2277-A 24 OZ. EZ MIX CUP $2.15
10+ CUPS $1.85 EA
25+ CUPS $1.65 EA

PLASTIC FUNNELS

Control Pouring for Liquids

Funnels are always handy in a composite shop. Large funnels facilitate pouring from 5 gallon pails and small funnels control pours from high viscosity materials like epoxy resin when measuring.

#181-A 4 OZ. FUNNEL $2.65
6+ FUNNELS $2.45 EA
10+ FUNNELS $2.15 EA

#182-A 8 OZ. FUNNEL $3.85
6+ FUNNELS $3.65 EA
25+ FUNNELS $3.15 EA

FLEXIBLE CURVE RULER

Easy Flex for Checking Symmetry

This Flexible Ruler can conform to curves and is only limited to those with radii of one inch or below. Simply smooth down over your radius and flip over to check for symmetry. Each size features a raised lip for tracing curves and is graduated in both inches and centimeters.

#2177-A 24" FLEXIBLE CURVE RULER $21.55
6+ RULES $20.45 EA
10+ RULES $18.35 EA

SYRINGES

Get Precise Measure for the Smallest Amounts

Syringes are handy when small, precise measurements are necessary. The 30 ml Syringe without needles with accept 1/8th" I.D. tubing or #106 needles. The 60 ml Syringe has a catheter tip to help control dispensing and comes with a cap.

#106-A 30 ML SYRINGE W/SMALL NEEDLE $8.75
#106-B 30 ML SYRINGE W/SMALL NEEDLE BOX OF 100 $46.35
#107-A 30 ML SYRINGE W/8 NEEDLE $3.15
#107-B 30 ML SYRINGE W/8 NEEDLE BOX OF 360 $53.86
#108-A 30 ML SYRINGE NEEDLES $0.36
#108-B 30 ML SYRINGE NEEDLES BOX OF 100 $25.95
#2275-A 60 ML SYRINGE, CATHETER TIP $4.25
#2275-C 60 ML SYRINGE, CATHETER TIP BOX OF 400 $102.85

WYPALL® X80 PAPER WIPES

Industrial Strength Paper Towels

WypAll® X80 Paper Wipes are stronger and more absorbent than ordinary shop paper towels.

#2406-A WYPALL® X80 PAPER WIPES $21.95
10+ BOXES $19.45 EA
25+ BOXES $18.95 EA

WYPALL® WATERLESS HAND WIPES

WypAll™ Waterless Hand Wipes pack a two-part punch. They feature a unique, natural formula powerful enough to instantly remove dirt, ink, resins, caulks, tar, adhesives, urethanes, paint, dyes, oil, and grease without having to rinse hands with water. The special dual-textured wipe traps the materials being removed within the towel. This prevents the materials from being re-deposited back on the skin.

#2406-A WYPALL® X80 PAPER WIPES $25.95
10+ BOXES $23.85 EA
25+ BOXES $23.15 EA
THE COMPLETE FIBERGLASS & COMPOSITE LIBRARY

Watch & Learn: The Complete How-To for Composites

With decades of experience in the composites industry, we've learned a thing or two that we can pass along. So join us in the workshop as we take a look at materials, fabricate composites, and walk you through techniques, step-by-step. From start to finish, this five-part series can be a reference for the fabricator for many years to come. Videos include: The Basics of Fiberglass, A Step-by-Step Guide to Molding Fiberglass, Advanced Mold-Making and Plug Construction, Vacuum Bagging and Sandwich Core Construction, The Art of Moldless Construction. Fibre Glass Developments, 2 DVDs, 190 total minutes.

#1227A THE COMPLETE FIBERGLASS AND COMPOSITE LIBRARY DIGITAL $98.95

COMPOSITE BASICS - SEVENTH EDITION

Everyday You Need to Know about Composites!

Composite Basics Seven provides a detailed, inside look at the science behind composite fabrication, from selecting materials to designing structures. Topics include: fabrics and resin; core materials and how to work with them; molding methods and tooling; adhesives and bonding; and curing and testing stress and load for your project.

The text includes multiple graphs and illustrations, as well as an extensive appendix, for reference.

#099A COMPOSITE BASICS, SEVENTH EDITION $30.95

COMPOSITE MATERIALS FABRICATION HANDBOOK #1

Get Practical Composites Know-How, Start to Finish

Part of the Composite Garage Series, this Fabrication Handbook starts at the beginning and lays out the step-by-step simplicity of composite building. Learn about basic materials and tools involved, how composite parts are made, mold making, and even some finishing methods for improved part cosmetics. Terminology is explained, so it's easy to understand, and numerous photos and illustrations accompany text throughout. As much as possible, this book emphasizes hands-on application to help composites builders problem solve, minimize common aggravations, and confidently tackle new composite projects. Text includes critical steps for safety and setting up a shop.

#1835A COMPOSITE MATERIALS FABRICATION HANDBOOK #1 $27.95

COMPOSITE MATERIALS FABRICATION HANDBOOK #2

Take Composites Knowledge One Step Further

Part of the Composite Garage Series, Fabrication Handbook #2 is written for those who want to enhance the quality and performance of their composite projects. Learn what it takes to truly optimize a composite laminate for high-performance use. Basic mold making is covered in this book to help fabricators produce effective mold systems from a variety of molding materials. Several advanced molding techniques are demonstrated in-depth, including compression molding, vacuum bagging, trapped-rubber insert molding, pre-regs, inflatable bladder molding, and resin transfer molding techniques. In the spirit of Composites Fabrication Handbook #1, this book presents each subject in a hands-on, practical way. Creating useful composite parts requires a good design, a topic that is discussed at length in this book. The methods illustrated here lend themselves to both motorcycle and automotive builders and customizers. The construction of these parts is documented in step-by-step fashion with an abundance of photographs.

#1836A COMPOSITE MATERIALS FABRICATION HANDBOOK #2 $27.95

CASTCRAFT MOLDMAKING GUIDE

Learn More about Casting and Molding

Designed for those interested in craft applications, these guides are an excellent source of information for anyone interested in fiberglass construction, plaster, latex molding, rubber gelatin, and flexible molding wax.

#1827A CASTCRAFT MOLDMAKING GUIDE $30.95

POLICIES & GUARANTEES:

PAYMENT METHODS
Visa, MasterCard, Discover, and American Express are the accepted credit cards. Net 30 Terms are available to U.S. corporate clients. Prepayments by check should be made by Certified Bank Check. Orders paid by other types of checks will not be shipped for a minimum of 10 days, upon receipt of check. Wire transfers incur a $50.00 Bank Handling Fee in addition to any charges assessed by your bank. Purchase orders specifying other terms must be approved in writing by an officer at Fibre Glast Developments Corporation.

PRODUCT GUARANTEES
All products except Vinyl Ester Resin are guaranteed to have a six-month shelf life from date of purchase when stored in unopened containers and at ambient temperatures. Vinyl Ester Resin has only a three-month guarantee.

PRODUCT CERTIFICATIONS
Material Certifications can be issued to our spec under the following two conditions: If requested when ordering, there is a $5.00 charge per certification for all orders under $500.00. There is no charge for orders over $500.00. If requested after the product has shipped, there is a $25.00 charge per certification regardless of order size. If retroactive certifications are requested more than 3 months after the product has shipped, there will be a $25.00 charge for each additional month.

RETURNS
Notify customer service for instructions and authorization. Customer is responsible for all outbound shipping charges resulting from items ordered in error. Items can only be returned in unopened containers or packages determined to be in salable condition at the discretion of Fibre Glast Developments Corporation.

DISPUTES
Any disputes which result in legal recourse will be resolved in the courts of Montgomery County, Ohio and under the laws of the State of Ohio and the United States of America.

SHIPPING

Our Central Location is capable of reaching 70% of the US population in 3 days shipping via UPS ground.

HAZARD CHARGES

Hazard Charges are levied by UPS, FedEx, and all transportation companies. Fibre Glast does not profit from these charges. If applicable, hazard charges will be added to your product total before shipping your order. We then remit them directly to the transportation company. We will combine products as the law permits in order to minimize these charges whenever possible.

HANDLING CHARGES

Fibre Glast will charge $10.00 handling for any orders shipped on the customers' freight account. Orders shipped internationally on customers' shipping accounts will incur a $20.00 handling fee. All international shipping accounts will be verified with the carrier for validity prior to shipment.

INTERNATIONAL ORDERS

Our standard shipping charges do not apply to international orders. We will quote your shipping charges by email and get your approval before we ship. All of our prices are in U.S. dollars and no other currencies will be accepted.

SHIPPING RESTRICTIONS

We are a fully authorized shipper of hazardous materials and we can ship anywhere in the world. However, some countries have international restrictions on hazardous goods and may not allow them into the country. We will advise you of any foreseeable problems by email and obtain your approval before we ship your order. Our shipping charges include insurance but do not include any fees or custom charges by your country. These are the customer’s responsibility and will not be added to your order.

SHIPPING SURCHARGES

If we are responsible for shipping your materials, we will quote a freight price which includes all documentation. This is our preferred method of shipping and we will provide either door-to-door service or door-to-airport service. We will include this information in our quote. If you wish to have your items shipped to a freight forwarder/consolidator and there are hazardous materials on your order, there is a $250.00 International Hazard/Freight Forwarder Handling Fee. If you wish to have your items shipped to a freight forwarder/consolidator and there are hazardous materials on your order, there is a $150.00 International Hazard/Freight Forwarder Handling Fee.
