

Embedded Voicemail

This user guide is for Embedded Voicemail provided by an IP Office Basic Edition system running in IP Office Essential Edition, IP Office Preferred Edition or IP Office Advanced Edition mode.

Your system maintainer can configure your system to support either Intuity or IP Office mode mailbox operation. This guide is for IP Office mode. Your system administrator can confirm which mode your system uses.

Normal Login

To login:

1. At your own extension, dial **777**.
 - To access your mailbox from another extension, dial **778**. You are prompted to enter the number of the mailbox you want to access. If you are dialing from your own extension, for your mailbox, just press **#**. Otherwise enter your extension number and press **#**.
2. Enter your mailbox password if you have a [password set](#) and press **#**.
3. After you log in, the voice prompts provide instructions. See [Default Mailbox Controls](#) for a summary of the controls.
 - For help at any time: Press ***4**.
 - To return to the activity menu: Press **8**.

Mailbox Controls

The following is a summary of the options that are available after you have [logged into](#) a mailbox.

Activity Menu
Playback <ul style="list-style-type: none"> • New messages start playing by default. • Play old messages = 1 • Play saved messages = 2 <ul style="list-style-type: none"> • Fast forward = # • Rewind = * • Repeat last message = 7 • Skip current message = 9 • Delete current message = 4 • Save current message = 5 • Mark Message as new = *06 • Call back sender = ** • Forward message = 6
Configuration <ul style="list-style-type: none"> • Edit greeting = 3 • Record Name = *05 • Change mailbox code = *04 • Direct all to email = *01 • Send email notification = *02 • Turn email off = *03 • Outcalling options = *07 • Help = *4

3. Edit Greeting
<ul style="list-style-type: none"> • Listen to greeting = 1 • Record new greeting = 2 • Save new greeting = 3 • Save new greeting as a loop = 4 • Return to mailbox = 8

6. Forwarding
<ul style="list-style-type: none"> • Forward to extensions = 2 • Forward with header message = 3 <p>[Follow each extension number with # and then a final # to finish.]</p>

*07. Outcalling
<ul style="list-style-type: none"> • Listen to settings = 0 • Configure outcalling = 1 • Turn outcalling off = 6 • Turn outcalling on = 9 • Return to mailbox = 8

IMPORTANT: Old Messages are automatically deleted after 24 hours

After you listen to new message, it is marked as 'old' and it is automatically deleted after 24 hours. If you do not want the message deleted, you must mark it as a 'saved' message.

- To mark the current message as saved, press **5** while listening to the message.

Caller Options

Callers to your mailbox can perform the following actions:

- **Skip Your Mailbox Greeting**
Callers can skip your greeting message and go straight to leaving a message by pressing **1**.
- **[Transfer to another number](#)**
Depending on your settings, the caller can select a transfer to another extension rather than leaving a message.
- **Leave a message**
After hearing the tone, your caller can start recording a message. The system only saves messages that are longer than 3 seconds. The default maximum message length is 120 seconds. However, the system administrator can adjust that.
- **Options after leaving a message**
After leaving a mailbox message, callers can press **#** rather than hanging up immediately. The caller hears a prompt informing them if the system saved the message. The system then disconnects the call.

Visual Voice

Visual Voice allows you to access your mailbox using the display menu of your phone rather than following spoken mailbox prompts. Not all phones support Visual Voice.

To use Visual Voice your system maintainer must add a Visual Voice button to your phone. Alternatively, your system maintainer can set the **MESSAGES** button on your phone to act as a Visual Voice button.

- On phones that have a display but do not support visual voice operation, use of the button for user mailbox access using voice prompts and for direct to voicemail transfer during a call is supported

Visual Voice Controls

The arrangement of options on the screen will vary depending on the phone type and display size. You can access controls not shown on the current display by using the phone's < and > buttons to move between screen pages.

Button	Functions
Listen	<p>Accesses your mailbox. When pressed, the screen shows the number of New, Old and Saved messages. Select one of those options to start playback of messages in that category. Once message playback is selected, the available controls change:</p> <ul style="list-style-type: none"> • Previous: Play the previous message. • Next: Play the next message. • Rewind: Rewind approximately 5 seconds. • FFwd: Step forwards approximately 5 seconds. • Delete: Delete the current message. • Save: Mark the message as a saved message. • Copy: Copy the message to another mailbox. When pressed, the phone displays: <ul style="list-style-type: none"> • Pre-Rec: Record a message to attach to the start of the copied message. • Targets: Enter the destination for the message copy. • Done: Copy the message using the targets entered. • Pause: Pause the current message. Press the button again to un-pause.
Main(0)	<p>Hunt group names may be displayed you have been configured for hunt group mailbox access. The number shows the number of new messages in the mailbox. Press the button to access the mailbox in the same way as the Listen option above.</p>
Message	<p>Record and send a voicemail message to another mailbox or mailboxes.</p>
Greeting	<p>Change the main greeting used for callers to your mailbox. If you have not recorded a greeting, the system's uses its default mailbox greeting.</p> <ul style="list-style-type: none"> • Record: Record a new greeting. • Listen: Listen to the current greeting or the new greeting just recorded. • Submit: Submit the new greeting just recorded. • Delete: Delete the current greeting. The mailbox reverts to using the default system greeting.
Email	<p>This system shows this option if you have a configured email address for voicemail email usage in the telephone system configuration. This control allows you to see and change the current voicemail email option used for new messages received by your mailbox. Use Change to change the mode displayed. Press Done to save the change. The modes are:</p> <ul style="list-style-type: none"> • Email Mode Off: Voicemail email is not used. • Email Mode Copy: Copy new voicemail messages to the email address, leaving the original message in the mailbox. • Email Mode Fwd: Forward new voicemail messages to the email address, deleting the original message from the mailbox. • Email Mode Alert: Send an alert email message to the email address, leaving the message in the mailbox.
Password	<p>Change the mailbox password. To do this requires entry of the existing password.</p>
Voicemail	<p>Switch voicemail usage on or off. When off, the voicemail system does not answer unanswered calls.</p>

Using the Visual Voice Button for Voicemail Transfer

If pressed when you have a call is connected, the Visual Voice button allows entry of an extension number for direct to

voicemail transfer of the connected call.

Listening to Messages

The system groups messages into the following categories:

- **New**
After you have listened to a new message, it automatically becomes an old message.
- **Saved**
This category applies to messages you [marked as saved](#). You would normally do this for messages that you do not want the system to automatically delete.
- **Old**
After you have listened to a new message it automatically becomes an old message. Unless you delete them sooner, the system automatically deletes old messages after 24 hours.

When you get your messages, the system automatically starts playing your new messages if you have any. After each message, the system plays details of when the message was left and the caller.

To listen to your messages:

1. [Log in](#) to your mailbox.
2. If you have any new messages, the system starts playing them.
 - To switch to playing old messages: Press **1**.
 - To switch to playing saved messages: Press **2**.
3. While playing a message, you can use the following options:
 - To fast forward: Press **#**.
 - To rewind: Press *****.
 - To repeat the last message: Press **7**.
 - To skip the current message: Press **9**.
 - To delete the current message: Press **4**.
 - To [mark the message as saved](#): Press **5**.
 - To [mark the message as new](#): Press ***06**.
 - To call back the sender: Press ******.
 - To forward the message: Press **6**.

Marking a Message as New

While listening to old or saved messages you can reset the message back to being treated as a new message. This will cause the message waiting indicator on the phone to be lit again. However, if you are using [voicemail email](#) or [outcalling](#), these are not triggered by changing the status of a message back to new.

To mark a message as new:

1. Press ***06** while listening to the old or saved message.

Fowarding a Message

You can forward a message to a different mailbox or to several mailboxes at the same time. When you do this, you can record a comment at the start of the message.

To forward a message:

1. While listening to the message, press **6**.
 - To forward the message as is, press **2**.
 - To add a comment before forwarding, press **3**. After the tone, record your comment and press **#** to finish recording.
2. Enter the extension number to forward the message to and press **#**.
3. If you want to send the message to more than one extension, repeat the process of enter each extension number followed by **#**.
4. Press **#** to finish addressing and forward the message.

Changing Your Password

You are not required to set a password for your mailbox if you only access it from your own extension. For access to your mailbox from other locations, including in response to Outcalling, you will need to have a password set. If you set a password, it is then required during access to your mailbox from your own extension.

To change your password:

1. [Log in](#) to your mailbox.
2. Press ***04** to change your password.
3. Enter your current password and press **#**. If you have no current password just press **#**.
4. Enter your new password followed by **#**.
 - Enter at least four digits and up to 15. Do not set an obvious code. For example:
 - Your extension number.
 - A sequence of digits, for example 1234.
 - The same repeated digits, for example 1111.
5. Re-enter your new password followed by **#**.
 - The system will prompt you if the codes do not match or is not acceptable. It will also confirm the change of password if successful.

System Administration

The system administrator cannot see your password. However, they are able to clear your existing password.

Recording Your Greeting

You can record the greeting heard by callers to your voicemail. At any time, you can listen to a greeting message and re-record it.

- A greeting must be longer than 3 seconds. The maximum length of a greeting is 120 seconds by default.

To record your greeting:

1. [Log in](#) to your mailbox.
2. Press **3** to select the option to edit your greeting.
3. Press **2** to change your greeting.
4. When prompted, speak your new greeting.
 - The greeting must be longer than 3 seconds.
 - A long (approximately 10 seconds) period of silence will disconnect you from voicemail.
5. Press **2** when you have finished recording your greeting.
6. Press **1** to listen to your new greeting. After you have listened to your greeting:
 - To save the new greeting: Press **3**.
 - To re-record the new greeting: Press **2**.
 - To save the new greeting as a continuous loop: Press **4**. Callers are not able to leave messages. Note that when you select this option, you can only change the greeting back to a normal greeting by recording a new greeting.

Transfer Options

Your system administrator can set up to 3 transfer numbers for your mailbox. When a caller to your mailbox presses **0**, **2** or **3**, the system transfers them to the matching number configured by your system administrator. Typically, this feature allows the system to transfer callers to the receptionist or one of your colleagues.

Contact your system administrator to find out if they have set any transfer numbers for your mailbox. When this feature is set, remember to alter your [mailbox greeting](#) in order to inform callers of the options they can use.

Voicemail Notification

There are several ways that the system can alert you when you have a new message.

- **Message Waiting Lamp**
Most Avaya telephones include a message waiting lamp, typically at the top right of the phone. This lamp lights when your mailbox contains any new messages that you have not heard. In addition, many Avaya phones have a **MESSAGE** button which also lights when your mailbox contains new messages.
- **Outcalling**
Outcalling allows you to specify a number that the system calls when your mailbox contains any new messages. If you answer the call, the system prompts you to login to hear your messages.
- **Voicemail Email**
The voicemail system can send an email whenever your mailbox receives a new message. The email can be just a simple alert that you have a new message or it can also include an attached copy of the message.

Voicemail Email

You can have notification of new messages sent to your email address. The notification can be a simple alert to tell you that you have a message or a copy of the voicemail message if required.

In addition to the functions described in this section, if you have an Avaya telephone that supports [Visual Voice](#), you can use Visual Voice to control your Voicemail Email settings.

- **Email Address/Enabling Voicemail Email Functions**

Before you can use the email options, your system administrator must enter your email address into the telephone system configuration. Otherwise, you hear the message *'Email is not enabled on this mailbox'* whenever you try to use an email option. Your system administrator can tell you whether they have configured your mailbox to use email.

This section covers the following actions:

- [Switching on email notification](#)
- [Switching off email notification](#)

Switching On Email Notification

When you switch on email notification, you can also select the type of notification required.

To switch on email notification:

1. [Log in](#) to your mailbox.
2. Select the required type of email notification.
 - For an email alert: Press ***02**. When you have a new voicemail message in your mailbox, you will receive an email advising you of this.
 - To have the message forwarded to your email: Press ***01**. When you have a new voicemail message in your mailbox, the system forwards it to your email address as an attachment. The system deletes the original message from your mailbox.

Outcalling

You can receive notification of a new voice message by using the outcalling feature. When you receive a new message, the voicemail system notifies you by calling a number that you have set. You can then retrieve the message from the number at which you received the notification. Systems running IP Office Release 7.0 or higher support this option.

Each outcalling alert rings for a duration you can set. The default is 15 seconds. The call ends if not answered. If answered, the system prompts you to enter your mailbox [password](#). When answer, the outcalling call automatically ends if:

- You press *# to indicate that you do not want any more outcalling calls for the current new messages.
- You enter the wrong password 3 times.
- More than 5 minutes passes with no response.

Up to 3 outcalling calls are attempted, with a minimum of 15-minutes between calls, unless you answer and press *# or access your mailbox by another method. If you receive any more new messages in the meantime they do not restart the outcalling attempts.

This section covers the following actions:

- [Initial outcalling configuration](#)
- [Setting your outcalling destination](#)
- [Setting your outcalling timeout](#)
- [Turning outcalling on](#)
- [Turning outcalling off](#)
- [Answering outcalling calls](#)

Initial Outcalling Configuration

The first time you access the outcalling menus, the system prompts you to set a destination number for outcalling alerts. Once set, you can then [change the number](#), [turn outcalling on](#), [turn outcalling off](#) and [change the timeout](#) used for how long outcalling calls ring.

To configure outcalling:

1. Press ***07**. An announcement tells you that you have not configured outcalling.
2. Press **1** to configure your outcalling options. You need to specify the destination telephone number where you want to receive your new voicemail notification.
3. When you have configured an outcalling destination number, you can turn outcalling on/off.

Setting Your Outcalling Destination

You can add or change the telephone number that outcalling uses.

To set your outcalling destination number:

1. [Log in](#) to your mailbox.
2. Press ***07** to access your outcalling settings.
3. Press **1**.
4. Press **2** for number entry.
5. Press **1** and then enter the number that you want outcalling to call. Remember to include any external dialing prefix that you would normally dial to make the call.
 - A ***** in the number is treated as a pause (1.5 seconds) in the dialing.
 - To enter a **#** into the number: Dial ***#**.
 - You can also use internal numbers as your outcalling destination. The calls will follow any internal forwarding and will honor do not disturb. However, the outcalling attempt ends if the call goes to voicemail.
6. Press **#** to finish number entry.

Setting Your Outcalling Timeout

The timeout controls how long the outcalling call rings the destination number before hanging up if not answered. The default is 15 seconds with the maximum being 59 seconds.

If the destination specified is an internal number, outcalling does not go to voicemail if unanswered. However, if the destination is an external number with its own voicemail, the timeout must be set to less than the time before the external voicemail might answer. For example, if you have voicemail active for your mobile telephone, where any calls go to voicemail if not answered after 30 seconds, you must set the outcalling timeout to less than 30 seconds.

To set your outcalling timeout:

1. [Log in](#) to your mailbox.
2. Press ***07** to access your outcalling settings.
3. Press **1**.
4. Press **3** for timeout entry.
5. Enter a number between 5 and 59 and then press #.

Answering Outcalling Calls

When you have a new message, the system tries to call your outcalling destination number three times with a 15-minute interval between each call.

To collect a message:

1. Answer the outcalling alert.
2. When you hear the outcalling announcement, enter your extension number and press #. You hear the "Welcome to Avaya IP Office" announcement.
3. Log in to voicemail in the usual way and collect your new message.

To cancel further message notification:

1. Answer the outcalling alert.
2. When you hear the outcalling announcement, enter *#. The system cancels any further outcalling for that new message. You still receive outcalling alerts for any subsequent new message.
