Scanfob®2006
Quick Start Guide

Setting up Scanfob® 2006 in SPP mode for use with SerialMagic or SerialMagic Gears

Android Mobile Device or Windows PC:

*To set up the Scanfob® 2006 for simulated keystroke injection with iOS or OSX see **other side** of sheet.*
If using OSX with SerialMagic, configure device in SPP mode.

1. **Charge** – Connect the Scanfob® 2006 to a powered USB port for about 4 hours, or until LED shows green. Only charge the Scanfob® 2006 with approved charging devices. Use of non-approved charging devices can damage the battery and void the warranty.

2. **Install SerialMagic** – SerialMagic is available at serialio.com/products/SerialMagic/SmSuppPlat.php. Download & install SerialMagic for your platform. Android users should visit the Google Play Store for SerialMagic Gears.

3. **Set Scanfob® 2006 to SPP mode** – Scan the following barcode to set the scanner's Bluetooth mode:

SerialMagic - SPP

4. **Make discoverable and connectable** – Scan the barcode below (or hold down the small button for 5 seconds) to make the Scanfob® 2006 discoverable and connectable (LED will blink blue rapidly):

Make Discoverable & Connectable

5. **Launch SerialMagic/SerialMagic Gears**

6. **Connect** – Use SerialMagic to pair the Scanfob® 2006. Setup instructions for SerialMagic can be found at www.serialio.com/support. The Scanfob® 2006's LED will blink blue slowly when connected. Android users should use SerialMagic Gears. In Gears, tap "Connect" and a list of devices will pop up. Then tap "Scan for devices" and select the desired scanner to pair.

7. **Set SerialMagic scan behavior** – Scan the following barcode to set the correct scan behavior:

Prefix=STX, Suffix=CR

Congratulations! The Scanfob® 2006 is now connected! For instructions on scanning into third party applications, Android users should visit serialio.com/support/SerialMagic/Android/SMKeys_Setup.php

Use the following barcodes to disconnect/reconnect your scanner:

Disconnect and Radio Off

Reconnect SerialMagic

For complete Scanfob® 2006 documentation, visit serialio.com/support

Setting up Scanfob® 2006 in HID mode (like a Bluetooth keyboard)

For use with iOS or OSX on Apple Devices:

*To set up the Scanfob® 2006 with SerialMagic or SerialMagic Gears on Windows PC or Android Mobile, use the **other side** of this sheet.*

1. **Charge** – Connect the Scanfob® 2006 to a powered USB port for about 4 hours, or until LED shows green. Only charge the Scanfob® 2006 with approved charging devices. Use of non-approved charging devices can damage the battery and void the warranty.

2. **Set Scanfob® 2006 to HID mode** – Scan the following barcode to set the scanner's Bluetooth mode:

Keyboard – HID

3. **Make discoverable and connectable** – Scan the barcode below (or hold down the small button for 5 seconds) to make the Scanfob® 2006 discoverable and connectable (LED will blink blue rapidly):

Make Discoverable & Connectable

4. **Start Bluetooth discovery mode** – Start Bluetooth discovery from your mobile device or computer located in Device "Settings". Select your scanner from the list of available devices. You will **not** be prompted to enter a PIN. If a request to pair with the Scanfob® 2006 appears, confirm that you want to connect.

5. **Set scan behavior** – Scan the appropriate barcode below to set the correct scan behavior:

iOS & Windows	Mac OSX
Prefix =NONE, suffix=CR	Prefix =NONE, suffix=ENTER

Congratulations! The Scanfob® 2006 is now connected!

6. **Enable keyboard toggle** – *(Optional)* If you are using the Scanfob® 2006 with an iOS device, scan the barcode below to allow you to toggle your on-screen keyboard with the small button on the scanner:

Enable iOS Keyboard Toggle

Use the following barcodes to disconnect/reconnect your scanner:

Disconnect and Radio Off	Reconnect to Last Device

You can also hold down the big button for 5 seconds to turn the Scanfob® 2006 off or on.

Need to turn Scanfob® 2006 beep on/off?

Scanfob® 2006 Beep OFF	Scanfob® 2006 Beep ON
