ZingHR Core Release Notes

• Introduction

This document communicates the new features and enhancements in this release of the ZingHR Web Application Attribute Version It also documents known problems and workarounds.

• About This Release

This release aims at making the end user self-sufficient to configure the system as per requirements and seamlessly use the feature functionalities. It focuses on the end user experience for ease of usage and simplicity in work flows.

• Compatible Browsers

This product has been tested on the following browsers.

Chrome

Firefox

• Features / Small Fixes

ZingCore-

- Geo fencing report. – We have added additional fields to the report, which will enable us to locate the user details along with Longitude/Latitude/Area/Radius and attribute details
- Team View - Employee Code Added along with Employee Name for ease of recognition

TNA/LMS-

- Outdoor and Regularization Auto Approved flow fixes.
- Comp-off leave type fixes.
- Calendar Group fixes while master updation.

Claims-

- Travel Expense as a part of Claim Module – For organizations where in exhaustive travel module is not used, we have a developed an alternate solution, where is the Travel Request can be made as a sub claim type and on 1st level approver the same can be sent as a request to travel desk, through a mailer and the claim is again routed back to the employee, in Transaction History section, to be applied on return from the Travel. With this the information is stored in the same claim and easy to map to the expenses being entered later.
- Additional field Added - Service Tax, Swachh Bharat Tax, Krishi Kalyan Tax, Goods and Services Tax fields have been added to the standard expense form, which can be used while implementing the form. These fields will not be considered in eligibilities of the employees. These are over and above the eligibilities, which are free text fields with no validations. It is for additional information storage with regards to claims being submitted.

Payroll Cockpit-

- Batch Name : This feature is provided to add appropriate batch description for a particular batch in batch process screen to enable the end user to tag the batches created for processing.
- Form 16 exe download : This feature is provided to download Form16 exe by which we can generate Form16. With this the client can independently generate the form16 for his/her organization.
- Rollover : This feature is provided for opening a new financial year for payroll processing, with features of data replication or clean data for the new opened financial year

• Limitations

- No specific limitations are there with reference to current feature releases.
