ZingHR Core Release Notes

• Introduction

This document communicates the new features and enhancements in this release of the ZingHR Web Application Attribute Version It also documents known problems and workarounds.

• About This Release

This release aims at making the end user self-sufficient to configure the system as per requirements and seamlessly use the feature functionalities. It focuses on the end user experience for ease of usage and simplicity in work flows.

• Compatible Browsers

This product has been tested on the following browsers Except Recruitment Module.

- Chrome
- Firefox

• Features

ZingCore

- HR Handbook - Replacing download button to Preview. Now user can't download the file from HR Handbook they can only view it by clicking on Preview button. With this we will curtail the possibility of the documents being downloaded by employees, which is a requirement by most of the customers.
- Help desk - Escalation Email triggered to escalation owner with open ticket summary. This will help the escalation owner to follow up with the call owners and provide timely solutions/answers to stake holders (employees)

TNA/LMS

- Employee Timecard - Manager can view their sub-ordinate timecard in organogram. With this feature in place, the manger would be able to see the complete attendance details of an employee for the opened month. This has been linked in the organogram for ease of use and control to the manager to be only able to look at details of his/her subordinates.
- OD Approval - While approving OD request manager can view previous day actual punch in/out details within the popup. This will help the manager to take an appropriate action on the OD request, based on previous day swipes, to actually find out the reason for delay to work today, incases of regularizations have been disabled and OD being used alternatively.
- Employee will be able to view their attendance details in cases of FnF Initiated and FnF process statuses, which has been incorporated now.

Payroll Cockpit

- Packet wise Payslips Generation - Payslip Generation screen is enabled with packets. We can define packet from payroll module itself. With this the generation of payslips can be controlled basis the packet assignment for payroll processing.

Employee Master

- Appointment Letter - Letter Incorporated in Employee Creation screen for hiring of employees which are direct using the employee creation screen. This functionality will enable the organizations, who don't have a full blown recruitment process to print the appointment letter by simple creating an employee using the employee master, including the salary details.

Reports

- Report Section - More user friendly UI incorporated in reports screen so that user can easily filter all the reports on desired attributes and other details like status, from/to date and download it as per requirement.

• **Limitations**

- No specific limitations are there with reference to current feature releases.
