1.Choose the Start time,start action,time interval and the action for it.Please click OK when all is set up.

2.Take this as an example.The cycle time is set as 10 minutes,and the switch is supposed to be turned off after 5 minutes of the starting time,which is at 10:09 a.m.

3.In this 10-minute cycle,the switch is supposed to be turned on again 5 minutes later,that is 10:14.
