Fixes:..... 4

Features

This release aims at making the end user self-sufficient to configure the system as needed and seamlessly use the features & functionalities. It focuses on the end user experience for ease of usage and simplicity in work flows.

These features have been tested on the following browsers.

- GoogleChrome
- MozillaFirefox

Leave & TNA:

- **Regularization Application** – We have come up with new rule which restricts the user while applying regularization request when no single swipe is available in system. The rule has been introduced in Regularization/Outdoor Setup which is available in Setup Circle --> Time & Attendance.
- **Timecard** – Time card option will give the addition functionality of showcasing the summarize data of attendance as per the attendance period selection. By toggling the (+) sign on section of "Employee Attendance Details", we are able to showcase the summarize attendance data.

Recruitment:

- **Candidate Application Form** - We have introduced one more field in candidate application form as Nationality.
- **Candidate wise TAT Report** - We have come up with three more additional columns in named as 'Resignation Date', 'Type', 'Replacer E. Code'.

ELC:

- **Validation on Checklist Attribute Changes:** This is a new enhancement in system which restricts user from changing the checklist attribute setup if any transaction is available in system whether it is approved **or** pending (**or if** checklist is triggered with an existing checklist attribute setup).

Fixes:

We identified a few fixes that were needed to strengthen the product functionality. We have incorporated the below list of fixes along with this release.

- ***Bulk Letter Generation at Offer Letter*** – Previously even after selecting Bulk Letter Generation button, letters was not generated. Now we are able to generate the bulk letters at offer letter stage.
- ***Modification in content of IJP email notification*** – We have modified the content of IJP email notification as there were few spelling mistakes.
- ***Checklist Notification*** – Previously there were multiple email were used to send to checklist verifier bucket against single candidate. The same has been fixed and now system will trigger a single email.
- ***Toggling of Salary Range*** – Previously, while creating requisition the selected salary range was used to set to zero which has been fixed now. Now system shows the values as per the selection /toggling done for salary range,
- ***Page Optimization*** – Page optimization is done for Planning & Budgeting, Talent & Acquisition.
- ***BGV Notification*** – Previously dismiss functionality of BGV notification was not working, now the functionality has been made workable to BGV verifier.
- ***Define Salary Range in Comp & Benefit*** – Previously we were not used to set the salary in figure of thousands. We were able to do it for figure of lacs. Now we can set for figures of thousand as well.
