Features 3

Base ESS: 3

Claim: 3

Features

This release aims at making the end user self-sufficient to configure the system as needed and seamlessly use the features & functionalities. It focuses on the end user experience for ease of usage and simplicity in work flows.

These features have been tested on the following browsers.

- GoogleChrome
- MozillaFirefox

Base ESS:

- **Notification** - *We have come up with new user interface with additional feature of notification count which will be displayed based on Calendar year or financial year pattern or Custom Pattern. Based on selected pattern, user will able to get the notification count in tabs. Also user will able view the active attendance cycle.*

Claim:

- **LTA Claim Application** - *We have come up with new functionality of "Return to Employee" button.
This functionality/button is applicable on approver form.
Using this option, approver will revert the claim to an employee for editing.
Any level of approval can have access to take action of return to employee.
Return transaction will be displayed in draft/pending section under transaction history for employee login.
Employee will able to re- apply with revised changes for that transaction.
If the LTA transaction is pending then employee will not able to reapply the same till current transaction is closed based on configuration.
Approver will able ot view the history of remark in comment section of preceeding approver.
Now an employee will able to add remark and it will be visible to approver.*
