Features	3
Payroll	3
Fixes:	5

Features

This release aims at making the end user self-sufficient to configure the system as needed and seamlessly use the features & functionalities. It focuses on the end user experience for ease of usage and simplicity in work flows.

These features have been tested on the following browsers.

- GoogleChrome
- MozillaFirefox

Payroll:

- **Maker/Checker-** This is feature enhancement where validation is added on Payroll Setting Page as maker can not be a checker1, checker2.

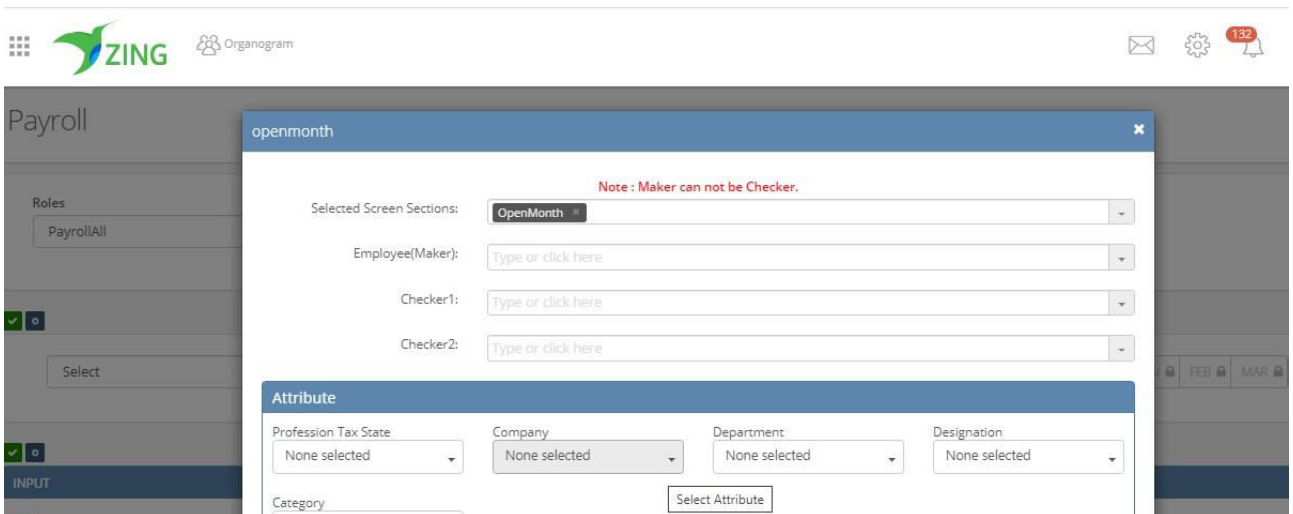

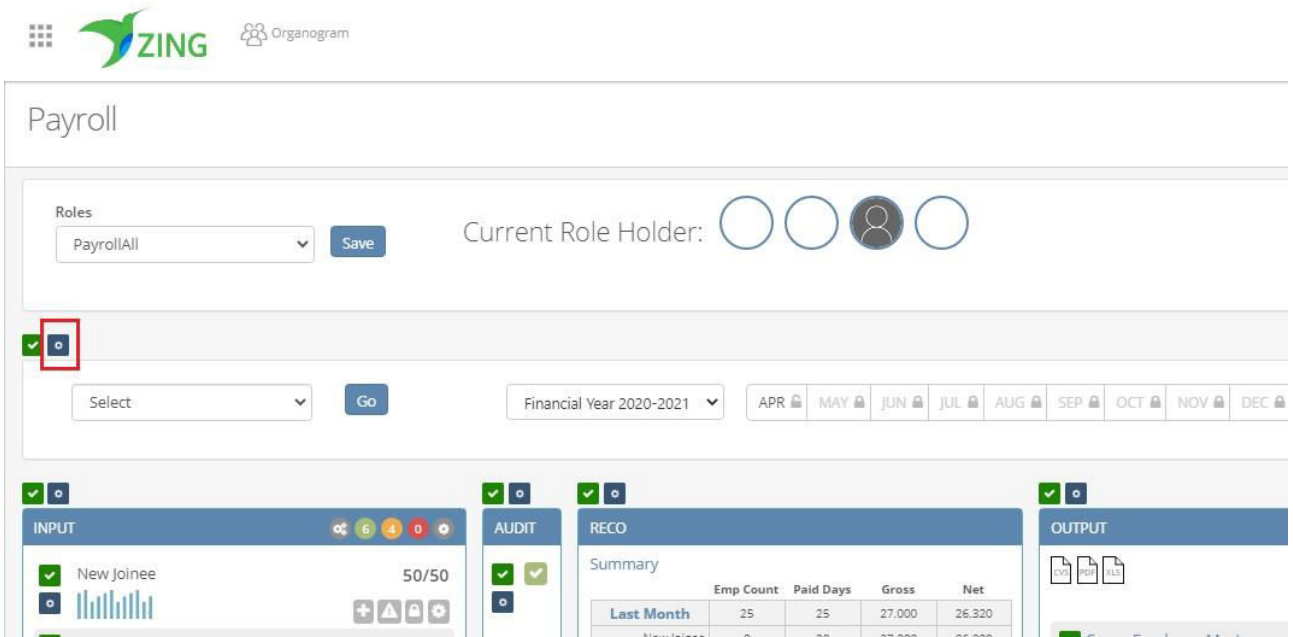

The provision of making the uniqueness in Maker and Checker employee are as below:

1. Two different user interfaces are available for maker and checker role. **If** maker and checker are same **then** when the batch file is available for approval in checker login then user interface or screen used to displayed as Maker.

2. Maker role is used for File Upload whereas Checker role is used for Batch Approval. **If** maker and checker are same **then** when the batch file is available for approval in checker login then checker employee was used to get the access of file upload (Edit and Upload). So this feature keeps the data accuracy and security.

Refer below steps to check on same :

Login -> Setup Circle-> Payroll & Compliance -> Click on Setting Icon

Fixes:

We identified a few fixes that were needed to strengthen the product functionality. We have incorporated the below list of fixes along with this release.

- **Batch File Visibility** - *In Previous, when checker approves the batch, maker was not able to view the batch in their login. Now the same is fixed. When checker approves the batch the checker will able to get/view the batch file for further processing.*
