Features

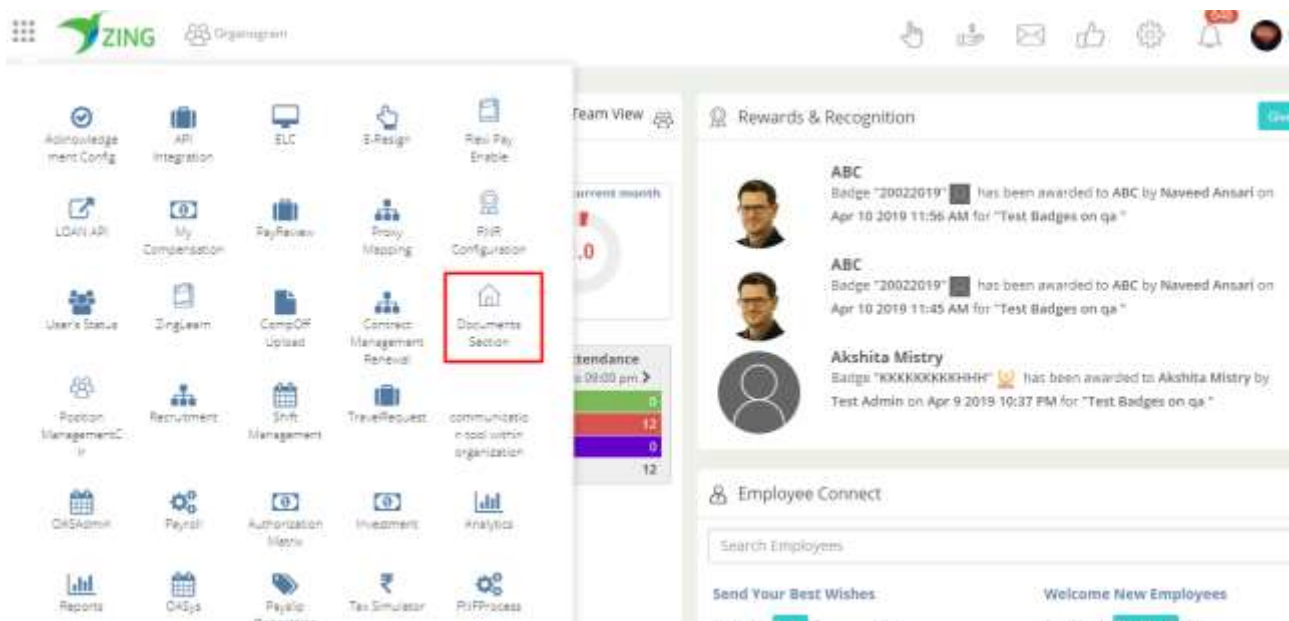

This release aims at making the end user self-sufficient to configure the system as needed and seamlessly use the features & functionalities. It focuses on the end user experience for ease of usage and simplicity in work flows.

These features have been tested on the following browsers.

- GoogleChrome
- MozillaFirefox

BASE ESS:

Document Section - We have renamed the menu named **Document Upload** in Menu option with **Document Section**. Overall Functionality same as previous.

ELC:

Confirmation Assessment Report – This is a new enhancement. Now user will able to get the report for Confirmation Assessment in Report Gallery.

Checklist Notification Description –This is a feature extension. Previously users were used to get the Checklist Approval notifications without the action date details. Now the visibility of same is provided on notification description.

Checklist Email Trigger–This is a new feature enhancement. Previously, checklist approval email were used to send/triggered only if the checklist initiation setup is kept on ' **Manager**' basis. Now email will also be triggered if the checklist initiation setup is kept on ' **Days**' basis

Report Gallery:

CTC Latest Monthly Report / CTC Latest Yearly Report – We have extended the functionality of two reports i.e. ' **CTC Latest Monthly**' and ' **CTC Latest Yearly**' with the additional columns of all attribute. Now report will be generated with attribute details.

Machine Raw Punch Report – We have extended the functionality of two reports i.e. ' **Machine Raw Punch Report**' with the additional columns of all attribute. Now report will be generated with attribute details.

Employee Master API:

Employee Master API – In Employee Master API, we have added three new fields under Response :

1. Marital Status
2. Date of Marriage
3. Personal Email API Name
