

Manage payments with ease

Dex is a cloud-based platform that helps you manage all your payment data in one place.

As your organization grows, you can keep adding payment platforms and watch your portals and passwords pile up. Or you can just use Dex to manage your payment operations, all from a single, cloud-based platform. Dex streamlines time-consuming payments tasks, gives you real-time transaction monitoring and much more.

OPERATIONAL EFFICIENCY

Gain complete control over the payment operations that matter to you.

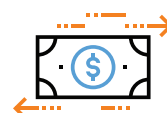

Manage transaction lifecycle

Initiate one-time or recurring transactions. View and handle voids, reversals, refunds and more.

Verify funding

Easily view or search for funding details and view related transactions.

Disputes management

Manage the full lifecycle of disputes: view, respond, track and upload documentation.

A sleek user experience for both merchants and partners

Dex provides insight into your organization's:

- ✓ **Permissions**
Grant role-based permissions on an individual basis within your organization.
- ✓ **Notifications**
Subscribe to event alerts and create custom notifications messages.
- ✓ **Ultimate mobility**
Dex's responsive design enables the same user experience across browsers and devices.

The screenshot shows the Dex web application interface. A sidebar on the left contains navigation options: Home, Transactions, Funding, Customers, Schedules, Disputes, Organizations, Locations, Manage, Merchant Application, Developer, and My Tickets. The main content area displays a 'Transactions' table for 'Five Tool Utility' (M 36783). The table has columns for Status, Customer, Order Info, Amount, Method, and Auth. Callouts highlight 'Sales Performance' (a bar chart icon), 'Payment Methods' (a document icon), and 'Settled Transactions' (a checkmark icon). The table shows transactions from January 2nd to 6th, with amounts of \$250.00 and methods like VISA and Sale.

CONVENIENCE

Smart tools at your fingertips—anywhere, on any device.

Robust reporting

Transaction data grid and funding records provide real-time reporting to inform operations.

Customer profiles

Oversee customer data with access to contact information, payment details and payment schedules.

API credentials

Create, edit, suspend, activate or delete API credentials as needed.

Integrate payments and data with in-house software using [Forte's Web Services \(APIs\)](#). Access all the benefits of Dex, along with developer documentation hosted on the Forte website.
