

SPS Commerce has been pioneering retail automation since 2001. Trusted by more than 80,000 organisations worldwide and with more than 350,000 users in 60 countries, SPS ranked as the #1 EDI software solution for 2019 on Capterra.com. The SPS platform is pre-wired to thousands of the world's biggest retailers and vendors, so you get connected to your trading partners with blazing speed.

## How will the EDI solution be implemented?

[\[back to top\]](#)

SPS Commerce will provide an EDI solution that meets a customer's needs. It will provide the end-to-end EDI solution, from implementation to support. It will handle the mapping and translation of data in each and every document that goes into and out of the EDI system.

SPS Commerce will ensure that the EDI solution integrates with any system you may want to connect to in the future.

To illustrate, during pick/pack and ship, a... includes every single field from... the collected data, SPS Co... and other relevant documents, if any, will be... system, ensuring that the order... connectivity between your system and your partner's system.
