

CUSTOMISED PORTAL GUI

IAM Cloud provides two options for branding the graphical user interface (GUI) of the 'Login' portal. Our base package customers receive our co-branded Portal, whereas customers with our Advanced Access Add-On are upgraded to a fully custom version.

Co-branded Portal GUI

Our co-branded Portal allows customisation of colours, background image, and allows the customer to add their logo. The portal screen will also display the IAM Cloud logo, or in the case where an accredited IAM Cloud Partner has aided implementation, it will display their company logo instead of IAM Cloud's.

Fully customised Portal GUI

The fully customised Portal allows customers to create their login portal exactly as they wish, with custom colours, custom branding, custom HTML and CSS - and no IAM Cloud or IAM Cloud Partner logos anywhere.
